Subject Index

Page references followed by *fig* indicate an illustrated figure. Followed by *t* indicate a table.

A
Action research. *See* Participatory Action Research (PAR); Qualitative action research

Arts-based research: associated with critical or postmodern inquiry, 283; description of, 10–11, 283; issues to consider when deciding to use, 331–333; performance autoethnographies of children with dyslexia, 284, 287–306, 313–315; on preparing teachers for high needs school using ethnodrama, 284, 317–329; research design used for, 10–11, 283–284

Audit trail: description of, 31t; function of, 28

Autoethnographies: on author’s sojourner experience in Iceland, 163–177; Chandra (Guyanese immigrant), 240–241, 243–253, 256–257; member checks during process of, 183; researcher reflections on narrative approach to, 280–282; on seeking ADHD assessment referrals, 241, 259–277; students with dyslexia, 287–306; unique nature of methodology used in, 162–163

B
Basic interpretive qualitative research. *See* Interpretive qualitative research

Biases of researchers, 5–6, 27

C
Categories. *See* Data categories

Classroom journals, 320

Community Based Appraisal, 368

Community Based Evaluation, 368

Community-Based Participatory Research, 368

Conceptual (or theoretical) framework: Celeste A. Wheat’s reflections on use of, 85–86; description of, 34; Lilian H. Hill’s reflections on use of, 84–85; of mentoring women leaders study, 61–62; Performance Ethnographic (PE), 294–295

Constant comparative method: deriving categories from the data, 186; grounded theory research guided by, 185–186

Constructivist grounded theory: advantages of using, 235–236; located within interpretivist tradition, 236; researcher reflexivity role in, 236–237

Context shaping design, 54–56

Critical friend: description of a, 137; sojourner seeking a Host Country National (HCN), 173, 185
Critical social science research: arts-based research associated with, 283; description of, 4
Critical theory, 4
Culture: as cornerstone of ethnography, 135, 136; influence on self-esteem, 288–289; North American youth leisure and boxing, 139–153; sojourner adaptation into new, 177; a sojourner’s autoethnography of experience in Iceland, 161–177; teacher preparation using ethnodrama findings on, 322–326

D
Data: the eVVM OPD course coding and, 199t, 200; grounded theory as driven by, 212–213. See also Data categories
Data analysis: boxing culture and North American youth leisure study, 144–145; constant comparative method of deriving categories during, 186; EOL patient/physician communication study, 418–421; the eVVM OPD course study data collection and, 195–200; family leisure phenomenological study, 97; Malay traditional healers study, 42–43; mentoring women leaders study, 66–67; method section on, 22; mixed-methods research design issue of, 410; QSR NVivo software for, 144; qualitative study design step of, 15–16; SPSS software for, 372; teacher preparation study, 320–321; Yik Yak messaging app study coding and categories, 398–399
Data categories: constant comparative method for deriving subcategories and, 186; the eVVM OPD course coding and, 199t–200; Yik Yak messaging app study coding and, 398–399. See also Data
Data collection: adequate engagement in, 31; boxing culture and North American youth leisure study interviews, 141–144; EOL patient/physician communication study, 417–418; ethnography approach to, 136; the eVVM OPD course data analysis and, 195–200; family leisure phenomenological study, 96–97; Malay traditional healers study, 41–42, 56; mentoring women leaders study, 65–66; method section on, 21–22; mixed-methods research design issue of, 410; open educational practices (OEP) study rigor and, 221; Performance Ethnographic (PE) study, 297; prosthesis user interviews, 117; qualitative study design step of, 14–15; teacher preparation study, 319–320
Demographics: end-of-life (EOL) patient/physician communication study, 417; Hartford community PAR project participants, 336–337, 365–383; mentoring study on women leaders age differences, 72–73; mentoring study on women leaders generational differences, 72–73
Dependability: description of, 27–28; ensuring qualitative research study, 28–29; mentoring women leaders study, 66–67
Discussion: what to look for in the, 23
Drama: benefits of socio-dramatic play on children with dyslexia, 291–292; conceptual framework of Performance Ethnographic (PE), 294–306; different factors to help bring out potential during, 292–293;
ethnodrama to prepare teachers for high needs schools, 284, 317–329; issues to consider for deciding on arts-based research using, 331–333; Malta Dyslexia Association’s organized project of, 313–315; Performance Ethnographic (PE) study on students with dyslexia and, 294–305; reflective learning through, 293–294; research findings on self-esteem improved through, 290–291, 293–294. See also Performance autoethnographies

