# Brief table of contents

*Detailed table of contents*  
*Foreword to the ninth edition*  
*Acknowledgements*  
*List of contributors*  
*List of abbreviations*  
*Quick reference to the procedure guidelines*  
*How to use your manual*  

## Part One  Managing the patient journey
1. Introduction  
2. Assessment and discharge  
3. Infection prevention and control  

## Part Two  Supporting the patient with human functioning
4. Communication  
5. Elimination  
6. Moving and positioning  
7. Nutrition, fluid balance and blood transfusion  
8. Patient comfort and end-of-life care  
9. Respiratory care  

## Part Three  Supporting the patient through the diagnostic process
10. Interpreting diagnostic tests  
11. Observations  

## Part Four  Supporting the patient through treatment
12. Medicines management  
13. Perioperative care  
14. Vascular access devices: insertion and management  
15. Wound management  

*Index*
1 Introduction

Overview

Evidence-based practice
What is evidence-based practice?
Grading evidence in The Royal Marsden Manual of Clinical Nursing Procedures

Structure of the Manual
Structure of chapters

Conclusion

References

Part One
Managing the patient journey

2 Assessment and discharge

Overview

Inpatient assessment and the process of care

Observation

Physical assessment/examination
Respiratory examination
Cardiovascular examination
Abdominal examination

Communication and discharge planning

References

Procedure guidelines for Chapter 2
2.1 Respiratory examination
2.2 Cardiovascular examination
2.3 Abdominal examination

3 Infection prevention and control

Overview

Infection prevention and control
Aseptic technique
Source isolation
Protective isolation

4 Communication

Overview

Communication

Communicating with those who are worried or distressed

Informing patients

Communicating with those with specific psychological needs

Denial and collusion
Anxiety
Panic attacks (acute anxiety)
Depression
Anger, aggression and violence management
Delirium
Dementia
Acquired communication disorders

Websites and useful addresses

References
5 Elimination

Overview

Normal elimination

Vomiting

Insertion of a nasogastric drainage tube

Removal of a nasogastric drainage tube

Urinary elimination

Faecal elimination

Assisting the patient with elimination

Altered urinary elimination

Urinary incontinence

Urinary catheterization

Suprapubic catheterization

Intermittent catheterization

Bladder irrigation

Nephrostomy tubes

Surgical urinary diversions

Altered faecal elimination

Diarrhoea

Constipation

Enemas

Suppositories

Digital rectal examination

Digital removal of faeces

Stoma care

Complications

References

Procedures guidelines for Chapter 5

5.1 Care of a patient who is vomiting

5.2 Insertion of a nasogastric (NG) drainage tube

5.3 Removal of a nasogastric tube

5.4 Slipper bedpan use: assisting a patient

5.5 Commode use: assisting a patient

5.6 Penile sheath application

5.7 Urinary catheterization: male

5.8 Urinary catheterization: female

5.9 Urinary catheterization: intermittent self-catheterization patient guidance: male

5.10 Urinary catheterization: intermittent self-catheterization patient guidance: female

5.11 Urinary catheter bag: emptying

5.12 Urinary catheter removal

5.13 Commencing bladder irrigation

5.14 Care of the patient during bladder irrigation

5.15 Nephrostomy tube: weekly dressing and bag change

5.16 Nephrostomy tube: removal of locking pigtail drainage system

5.17 Continent urinary diversion stoma: self-catheterization

5.18 Enema administration

5.19 Suppository administration

5.20 Digital rectal examination

5.21 Digital removal of faeces

5.22 Stoma sitting

5.23 Stoma bag change

5.24 Stoma bridge or rod removal

Positioning the patient: sitting in bed

Positioning the patient: side-lying

Positioning the patient: in a chair/wheelchair

Moving the patient from sitting to standing

Walking

Moving and positioning the unconscious patient

Moving and positioning the patient with an artificial airway

Moving and positioning the patient with respiratory compromise

Positioning to maximize ventilation/perfusion matching

Positioning to minimize the work of breathing

Positioning to maximize drainage of secretions

Moving and positioning the patient with neurological impairment

Moving and positioning the patient with actual or suspected spinal cord compression or spinal cord injury

