Note: Page references in *italics* refer to Figures; those in **bold** refer to Tables

χARM/SIRM ratios 101–2, 105
χARM/χ 105
χARM/χfd 105

Adirondak Mountains, New York 100
Alleghanian-age deformation 85
Alleghanian orogeny 14
Alleghanian Plateau 76
Allentown Formation, Pennsylvania 87–8
alternating field demagnetization 126, 128
aluminum-in-hornblende paleobathymetric technique 3
Amana Formation 12
Andreas Formation 9
anisotropy-inclination corrections for hematite-bearing rocks 53–5
next generation 53
propagating errors 59–60
test 51–3
anisotropy of isothermal remanence (AIR) 56, 57, 59
anisotropy of magnetic remanence (AMR) 10
anisotropy of magnetic susceptibility (AMS) 10, 24, 43, 45, 48, 49, 51, 52, 53, 56–7, 57, 59, 72, 74, 75–6, 89, 91, 129
anisotropy remanent magnetization (ARM) 48–51, 52, 96
anisotropy of anhysteretic remanence (AAR) 21, 43, 100
antiferromagnetism 95

Appalachian fold belt 84
apparent polar wander path (APWP) 55–6
Arguis Formation, Spain 69, 114, 117–19, 120, 121
ARM/IRM ratio 97
ARM/SIRM ratio 75, 100, 101, 107, 107, 108, 115, 116, 121
ARM/χ ratios 97, 101, 115
baked contact test 126, 130
bacterially controlled mineralization (BCM) 103
bacterially induced mineralization (BIM) processes 103
Baikal, Lake 114
Baja BC controversy 53
Bcr/Bc ratios 97
bedding error correction 24, 25
Belden Formation, Colorado 79
Bermuda Rise, North Atlantic Ocean 6, 6, 7, 32, 32
Big Moose Lake 100
Bingham statistics 128
biogenic magnetic minerals formation, Lake Ely 103–12, 104, 106, 107, 108, 109–10, 112, 113
biologically organized mineralization (BOM) processes 103
bioturbation 27
blocking volume 66
Bloomburg Formation 9, 88–9, 88, 89, 92
Bonneteer Dolomite 75
Brownian motion 17, 18, 18, 22
Brunhes-Matayama polarity transition 2
burial compaction 10, 11–12
burial diagenesis 78–9
Cala Viola, Sardinia 72
calcite 2, 53, 79, 90, 93, 96
Catskill Formation, deltaic rocks 9
characteristic remanent magnetization (ChRM) 126, 129, 130
chemical demagnetization 56–7, 58, 72, 129
chemical remanent magnetization (CRM) 10, 12, 14, 16, 19, 41, 43, 66–80
Chinle Formation 9
Chugwater Formation, Montana 79
Cimon Forcellone 120, 122
Cimon Latemar 121, 122
coaXial strain 82–3, 83
pure shear 90
simple 90
coercivity 12, 35, 48, 53, 94, 95
Colorado Plateau 51
compaction-shallowed inclination 46–65
conglomerate test 67, 130
contact test, alternating field demagnetization 67
Cupido Formation, Mexico 102, 114, 116–17, 117, 119
Curie temperature for magnetite 98

© 2012 Kenneth P. Kodama. Published 2012 by Blackwell Publishing Ltd.
Day plot 97
depositional (detrital) remanent magnetization (DRM) process 4–5
deposition on a sloping bed and from a current 24–5, 24
every evidence of 5–9
equation 16–18
in hematite-bearing rocks 19–22
laboratory re-deposition experiments 23–4
for magnetite-bearing rocks 16–19
flocculation model 18–19
in red, continental sedimentary rocks 9–10
saturation 21
syn-depositional 25
tensor 59
Deseret Limestone, Utah 79
Desulfovibrio 67
diagenesis, definition 66
diagenesis, early, in terrestrial red bed sedimentary rocks 71–4
diagenesis, late, and remagnetization 74–9
basinal fluid flow during orogenesis 74–8
burial diagenesis and illitization 78–9
hydrocarbon migration and dolomitization 79
diamagnetic minerals 96
Dnieper River, Ukraine 73
Dome de Barrot 10
Donbas Fold Belt, Ukraine 43
DRM:IRM ratio 21
DRM:SIRM ratio 20, 21, 22
eccentricity 114
El Trebol, Lake 7
elongation-inclination (EI) correction technique 41, 46, 58, 61–5,
62
Ely, Lake 12
biogenic magnetic minerals
formation 103–12, 104, 106, 107, 108, 109–10, 112, 113
energy-dispersive spectrometry (EDS) 133
environmental magnetism 3–4, 94–9
environmental processes
detection 99–103
and DRM accuracy 103
ferromagnetic resonance (FMR) 111
ferromagnetism 12, 14, 95
first-order reversal curve (FORC diagrams) 97, 111
Fisher distribution 85, 127, 128
Fisher statistics 7, 51, 59, 127–8
