Contents

List of Contributors vii
Foreword ix

Chapter 1. The Origins of Cattle
Matthew D. Teasdale and Daniel G. Bradley 1

Chapter 2. Mendelian Inheritance in Cattle
Frank W. Nicholas 11

Chapter 3. Genetics of Coat Color in Cattle
Sheila M. Schmutz 20

Chapter 4. From Quantitative Genetics to Quantitative Genomics:
A Personal Odyssey
Morris Soller 34

Chapter 5. Cartography of the Bovine Genome
James E. Womack 51

Chapter 6. History of Linkage Mapping the Bovine Genome
Stephanie D. McKay and Robert D. Schnabel 63

Chapter 7. Bovine X and Y Chromosomes
F. Abel Ponce de León and Wansheng Liu 75

Chapter 8. Cattle Comparative Genomics and Chromosomal Evolution
Denis M. Larkin 101

Chapter 9. Sequencing the Bovine Genome
Kim C. Worley and Richard A. Gibbs 109

Chapter 10. Bovine Genome Architecture
David L. Adelson 123

Chapter 11. Bovine Epigenetics and Epigenomics
Xiuchun (Cindy) Tian 144

Chapter 12. Mapping Quantitative Trait Loci
Joel I. Weller 169

Chapter 13. Genome-Wide Association Studies and Linkage Disequilibrium in Cattle
M. E. Goddard and B. J. Hayes 192

Chapter 14. Genomic Selection in Beef Cattle
Jeremy F. Taylor, Stephanie D. McKay, Megan M. Rolf, Holly R. Ramey, Jared E. Decker, and Robert D. Schnabel 211
## Contents

Chapter 15. Impact of High-Throughput Genotyping and Sequencing on the Identification of Genes and Variants Underlying Phenotypic Variation in Domestic Cattle  
*Michel Georges*  
234
