AdoMet synthetase 179, 190
adrenaline 147
age-related cognitive decline 30, 32, 127, 228
age-related macular degeneration (AMD) 6, 29–30
and carotenoid intake 89, 95, 96
aglycones
flavonoids 113, 123
isoflavones 124, 208, 210, 219
alcoholic beverages
lignans in 207
see also beer; cider; wine
alfalfa 205, 236
algae
carotenoids 90
LC-PUFA synthesis 74
methionine synthase 179
almonds 15, 160
α-carotene 91, 92
bioabsorption 97
dietary sources 8, 93, 94
vitamin A precursor 95
α-linolenic acid 69, 69, 73, 74
aluminum concentrations in humans and plants 256, 258
Alzheimer’s disease 30, 190, 228
see also age-related cognitive decline
amylopectin 55–6, 57
amylose 55–6, 57, 58
anaemia
folate deficiency 173, 190
iron deficiency 259
anencephaly 190
angiogenesis inhibitors 127, 217, 219, 232, 233
anthexanthin 92, 96
anthocyanidins
biosynthesis 119, 120
dietary sources 8
structure 114
anthocyanins
cardiovascular health 19
dietary sources 122, 123
antioxidant action 8, 9, 20, 32
antioxidants 39
carotenoids 95, 96
health effects
cancer prevention 29, 218
cardiovascular health 17–18
eye disorders 30
isoflavonoids 218, 222–5
polyphenols 124, 128–30
supplementation 17, 18, 20
vitamin C 147
vitamin E 157–8, 164–6
ApoE4 carriers 30
apples
flavonoids 122, 122, 123
folates 193
health effects
cardiovascular health 10, 19
respiratory health 31
phenolic acids 121, 122
plant composition 53
resveratrol 206
stilbenes 233
vitamin C 148
apricots
carotenoids 94
flavonoids 122, 123
folates 193
Arabidopsis 162, 163
folates 185, 187, 196
mineral concentrations 260
arabinosylans 59
arachidonic acid (AA) 74
archaeological evidence of diets 1–5
arsenic concentrations in humans and plants 257, 258
artichokes 2–3
L-ascorbate 146–7
antioxidant properties 152
biosynthesis 149–51, 149, 151
functions in plants 152–4
manipulation in plants 154–5
turnover rate 151, 152
see also vitamin C
ascorbic acid 24, 130, 146, 147
see also vitamin C
astaxanthin 90
asthma see chronic obstructive pulmonary disease (COPD)
atherosclerosis
antioxidant hypothesis 8, 20, 222
isoflavones intake 221, 225
polyphenols intake 127, 133
sitosterolaemia intake 82
see also cardiovascular health
aubergines
anthocyanins 122, 123
fatty acid composition 77
avocados
carotenoids 94
fatty acid composition 78
folates 193
lipid content 76
bacteriological synthesis of LC-PUFAs 74
baker’s yeast see yeast
bananas
carotenoids 94
folates 193
plant composition 53
barley
folates 193
lipid content 76
tocochromanols 162
beans see legumes
beer
folates 193
isoflavones 206
prenylflavonoids 231
beetroot, minerals in 265
benzoic acid biosynthesis 115, 116, 118, 119
berries see soft fruits
β-carotene 32
bioabsorption 97
bioavailability 98
biosynthesis 91, 92
dietary sources 8, 93, 94
health effects
cancer 26, 27
cardiovascular health 17, 18
sunburn protection 96
levels in fruit and vegetables 93, 94
lipoprotein association 97
vitamin A precursor 95, 99–101
β-cryptoxanthin
bioabsorption 97
dietary sources 93
health effects 96
levels in fruit and vegetables 94
vitamin A precursor 95
β-glucan, blood cholesterol 16, 32
biochanin A 216, 220
biofortification
folates 195–6
minerals concentration 261, 263, 264, 265
birth defects, folate deficiency 190
blackberries
polyphenols 122
vitamin E 160
blackcurrants
polyphenols 122
vitamin C 148
bladder cancer 23, 24
blood cholesterol 13, 32
β-glucan intake 16, 32
cereals consumption 16
derivation 52–3
dietary fibre 16, 67
fatty acids intake 79
isoflavonoids intake 220–1
phytosterols and phytostanols intake 20, 32, 80, 82
synthesis 8
see also lipoproteins
blood pressure see hypertension
blueberries
- age-related cognitive effects 32, 228
- polyphenols 122
- stilbenes 233
- vitamin C 152
bone health 31

see also osteoporosis
borage 73, 74
boron concentrations in humans and plants 256, 260
brassica
- cancer protection 28
- cardiovascular health 11
- fatty acids 72
- mineral concentrations 260, 262, 262, 263

