Subject Index

7 Habits of Highly Effective People, The (book), 63
12-step programs, 268, 353
ABC model of cognitive mediation, 210, 211, 218, 222
Abstraction, selective, 216
Abstractness (levels of goals), 61
Abuse, child/spousal/elder: See also Intimate partner violence
adult survivors of child abuse, 154–155, 189
child abuse, 148-149
children protecting abusers, 121, 148, 302
Emergency (CS1), 117–119
Freedom and Responsibility (ES2), 274
legal issues, 109, 119
mandated reporting, 108, 109, 119
recognition of, 120
recovery framework, 154
Recurrent Pattern (P2), 301, 302
screening, 163
Accelerated Experiential-Dynamic Psychotherapy (AEDP), 112, 113, 194
Acceptance:
marital therapy and, 199, 217, 339
mindfulness and, 198, 204
Acceptance and Commitment Therapy (ACT), 88, 113, 114, 203–204
Accountability, 13, 61
Acculturation issues, 26, 341, 343
Action plan, 88, 129, 266, 277
Activism, 269, 359
Activities:
2.1: Metamodel practice, 35, 431–432
3.1: Using the BASIC SID for problem identification, 46, 432–433
3.2: Checking domains of functioning for problems and strengths, 46, 433–434
3.3: Is it a problem title or a conceptualization title, 53, 434–435
3.4: Creating problem titles from your preliminary problem list, 59, 435
4.1: Writing outcome statements, 66–67, 435–436
4.2: What kind of goal is it?, 71, 436–437
4.3: Practice writing outcome goals, 72, 437
4.4: Outcome goals for Maria, 72, 437–438
5.1: Find the formulation ideas in the subjective data section, 79, 438
5.2: Is it objective data or formulation?, 80, 438–439
15.1: Apply and test hypotheses with case vignettes, 376–377, 439–443
15.2: Combining hypotheses for common problems, 379, 443–449
15.3: Using the three-column worksheet, 381, 449–451
15.4: Writing plans, 382, 451–452
15.5: Writing a case formulation report, 383, 452–459
Actualization, 263
Acupuncture, 169
ADD/ADHD. See Attention deficit/hyperactivity disorder
Addictions. See Substance-related disorders and problems
ADDRESSING (acronym for cultural categories), 25, 342
Adherence to medication regimen, 165, 168, 174
Adjustment disorders, 125
Adopted children, 140
Adult Children of Alcoholics (ACA), 311
Adult children’s relationship with parents, 307
Adult survivors of childhood abuse, 154–155, 189
Statute of limitations for legal action, 155
Advocacy, 358, 359, 362, 366, 367
AEDP. See Accelerated Experiential-Dynamic Psychotherapy
Affect:
  avoidance, 187, 189, 259, 265, 273, 339 See also Alexithymia
data gathering domain in BASIC SID, 27, 29 problem identification with BASIC SID, 43
Affect-focused psychodynamic psychotherapy, 194
Affect phobia, 184, 194, 305, 327
Aging:
  co-occurring disorders, 160
discrimination, 358
elder abuse, and Emergency (CS1), 117, 119, 120
existential issues, 262, 263
Developmental Transition (CS3), 131, 132
gender differences, 132
lengthening of lifespan, 131
Loss and Bereavement (CS4), 135, 138, 139
social support, and, 350–351
AIDS. See HIV/AIDS
Alcohol, excessive use of. See Substance-related disorders and problems
Alcoholics Anonymous, 268. See also 12-step programs
Alexander technique, 182
Alexithymia, 185, 188, 189, 191, 195
Alpert, Richard (Ram Dass), 285
All-or-nothing thinking, 216
AMBIANCE coding system, 36
Ambivalence (relational capacity), 313
American Counseling Association, 166
American Psychiatric Association, 170, 171, 360
American Psychological Association, 14, 93, 103, 146, 148, 166, 280
Americans with Disabilities Act (ADA), 167, 367
Anchoring (conditioning technique), 246
Anger problems, 220, 221, 274
Anima/animus, 324
Anorexia nervosa. See Eating disorders.
Antabuse, 168, 172
Antecedents and Consequences (BL1), 225, 227–238
definition/explanation, 225, 227
elements, 228, 377, 379, 450
key ideas:
  behavioral principles, 228
  steps in a behavioral analysis, 229–233
  clarify sequences, 232
  clarify social and cultural supports, 231
define (operationalize) behaviors, 229
design intervention plan, 233
discover potent reinforcers, 231
  conduct cost-benefit analysis of change vs. no change, 231–232
  functional analysis, 232–233
  identify antecedents, 230
  identify consequences, 230
  relevant problem areas, 228, 233–235
treatment ideas, 228, 234–238
  behavioral treatment of depression,
  237–238
  client involvement, 234
deal with noncompliance, 237
eliminate and reduce undesired behavior,
  236–237
implement with empathy and flexibility, 235
increase desired behavior, 236
Anxiety/panic disorders:
  Cognitive Models (C), 197, 200, 201, 204, 206, 210, 212, 214, 220, 221, 223
  Crisis, Stressful Situations, Transitions, and Trauma (CS), 113, 126, 130, 132, 138, 140, 145, 148, 150, 152, 154
  Existential and Spiritual Models (ES), 257, 258, 259, 261, 263, 273, 274, 282, 284
  Psychodynamic Models (P), 301, 303, 304, 309, 313, 318, 326
  Social, Cultural, and Environmental Factors (SC), 332, 334, 337, 334, 360
Arbitrary inference, 216
Art, therapeutic use of, 137, 143, 195, 286, 300
As Good as It Gets (movie), 170

