Index

A
Abandoned coal mine lands, 132, 133
Abandoned Mine Land (AML) tax fund, 130, 132, 133
Abandoned wells:
  environmental impact of, 59
  environmental threats from, 48–53, 62
  identifying status of, 235–236
  leakage of sequestered CO₂ through, 56, 57, 231
  locating/handling, 52–54
  in the United States, 51–54
Abandonment, of offshore oil and gas platforms, 37–39
Abandonment plan, 37
ABB Lummus Crest Inc., 273
ABB Lummus Crest Power Plant (Trona, California), 269–270, 273–274
Absorption, for CO₂ capture, 266, 271
Accidents, environmental damage from, 3
Accidental oil spills, 173. See also Oil spills
Acetic acid, 23
Acid gases, in Selexol process, 267, 273
Acidizing, well stimulation by, 22–23
Acrylic polymers, as gelling agent, 23
Activated potassium carbonate process, 269
Adsorption processes, for CO₂ capture and removal, 266, 271
Age of Oil, 58
Aggregation, of oil spills, 189
Agro-toxins, 26
Air (atmosphere):
  concentration of CO₂ in, 229, 232
  leakage of sequestered CO₂ into, 229, 230
Air (atmospheric) pollution:
  from petroleum, 14–15, 17
  from plugged wells, 50
  from shipping emissions, 164
  from ships at berth, 144, 164–169
  from stored CO₂ leakage, 55, 56
  and Wilmington oil field, 44, 47
Alberta, oil sands operations in, 103, 117–124
Alcohols, as gelling agents, 23
Aldehydes, 22
Aliphatic hydrocarbons, as gelling agent, 23
Alkalibenzines, 26
Alkyl amines, in acidizing wells, 23
Alkyl phosphonates, in acidizing wells, 23
Alkyl sulfonates, in acidizing wells, 23
Allothermic coal gasification, 246
American Petroleum Institute (API), 29
Amines, as gelling agent, 23
Amine acetate salts, 22
Amine scrubbing, for coal-fired power plants with CO₂ capture, 282
AML tax fund, see Abandoned Mine Land tax fund
Ammonium bisulfate, 22
Angola, oil spill in, 179
Annular injection of solid wastes, 33
Annular seals, integrity of, 31–32, 50
Anthropogenic CO₂ release, 28–29
Anthropogenic greenhouse gases, 208
Anthropogenic petroleum pollution, 13, 15
API (American Petroleum Institute), 29
Appalachia, coal mining in, 129
Applicant/Violator System (AVS), 131–132
Aquicludes, 211–212
Aquifers:
   CO₂ storage in, 54, 210, 212. See also Carbon dioxide sequestration
defined, 211
geology of, 211–212
storage capacity of, 217–219
Aquitards, 211, 212
Aromatic hydrocarbons, toxicity of, 194
Artificial drilling islands, 44, 45, 47, 48
Asia, coal gasification in, 258
ATB, see Atmospheric-topped bitumen
Atmosphere, see Air
Atmospheric pollution, see Air pollution
Atmospheric-topped bitumen (ATB), 111, 114
Australia, coal gasification in, 258
Automatic shut-off valves, at Wilmington oil field (California), 48
Autothermic coal gasification, 246
AVS (Applicant/Violator System), 131–132

B
Barriers:
in drilling, 31
in production/injection, 31
Base fluids, in hydraulic fracturing of wells, 23
Battle carbon management electricity model (CMEM), 279
Beaches, oil spill cleanup for, 191
Bingham, Nancy, 128, 140
Biodegradation (oil spills), 189–191
Bioremediation (oil spills), 190–191
Biostimulation (oil spills), 191
Bitumen:
diluted, 110
key properties of, 93
Bitumen extraction, 89–92, 103
energy used in, 88
modeling, 109–110
in oil sands case study, 118–119
by steam-assisted gravity drainage, 91–92, 104, 110–111, 119–120
Bitumen production:
case study of, 117–124
energy availability for, 88
Bitumen recovery levels, 88, 109–110
Bitumen upgrading, 92–97, 103
energy in, 88, 97–102
greenhouse gas emissions from, 122
for marketing, 88
modeling, 103, 111–114
in oil sands case study, 119–120
processes for, 93–97
products of, 93, 94
Black gold, 3, 58
Block valves, in pipelines, 232
Blowouts, see Well blowouts
Blowout preventers (BOPs), 31, 47–48
Booms, for oil spill containment, 191
BOPs, see Blowout preventers
Breakers, in hydraulic fracturing of wells, 24
Brine, from abandoned wells, 51, 52
Brine injection, subsurface, 32
Brundtland Commission, 136
Buffalo Creek, West Virginia, empoundment failure, 128, 129
Burning, for oil spill cleanup, 193
Buzzard’s Bay oil spill, 174

