Contents

Dedication, vi
Foreword, vii
Preface, viii
1 An Overview of Endobronchial Ultrasonography, 1
2 Anatomy of Mediastinal and Hilar Area, 16
3 How to Perform Endobronchial Ultrasonography, 26
4 Endobronchial Ultrasound-Guided Transbronchial Needle Aspiration (EBUS-TBNA), 36
5 Tips and Difficulties in EBUS-TBNA, 52
6 Endoscopic Ultrasound-Guided Mediastinal Lymph Node Aspiration for Lung Cancer Diagnosis and Staging, 59
7 Qualitative Analysis of Peripheral Pulmonary Lesions Using Endobronchial Ultrasonography, 62
8 EBUS-Guided Peripheral Pulmonary Nodule Biopsy, 73
9 Diagnosis of Peripheral Pulmonary Lesions Using Endobronchial Ultrasonography with a Guide Sheath, 89
10 Endobronchial Ultrasonographic Analysis of Airway Wall Integrity and Tumor Involvement, 96
11 EBUS in Interventional Bronchoscopy, 111
12 Future Directions for Endobronchial Ultrasonography, 118
13 Case Reports, 120
Appendix: Videos, 160
Index, 162

Companion DVD

This book has a companion DVD with:

- A searchable database of 36 video clips showing procedures described in the text
- All clips are referenced in the text where you see this icon:
