combination of sensory experiences, 217
consistency of sensory experiences, 216
differential effects of various sensory experiences, 217–218
lighting, 215
influence on circulation paths, 215
intensity, 215
sunlight, 215
use to establish territories, 215
peripheral vision, 216–217
scents, 213–215
consistency with merchandise, 213, 214
dispersion systems, 214
influence on mood and shopping behavior, 213–214
time passage, influence on perceptions of, 214
use to create a signature experience, 214
sound, 212–213
density (shopper) and, 213
Retail environments (continued)
- music familiarity/preference, 213
- music tempo, 212–213
- music type, 212
- volume levels, 213
- visual complexity, 217
crowding, 219
design implication, 210, 211, 213, 215, 217, 218
nonverbal communication, 210–211
- assessment of nonverbal messages, 211
- consistency with self-concept, 210–211
patterns of behavior, shopper, 218–219
personal/perceived control, 219
restorative experiences, 219
signage 217
- spatial needs of shoppers, 218
territory, 219
types of shoppers and design repercussions, 209–210

Rhythm
- audio, 45
- visual, 59

Romance, basic human need and place design, 18

Rose scent, 42

Rules, importance of for national culture and place design, 123

Sandalwood scent, 42

Saving, basic human need and space design, 18

Scale
- learning environments, 228–229

Scents, 38, 40–43
- almond, 42
- baby powder, 43
- basil, 43
- bergamot, 42
- cedar, 42
- chamomile, 42
- cinnamon-vanilla, 42, 43
- cloves, 43
- cypress, 42
- design implication, 44
- floral scents, 42
- frankincense, 42
- grapefruit, 43
- healthcare environments, use in, 239
- heliotrope, 42
- hyacinth, 42
- jasmine, 41, 42, 43
- lavender, 41, 42
- lemon, 41, 42, 43
- lime, 42
- marjoram, 42
- muguet, 42
- neroli, 43
- orange, 42
- patchouli, 43
- peppermint, 42, 43
- pine, 42

psychological influences, types of
- completing tedious mental and physical tasks and, 42
- doing mental tasks and, 41
- energizing and, 43
- enhancing memory and, 43
- feeling healthier and, 43
- improving creativity and, 43
- improving mood and, 43
- improving sleep and, 43
- increasing alertness and, 43
- reducing anxiety, 42
- reducing tension, 42
- relaxing, 42–43
- working at physical tasks and, 42

retail environments, 213–215
- consistency with merchandise, 213, 214
- dispersion systems, 214
- influences on mood and shopping behavior, 213–214
- time passage, influence on perceptions of, 214
- use to create signature experience, 214

- rose, 42
- rosemary, 43
- sandalwood, 42
- spiced apple, 42
- vanilla, 42
- ylang-ylang, 42

Schools, see Learning environments

Seating arrangement 72–76
- design implication, 76
- selection, 72–73

Self-concept, presentation through place design, 25–26, 30, 169, 172, 183

retail environments, 210–211

Sensation seeking (personality factor) and place design, 98–99

Sensory overload, see Dominant sense

Sight, see Vision

Signage, see Wayfinding

Smell, see Scents

Social contact, basic human need and place design, 17

Social interaction, 25, 27–28

Sophisticate living, 146–147

Sound 38–39. See also Hearing

Spiced apple scent, 42

Status display, 17, 32–35
- national culture and status display, 124

workplace environments, 195

Status, basic human need and place design, 17

Stimulation, see Optimal stimulation level
Stimulus sensitivity, see Environmental sensitivity and place design
Stress (place related), 32–35, 45, 238
    Workplace environments, 185–186
Success-focused organizational culture and design, 107–108, 109
Sunlight
    healthcare environments, benefits in, 236
    learning environments, 223
    retail environments, 215
    workplace environments, 188
Surface finishes, see Color; Texture; Vision
Surveys (written, research method), 151, 152–158
    cover note, 153
    data analysis, 153
    distribution, 153
    issues to be probed with, 152, 155–157, 157–158
    pre-testing surveys, 153
    sample size, 153–154
    survey mechanics, 154–155, 157–158
Symbolic ways national cultures perceive the world and design, 118
Symmetry, visual, and response to, 60

