List of Contributors  
Preface  

1  Introduction: The Increasing Demand for Functional Foods  
*Natália Martins, Patricia Morales, Lillian Barros, and Isabel C. F. R. Ferreira*

1.1  Food Patterns: A Cross-sectional Approach and Brief Overview  
1.2  Nutrition and Health: Facts and Tendencies  
1.2.1  Evidence-based Medicine: Past to Present  
1.2.2  Modern Food Patterns: An (Un)Healthy Yield  
1.3  Functional Foods Diversity and Related Applications: A World of (Un)Explored Biofunctionalities  
1.3.1  Food and Dietary Supplements, Botanicals, and Nutraceuticals: Clarifying Misinterpreted Concepts  
1.4  Functional Foods Versus Bioactive Molecules: Hierarchies and Regulatory Practices  
1.5  Challenges and Opportunities: A Multidimensional Perspective  
1.6  Conclusion  

References  

2  The Numbers Behind Mushroom Biodiversity  
*Anabela Martins*

2.1  Origin and Diversity of Fungi  
2.2  Ecological Diversity  
2.2.1  Freshwater Fungi  
2.2.2  Marine Fungi  
2.2.3  Endophytes of Plant Leaves and Stems  
2.2.4  Fungi from Arthropod and Invertebrate Animals  
2.3  Global Diversity of Soil Fungi  
2.4  Wild Edible Fungi  
2.4.1  Diversity of Wild Edible Mushrooms  
2.4.2  Medicinal Mushrooms  
2.5  Cultivation of Edible Fungi  
2.6  Social and Economic Interest in Edible Mushrooms  
2.7  Edible Mushroom World Production and Commercialization  
2.8  Conclusion

3 The Nutritional Benefits of Mushrooms 65
Carolina Barroetaveña and Carolina V. Toledo

3.1 Introduction 65
3.2 Nutritional Properties of Mushrooms 66
  3.2.1 Proteins and Amino Acids 66
  3.2.2 Carbohydrates: Available Carbohydrates and Dietary Fiber 69
  3.2.3 Lipids 71
  3.2.4 Energetic Value/Caloric Content 72
  3.2.5 Ash and Mineral Elements 73
3.3 Vitamins 73
3.4 Conclusion 75

References 76

4 The Bioactive Properties of Mushrooms 83
Marina Soković, Ana Ćirić, Jasmina Glamočlija, and Dejan Stojković

4.1 Introduction 83
4.2 Antimicrobial Activity of Edible and Medicinal Fungi 84
  4.2.1 Antibacterial Activity of Mushroom Extracts 84
  4.2.2 Compounds Isolated from Mushrooms as Bacterial Growth Inhibitors 84
  4.2.3 Antifungal Activity of Crude Mushroom Extracts 92
  4.2.4 Isolated Compounds from Mushrooms Express Antifungal Potency 93
4.3 Mushrooms as a Reliable Source of Antioxidants for Disease Prevention 95
4.4 Could Mushrooms Be Used as Cytotoxic and Antitumor Agents? 100
  4.4.1 Cytotoxic Features of Wild Mushroom Extracts 100
  4.4.2 Mushroom Polysaccharides, β-, and α-Glucans as Antitumor Agents 100
  4.4.3 Cytotoxic Potency of Terpenoids and Related Compounds from Mushrooms 104
  4.4.4 Mushroom Sterols Inhibit the Growth of Carcinoma Cell Lines 104
4.5 Controlling Obesity, Metabolic Syndrome, and Diabetes Mellitus with Mushrooms 108
4.6 Conclusion 111

References 111

5 The Use of Mushrooms in the Development of Functional Foods, Drugs, and Nutraceuticals 123
Humberto J. Morris, Gabriel Llauradó, Yaixa Beltrán, Yamila Lebeque, Rosa C. Bermúdez, Nora García, Isabelle Gaimé-Perraud, and Serge Moukha

5.1 Introduction 123
5.2 A Window into the “Garden” of a Novel Class of Products 125
5.3 Main Uses of Edible Medicinal Mushrooms in the Age of Human Health Crises 127
  5.3.1 Mushrooms as Functional Foods: A Paradigm of Integrating Tradition and Novelty 128
  5.3.1.1 Proven Functional Properties 129
8  Nutrients and Bioactive Compounds in Wild Fruits Through Different Continents 263
Virginia Fernández-Ruiz, Patricia Morales, Brígida María Ruiz-Rodríguez, and Esperanza Torija Isasa
8.1  Introduction  263
8.2  African Wild Fruits as a Source of Nutrients and Bioactive Compounds 264
8.3  American Wild Fruits as a Source of Nutrients and Bioactive Compounds 273
8.4  Asian Wild Fruits as a Source of Nutrients and Bioactive Compounds 287
8.5  European Wild Fruits as a Source of Nutrients and Bioactive Compounds 291
8.6  Conclusion 306
References 306