see also broccoli; brussels sprouts
Brazil nuts, selenium in 259
bread
- consumption trends 36, 37, 37
- folates 193
- isoflavones 207
- vitamin E 160
breakfast cereals
- consumption trends 36, 37, 37
- folates 193
- vitamin C 148
breast cancer
- folate intake 27, 190
- fruit and vegetable consumption 21, 23, 24, 25
- isoflavonoids intake 28, 211–20
- lignans intake 230
- miroestrol intake 235
- prenylflavonoids intake 232
- stilbenes intake 234
British Nutrition Foundation 5
broccoli
- carotenoids 94
- flavonols 122, 122
- folates 193
- health effects
  - cancer protection 28
  - cardiovascular health 19
  - eye disorders 30
- mineral concentrations 260, 265, 267
bronchitis see chronic obstructive pulmonary disease (COPD)
brussels sprouts
- cancer protection 28
- vitamin C 148
cabbage
- anthocyanins 122
- cancer protection 28
- fatty acid composition 77
- vitamin C 148

see also broccoli; brussels sprouts
cadmium concentrations in humans and plants 256, 258
caffeic acid 121
calabrese see broccoli
calcium
- bone health 31

tomatoes  
cancer protection  95–6  
carotenoids  93, 94, 95  
effect on platelet aggregation  32  
flavonoids  122, 123  
folates  185, 193, 196  
vitamin C  5, 148, 155  
vitamin E  160–1  
see also aubergines; sweet peppers  
Total Diet Survey, isoflavones  206–7  
trans fatty acids  68  
transgenic plants  
folates manipulation  183, 196  
phytoestrogens manipulation  205–6, 233  
plant lipids manipulation  73–4, 75–6  
vitamin C manipulation  154–5  
vitamin E manipulation  162–4  
tree fruits  3, 7, 8  
see also apples; apricots; cherries; citrus  
fruit; mangoes; olives; papayas; peaches;  
pears; pineapples; plums  
triacylglycerols (TAG)  52, 70, 72  
type 2 diabetes  29  
carotenoids intake  95  
cereals consumption  35  
dietary fibre  67  
fruit and vegetables consumption  33  
ultraviolet protection, carotenoids  89,  
95, 96  
United Kingdom  
consumption patterns  35–9, 36, 37, 38  
intervention schemes  33, 34, 35  
recommended daily intakes  33, 35, 65  
United States  
consumption patterns  36  
intervention schemes  33, 34, 35  
recommended daily intakes  33, 35  
unsaturated fatty acids  68, 74–6  
see also polyunsaturated fatty acids (PUFA)  
UV protection, carotenoids  89, 95, 96  
VAD (vitamin A deficiency)  101  
vegetable oils  77  
see also seed oils  
vegetables  3  
carotenoids  94  
consumption patterns  35–9, 38  
consumption trends  36, 37, 37  
fatty acid composition  76–7  
folates  193, 194  
health effects  
age-related cognitive performance  30  
bone health  31  
cancer protection  21–5, 22–3, 24,  
28–9  
cardiovascular health  9–13  
eye disorders  30  
respiratory health  31  
type 2 diabetes  29  
isoflavones  207  
plant constituents  7–8  
vitamin C  148  
see also cabbage; onions; root crops; salad  
vegetables; tomatoes  
vegetarians and CHD  12  
violetaxanthin  92, 93, 96  
vitamin A, carotenoids  89, 95, 97, 99–101  
vitamin A deficiency (VAD)  101  
vitamin B, coronary heart disease (CHD)  20  
vitamin B5 see pantothenate synthesis  
vitamin B6, dietary sources  7  
vitamin B9 see folates
vitamin C 146–56
absorption and transport in mammals 155–6
antioxidant properties 147
biosynthesis and metabolism in plants 148–52, 149, 151
dietary sources 7, 147–8, 148
health effects 8
cancer protection 27
cardiovascular health 11, 17
eye disorders 30
respiratory health 31
interaction with vitamin E 165
storage losses 148, 151, 152, 154
see also ascorbate
vitamin E 156–8
absorption and transport in mammals 164
antioxidant properties 157–8, 164–6
biosynthesis 159–61
dietary sources 7, 159, 160
health effects 8
cancer protection 27
cardiovascular health 17, 18
type 2 diabetes 29
interaction with vitamin C and selenium 165
storage losses 159
wholegrains 66
see also tocochromanols
vitamin K, dietary sources 7
vitamin supplements see dietary supplements

walnuts 15, 32
watermelon
carotenoids 94
vitamin C 152
weight management 33
