Contents

Preface xi

1 Overview 1

1.1 Development of the MedDiet 1

1.1.1 A brief history of the MedDiet 2

1.1.2 The traditional MedDiet and present day MedDiets 2

1.1.3 International differences 6

1.1.4 National representations of the MedDiet 7

1.1.5 Sources of information for the general public 13

1.2 Lifestyle factors 13

1.2.1 Meal patterns 14

1.2.2 Siestas 16

1.2.3 Physical activity 16

1.2.4 Sunshine 16

1.3 Health benefits 16

1.3.1 Mediterranean dietary patterns 17

1.3.2 Endorsements 19

1.4 The MedDiet, past, present and future 19

1.4.1 Current trends 19

1.4.2 The Greek experience 23

1.4.3 Not all bad news 24

1.4.4 Future prospects 25

References 25

SECTION 1: CONSTITUENTS

2 Constituents and Physiological Effects of Mediterranean Plant Foods 31

2.1 Introduction 31

2.2 Carbohydrates 32

2.2.1 Glycaemic index 32

2.2.2 Honey 34

2.2.3 Physiological effects of carbohydrates 35

2.2.4 Fibre 36

2.3 Fats 38

2.4 Organic acids 39

2.5 Minerals 40

2.6 Vitamins 40

2.6.1 Water soluble vitamins 40

2.6.2 Fat soluble vitamins 41

2.7 Phytochemicals 44

5.4 Fruits 114
5.4.1 Citrus fruits 114
5.4.2 Apples and related fruits 118
5.4.3 Stone fruits 120
5.4.4 Grapes 121
5.4.5 Other berries 122
5.4.6 Pomegranates 122
5.4.7 Figs 123
5.4.8 Dates 123
5.4.9 Olives 123
5.5 Herbs and spices 127
5.6 Nuts and seeds 129
5.6.1 Nuts 129
5.6.2 Seeds 132
References 132

6 Olive Oil and Other Fats 137
6.1 Overview 137
6.2 Olive oil 138
6.2.1 Consumption and production 138
6.2.2 Origin and varieties of olive trees 139
6.2.3 Olive oil production 139
6.2.4 Traceability and European regulations 143
6.2.5 Biochemical composition 144
6.3 Other fat sources 147
6.3.1 Nuts and seeds 147
6.3.2 Herbs and spices 148
6.3.3 Meat and dairy 148
6.3.4 Eggs 150
6.3.5 Fish and shellfish 151

SECTION 2: HEALTH EFFECTS

8 Epidemiological Methods 175
8.1 Introduction 175
8.2 Study designs 176
  8.2.1 Descriptive epidemiology 176
  8.2.2 Ecological studies 178
8.3 Analytical epidemiology 178
  8.3.1 Case-control and prospective studies 179
8.4 Intervention studies 180
8.5 Expression and interpretation of data from epidemiological studies 180
8.6 Dietary patterns 181
  8.6.1 A priori dietary patterns 181
  8.6.2 A posteriori dietary patterns 183
8.7 Criteria for judging epidemiological data 184
References 185

9 General Mechanisms for Disease Prevention 187
9.1 Introduction 188
9.2 Methods for studying the effects of nutrients on disease mechanisms 189
  9.2.1 General considerations 189
  9.2.2 In vitro models 190
  9.2.3 Animal models 191
  9.2.4 Human intervention studies 191
9.3 Oxidative stress 192
  9.3.1 What are free radicals? 192
  9.3.2 Production of reactive species 192
  9.3.3 Effects of reactive species 193
  9.3.4 Antioxidant defences 195
  9.3.5 Measuring antioxidant activity 198
  9.3.6 Antioxidant activity in the Mediterranean diet 199
  9.3.7 Limitations of the dietary antioxidant theory 204
9.4 Inflammation 205
  9.4.1 The inflammatory response 205
  9.4.2 The MedDiet and inflammation 206
  9.4.3 n-3 Fatty acids 207
  9.4.4 Phenolics 210
  9.4.5 Pro-inflammatory foods 212
9.5 Modulation of cell signalling pathways by phenolics 212
  9.5.1 Cell signalling pathways in disease 212
9.6 Gene interactions 213
  9.6.1 Genetic predisposition to diet – nutrigenetics 213
  9.6.2 Effects of diet on gene expression 216
9.7 Increased stress resistance 222
  9.7.1 The general concept 222
  9.7.2 Mechanistic basis of hormesis 225
9.8 Nutrient interactions and the Mediterranean dietary pattern 226
  9.8.1 Minimising spikes in plasma concentrations 227
  9.8.2 Synergistic interactions 228

11 Cardiovascular Diseases 258
11.1 Introduction 259
11.2 Nutrition and the biology of CVD 260
  11.2.1 Atherogenesis 260
  11.2.2 Cardiac arrhythmias 265
11.3 Epidemiological evidence and mechanisms 265
  11.3.1 Fat and fatty acids 265
  11.3.2 Plant food constituents 269
  11.3.3 Whole foods 273
  11.3.4 Dietary patterns 283
References 286

12 Cancers 293
12.1 Introduction 293
12.2 Nutritional factors and the biology of cancer 294
  12.2.1 Introduction 294
  12.2.2 Carcinogenesis 294
  12.2.3 The issue of selectivity 309
  12.2.4 Mediterranean dietary pattern and cancer prevention 311
12.3 Epidemiological evidence and mechanisms 316
  12.3.1 Fats 316
  12.3.2 Plant food constituents 318
  12.3.3 Tea 322
  12.3.4 Coffee 323
  12.3.5 Wine and alcohol 323
  12.3.6 Plant foods 327
  12.3.7 Dietary patterns 330
