Subject Index

a
Ahmed body 309–317
Anisotropy tensor 213
Asmoo vehicle 321
Average 17–19
  conditional 18
  ensemble 18,113
  spatial 18
  time 17

b
Backscatter 35,37,65,260
Bottleneck effect 64
Boundary layer 167–199
  Blasius solution 167,171
  Clauser equilibrium parameter 176
  displacement thickness 170
  hairpins 188
  integral momentum balance 172
  intermittency 170
  log law 174
  momentum thickness 170
  outer layer 175
  overlap layer 176
  pockets 190
  pressure 197
  rotational markers 186
  streaks 180
  streamwise vortices 181
  structure 177–197
  structure identification 184
  thickness 170,174
  transition 168
  vortices 182
  wake function 177
  Buffer layer 141

C
Channel flow 135–156
  dissipation budget 149
  enstrophy budget 154
  kinetic energy budget 148
  log law 144
  Reynolds stress 138
  Reynolds stress budget 150
  similarity 141
  velocity moments 145
  viscous sublayer 142
  vorticity transport 130
  Clauser equilibrium parameter 176
  Closure, see Model
  Constitutive law 110
  Continuity equation 15
  Control volume analysis 36
  Correlation
    Gaussian longitudinal velocity 81
    longitudinal velocity 23,51,78
    time 28
    time auto 25
    transverse velocity 23
    triple velocity 22,52
    two-point velocity 22,88
  Cylinder flow 285

d
DDES 272
DES 271
DIA 101
Direct numerical simulation, see DNS
Dissipation 65
e equation 37–39, 74, 212
budget 149
enstrophy 87
intermittency 64
isotropic 36
length scale 55
of dissipation 84
rate 35, 49, 56
DNS 9
channel flow 137
cost 57
isotropic turbulence 63
scaling with Reynolds number 57
Drag coefficient 314
DrivAer model 317
e
Eddy turnover time 83, 84
Eddy viscosity 110
negative 122
EDQNM 101
Ejection event 118
Energy
\( K \) equation 33–37, 72, 212
\( \tau^{-10/7} \) decay law 104
\( \tau^{-1} \) decay law 84, 86
\( \tau^{-3/2} \) decay law 83
\( \tau^{-5/2} \) decay law 83
\( \tau^{-6/5} \) decay law 77, 86
cascade 65
decay 71–76
density function 28, 58
final period decay 75, 80, 96
internal 33
kinetic 33
LES 256
mean turbulent kinetic 33
redistribution 37, 40, 153
self-similar decay 77
spectrum 28, 58
spectrum equation 94–100
subgrid 257
transfer 58, 99
turbulent kinetic 19, 33
Enstrophy 154
blow up 88
dissipation 87
equation 43
Equilibrium
high Reynolds number 84
low Reynolds number 80
production-equals-dissipation 126, 262
states in isotropic decay 79
f
Filter 18, 252
grid 266
test 266
First law of thermodynamics 34
Fixed points 79
Flatness factor 21
Fourier
coefficients 25
cosine transform 29
cutoff filter 254
discrete transform 25
fast transform 30
series 25
transform 27, 28, 94, 97
Free shear flow 283
Frequency 28
angular 28
Friction velocity 115
FSM 273
g
Galilean invariance 224, 260
Gaussian random field 101
Generic conventional model 324
h
Homogeneous shear flow 122–128
i
IDDES 272
Inertial subrange 58–65
Instability
boundary layer 168
Kelvin–Helmholtz 4, 286, 298
Integral scale 55
Intermediate layer 141, 143
Internal energy 33
Subject Index

\( j \)
Jet flow 4, 292
  mean velocity 293
  Reynolds stress 295
  self-preserving 292

\( k \)
Kármán constant 144
Kármán–Howarth equation 92
Kinetic theory of gases 108
Kolmogorov
  \( k^{-5/3} \) law 58, 262
  \( t^{-10/7} \) decay law 104
  dissipation scale 55
Kurtosis 21
