INDEX

Page numbers in italics refer to figures.

A
Acciona Infrastructure:
ETFE-MFM (research project), 131, 133
active chilled beams, 139, 139
adaptive living interface system (ALIS), 165, 168
additive methods, of digital fabrication, 112, 113
alumina foams, 36–37
ALIS (adaptive living interface system), 165, 168
amorphous silicon cells, 51, 53
analytical methods, 112
architectural design:
Antoine Predock Architect PC:
analyses, 165
architecture, biomimetic, 41
architectural firms, roles in, 173, 174
artificial life, of King Fahad National Library, 201
AS (architectural science), 163
automated chilled beams, 139
B
BAS (building automation systems), 49, 151, 156
Belectric:
ETFE-MFM (research project), 131, 133
BIM, see Building Information Modelling
biomaterials, 39–43, 41
biomimetic architecture, 41
Brussels Environment, 55, 56–58
building automation systems (BAS), 49, 151, 156
building envelope(s):
of King Fahad National Library, 201
responsive, 164
Building Information Modelling (BIM):
applications for, 81, 83
and building automation systems, 151, 156, 156
in Collaborative Life Sciences Building and Skourtes Tower, 215, 217
in computational design, 88–91
and fabrication, 121
in facility management, 95, 98
in Health Sciences Education Building, 233, 237, 241
and integrated project delivery, 181
in virtual construction, 91, 93, 95
building performance:
and BIM, 156
environmental simulations and energy analysis for, 98
new approaches to, 84, 85
Building Realization and Robotics research team, 162, 163
buildingSMART initiative, 83–84