E
Embodied ethnography: boxing culture and serious leisure of North American youth, 139–153; description and use of body in, 142, 158, 159; unique type of personal narratives and reflexivity in, 158–159
Ethical issues: evaluating qualitative research study, 29–30; Institutional Review Board (IRB) protocols for, 144, 369; Performance Ethnographic (PE) study, 296; prosthesis user study, 117; unintended presence of partner during phenomenological interview, 131–133
Ethnographies: autoethnographic approach to, 161–177; boxing culture and serious leisure of North American youth, 139–153; different formats used to present, 136–137; embodied, 139–153, 158–159; fieldwork and data collection for, 136
Ethnography: “critical friend” concept in, 137, 173, 185; culture as the cornerstone of, 135, 136; description and applications of, 8–9, 135–137; embodied, 142–144; research design used for, 8–9
Evaluating qualitative research: to ensure “quality” of study, 23–25; ethical issues, 29–31; external validity, generalizability, or transferability, 28–29; issues to consider when, 19; reliability or dependability, 27–28; summary of strategies to ensure rigor, 31; validity, 26–27; what to look for when, 20–23

F
Feminist qualitative research: description of, 4; mentoring women leaders study, 34–35, 57–79; varied data collection and analysis strategies used in, 64
Findings: form used to assess qualitative research, 24; what to look for in the, 22–23.

G
Generic qualitative research, 34
Good Reporting of a Mixed Methods Study (GRAMMs), 426
Grounded theory: comparing thematic analysis and, 213–214; constructivist, 235–237; as data-driven, 212–213; description and research design used for, 9–10, 185; interviews and observations as primary sources in, 185; online professional development programs for vaccine management study, 186–187; open educational practices (OEP) model developed through, 187; Pandit on corporate turnaround using, 185
Grounded theory research design: description of, 9–10; guided by constant comparative method, 185–186
I
Institutional Review Board (IRB), 144, 369
Interpretive qualitative research: description and overview of, 33–35; Malay traditional healers study, 34, 37–51; primary goal of uncovering meanings, 35
Interpretive/constructivist (or critical) perspective: description of, 4; qualitative research design using, 7–8
Interviews: boxing culture and North American youth leisure study, 141–144; grounded theory informed by observations and, 185; prosthesis user, 117; situation during ADHD assessment referrals stories, 281–282; teacher preparation study, 320; youth and adults seeking ADHD assessment referrals, 241, 259–277. See also Narrative inquiries

M
Maximum variation, 31t
Member checks: autoethnography and process of, 183; description of, 31t; to ensure validity, 26
Method section: form used to assess qualitative research, 24t; what to look for to evaluate, 21–22. See also specific study
Mixed-methods research design: to answer complex healthcare question, 431–433; choosing your method or methods for a, 409–410; collecting and analyzing data issues of, 410; description and application of, 11–12, 385–387; EOL patient study on preferred physician communication using, 387, 413–427; explanatory sequential or “embedded,” 386; Good Reporting of a Mixed Methods Study (GRAMMs), 426; “way of thinking” specific to, 385; Yik Yak messaging app study using, 386, 389–403, 409–411

N
Narrative inquiries: assessing people’s stories about a phenomenon in, 34; Chandra (Guyanese immigrant), 240–241, 243–253, 256–257; Danzak on researcher experience with, 255–257; description and power of, 10, 239; research design used for, 10; several methodologies used to analyze stories in a, 239–241; on stories of seeking ADHD assessment referrals, 241, 259–277. See also Interviews; Stories

O
Observations: boxing culture and North American youth leisure study, 139–153; the eVVM OPD course study data collection and, 195–199; grounded theory informed by interviews and, 185

P
Participants: end-of-life (EOL) patient/physician communication study, 415–416t; family leisure phenomenological study, 95–96; Malay traditional healers study, 41–42; mentoring women leaders study, 64–65; open educational practices (OEP) study, 219–220t, 222t; Performance Ethnographic (PE) study, 296; prosthesis user study, 115–116t; teacher preparation study, 319; youth with dyslexia becoming
researchers as well as, 313–315.
See also Sample selection
Participatory Action Research (PAR): Hartford’s community improvement project using, 336–337, 365–379; historical roots of the, 366–367; literature review on, 366–368; reflections on trusting process of, 382–384; sample selection advantages of, 379