9  Wild Plant-Based Functional Foods, Drugs, and Nutraceuticals 315
José Pinela, Márcio Carocho, Maria Inês Dias, Cristina Caleja, Lillian Barros, and Isabel C. F. R. Ferreira
9.1  Introduction 315
9.2  Wild Plants and Functional Foods 316
9.2.1  The Concept and Recent Trends in Functional Foods 316
9.2.2  Classification and Development of Functional Foods 318
9.2.3  Wild Plants Used as Functional Foods 319
9.3  Wild Plant-Based Nutraceuticals 326
9.3.1  The Emerging Concept and Applications of Nutraceuticals 326
9.3.2  Recent Advances in Formulations for Nutraceuticals 328
9.3.3  Examples of Nutraceuticals Based on Wild Plants 329
9.4  Wild Plant-Based Drugs 335
9.4.1  From the Bioactive Phytochemical to the Active Principle 335
9.4.2  Common Formulations in Drugs from Plant Origin 337
9.4.3  Wild Plant-Based Drugs for Different Therapeutic Targets 340
9.5  Conclusion 341
References 342

10  Nuts: Agricultural and Economic Importance Worldwide 353
Albino Bento, Paula Cabo, and Ricardo Malheiro
10.1  Introduction 353
10.2  Almond 354
10.2.1  Evolution of Almond Production and Trade Facts 356
10.2.2  Consumption of Almonds Worldwide 357
10.3  Chestnut 359
10.3.1  Evolution of Chestnut Production and Trade Facts 360
10.3.2  Consumption of Chestnuts Worldwide 362
10.4  Hazelnut 362
10.4.1  Evolution of Hazelnut Production and Trade Facts 365
10.4.2  Consumption of Hazelnuts Worldwide 367
10.5  Walnut 367
10.5.1  Evolution of Walnut Production and Trade Facts 369
10.5.2  Consumption of Walnuts Worldwide 374
10.6  Conclusion 374
References 374
11 Recent Advances in Our Knowledge of the Biological Properties of Nuts 377
Ryszard Amarowicz, Yi Gong, and Ronald B. Pegg

11.1 Introduction 377

11.2 Nuts as a Source of Nutrients, Phytosterols, and Natural Antioxidants 378

11.2.1 Nuts as a Source of Energy and Macronutrients 378
11.2.2 Biological Value of Nut Proteins 378
11.2.3 Nuts as a Source of Vitamins and Minerals 378
11.2.4 Nuts as a Source of Essential Fatty Acids and Phytosterols 382
11.2.5 Phenolic Compounds Originating from Tree Nuts as Natural Antioxidants 382

11.3 Health Benefits of Nuts 389

11.3.1 Health-Promoting Properties of Nuts 389
11.3.2 Nuts and Body Weight Control 389
11.3.3 Nuts and Cardiovascular Disease 389
11.3.4 Nuts and Diabetes 393
11.3.5 Nuts and Cancer 395
11.3.6 Application of Nuts in the Functional Food Industry 398

11.4 Tree Nuts and Allergy 399

11.5 Conclusion 401

References 401

12 Nuts as Sources of Nutrients 411
João C. M. Barreira, M. Beatriz P. P. Oliveira, and Isabel C. F. R. Ferreira

12.1 Prunus dulcis (Miller) D. A. Webb (almond) 411
12.1.1 Botanical Aspects and Geographical Distribution 411
12.1.2 Main Applications and Nutritional Overview 411
12.1.3 Major Components 412
12.1.4 Minor Components 417

12.2 Castanea sativa Miller (Chestnut) 418
12.2.1 Botanical Aspects and Geographical Distribution 418
12.2.2 Main Applications and Nutritional Overview 418
12.2.3 Major Components 418
12.2.4 Minor Components 419

12.3 Corylus avellana L. (Hazelnut) 420
12.3.1 Botanical Aspects and Geographical Distribution 420
12.3.2 Main Applications and Nutritional Overview 420
12.3.3 Major Components 420
12.3.4 Minor Components 421

12.4 Juglans regia L. (Walnut) 422
12.4.1 Botanical Aspects and Geographical Distribution 422
12.4.2 Main Applications and Nutritional Overview 422
12.4.3 Major Components 422
12.4.4 Minor Components 423

12.5 Conclusion 423

References 424
13 The Contribution of Chestnuts to the Design and Development of Functional Foods 431
Ariane Mendonça Kluczkovski
13.1 Introduction 431
13.2 Chestnut Composition 431
13.3 Biotechnology and Safety 435
13.3.1 Functional Properties and Health Effects 435
13.3.1.1 Antioxidants 436
13.3.1.2 Prebiotics 437
13.3.1.3 Gluten-Free Products 438
13.3.2 Functionality of Chestnut Products 439
13.4 Conclusion 440
References 441

14 Emerging Functional Foods Derived from Almonds 445
Isabela Mateus Martins, Qianru Chen, and C. Y. Oliver Chen
14.1 Introduction 445
14.2 Overview of Almond Nutrients 446
14.3 Health Benefits and Bioactions of Almonds 447
14.3.1 Cholesterol Reduction 447
14.3.2 Glucose Regulation 451
14.3.3 Antiinflammation 451
14.3.4 Antioxidation 453
14.3.5 Body Weight Control 456
14.3.6 Prebiotics 458
14.4 Development of Functional Foods with Almonds 459
14.5 Conclusion 462
