*Introduction*

### Chapter 1  
**Cell and body tissue physiology**  
*Anthony Wheeldon*

1. Introduction  
2. Anatomy of the cell  
3. The cell membrane  
9. Cytoplasm  
9. Nucleus  
10. Mitosis and meiosis  
14. The organelles  
18. Types of cells  
19. Tissues  
26. Tissue repair  
27. Conclusion  
28. Activities  
31. Glossary of terms  
35. References

### Chapter 2  
**Cancer**  
*Carl Clare*

36. Introduction  
39. Biology of cancer  
42. Causes of cancer  
46. Staging of cancers  
47. Signs and symptoms of cancer  
48. Treatment of cancer
Contents

Fundamentals of Applied Pathophysiology

Prevention of cancer 50
Examples of cancers 51
Conclusion 56
Activities 57
Further resources 60
Glossary of terms 60
References 64

Chapter 3  Inflammation, immune response and healing 66
Janet G. Migliozzi

Introduction 68
Infectious micro-organisms 68
Spread of infection 69
Types of infectious micro-organisms 73
The immune system 78
Organs, cells and proteins of the immune system 78
Inflammatory response 84
Conclusion 86
Activities 87
Further resources 90
Glossary of terms 91
References 95

Chapter 4  Shock 96
Janet G. Migliozzi

Introduction 98
Types of shock 99
Pathophysiology of shock 102
Stages of shock 103
Care of the patient in shock 105
Conclusion 107
Activities 109
Further resources 111
Glossary of terms 112
References 113

Chapter 5  The heart and associated disorders 114
Muralitharan Nair

Introduction 116
Location of the heart 116
Structures of the heart 117
Blood flow through the heart 119
Conducting systems of the heart 120
Nerve supply of the heart 122
Diseases of the heart 123
Conclusion 135
Chapter 6  The vascular system and associated disorders

Muralitharan Nair

Introduction 144
Overview of blood vessels 144
Structure of the blood vessels 144
Blood pressure 149
Diseases of the blood vessels 150
Conclusion 168
Activities 169
Further resources 172
Glossary of terms 173
References 174

Chapter 7  The blood and associated disorders

Muralitharan Nair

Introduction 178
Composition of blood 178
Properties of blood 178
Functions of blood 179
Plasma 180
Formed elements of blood 182
Haemostasis 187
Blood groups 188
Diseases of the blood 190
Conclusion 204
Activities 204
Further resources 206
Glossary of terms 207
References 209

Chapter 8  The renal system and associated disorders

Muralitharan Nair

Introduction 212
The renal system 212
Disorders of the renal system 222
Conclusion 233
Activities 234
Further resources 236
Glossary of terms 237
References 239

Chapter 13  The endocrine system and associated disorders
  Carl Clare
  Introduction
  Hormones
  The physiology of the endocrine glands
  Disorders of the endocrine system
  The pancreas
  Conclusion
  Activities
  Further resources
  Glossary of terms
  References

Chapter 14  The reproductive systems and associated disorders
  Ian Peate
  Introduction
  Reproductive health
  The pelvis
  The female reproductive tract
  The menstrual cycle
  The female breast
  Menstrual disorders
  The male reproductive tract
  Male reproductive disorders
  Conclusion
  Activities
  Further resources
  Glossary of terms
  References

Chapter 15  Pain and pain management
  Anthony Wheeldon
  Introduction
  The physiology of pain
  Pain classification
  The pain experience
  Pain theories
  Pain pathophysiology and management
  Conclusion
  Activities
  Further resources
  Glossary of terms
  References
Further resources  580
Glossary of terms  580