C
CAA (Clean Air Act of 1963), 131
Caddo Pine Island Field (Louisiana), 53, 54
California:
   Cool Water IGCC plant in, 259
   environmentally conscious petroleum engineering in, 42–48
California Department of Conservation, 42–43
Canada, IGCC status in, 259–261
Canary Islands, oil spill in, 179
CANMET Energy Technology Center, 260
Caprock:
   integrity of, 226, 235
   permeability of, 225
Carbon (CO₂) capture and storage (CCS).
   See also Carbon dioxide capture;
   Carbon dioxide sequestration
in electric power generation, 278, 279. See also Carbon mitigation in electric power generation in oil sands operations, 88
Carbon density, of fossil fuels, 34
Carbon mitigation in electric power generation, (continued)
and CO₂ sequestration location, 293
constraints on, 288–295
cost calculation for, 287–288
and cost of electricity, 300–302
and effect of natural gas price on COE, 307–309
effects of strategies for, 299–300
and electricity demand distribution, 302–307
and energy balance/demand satisfaction, 289
and energy balance on capture process, 289
and fuel selection/plant shutdown, 290
illustrative case study, 295–301
logical constraints on, 295
and lower bound on operational constraints, 291–292
models for, 278–281
and plant capacity constraints, 290
and selection of new power plants, 292
superstructure representation, 282–287
and upper bound on operational changes, 290–291
Carbon monoxide, from coal gasification, 246
Carbon sequestration, 210–211. See also Carbon dioxide sequestration
Casing:
corrosion of, 51
pressure testing of, 32
regulations for, 71–79
Casing pipes, 6
corrosion of, 58
regulations related to, 31, 32
Cathodic casing protection system, 51
Caverns:
CO₂ storage in, 210
liquefied hydrocarbon storage in, 221
CBL (cement-bond log) tests, 31
CCS, see Carbon capture and storage
Cement-bond log (CBL) tests, 31
Cementing regulations, 31, 32, 71–79
Cement-plug deterioration, 50
Cement slurry, vibration of, 50
Central tank farms (CTFs), 8
CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act of 1980), 130–131
CFCs (chlorofluorocarbons), 208
CH₄, see Methane
Channeling, 50
Char combustion, in coal gasification, 245
Char gasification, in coal gasification, 245
Chemical absorption systems, for CO₂ capture, 269
Chemical flooding, in petroleum production, 24–25
Chemical injection, environmental impact of, 59
Chemical solvents, for CO₂ capture, 266, 269
China:
carbon consumption in, 127
carbon gasification in, 258
carbon reserves in, 127
environmental impact of coal mining in, 128
Chlorine compounds, 22
Chlorofluorocarbons (CFCs), 208
Christmas tree, 8
Clean Air Act (1963) (CAA), 131
Clean Air Act Amendment (1990), 129
Clean coal technologies, 244
carbon dioxide capture and removal, 264–274
carbon gasification, 243–253
integrated coal gasification fuel cell combined cycle, 263–264
integrated gasification combined cycle, 253–263
Cleanup operations, for accidental oil spills, 181, 190–194
Clean Water Act (1972), 66–67, 131
Climate change, 28–29, 277
CMEM (battle carbon management electricity model), 279
CO₂, see Carbon dioxide
Coal, 127–128, 243
availability of, 253
burning, 244
for electric power generation, 133–134, 253, 264
forecasted increase in use of, 3
integrated approach to use of, 137–139
world consumption of, 127
Coal Association of Canada, 260
Coal combustion, 244
Coal-fired power plants, 133–135, 244, 264, 281, 282
Coal gasification, 243–264
c oal combustion and, 244
commercial processes for, 250–253
defined, 244
fundamental reactions in, 245–246
integrated coal gasification fuel cell combined cycle, 263–264
integrated gasification combined cycle, 253–263
techniques for, 246–250
Coal mining, 127–140
current environmental regulations for, 129–132
environmental achievements in, 132–136
future of, 137–140
historical environmental performance in, 129
issues in, 128
OSM 2006 annual report on, 132
sustainable developmental principles for, 136–137
Coal reserves, 127
COE, See Cost of electricity
Coke, from bitumen upgrading, 95, 112–113
Coke to ammonia gasification project (Kansas), 272–273
Coking processes (bitumen upgrading), 93, 95–96, 112–113
Combined cycle power plants, 314–315
integrated coal gasification fuel cell, 263–264
integrated gasification, 100–102, 134, 135, 244, 253–263
natural gas, 100, 101, 105, 116, 313–333
Commodity flow information, 140
Compaction monitoring instruments, 45–46
Completion of wells, regulations for, 71–79
Comprehensive Environmental Response, Compensation, and Liability Act (1980) (CERCLA), 130–131
Contingency plan, for CO2 sequestration, 236
Conventional oil sands mining, 89–90
Cooling towers, 24–25
Cornwall, England, oil spill, 179
Corrosion:
of casing, 51, 58
of production equipment by produced water, 21–22
Corrosion control, 22
Cost:
of carbon mitigation in electric power generation, 287–288. See also Cost of electricity
of coal vs. natural gas, 243–244
of oil spills, 41
Cost of electricity (COE):
effect of CO2 reduction on, 300–302
incremental cost of CO2 reduction and, 279
and natural gas price, 307–309
Crude oil, 2, 175–176
processing of, 8
products derived from, 176–177
spills of, 175. See also Oil spills
Cryogenic technologies, for CO2 capture and removal, 266, 271–272
CTFs (central tank farms), 8
Curry, William H., 43
Cuttings reinjection, 33, 58, 59