Table
    shape, psychological implications, 75–76
    use, psychological implications, 73–76
Tactile experiences
    surface texture and response to, 64–65
    variety in tactile experiences, 65
Task complexity and design, 135–137, 198
Taste, 65
Teammate living, 145–146
Temperature, 65
    learning environments, 223
    perceptions based on color, 55
    workplace environments, 194
Territoriality (personality factor) and place design, 99–100
Territory, 83
    definition of, 83
    design implication, 83
    group territory, 83
    individual territory, 83
    learning environments, 228
    national culture and, 124–125
    personalization and, 83
    retail environments and, 219
Texture
    tactile, 64–65
    visual, 56
Therapeutic place design, see Attention restoration theory;
    Healthcare environments

Time orientation of national culture and place design, 131–132
Time, influences on perception of passage of, retail environments, 214, 216
Tone (sound) and human response, 45–46
Touch, 39, 64–65
    design implication, 65
    surface texture and response to, 64–65
    temperature, 65
    variations, 65
Tranquility, basic human need and place design, 18
Travel distances, apparent, 82

Uniqueness, need for (personality factor) and place design, 100

Vanilla scent, 42
Vengeance, basic human need and place design, 17
Video images, 168
Visibility to others, 80, 195–196
    design implication, 80
    relation to task, 80
Vision, 39, 48–63
    balance, 60
    color, 48–56
        activity level in a space and use of, 53
        appetite, effects on, 54–55
        blue, 52
        combinations, 50–51
        cool, 49
        gender differences, 49, 55
        geography and perceptions of, 55–56
        learning environments, 222
        lighting, 62–63, 189–190
        national culture and response, 50, 127–130
        patterns, 51
        perceptions of room size and, 54
        pink, 49, 55
        preferences, 51–53
            ethnic, 52–53
            generational, 52
            national, 53, 128–130
        red, 49
        surfaces
            healthcare environments, 236–237
            retail environments, 216
            workplace environments, 190
        symbolic meanings/impacts of, 53, 55
        temperature perceptions based on, 55
        textures, 56
        warm, 49
        weight, perceptions influenced by, 55
Vision (continued)

design implication, 64
form, 56–57
harmony and response to, 60–61
light, 61–63
  artificial light, gender differences in response to, 189
colors and response to, 62–63, 189–190
dappled and response to, 62
daylight and response to, 63, 188
directness and response to, 61–62
full-spectrum, 189
intensity levels and response to, 61, 63, 189
line and response to, 56–57
proportions and responses to, 56
rhythm and response to, 59
symmetry and response to, 60
visual quality, 57–59

Visual complexity
  healthcare environments, 237
  retail environments, 217

Visual cues, 190–191

Visual quality, 57–59

Volume (sound) and human response, 46–47

Wayfinding
  gender differences in wayfinding styles, 242
  healthcare environments, 241–242
  landmarks, use of for wayfinding, 242
  signage design and placement, 242
  special issues, 241
 零售 environments, 217

Weight, perceptions influenced by color, 55

Well-designed space, aspects of, 21–36
  challenging, 22, 35
  national culture and, 130–131
  residential environments, 176
  workplace environments, 204–205
  comforting, 22, 28–35
  healthcare environments, 233–241
  learning environments, 227–230
  national culture and, 119–124
  residential environments, 169–171
  retail environments, 211–219
  workplace environments, 184–186

Communicating, 21–22, 23–28
  healthcare environments, 232–233
  learning environments, 221
  national culture and, 124–131
  residential environments, 171–173
  retail environments, 210–211
  workplace environments, 183–184

complying, 21, 23
  healthcare environments, 241–242
  learning environments, 221–227
  national culture and, 131–134
  residential environments, 173–176
  retail environments, 209–210
  workplace environments, 186–204
  continuing, 22, 35–36
  residential environments, 176–180
  workplace environments, 205–207

White-noise, 46–47, 203

Window. See also Sunlight