C
CAAD (computer-aided architectural design), 77, 81, 83
CAD (computer-aided design), 77, 81, 83
CAM (computer-aided manufacturing), 85, 111–112
Cascade Meadow Wetlands and Environmental Science Center, 31, 32, 33
case studies, 185–245
Center for Design Research, 186–191, 187, 191
Collaborative Life Sciences Building and Skourtes Tower, 211, 212–218, 215, 217–218
Hanjie Wanda Square, 204–211, 205, 209
Health Sciences Education Building, 233, 237, 237–244, 241, 243
King Fahad National Library, 199, 199–203, 201, 205
Shanghai Natural History Museum, 218–219, 219–227, 223, 225
Umwelt Arena, 191, 192–198, 193, 197, 199
Yas Hotel, 228–236, 229, 233
Case Western Reserve University, 108–111, 109, 111
CDR (Center for Design Research), 186–191, 187, 191
cellular aluminium foam sheets, 36–37, 37, 38
Cener (National Renewable Energy Center of Spain):
ETFE-MFM (research project), 131, 133
Center for Design Research (CDR), 186–191, 187, 191
central home automation server (CHAS), 165
cemex:
Brussels Environment, 55, 56–58
CFD (computational fluid dynamics) analysis, 105, 109, 111
CHAS (central home automation server), 165
chilled beams, active and passive, 139, 139
CLSB/SKT (Collaborative Life Sciences Building and Skourtes Tower), 211, 212–218, 215, 217–218
coatings, on glass, 29
case studies, 185–245
Collaborative Life Sciences Building and Skourtes Tower (CLSB/SKT), 211, 212–218, 215, 217–218
commercialisation or implementation stage (of innovation), 16
composite materials, 41, 44, 45
case studies, 185–245
computational design, 61–127
design to fabrication, 121, 125
digital fabrication and methods, 111–113,
environmental simulations and energy analysis, 98–99, 101
Eskenazi Hospital parking structure art facade, 67, 68–71, 69
for Hanjie Wanda Square, 209
Louisiana State Museum and Sports Hall of Fame, 69, 71, 72–77
Metropl Parasol, 71, 77, 78–80
for Shanghai Natural History Museum, 219, 223
structural analysis, 101, 103, 105
tools and methods, 77, 81, 83–85, 88
computational fluid dynamics (CFD) analysis, 105, 109, 111
computational structural analysis, 103
computer-aided architectural design (CAAD), 77, 81, 83
computer-aided design (CAD), 77, 81, 83
computer-aided manufacturing (CAM), 85, 111–112
computer applications:
for design functions, 81
for environmental simulations, 98–99
concrete, 22–28, 23, 25, 27, 30
concrete masonry units (CMUs), 25, 25
concrete sandwich wall system, 26, 27
Consarc Architects:
Concourse Architects, 26, 27
ICD (Institute for Computational Design): 237–244, 241, 243
Gantenvein Vineyard facade, 115, 118–119, 121
Greenovate! Europe:
ETFE-MFM (research project), 131, 133
grid-shell structure, of Yas Hotel, 229, 233
The Groove, 148, 149, 150–151
H
Hanjie Wanda Square, 204–211, 205, 209
Health Sciences Education Building (HSEB), 233, 237, 237–244, 241, 243
HEMA Building, 41, 43
HOK:
Anaheim Regional Transportation Intermodal Center, 92, 93, 94, 95, 96–97
HSEB (Health Sciences Education Building), 233, 237, 237–244, 241, 243
humidity sensors, 48
HVAC systems:
technological innovations in, 135, 139, 141, 142–144, 145
in Umwelt Arena, 193
I
ICD (Institute for Computational Design):
iCon Innovation Centre, 50–51, 51–53
IDOM-ACXT:
San Mamés Stadium, 149, 151, 151–155
IGUs (triple-insulated glazing units), 50, 50
incremental innovation, 248
industrialisation, 156–157, 157
Industry Foundation Classes (IFC), 83–84, 99
innovation, 13–19, 171–183
activities classified as, 17
Center for Design Research as example of,
ITMA Materials Technology: ITKE (Institute of Building Structures and IPD (integrated project delivery), 91, 179–182
investment, for innovation, 177–178
internal research practices, 176
interdisciplinary collaboration, 173
methods for, 17–19
motives and goals for, 171–172
organisations and roles that foster, 172–173, 174
in project delivery, 179–182
purpose of, 16–17
research methods for, 176–177
and risk management, 181–182
strategies for integrating, 183
transformational and incremental, 248
strategies for integrating, 183
transformational and incremental, 248
value of, 179, 180
Institute for Advanced Architecture of Catalonia:
Translated Geometries (research project), 114, 115, 116–17
Institute for Computational Design (ICD):
Institute of Building Structures and Structural Design (ITKE):
integrated automation systems, 162, 162
integrated intelligent systems, 163, 164
integrated project delivery (IPD), 91, 179–182
integration:
in Collaborative Life Sciences Building and Skouretes Tower, 217
in complex buildings, 185
in computational design, 84
of innovation, strategies for, 183
innovation in, 18, 19
of research and design practice, 174–176
intelligent elements, in smart and responsive buildings, 163
interdisciplinary collaboration, 173
internal research practices, 176
investment, for innovation, 177–178
IPD (integrated project delivery), 91, 179–182
ITKE (Institute of Building Structures and Structural Design):
ITMA Materials Technology:
ETFE-MFM (research project), 131, 133
J
James B Hunt Jr Library, 138, 140, 141, 142–143
J Mayer H Architects:
Metropol Parasol, 71, 77, 78–80
Joggins Fossil Centre, 34–35, 35
K
King Fahad National Library, 199, 199–203, 201, 205
L
LED (light-emitting diode) technology, 145, 149
Level of Development (LOD), 90
Ley, Rob:
Reef (installation), 46, 47, 47
LHB:
Cascade Meadow Wetlands and Environmental Science Center, 31, 32, 33
light-emitting diode (LED) technology, 145, 149
lighting, 145, 146–148, 149, 150, 151
lighting sensors, 48
light-to-solar-gain (LSG) ratio, 29
LKPB Engineers:
Cascade Meadow Wetlands and Environmental Science Center, 31, 32, 33
LOD (Level of Development), 90
L’Office 64 de l’Habitat, 39, 39, 40
Louisiana State Museum and Sports Hall of Fame, 69, 71, 72–77
LSG (light-to-solar-gain) ratio, 29
M
MAD Architects:
Taichung Convention Center, 41, 41, 42
magnetostrictive materials, 21
Marcus, Frank:
First Aid Emergency Post, 48, 48
material manipulators, 159
materials, 21–59
biomaterials, 39, 39–43, 41
composite materials, 41, 44, 45
cement, 22–28, 23, 25, 27, 30
electrochromics, 45
glass, 27, 29, 30–36, 31, 33, 35, 37
metals, 37, 37–40, 39
phase-change materials, 49–51, 50–52
photovoltaics, 51, 52–56, 53, 55
self-healing materials, 47–48, 47–48
sensors and controls, 48–49, 49
shape-memory alloys, 45, 45–47, 47
thermoelectrics, 55, 57
in Umwelt Arena design, 197, 199
McKeever, Sean:
exterior shading system prototype, 48–49, 49
mechanisation, in industrialisation, 156–157, 157
metals, 37, 37–40, 39
Metro Arkitekter:
Hyllie Train Station, 27, 30
Metropol Parasol, 71, 77, 78–80
mixed research methods, 177
modular construction, 156–157, 158–161, 159
monocrystalline silicon cells, 51, 53
Morgan Library, 31, 31
Morphis:
Giant Interactive Group Corporate Headquarters, 27, 28
motion sensors, 48, 149
Multifunctional Sports Hall, 134, 135, 136–137
N
NASA Sustainability Base, 141, 144, 145, 146–147
National Renewable Energy Center of Spain (Cener):
ETFE-MFM (research project), 131, 133
New York City Beach Restoration Modules, 22–24, 25
nickel-titanium (NiTi) alloys, 47
Nobel Halls, 36, 37
North House, 164, 164–165, 166–167, 168
occupancy sensors, 48, 149
opaque PV glass, 53
operation models, 176
operations, activities classified as, 17
organisations:
change embraced by, 247–248
culture of innovation established by, 248–249
supporting innovations in, 17–18
that foster innovation, 172–173, 174
overhead costs, 178
P
paraffin, in PCMs, 50
parametric modeling, 63, 65, 81, 83
passive chilled beams, 139, 139
Patrick Arotcharen Agence d’Architecture:
L’Office 64 de l’Habitat, 39, 39, 40
New York City: Louisana State Museum and Sports Hall of Fame, 69, 71, 72–77
PCMs (phase-change materials), 49–51, 50–52
Perkins+Will:
Case Western Reserve University, 108–111, 110, 111
Exploratory Hall, 99, 100–103, 101
research project, 82–83, 84, 85, 86–87
School of Business Building, 26–27, 27
Shanghai Natural History Museum, 218–219, 219–227, 223, 225
INDEX 262-263

