severity 197
symptoms 197
treatment 199–202
types 196
aura see migraine, aura
autogenic training 52
awareness 24, 84, 86, 121, 248, see also mindfulness, awareness
breathing 84, 90–92, 285
mindfulness 5, 13–14, 17, 19, 144
overbreathing 90–92
skin conductance (SC) 169
surface electromyography (sEMG) 121, 139, 140, 144, 146, 155
temperature 160
B
band-pass filter
deactivation training 148
dynamic training 152
isolation of target muscle activity 142
left/right equilibration training 151
minimal tension recognition 146
relaxation-based downtraining 143
surface electromyography (sEMG) 124–125
tension discrimination training 146
tension recognition training 144
threshold-based downtraining/uptraining 150
upper trapezius assessment 129
working-at-the-computer assessment 136–137
baroreceptor 100, 101, 225, 229
baroreflex 101–102, 106, 227
beat-to-beat interval see R-R interval
behavior, learned 76
beta adrenergic theory of asthma 198
bicarbonate (HCO₃⁻) 69, 72, 73
biofeedback
contraindications for 35
definition 24
do’s and don’ts 21
goals 24
integrating mindfulness 8–21
mindfulness, application 5–6
modalities 25
myths 35
obstacles to success 5, 19–20
session scheduling 27

low back pain 263–265
major depressive disorder (MDD) 278
migraine 211
panic disorder 178
posttraumatic stress disorder (PTSD) 189
biofeedback efficacy (cont’d)
Raynaud’s disease 246
temporomandibular joint disorder (TMJD) 257
tension-type headache 220
biofeedback efficacy, guidelines for evaluation 60–63
biofeedback equipment
breathing 79–80
capnometer see capnometer
professional/large scale 29, 80
small scale 30, 80
blood pressure 100
client log 320
physiology 224–226
regulation 225
blood-injection-injury (BII) phobia 192
Bohr effect 69
breathing
assessment 78–84
awareness 84, 90–92, 285
balloon imagery 88
client log 306, 308
control 75
deep see deep breathing
drive see breathing reflex
dysfunctional 70, 75
effort 75
effortless 88
low and slow 77, 87–89
pacer 90
pattern 82
physiology 67–78
physiology, normal 69–70
physiology, overbreathing 70–74
rate see breathing rate
shortness of breath 74, 76, 89, 175, 176, 197, 270
training 84–93
breathing assessment
interpretation 82–85
protocol 80–82
Breathing Interview Checklist 78, 94–96
breathing rate 45, 75, 78, 80, 82, 90, see also resonance frequency breathing rate
breathing reflex 68, 69, 70, 75, 87, 92
breathing relaxation exercise 49
breathing training
protocol 86–93
surface electromyography (sEMG) 153
troubleshooting 89
C
cancer pain 272
capnometer 30, 79
carbon dioxide (CO₂) see CO₂
cardiac cycle 98
cardiac output 225
cardiac physiology 97–98
cation 72
cerebral palsy 272
chronic low back pain see low back pain
chronic pain 262, see also pain
low back see low back pain
classical conditioning 76
client log
asthma symptom 317
blood pressure monitoring and skill practice 320
breathing awareness 306
breathing practice 308
chronic back pain 324
chronic pain (general) 325
cold/emotion challenge training 312
dyspnea awareness 304
finger temperature 305
general anxiety symptom 315
general symptom 313
hand warming practice 311
heart rate variability resonance frequency breathing practice 309
irritable bowel syndrome (IBS) symptom 321
jaw pain 323
meditation practice 307
migraine headache 318
minimal muscle tension awareness 303
muscle tension recognition/discrimination 302
panic attack 314
posttraumatic stress disorder (PTSD) symptom 316
Raynaud’s disease symptom 322
Index

