## Contents

Preface xi  
Acknowledgment xiii  

### SECTION 1  INTRODUCTION

1  Introduction to Intervention Research 3  
   1.1  Overview of paradigm shift 4  
   1.1.1  Evidence-based practice: a review 5  
   1.1.2  Client-centered care 7  
   1.1.3  High-quality care redefined 9  
   1.2  Process for designing, evaluating, and translating interventions 11  
   1.2.1  Design of interventions 11  
   1.2.2  Evaluation of interventions 12  
   1.2.3  Translation of interventions 13  
   1.3  Overview of the book 14  

### SECTION 2  DESIGNING INTERVENTIONS

2  Overview of Designing Interventions 17  
   2.1  Nursing interventions defined 17  
       2.1.1  Definition of interventions 17  
       2.1.2  Characteristics of interventions 19  
   2.2  Presenting problems 21  
       2.2.1  Definition of problem 21  
       2.2.2  Characteristics of problems 21  
   2.3  Design of interventions 23  

3  Understanding the Problem 27  
   3.1  Theoretical approach for understanding the problem 27  
   3.2  Empirical approach for understanding the problem 31  
   3.3  Experiential approach for understanding the problem 35  
   3.4  Combined approach for understanding the problem 40  
   3.5  Theory of the problem 42
vi Contents

4 Clarifying Elements of the Intervention 43
  4.1 Theory-based approach for designing interventions 43
  4.2 Empirical approach for designing interventions 49
  4.3 Experiential approach for designing interventions 53
    4.3.1 Focus group 53
    4.3.2 Concept mapping 54
    4.3.3 Assessment of treatment preferences 54
  4.4 Specification of interventions 56
    4.4.1 Intervention goals 56
    4.4.2 Intervention components and activities 56
    4.4.3 Intervention mode of delivery 57
    4.4.4 Intervention dose 59

5 Intervention Theory 61
  5.1 Delineation of intervention outcomes 61
  5.2 Intervention theory 64
    5.2.1 Structure 64
    5.2.2 Process 68
    5.2.3 Outcome 68
  5.3 Utility of intervention theory 71

6 Tailored Intervention 73
  6.1 Design of tailored interventions 74
    6.1.1 Intervention theory 74
    6.1.2 Identification of client characteristics for tailoring 75
    6.1.3 Assessment of client characteristics 76
    6.1.4 Construction of a list of intervention strategies 76
    6.1.5 Development of algorithm 78
  6.2 Effectiveness of tailored interventions 81
  6.3 Mechanisms underlying effects of tailored interventions 82

SECTION 3 IMPLEMENTATION OF INTERVENTIONS

7 Overview of Implementation of Interventions 85
  7.1 Variations in intervention implementation 85
  7.2 Consequences of variations in intervention implementation 90
  7.3 Strategies to enhance intervention implementation 91

8 Development of Intervention Manual 93
  8.1 Procedure for developing the intervention manual 93
    8.1.1 Contextual characteristics 94
    8.1.2 Process 94
Contents

8.2 Content of the intervention manual 95
  8.2.1 Section I: overview of the intervention 95
  8.2.2 Section II: human and material resources 97
  8.2.3 Section III: procedure 100
8.3 Use of the intervention manual 108

9 Selecting, Training, and Addressing the Influence of Interventionists 111
  9.1 Traditional perspective on interventionist influence 112
  9.2 Interventionist influence: the evidence 113
  9.3 Selection of interventionists 116
  9.4 Training of interventionists 119
  9.5 Methodological features of studies aimed at investigating interventionist effects 123

10 Intervention Fidelity 125
  10.1 Definition of fidelity 125
  10.2 Methods for monitoring fidelity 129
    10.2.1 Theoretical fidelity 130
    10.2.2 Operational fidelity 133
  10.3 Importance of monitoring fidelity of intervention implementation 143

SECTION 4 EVALUATION OF INTERVENTIONS

11 Overview of Evaluation of Interventions 149
  11.1 Criteria for inferring causality 149
  11.2 Phases for intervention evaluation 154
    11.2.1 Phase I 154
    11.2.2 Phase II 155
    11.2.3 Phase III 158
    11.2.4 Phase IV 160
  11.3 Role of intervention theory 161

12 Testing the Acceptability and Feasibility of Interventions 163
  12.1 Acceptability of interventions 164
    12.1.1 Conceptualization of intervention acceptability 165
    12.1.2 Operationalization of intervention acceptability 167
  12.2 Feasibility of interventions 180
    12.2.1 Definition of feasibility 180
    12.2.2 Indicators of feasibility 181
  12.3 Feasibility of research methods 185
    12.3.1 Recruitment procedures 186
    12.3.2 Screening 188
12.3.3 Randomization 189
12.3.4 Retention 191
12.3.5 Data collection 192
12.4 Design of pilot study 193

13 Examining the Efficacy of Interventions 197
13.1 Factors affecting the causal relationship between intervention and outcomes 198
13.1.1 Conceptual factors 198
13.1.2 Methodological factors 200
13.1.3 Addressing conceptual and methodological factors 201
13.2 Design features of an efficacy study 201
13.2.1 Careful selection of participants 219
13.2.2 Control of experimental condition 222
13.2.3 Selection of comparison group 223
13.2.4 Allocation of participants to groups 228
13.2.5 Standardized treatment implementation 230
13.2.6 Outcome measurement 231
13.2.7 Outcome data analysis 231

14 Determining the Effectiveness of Interventions 233
14.1 Efficacy versus effectiveness: A brief review 234
14.2 Limitations of the RCT design in effectiveness research 235
14.2.1 Unrepresentativeness of the sample 235
14.2.2 Highly select setting 236
14.2.3 Limited applicability of interventions 237
14.2.4 Irrelevance of comparison treatment 238
14.2.5 Limited utility of randomization 239
14.2.6 Limited relevance of findings 240
14.3 Alternative designs for evaluating effectiveness 241
14.3.1 Overall function or goal 241
14.3.2 Broad representative sample 241
14.3.3 Selection of different settings 242
14.3.4 Comparison of clinically relevant alternative treatments 242
14.3.5 Assessment of relevant health outcomes at follow-up 243
14.3.6 Allocation to treatment 243
14.3.7 Additional features 245

15 Preferences for Treatment 251
15.1 Conceptualization of treatment preferences 251
15.1.1 Factors influencing treatment preferences 252
15.1.2 Consequences of treatment preferences 253
15.2 Mechanisms underlying influence of treatment preferences in intervention research 254
15.2.1 Influence of treatment preferences on external validity 254
15.2.2 Influence of treatment preferences on internal validity 256
15.2.3 Research designs accounting for treatment preferences 258

SECTION 5 TRANSLATION OF INTERVENTIONS

16 Translation of Interventions 263
  16.1 Systematic review of evidence 264
  16.2 Translation of evidence 265
  16.3 Transfer of guideline to practice 268
     16.3.1 Adaptation of guideline 268
     16.3.2 Dissemination and implementation of guideline 270