D
Decommissioning, of offshore oil and gas platforms, 36–39
Deep-water dumping, of offshore platforms, 38
Delayed coking process, 95–96
Demand-side management (DSM), 280
Demulsifiers, in acidizing wells, 23
Density, CO₂, 214–216, 220
Derating, 289, 297
Desalination plants, 153
Deterding, Sir Henri Wilhelm
  August, 3
Devolatization, in coal gasification, 245
Dewatering, of drilling fluids, 19–20
Diagenesis, 225–226
Diesel engines, 164
Diesel oil, 2, 19
Directional drilling, in Wilmington oil field, 44
Dispersants, for oil spills, 192
Dispersion, of oil spills, 185, 186, 194
Disposal of offshore platforms, 37–39
Dissolution, of oil spills, 186–188, 194–195, 197, 202–203
Dissolved oxygen, corrosion caused by, 21–22
Dissolved-salt concentrations, in petroleum-polluted water, 16
Diverter additives, in hydraulic fracturing of wells, 24
Down-dip water flow, in CO₂ sequestration projects, 233–234
Downstream petroleum industry, 5
Drake Day, 2
Drilling, petroleum:
  barriers in, 31
  environmental damages from, 17–20
  environmental impact of, 59
  muds used in, 16, 29
  regulations for, 71–79
Drilling fluids:
  damage from and remedies for, 58
  for oil and gas wells, 17, 19–20
  to prevent blowout, 31
  treatment of, 19–20

of oil spill components, 187, 189
of petroleum wastes, 15–16
Trans Alaskan Pipeline System (TAPS), 5
Transportation, of carbon dioxide, 219–220, 232
Transportation sector, petroleum discharges in, 13–14. See also Maritime oil transport
Trinidad and Tobago, oil spill in, 179
Triple bottom line concept, 42
TSA (temperature swing adsorption), 271
Tubing string, 6
Ukraine, environmental impact of coal mining in, 128
Uncertainties analysis, for CO₂ sequestration, 236
UNCLOS (United Nations Convention the Law of the Sea), 37
Underground storage, 54–57, 221. See also Carbon dioxide sequestration
UNFCC (United Nations Framework Convention on Climate Change), 277–278
Union Oil, 43
United Nations Convention the Law of the Sea (UNCLOS), 37
United Nations Framework Convention on Climate Change (UNFCC), 277–278
United States:
abandoned wells in, 51–54
coal consumption in, 127
cal gasification in, 259
cal reserves in, 127
environmental impact of coal mining in, 128
oil spills in, 40–41, 180
pollution abatement expenditures in, 61
worst oil spill in, 178
U.S. Coast Guard Marine Safety Office, 179–180
U.S. Geological Survey, 140
Up-dip water flow, in CO₂ sequestration projects, 233–234
Upstream petroleum industry, 5, 43. See also Exploration and production industry
Urban areas, petroleum pollution from, 14
Uzbekistan, oil spill in, 179

V
Vacuum pumps, for oil spill cleanup, 193
Vacuum-topped bitumen (VTB), 111, 114
Valley Waste Disposal, Inc., 43
Vanadium, 188
Vaporization, of oil spills, 194, 201
Vapor-recovery systems, on oil tanks, 47
Virginia Division of Mines Land Reclamation, 129–130
Viscosity, injection rate and, 225
Visual pollution, Wilmington oil field and, 47
VPSA units, 271
VTB, see Vacuum-topped bitumen
Waiting-on-cement (WOC) time, 31
War, oil disasters in, 27
Wastes:
  from drilling oil and gas wells, 17
  petroleum, 15–16
  produced water from petroleum production, 20–21
  production chemicals from petroleum production, 21–22
  solid, from drilling, 20
  subsurface injection of, 32, 33
  from water and chemical flooding of wells, 24–25
Wastewater disposal, environmental impact of, 59
Water, hydrostatic pressure gradient for, 215. See also Freshwater; Groundwater
Water-based muds (WBMs), 16, 29, 30
Water electrolysis, for hydrogen production, 100
Water flooding:
  for land subsidence control, 46
  in petroleum production, 24–25
Water pollution:
  from oil spills, 152–153, 174. See also Oil spills
  from petroleum, 12–14
  from plugged wells, 50
  and Wilmington oil field, 44, 45, 47
Water vapor, 208
  in CO₂ pipelines, 232
  in cryogenic CO₂ capture systems, 271
WBMs, see Water-based muds
Wells. See also Abandoned wells
  annular seals of, 31
  unplugged, 51–52
  waste from, 17
Well abandonment (offshore), 37
Well blowouts, 17, 19, 31
  damage from and remedies for, 58
  environmental impact of, 59
  preventing, 31
Wellbores, 6
Well-bottom pressure, injection rate and, 223–224
Well-plugging funds, 49
Well stimulation, 22
  by acidizing, 22–23
  by hydraulic fracturing of wells, 23–24
Well testing, environmental impact of, 59
Western Europe, coal gasification in, 258