Assimilative integration, 17
Atheism, 279
Attachment styles, 138, 144, 303
Attachment theory, 303
childhood trauma, 148
Emotion Focused Therapy, 193,
emotional competence, 184, 186
grieving complications, 138, 144
Interpersonal Therapy, 252,
relational capacities, development of,
313, 323
Time-limited dynamic psychotherapy, 309
Attention deficit/hyperactivity disorder (ADD/ADHD), 36, 171, 201, 235, 335
Attention mechanisms, 215
Attentional control, 203
Attribution error, fundamental, 369–370
Auditory sensory modality (part of VAK), 21
Authenticity, 259, 260, 261–262, 263
Author introduction to this method, 41
Author:
dependence on, 273
problems with, 305
therapist’s level of, 106–107
Autism, 235, 250, 313
Autonomy:
capacities of self, 314
good-enough parenting, 316
impaired, 267–268, 274
Internal Parts (P1), 293
loss of, 167
parental support of, 316
promoting, 102, 269–270, 273, 276
struggles with, 319
young adults and, 278
Average, psychopathology of the (Maslow), 261
Aversive methods, 222, 237, 245
Baby boomers, 76, 132
Balance self and family, 18
BASIC ID. See BASIC SID
BASIC SID:
Activity 3.1: Using the BASIC SID for
Problem Identification, 46, 432–433
components defined, 29–31
Behavior, 29
Affect, 29
Sensation, 30
Imagery, 30
Cognition, 30
Spiritual, 31
Interpersonal, social, and cultural, 31
Drug/Biology, 31
data-gathering tool, 27, 29–32
example, “difficulty completing dissertation,”
29–31
form for using (Form II.A), 421
Lazarus as creator, 27
problem identification, use in, 43–44
spirituality added to Lazarus’s Basic ID, 27
Table 2.2: The BASIC SID, 29–31
Battered women. See Intimate partner violence
Battle of Trenton, 197
BE1 Biological Cause. See Biological
Cause (BE1)
BE2 Medical Interventions. See Medical
Interventions (BE2)
BE3 Mind-Body Connections. See Mind-Body
Connections (BE3)
BE4 Emotional Focus. See Emotional
Focus (BE4)
Beck Depression Inventory, 26
Behavior(s):
data gathering domain in BASIC
SID, 27, 29
evaluation of, for self-direction, 277
in behavioral analysis, 228–233
problem identification with BASIC SID, 43
Behavior modification, 228
Behavior therapy, 228, 238, 252
Behavioral activation, 235, 237, 353
Behavioral analysis, 228–233
Behavioral and learning models (BL), 225–255.
See also specific BL hypotheses
Antecedents and Consequences (BL1), 225,