Participatory Research, 368
Peer review: description of, 31t; to ensure validity, 26–27
Performance autoethnographies: of children with dyslexia, 284, 291–306; on factors to help bring out potential during drama, 292–293; issues to consider for deciding on arts-based approach of, 331–333; preparing teachers for high needs school using ethnodrama, 284, 317–329; youth with dyslexia reporting on their experience, 313–315. See also Drama
Phenomenological research: Bongaardt on phenomenological experiences of hiking trip, 109–111; on becoming prosthesis user following loss of a leg, 113–127; leisure affordance and family hiking trip, 92–105; Reflective Lifeworld Research (RLR) approach to, 88; unintended presence of partner during interview, 131–133
Phenomenology: description and research design used for, 8; scholarship roots and applications of, 87–88
Postmodern feminist theoretical framework: Celeste A. Wheat’s reflections on using, 85–86; used in mentoring women leaders study, 34–35, 57–79. See also Feminist qualitative research
Postmodern qualitative research: arts-based research associated with critical or, 283; description of, 4–5
Purposeful sampling, 14

Q
QSR NVivo software, 144
Qualitative action research: description and designing, 11, 335–337; Hartford’s neighborhood improvement PAR project, 336–337, 365–379, 382–384; Irizarry’s youth participatory action research (YPAR) study example of, 336; “real world needs” basis of, 335; researcher’s reflections and suggestions on, 361–364; Seaman’s High School’s transformational change case study, 336, 339–355, 361–364; trusting process of PAR approach to, 382–384
Qualitative research: basic interpretive, 33–35; inductive process of, 6; journals on, 3; as richly descriptive, 6; understanding the nature of, 3–6
Qualitative research designs: how context shapes implementation and, 54–56; introduction to the traditions and types of, 6–12. See also specific research design
Qualitative researchers: identifying biases or subjectivities of the, 5–6; inductive process used by, 6; as primary instrument for data collection and data analysis, 4
Qualitative study design: data collection and analysis, 14–15; representing qualitative research in, 15–16;
research problem, question, and sample selection, 12–14
Quality: ensuring the qualitative research, 23, 25; form used to assess qualitative research, 24t;
questionnaire, 417, 419, 422–426
Questions. See Research questions

R
Reflective Lifeworld
Research (RLR), 88
Reflectivity. See Researcher reflexivity
Reliability. See Researcher reflectivity
Reliability: boxing culture and North American youth leisure study, 145–146; description of, 27–28; ensuring qualitative research study, 28
Research problems: description of the, 12; as first step in design of qualitative study, 12–13; form used to assess qualitative research, 24t; what to look for to evaluate the, 20–21
Research questions: as first step in design of qualitative study, 12–13; as focus of ADHD assessment referrals stories, 260; mixed-methods research to answer complex healthcare, 431–433; Seaman’s High School case study design and addressed, 341–355; what to look for to evaluate the, 20
Researcher reflectivity: constructivist grounded theory and role of, 236–237; description of, 27, 31t; on narrative approach to autoethnographical stories, 280–281; promoting trustworthiness and rigor, 31t
Researchers: Hartford community PAR project role of, 369; identifying biases of the, 5–6; reflections and suggestions on action research by, 361–364; reflexivity of, 235–237; “researcher’s position” strategy, 27, 31t; students with dyslexia participants becoming, 313–315
“Researcher’s position” strategy, 27, 31t
Rich, thick description strategy, 29, 31t
Rigor: open educational practices (OEP) study data collection and, 221; researcher reflectivity promoting trustworthiness and, 31; summary of strategies to ensure, 31t

S
Sample selection: maximum variation in, 31t; method section on, 21; PAR advantages related to, 379; purposeful sampling, 14; qualitative study design step of, 13–14. See also Participants
Saturation, 27
Social media: mixed method research for data on, 410–411; as sojourner’s homesickness coming from, 175. See also Technologies
Social movement theory, 377
Spouses/partners: as informal mentors, 74; phenomenological interview and unintended presence of, 131–133
SPSS software, 372
Standpoint Theory, 314
Stories: Chandra (Guyanese immigrant), 240–241, 243–253, 256–257; narrative inquiry assessing people’s, 34; on seeking ADHD assessment referrals, 241, 259–277. See also Narrative inquiries
Subjectivities: clarifying in order to ensure validity, 27; identifying the researcher, 5–6

T
Technologies: professional learning (PL) interactions facilitated
by, 205; QSR NVivo software, 144; SPSS software, 372. *See also* Social media

**Thematic analysis**, 213–214

**Theoretical framework. See Conceptual (or theoretical) framework**

**Triangulation**: description of, 31; to ensure validity, 26; Yik Yak messaging app study use of, 397, 398

V

**Vaccine Vial Monitor (VVM)**

ODP course: grounded theory used to develop, 186–187;

study on professional learning through, 194–209

**Validity**: boxing culture and North American youth leisure study, 145–146; clarifying subjectivities to ensure, 27; member checks used to ensure, 26, 31; mentoring women leaders study, 66–67; peer review to ensure, 26–27, 31; triangulation to ensure, 26, 31

Y

**Youth participatory action research (YPAR) study** [Irizarry, 2013], 336
