This book is printed with soy-based inks on presses with VOC levels that are lower than the standard for the printing industry. The paper, Rolland Enviro 100, is manufactured by Cascades Fine Papers Group and is made from 100 percent post-consumer, de-inked fiber, without chlorine. According to the manufacturer, the use of every ton of Rolland Enviro 100 Book paper, switched from virgin paper, helps the environment in the following ways:

<table>
<thead>
<tr>
<th>Mature trees</th>
<th>Waterborne waste not created</th>
<th>Water flow saved</th>
<th>Atmospheric emissions eliminated</th>
<th>Soiled Wastes reduced</th>
<th>Natural gas saved by using biogas</th>
</tr>