report writing, 6
suggested readings, 18
single theory versus integrative, 87
teaching skills systematically, 3, 8
three-column worksheet, 88, 380, 450–451
Case formulation standards, 8, 9, 10, 13, 122, 413–414
nos. 1–7 (problem definition), 9, 49–59
standard 1: problems are defined as solvable targets of treatments, 9, 49–50
standard 2: problem titles refer to the client’s real-world problems and current level of functioning, 9, 50–51
standard 3: problem titles are descriptive, designed for a specific client, and justified by the data that have been collected, 9, 51
standard 4: problem titles do not contain theoretical, explanatory concepts, 9, 51–53
standard 5: problem titles reflect the client’s values, not the therapist’s personal or cultural bias, 9, 53–55
standard 6: lumping and splitting decisions are justified in that they lead to good treatment planning, 9, 55–58
standard 7: the problem list is complete and comprehensive, 9, 58–59
nos. 8–11 (outcome goals), 10, 67–71
standard 8: outcome goals are directly related to the problem title and endorsed by the client, 10, 67–69
standard 9: outcome goals do not contain the therapist’s conceptualization, 10, 69–70
standard 10: outcome goals are realistic, attainable, and testable with evidence of client’s real-world functioning, 10, 70–71
standard 11: outcome goals do not contain the “how” of the treatment plan, 10, 71
nos. 12–15 (presentation of database; S and O), 8, 78–86
standard 12: the database does not contain formulation concepts (unless they are quotations from the client), 8, 78–80
standard 13: the database is comprehensive, with sufficient data so that multiple hypotheses can be applied, 8, 80–82
standard 14: the subjective and objective data sections contain the correct type of information, 82–84
standard 15: the subjective section is well organized, appropriately selective, and condensed, 22, 84–86
nos. 16–20 (hypotheses section; H), 12, 87–93
standard 16: the hypotheses are consistent with the database, 12, 87–90
standard 17: the hypotheses section does not introduce new data, 12, 90–91
standard 18: the hypotheses section focuses on the specific problem of the specific client, 91–92
standard 19: hypotheses all lead to treatment plans, 12, 92
standard 20: hypotheses are discussed with professional-level thinking and writing skills, 12, 92–93
nos. 21–28 (plan; P), 13, 95–109
standard 21: the plan is focused on resolving the identified problem and achieving outcome goals, 13, 95–98
standard 22: the plan follows logically from the hypotheses and does not introduce new data or hypotheses, 13, 98–99
standard 23: the plan is informed by knowledge of research literature, 13, 99–100
standard 24: there is clarity regarding strategy; subgoals and process goals; procedures and techniques; priorities and sequencing; and desired client-therapist relationship, 13, 100–103
Case formulation standards (continued)
standard 25: the plan is tailored to the specific client: such factors as gender, ethnicity, sexual orientation, spirituality, and personal values are considered, 13, 103–107
standard 26: the plan is appropriate for the treatment setting, contractual agreements, and financial constraints, 13, 107–108
standard 27: the plan appropriately incorporates community resources and referrals, 13, 108
standard 28: the plan appropriately addresses legal, ethical, and mandated reporting issues, 13, 108–109
Case vignettes for practice:
Allison—feels stuck in a bad relationship, 429, 440–441
Cathy—indecisive about future goals, 430, 441–442
Celeste—depressed and confused, 428–429, 439–440
James—suffering from writer’s block, 430, 442–443
Causality, circular, 193, 333, 335, 338
Cause-effect errors, 34, 210
Change:
challenge client to, 276–277
motivation for, 259, 261, 276
no change as positive outcome, 264, 276, 277
resistance to. See Resistance readiness for. See Stages of Change model
Charles, Ray, 172
Chart notes, 6, 17
Chemistry analogy, 11
Child abuse. See Abuse, child/spousal/elder

Orientation. See Theoretical orientation.
Orientation-based formulations, versus unique/integrative, 16–17