329

stressful events 301
surface electromyography (sEMG) practice 310
tension headache 319
CO₂ function 68
cognitive-behavioral therapy (CBT) generalized anxiety disorder (GAD) 184
irritable bowel syndrome (IBS) 238
migraine 209
panic disorder 177
posttraumatic stress disorder (PTSD) 189
temporomandibular joint disorder (TMJD) 257
tension-type headache 220
complex regional pain syndrome (CRPS) 272
concentration practice see mindfulness, concentration practice
conditioning classical (Pavlovian) 76
operant (instrumental) 76
control breathing 75
example 1
futile effort 8, 9, 10, 11
cortical spreading depression (CSD) 208

D
deactivation training 147–149
deep breathing 68, 75–76, 77–78, 83, 178, 192
depression see major depressive disorder (MDD)
describing see mindfulness, components of
diabetes 279–280
drive to breathe see breathing reflex
driving phobia 192
dynamic training 151–153
dyspnea see breathing, shortness of dyspneon
assessment 129, 133, 136
attention effort 121
bracing effort 120
definition 120
demonstration 121
examples 121
performing effort 120
representing effort 121
temporomandibular joint disorder (TMJD) 252

E
eccrine sweat gland 165
ECG see electrocardiogram
electrocardiogram (ECG) 98
electrodermal response (EDR) see skin conductance (SC)
electrolytes 72
electromyography (EMG) see surface electromyography (sEMG)
EMG see surface electromyography (sEMG)
emotion suppression 9
endometriosis 272
end-tidal pCO₂ 45, 79, 80, 84, 174, 178, 192, 200, 265
enteric nervous system (ENS) 235
equilibration training see left/right equilibration training
ergonomic considerations 153–154
etiology asthma 198–199
generalized anxiety disorder (GAD) 181–182
irritable bowel syndrome (IBS) 235–237
major depressive disorder (MDD) 277
panic disorder 173–175
posttraumatic stress disorder (PTSD) 187
temporomandibular joint disorder (TMJD) 251–252

tension discrimination training 145–146
tension recognition training 144–145
tension-type headache
assessment 217–219
biofeedback efficacy 220
client log 319
cognitive-behavioral therapy (CBT) 220
medication 219
physiology 216–217
protocol 220–222
script 221
sensor placement 218
symptoms 215–216
treatment 219–222
triggers 216
thermal biofeedback see temperature
thought suppression 9
threshold-based downtraining/uptraining 149–150
tidal volume 78
TMD see temporomandibular joint disorder (TMJD)
TMJD see temporomandibular joint disorder (TMJD)
toe temperature, norm 45
tonic level see skin conductance level (SCL)
total peripheral resistance 225
training
70–30 rule 162
breathing see breathing, training
deactivation training 147–149
dynamic training 151–153
isolation of target muscle activity 141–142
left/right equilibration training 151
minimal tension recognition 146–147
relaxation-based downtraining 142–144
resonance frequency breathing rate 110–113
skin conductance (SC) 169–171
surface electromyography (sEMG) 141–155
temperature 159–163
tension discrimination training 145–146
tension recognition training 144–145
threshold-based downtraining/uptraining 149–150
treatment
arthritis 280–281
asthma 199–202
diabetes 279–280
fibromyalgia 270
functional chest pain (FCP) 271
generalized anxiety disorder (GAD) 183–186
heart disease 278
hypertension 228–232
insomnia 281
irritable bowel syndrome (IBS) 237–240
major depressive disorder (MDD) 278
migraine 209–214
panic disorder 177–181
Index

posttraumatic stress disorder (PTSD) 188–191
Raynaud’s disease 245–248
temporomandibular joint disorder (TMJD) 256–260
Tension-type headache 219–222
treatment planning
goals 57
order of focus 63
template 65–66
using empirical evidence 60–63
using stress-profile 57–60
treatment rationale 26
troubleshooting
breathing training 89
with mindfulness 19–20

U
upper trapezius assessment
band-pass filter 129
interpretation 132–133

V
vagus nerve 101

W
working-at-the-computer assessment
band-pass filter 136–137
interpretation 138–140
protocol 137–138
sensor placement 136–137

Y
yawning 78
