Index

Active power, 69, 89, 147, 155, 181, 211
Affine non-linear system, 103, 124
Aluminium smelter, 235

Back-to-Back interconnection, 106, 111, 117, 123, 125, 133, 149, 221
Back-to-Back interconnection, control system, 226
BJT (bipolar junction transistor), 3
Bridge converter, 9

Cable, 154, 158
Capacitor balancing, 55, 60, 64, 67, 69, 91
Capacitor clamping, 61
Cascaded H-bridge, 65, 89
Centre-tapped rectifier, 251
Chopper, 297, 298
Clamp control, 50
Commutation, 241, 244
Commutation angle, 245, 277
Commutation reactance, 244, 277
Control AC and DC power balance, 102
Control active power, 102, 133, 147
Control affine, 103, 145
Control DC current, 99, 145, 206
Control direct (voltage), 165
Control firing, 100
Control four quadrant, 99, 102, 145, 180, 296
Control frequency, 165
Control non-linear, 102, 145
Control power, 101, 161, 165

Control reactive power, 102, 133, 147, 161
Control state space, 102, 103, 120, 142
Control system, 102
Control tap change (see On-load tap-changer)
Control voltage, 168, 183, 191
Control VSC, 99, 145, 161, 168
Converter back to back, 221
Converter multi-pulse, 10
Converter six-pulse, 9, 23
Converter twelve-pulse, 10, 27
Converter coupling reactance, 20
CSC (Current Source Conversion), 42, 120, 297
DC capacitor, 20
DC link, 153
DC link, back to back, 222
DC link, bipolar, 154
DC reactor, 8
DC ripple, 73
Diode, 3, 23
Diode clamping, 49, 56

Electromagnetic interference (EMI), 169
EMTDC, 183, 217, 230, 265, 303
Energy storage, 294
ETO (Emitter turn-off thyristor), 2

FACTS, 12, 100
FCT (field controlled transistor), 3
Filters, 20, 155
Firing-shift control, 210, 222, 241

Self-Commutating Converters for High Power Applications
J. Arrillaga, Y. H. Liu, N. R. Watson and N. J. Murray
© 2009 John Wiley & Sons, Ltd
INDEX

Five level VSC, 53
Flying capacitors, 61
Frequency control, 165

Gate turn-off (see GTO)
GCT (see IGCT)
GTO, 2
Group converter (CSC), 129, 207, 236, 259, 301
Group converter (VSC), 107, 180

Harmonic elimination, 30
Harmonics, 30, 52, 58, 75, 85, 87
Harmonics, AC side, 26, 59, 257, 268, 284
Harmonics, characteristic, 9, 43
Harmonics, DC side, 26, 43
Harmonics, even, 28, 31, 34, 41
Harmonics, selective cancellation, 31
Harmonics, sequence components, 26
Harmonics, subharmonics, 31
Harmonics, triplen, 26, 40, 41, 51
Harmonics, uncharacteristic, 9
H-Bridge (see cascaded H-bridge)
High current rectification, 235
High current rectification, smelter, 237
High voltage valve, 21
HVDC, 1, 106, 111, 114, 123
HVDC, light, 154
HVDC, ultra high voltage VSC, 169, 171
HVDC, ultra high voltage CSC, 197
HVDC, back to back, 221

IEGT, 3
IGBT (insulated gate bipolar transistor), 3, 21
IGBT chains, 22
IGCT (integrated gate commutated thyristor), 2
Insulated gate bipolar transistor (see IGBT)

LCC (Line Commutated Conversion), 1, 5, 10, 145, 246
Level number, 8

MCT (MOS controlled thyristor), 2
MLCR (see Multilevel reinjection)
MLVR (see Multilevel reinjection)
Modular multilevel conversion (MMC), 67,172
MOSFET, 2, 21
MTO (MOS turn-off thyristor), 2
Multibridge conversion, 48, 236
Multilevel conversion, cascaded H-bridge, 65, 92, 174
Multilevel conversion, diode clamping, 49, 53
Multilevel conversion, flying capacitor, 62
Multilevel conversion, neutral point clamping, 49, 156
Multilevel CSC, 297
Multilevel Reinjection, 73
Multilevel Reinjection, MLVR, 89, 95, 171, 180
Multilevel Reinjection, MLCR, 85, 87, 94, 197, 224, 297
Multilevel VSC, 47, 174

OLTC (see On Load Tap Changer)
On-load tap-changer, 202, 211, 222, 235
Optimal PWM, 155
Overlap angle, 241, 244

PLL (phase locked loop), 161, 248, 263, 279
Phase-shifting, 2, 249
Power factor, 43, 178, 179, 184, 185, 195, 250, 265
PSCAD (see EMTDC)
Power transfer, 17
Pulse number, 8
Pulse Width Modulation, 29, 31, 48, 103
Pulse Width Modulation, space vector control, 40
PWM (see Pulse Width Modulation)

Reactive power, 18, 67, 89, 155, 165, 173, 181, 211, 274, 283
Reactive power compensators, 58, 61, 67, 276, 286
Real power (see active power)
Reinjection, 74
Reinjection, four-quadrant control, 180
Reinjection, ideal injection, 78
Reinjection, symmetrical approximation, 82
Reinjection, multilevel, 85

SCR (see Silicon Controlled Rectifier), 2
Self-commutation, 11, 242
SiC (Silicon carbide), 6
Silicon controlled rectifier, 2
Smelter cell, 238, 280
Smelter centre-tapped, 251
Smelter hybrid double group, 239
Smelter independent group control, 241
Smelter MLCR, 253
Smelter multicell/PWM, 287
Smelter pot-line, 237
Smelter thyristor/MLCR rectification, 274
Smelter two-quadrant control, 240
Smelter 48-pulse, 235, 247, 250, 253, 264, 279, 285, 300
SMES coil, 299
SMES coil energization control system, 301
SMES high temperature superconducting, 300
SMES MLCR conversion, 297, 299, 300
SMES power conditioning system, 295
SMES VSC versus CSC, 297
SMES storing capability, 295
SMES superconductive coil, 294
SMES superconductive coil, energization, 299
SMES superconductive coil, solenoidal coil, 299
SMES superconductive coil, toroidal coil, 299
Smoothing reactor (see DC reactor)
Snubbers, 21, 23, 56, 94
Space-vector PWM, 34
Stability, 164, 166
STATCOM, 18, 33, 58, 106, 111, 113, 123, 125, 138, 148, 286
Subsynchronous damping control, 162
Subsynchronous resonance, 162
Superconducting magnetic energy storage
(see SMES), 293
Switching losses, 44, 52, 58, 64, 159

Thyristor, 2
Thyristor, valve, 21
Transformer, phase-shift, 236

Transformer, zig-zag connection, 236
Triple harmonics, 26, 40, 41, 51
Three-level VSC, 32

Ultra high-voltage CSC, 198
Ultra high-voltage CSC, control structure, 199, 211
Ultra high-voltage CSC, independent reactive power, 207
Ultra high-voltage VSC, 171
Ultra high-voltage VSC, control strategies, 185
Ultra high-voltage VSC, control structure, 182
Ultra high-voltage VSC, four-quadrant control, 180
Ultra high-voltage VSC, H-bridge, 174
Uncharacteristic harmonics, 9

Voltage sharing, 21
VSC (Voltage source conversion), 16, 18, 120
VSC chopper, 297, 298

ZVS (zero voltage switching), 89, 95
ZCS (zero current switching), 87, 94
