Foreword xi

Contributors xiii

1 Changing epidemiology of obesity – implications for diabetes 1
   Jonathan Webber
   1.1 Introduction 1
   1.2 Assessment of obesity in epidemiological studies 1
   1.3 Prevalence of obesity 2
   1.4 The epidemiological link between obesity and diabetes 3
   1.5 Factors modifying the relationship between obesity and diabetes 5
   1.6 Early life influences on obesity and diabetes 8
   1.7 Conclusions 9
   References 9

2 The genetics of human obesity 13
   Victor J. Lawrence and Tahseen A. Chowdhury
   2.1 Introduction 13
   2.2 Why has the genetics of obesity been difficult to study? 14
   2.3 How much of obesity is genetic? 15
   2.4 Is there a major gene for obesity? 17
   2.5 How to identify obesity genes 18
   2.6 Summary and conclusions 28
   References 28

3 Lifestyle determinants of obesity 31
   Laura Johnson and Susan A. Jebb
   3.1 The importance of energy balance 31
   3.2 Physical activity 32
13.3 Scope of the chapter 250
13.4 Pathogenetic mechanisms underlying the relationship between obesity and PCOS 250
13.5 Clinical features of obese PCOS women 256
13.6 Treatment of obese women with PCOS 260
13.7 Conclusions 264
References 264

14 Management of diabesity in primary care: a multidisciplinary approach 273
Ian W. Campbell

14.1 Prevalence of obesity in primary care 273
14.2 Current approach to diabetes care in primary care 274
14.3 Early treatment with hypoglycaemic agents 274
14.4 Integrating obesity management with diabetes 275
14.5 A multidisciplinary approach 275
14.6 Dietary treatment of diabetes 275
14.7 Clinical assessment 277
14.8 Treatment groups 277
14.9 Physical activity 279
14.10 Behavioural change 280
14.11 Use of medication to aid weight loss in primary care 281
14.12 Summary 282
References 282

15 Obesity and employment 285
Nerys Williams

15.1 Introduction 285
15.2 Obesity, health and work 285
15.3 Effect of work on health 286
15.4 Shift work 287
15.5 Work and response to treatment 287
15.6 Effect of health on work 287
15.7 Sickness absence and short-term disability 288
15.8 Disability pensions 289
15.9 Is it reversible? 289
15.10 Accidents 289
15.11 Fitness for work and ergonomics 290
15.12 Medical standards 291
15.13 Rehabilitation 291
15.14 Stigma and discrimination 292
15.15 Health promotion 294
References 295
16 Obesity in different ethnic groups

Ponnusamy Saravanan, George Valsamakis and Sudhesh Kumar

16.1 Introduction – obesity and adiposity
16.2 Prevalence of obesity and its relationship with metabolic risk in various ethnic sub-groups
16.3 Conclusion