Moving and positioning the patient with an amputation

Websites

Procedure guidelines for Chapter 6

6.1 Positioning the patient: supine

6.2 Positioning the patient: sitting in bed

6.3 Positioning the patient: side-lying

6.4 Positioning the patient: lying down to sitting up

6.5 Positioning the patient: in a chair/wheelchair

6.6 Moving from sitting to standing: assisting the patient

6.7 Assisting the patient to walk

6.8 Positioning the unconscious patient or patient with an airway in supine

6.9 Positioning the unconscious patient or patient with an airway in side-lying

6.10 Positioning the patient to maximize V/Q matching with unilateral lung disease in a self-ventilating patient

6.11 Positioning the patient to maximize V/Q matching for widespread pathology in a self-ventilating patient

6.12 Positioning to maximize the drainage of secretions

6.13 Positioning the neurological patient with tonal problems

6.14 Log rolling for suspected/confirmed cervical spinal instability

6.15 Positioning for suspected/confirmed cervical spinal instability: pelvic twist to right

6.16 Log rolling for suspected/confirmed thoracolumbar spinal instability

6.17 Early mobilization of the patient in bed

6.18 Positioning the pre-operative and post-operative amputation patient

7 Nutrition, fluid balance and blood transfusion

Overview

Fluid balance

Nutritional status

Provision of nutritional support: oral

Nutritional management of patients with dysphagia
Enteral tube feeding 279
Enteral tube insertion 280
Enteral tube removal 287
Enteral tube care 288
Administration of enteral tube feed 294
Enteral feeding tubes: administration of medication 296
Enteral feeding tubes: unblocking 298
Parenteral nutrition 299
Transfusion of blood and blood components 302
Websites and useful addresses 323
References 324

Procedure guidelines for Chapter 7
7.1 Fluid input: measurement 259
7.2 Fluid output: monitoring/measuring output if the patient is catheterized 261
7.3 Fluid output: monitoring/measuring output if the patient is not catheterized 261
7.4 Fluid output: measuring output from drains 262
7.5 Fluid output: monitoring output from gastric outlets, nasogastric tubes, gastrostomy 263
7.6 Fluid output: monitoring output from bowels 263
7.7 Fluid output: monitoring output from stoma sites 264
7.8 Measuring the weight and height of the patient 269
7.9 Feeding an adult patient 276
7.10 Nasogastric intubation with tubes using an internal guidewire or stylet 281
7.11 Removal of a nasogastric tube 287
7.12 Percutaneous endoscopically placed gastrostomy (PEG) tube care 288
7.13 Radiologically inserted gastrostomy (RIG) tube care 290
7.14 Removal of T-fasteners 290
7.15 Checking the balloon volume on a balloon gastrostomy 291
7.16 Jejunostomy feeding tube care 292
7.17 Enteral feeding tubes: administration of feed 294
7.18 Enteral feeding tubes: administration of medication 296
7.19 Enteral feeding tubes: unblocking 298
7.20 Blood product request 312
7.21 Blood sampling: pre-transfusion 313
7.22 Blood components: collection and delivery to the clinical area 314
7.23 Blood component administration 316

8 Patient comfort and end-of-life care 331
Overview 332
Personal hygiene 332
Eye care 340
Ear care 350
Mouth care 352
Pain 360
Pain management 366
Acupuncture 373
Epidual and intrathecal analgesia 376
Regional analgesia: local anaesthetic nerve blocks and infusions 388
Entonox administration 391
Management of ascites 396
End-of-life care 402
Care before death 403
Care after death (last offices) 413
Websites 421
References 421

9 Respiratory care 431
Overview 432
Respiratory therapy 432
Oxygen therapy 434
Humidification 441
High-flow oxygen therapy 444
Continuous positive airway pressure 446
Chest drains 452
Tracheostomy and laryngectomy care 467
Tracheostomy: dressing change 475
Tracheostomy: succioning 476
Tracheostomy: changing the inner cannula 479
Tracheostomy: tube change 481
Cardiopulmonary resuscitation 484
References 502

Procedure guidelines for Chapter 9
9.1 Oxygen therapy 438
9.2 Humidification for respiratory therapy 443
9.3 High-flow oxygen therapy 444
9.4 Continuous positive airway pressure 449
9.5 Chest drain: insertion 458
9.6 Chest drainage: succion 461
9.7 Chest drain: priming ambulatory chest drain bag 461
9.8 Chest drain: changing the bottle 462
9.9 Chest drain: removal 463
9.10 Tracheostomy: dressing change 475
9.11 Tracheostomy: succioning a patient 478
9.12 Tracheostomy: inner cannula change 480
9.13 Tracheostomy: tube change 481
9.14 Cardiopulmonary resuscitation 498

Part Three
Supporting the patient through the diagnostic process 507

10 Interpreting diagnostic tests 509
Overview 510
Diagnostic tests 510
## Blood: obtaining samples from a peripheral vein (venepuncture)
- Page 514