Other-directedness schemas, 207

Outcome goals, 9–10, 61–63, 67–72, 277
abstractness and concreteness levels, 61, 67–68
activities:
4.2: What kind of goal is it?, 71, 436–437
4.3: Practice writing outcome goals, 72, 437
4.4: Outcome goals for Maria, 72, 437–438
benefits of clear definition of, 9, 61, 62–63
culture and goals, 104
errors and corrections:
“Change other” agenda, 70
contains process goals, 70
contains therapist’s conceptualization, 69–70
contains treatment plans, 65, 71
not logically connected to problem title, 68–69
therapist imposes values, 62, 68
too narrow, 61
utopian (unrealistic), 70–71
logical connection to problem titles, 67, 68
operationalized, 64
process goals, differentiating from, 10, 70
reassessment, 9, 10
self-determination and, 277
separate from plans, 71
standards, 10, 67–71
standard 8: outcome goals are directly related to the problem title and endorsed by the client, 10, 67–69
standard 9: outcome goals do not contain the therapist’s conceptualization, 10, 69–70
standard 10: outcome goals are realistic, attainable, and testable with evidence of client’s real-world functioning, 10, 70–71
standard 11: outcome goals do not contain the “how” of the treatment plan, 10, 71
treatment plan focused on achieving (standard 21), 13, 95–98
values, 62, 66, 68

Outcome statements, 63–67
Activity 4.1, developing good outcome statements, 66–67
compare to outcome goal, 63
criteria for outcome statements (PUERE), 63–65

Preliminary problem list, 19
Presenting complaint/problem, 42
Pretherapy orientation, 361
Prevention opportunities, 71, 118, 126, 129, 130, 146–148, 151–152, 163, 362
Priorities (in plan), 96, 101, 103
Problem(s):
compared to normal life difficulties, 42
defined, 6, 41
how to SOHP, 6
presenting, 42
targets for change, 41
Problem definition (creating problem titles), 8–9, 41–48. See also Problem identification.
activities:
3.3: is it a problem title or a conceptualization title?, 53, 434–435
3.4: creating problem titles from your preliminary problem list, 59, 435
collaborative process with client, 47
conceptualization title, compared to problem title, 15, 53, 434–435
elevator example, 48
faulty, 48–49
informed consent and, 47
logical connection to outcome goals, 9–10
lumping and splitting, 55–58
mismatch between problem title and plan, 13, 50
must be solvable, 47
no definable problem, 50
standards, 9, 49–59
standard 1: problems are defined as solvable targets of treatments, 9, 49–50, 413
standard 2: problem titles refer to the client’s real-world problems and current level of functioning, 9, 50–51, 413
standard 3: problem titles are descriptive, designed for a specific client, and justified by the data that have been collected, 9, 51, 413
standard 4: problem titles do not contain theoretical, explanatory concepts, 9, 51–53, 413
standard 5: problem titles reflect the client’s values, not the therapist’s personal or cultural bias, 9, 53–55, 413
standard 6: lumping and splitting decisions are justified in that they lead to good treatment planning, 9, 55–58, 413
standard 7: the problem list is complete and comprehensive, 9, 58–59, 413
umbrella titles with subproblems, 57
values, 53–55
writing problem titles, 12, 47
Problem exploration, 27–28
Problem identification:

Activities:
3.1: Using the BASIC SID for problem identification, 46, 432–433
3.2: Checking domains of functioning for problems and strengths, 46, 433–434

BASIC SID, 43
brainstorming, 43
continuum from a narrow to comprehensive approach, 42
contrast with diagnostic process, 42
domains of functioning, 43, 44–45
impairment lists, 43
presenting problem, 42
sources, 41
strengths and resources, 46
therapist’s values, 42–43
three positions taken by therapists, 42

Problem list, 46
BASIC SID, 43
comprehensive, 43, 58
preliminary, 7, 8, 46
use of domains of functioning list, 44

