Foreword xiii
Preface xvii
About the Authors xix

PART ONE

Introduction to Bonds 1

CHAPTER 1
The Bond Instrument 3

CHAPTER 2
Bond Instruments and Interest-Rate Risk 43
Appendix 2.1 Formal Derivation of Modified-Duration Measure 59
Appendix 2.2 Measuring Convexity 59
Appendix 2.3 Taylor Expansion of the Price/Yield Function 61

CHAPTER 3
Bond Pricing, Spot, and Forward Rates 65
Appendix 3.1 The Integral 83
Appendix 3.2 The Derivation of the Bond Price Equation in Continuous Time 85

CHAPTER 4
Interest-Rate Modelling 89
Appendix 4.1 Geometric Brownian Motion 101

CHAPTER 5
Fitting the Yield Curve 105
Appendix 5.1 Linear Regression: Ordinary Least Squares 124
Appendix 5.2 Regression Splines 127

PART TWO

Selected Market Instruments 133

CHAPTER 6
The Money Markets 135
Appendix 6.1 179
# CONTENTS

## CHAPTER 7
Hybrid Securities and Structured Securities 181

## CHAPTER 8
Bonds with Embedded Options and Option-Adjusted Spread Analysis 205
Appendix 8.1 Calculating Interest Rate Paths Using Microsoft Excel 232

## CHAPTER 9
Inflation-Indexed Bonds and Derivatives 235
Appendix 9.1 Current Issuers of Public-Sector Indexed Securities 256
Appendix 9.2 U.S. Treasury Inflation-Indexed Securities (TIPS) 257

## CHAPTER 10
Introduction to Securitisation and Asset-Backed Securities 261

## PART THREE
Derivative Instruments 297

## CHAPTER 11
Forwards and Futures Valuation 299

## CHAPTER 12
Bond Futures Contracts 309
Appendix 12.1 The Conversion Factor for the Long Gilt Future 324

## CHAPTER 13
Swaps 329
Appendix 13.1 Calculating Futures Strip Rates and Implied Swap Rates 370

## CHAPTER 14
Credit Derivatives I: Instruments and Applications 375
Appendix 14.1 Bond Credit Ratings 418

## CHAPTER 15
Credit Derivatives II: Pricing, Valuation, and the Basis 421

## CHAPTER 16
Options I 435
Appendix 16.1 Summary of Basic Statistical Concepts 456
Appendix 16.2 Lognormal Distribution of Returns 457
Appendix 16.3 Black-Scholes Model in Microsoft Excel 458

## CHAPTER 17
Options II 461