## Blood sampling from a central venous catheter
- Page 524

## Arterial sampling
- Page 527

## Blood tests
- Page 534

## Blood cultures
- Page 535

## Post-procedural considerations
- Page 539

## Antibacterial drug assay
- Page 540

## Cerebrospinal fluid obtained by lumbar puncture
- Page 541

## Semen collection
- Page 547

## Cervical uterine smear (pap smear)
- Page 550

## Specimen collection: swab sampling
- Page 557

## Specimen collection: urine sampling
- Page 565

## Specimen collection: faecal sampling
- Page 571

## Specimen collection: respiratory tract secretion sampling
- Page 573

## Specimen collection: pleural fluid
- Page 578

## Endoscopic investigations
- Page 579
  - Gastroscopy
  - Colonoscopy
  - Cystoscopy

## Liver biopsy
- Page 583

## Radiological investigations: X-ray
- Page 585

## Magnetic resonance imaging
- Page 586

## Computed tomography
- Page 587

## Procedure guidelines for Chapter 10

10.1 Venepuncture 519
10.2 Central venous access devices: taking a blood sample for vacuum sampling 525
10.3 Central venous access devices: taking a blood sample for syringe sampling 526
10.4 Arterial puncture: radial artery 530
10.5 Arterial blood gas sampling: arterial cannula 532
10.6 Blood cultures: peripheral (winged device collection method) 537
10.7 Blood cultures: central venous access device 538
10.8 Blood sampling: antimicrobial drug assay 541
10.9 Lumbar puncture 544
10.10 Semen collection 550
10.11 Cervical uterine smear using a wooden spatula 552
10.12 Cervical uterine smear using liquid-based cytology 554
10.13 Cervical uterine smear using an endocervical brush 555
10.14 Swab sampling: ear 558
10.15 Swab sampling: eye 559
10.16 Swab sampling: nose 559
10.17 Swab sampling: penis 560
10.18 Swab sampling: rectum 561
10.19 Swab sampling: skin 562
10.20 Swab sampling: throat 563
10.21 Swab sampling: vagina 564
10.22 Swab sampling: wound 564
10.23 Urine sampling: midstream specimen of urine: male 566
10.24 Urine sampling: midstream specimen of urine: female 567
10.25 Urine sampling: catheter specimen of urine (CSU) 568
10.26 Urine sampling: sampling from an ileal conduit 569
10.27 Urine sampling: 24-hour urine collection 570
10.28 Faecal sampling 572
10.29 Sputum sampling 574
10.30 Nasopharyngeal wash: syringe method 575
10.31 Nasopharyngeal wash: vacuum-assisted aspirate method 577

## 11 Observations

### Overview
- Page 595

### Observations
- Page 596
  - Pulse (heart rate)

### Twelve-lead electrocardiogram (ECG)
- Page 604

### Blood pressure
- Page 610

### Respiration and pulse oximetry
- Page 618

### Peak flow
- Page 630

### Temperature
- Page 634

### Urinalysis
- Page 640

### Blood glucose
- Page 646

### Neurological observations
- Page 652

### References
- Page 665

## Procedure guidelines for Chapter 11

11.1 Pulse measurement 602
11.2 Electrocardiogram 608
11.3 Blood pressure measurement (manual) 616
11.4 Respiratory assessment and pulse oximetry 627
11.5 Peak flow reading using a manual peak flow meter 632
11.6 Temperature measurement 638
11.7 Urinalysis: reagent strip procedure 644
11.8 Blood glucose monitoring 649
11.9 Neurological observations and assessment 662

## Part Four

### Supporting the patient through treatment
- Page 673

## 12 Medicines management

### Overview
- Page 675

### Self-administration of medicines
- Page 687

### Controlled drugs
- Page 690

### Routes of administration
- Page 697
  - Oral administration
  - Topical administration
  - Transdermal administration
  - Rectal administration
  - Vaginal administration
  - Pulmonary administration
  - Ophthalmic administration
  - Nasal administration
  - Otic administration

### Injections and infusions
- Page 719
  - Intravenous injection
  - Intramuscular injection
  - Intracutaneous injection
  - Intradermal injection
  - Intrathecal injection
  - Intracerebral injection

### Intra-articular injection
- Page 728

### Intravenous injections and infusions
- Page 747
14.7 PICC removal
14.8 Short-term central venous catheter (non-cuffed/tunnelled) insertion into the internal jugular vein
14.9 Short-term central venous catheter (non-cuffed/tunnelled): removal
14.10 Central venous catheter (skin-tunnelled): surgical removal
14.11 Implanted ports: insertion and removal of non-coring needles
14.12 Arterial cannula insertion: preparation and setting up of monitoring set
14.13 Arterial cannula: removal

15 Wound management

Overview

Wounds

Pressure ulcers

Surgical wounds
Suturing
Removal of sutures or clips

Plastic surgery

Negative pressure wound therapy

Websites

References

Procedure guidelines for Chapter 15
15.1 Dressing a wound
15.2 Suturing a simple wound
15.3 Suture removal
15.4 Clip removal
15.5 Negative pressure wound therapy