Problem-oriented method:
author’s introduction to, 41
origin in medicine, 3, 8

Trauma-focused Cognitive Behavior Therapy (TF-CBT), 153
Treatment contract, 106
Treatment plan (P in SOHP): 1, 6, 12–13, 95–109, 413–414
as experiment testing hypothesis, 1
case management discussion, 101
concepts for tailoring treatment:
  client’s reactance, 107
culture, 103–106
readiness to change, 106
structure, amount of, 106
therapist’s level of authority, 106–107
community resources, 108
components of:
  client-therapist relationship, 96, 100–101, 102
duration and frequency, 97, 107
modality (format), 97
process goals, 96
setting, 97
strategy, 95, 96
subgoals or intermediate objectives, 96, 107
Table 7.1: Components of Treatment Plans, 96–97
technique or procedure, 96
culturally tailored interventions (cultural adaptation), 104–106
errors and corrections:
hypotheses not followed up in plan, 98–99
ideas in plan without foundation in hypotheses section, 98–99
introduces new data or hypotheses, 98
lack of logical connection to hypotheses, 98–99
not focused on problem and outcome goal, 98
report outline, 101, 419
sequencing interventions, 101, 103, 107
setting priorities, 103
staages of therapy in the plan, 13, 101
standards 21–28 (plan; P), 13, 95–109
standard 21: the plan is focused on resolving the identified problem and achieving outcome goals, 13, 95–98, 413
standard 22: the plan follows logically from the hypotheses and does not introduce new data or hypotheses, 13, 98–99, 413
standard 23: the plan is informed by knowledge of research literature, 13, 99–100, 414
standard 24: there is clarity regarding strategy; subgoals and process goals; procedures and techniques; priorities and sequencing; and desired client-therapist relationship, 13, 100–103, 414
standard 25: the plan is tailored to the specific client: such factors as gender, ethnicity, sexual orientation, spirituality, and personal values are considered, 13, 103–107, 414
standard 26: the plan is appropriate for the treatment setting, contractual agreements, and financial constraints, 13, 107–108, 414
standard 27: the plan appropriately incorporates community resources and referrals, 13, 108, 414
standard 28: the plan appropriately addresses legal, ethical, and mandated reporting issues, 13, 108–109, 414
suggested readings, 25
termination, 95, 101, 107, 108,
three-column worksheet, 95, 98
treatment ideas for 30 core clinical hypotheses, 416–418 (see also treatment ideas under each specific hypothesis)
treatment manuals, 96, 100, 106, 107
writing plans, 107, 381–382
Treatment manuals. See Manualized treatment
Trial and error, 3, 13
Triangulation, 334, 337, 340

Umbrella titles with subproblems, 57
Unconscious Dynamics (P4), 289, 324–330
definition/explanation, 289, 324
euamples, 324–325, 377, 443, 457
key ideas:
  compromise formations, 326
  concept of the unconscious, 325
defense mechanisms, 325
disowned selves, 325
dissociative reactions, 327
explaining irrationality and resistance, 327
projective identification, 328
risk of implanting false memories, 326
support from cognitive neuroscience, 325
neurotic functioning, 325–326
relevance of other hypotheses:
Conditioned Emotional Responses (BL2), 327
Deficits of Self and Relational Capacities (P3), 326
Emotional Focus (BE4), 327
Internal Parts (P1), 325
when other hypotheses do not lead to therapeutic change, 327
relevant problem areas, 324, 326–327
suggested readings, 330
treatment ideas, 289, 327–330, 418
art therapy, 329
dream analysis, 329
free association and interpretation, 328
hynotherapy, 329–330
projective tests, 327
using countertransference, 328–329
using neurotic transference, 328
Underachievement schema, 210
Unfinished business, 112, 192, 296, 301, 308
Universal quantifier, 33
Unspecified verb, 33
Utopian versus realistic goals, 64, 70
Utopian syndrome, 208–209
VAK (visual/auditory/kinesthetic) modalities, 21
Values:
clarification, 266, 277
client’s values conflicting with therapist’s, 66, 69
outcome goals and, 62, 63, 65, 68
Viagra, 172
Vicarious traumatization, 149, 151
Victim(s):
appropriate use of term, 271
notification of intended. See Tarasoff
of child, spousal, and elder abuse, 121, 124
of religious prejudice and persecution, 279, 283
of violent crime, 147, 148
Victim, Persecutor, and Rescuer, 299
Vietnam era, 77
Violence:
Domestic, 124
Family, 120
managing violent clients, 122
reporting abuse and intentions of, 119
screening risk of, 117, 119–120, 172
victims of, 124, 148
Virtual reality exposure, 241, 242
Visual sensory modality (part of VAK), 21
Voice Dialogue, 296, 297–298
Voice Therapy, 296, 298
Vulnerabilities (risk factors), 125, 144, 146, 149, 346
Vulnerable inner parts of personality, 290, 293, 296, 298, 302, 314
“Want” versus “should,” 277
Weight management problems, 172, 179, 295
When Bad Things Happen to Good People (book), 143, 287
When Harry Met Sally (movie), 81–82
White privilege, 360
WIFM, 62
Will, 272, 275, 276, 277, 332
Work stress, 355–356
Worksheet, three-column. See Three-column worksheet
Wraparound programs, 359
Writing activities in therapy, 143, 299–300
Yoga, 181, 285
