1. **The Bobath Concept: Developments and Current Theoretical Underpinning**
   *Sue Raine* 1
   - Introduction 1
   - The founders and development of the Bobath Concept 1
   - Current theory underpinning the Bobath Concept 3
   - Systems approach to motor control 4
   - Clinical application of the theory underpinning the Bobath Concept 11
   - Summary 16
   - References 17

2. **An Understanding of Functional Movement as a Basis for Clinical Reasoning**
   *Linzi Meadows and Jenny Williams* 23
   - Introduction 23
   - Normal movement versus efficient movement 24
   - Compensatory strategies 25
   - Motor control and motor learning 26
   - Requirements of efficient movement 31
   - Summary 37
   - References 39

3. **Assessment and Clinical Reasoning in the Bobath Concept**
   *Paul Johnson* 43
   - Introduction 43
   - Models of clinical reasoning and the Bobath Concept 45
   - Key characteristics of assessment using the Bobath Concept 47
Contents

Basis for clinical reasoning 52
Illustrating clinical reasoning using the Bobath Concept 53
Summary 57
References 61

4. Practice Evaluation 64
Helen Lindfield and Debbie Strang

Introduction 64
Evaluation in the context of the International Classification of Function, Disability and Health 65
Factors influencing measurement selection 66
Measurement properties 68
Measures 70
Summary 78
References 79

5. Moving Between Sitting and Standing 83
Lynne Fletcher, Catherine Cornall and Sue Armstrong

Introduction 83
Clinical considerations from the literature 84
Phases of sit to stand 86
Movements from standing to sitting 89
Effects of ageing 92
Sit to walk 93
Clinical aspects 93
Movement in functional contexts 95
Clinical example 98
References 114

6. The Control of Locomotion 117
Ann Holland and Mary Lynch-Ellerington

Introduction 117
Key aspects of bipedalism 117
The gait cycle 122
Use of body weight support treadmill training in the Bobath Concept 127
Assistive devices 129
Outcome measures 147
Summary 149
References 149

7. Recovery of Upper Limb Function 154
Janice Champion, Christine Barber and Mary Lynch-Ellerington

Introduction 154
The importance of postural control in upper limb function 155