Texas Health Harris Methodist Hospital Alliance, 157, 158–161, 159
PGE G&K Corporate Headquarters, 44–45, 45
phase-change materials (PCMs), 49–51, 50–52
phenolic wood composites, 41, 43
photocatalysis process, for self-cleaning concrete, 24, 25
photochromic glass, 33

Q
qualitative research methods, 177
quantitative research methods, 177
R
radiator systems, 139, 141
rainscreen facade system, 27, 28, 237, 241
Reef (installation), 46, 47, 47
remote-controlled and sensing systems, 159
René Schmid Architekten:
Umwelt Arena, 191, 192–198, 193, 197, 199
reproduction, in industrialisation, 157, 157
research:
integration of design practice and, 174–176
methods of, for innovation, 176–177
research and development stage (of innovation), 16
responsive building envelopes, 164
responsive buildings, see smart and responsive buildings
retrofitting existing buildings, 199, 201, 205
Richter Dahl Rocha & Associës:
SwissTech Convention Center, 53, 54–55, 55
Rickhill, Dan, 187
risk management, 181–182
RMIT (Royal Melbourne Institute of Technology), 132–133, 135
Rob Ley Studio:
Eskenazi Hospital parking structure art facade, 67, 68–71, 69
robot construction system for computer-integrated construction (ROCCO), 163, 163
robotics:
in construction, 162–163
in industrialisation, 157, 157
roles:
in architectural firms, 173, 174
that foster innovation, 172–173, 174
Royal Melbourne Institute of Technology (RMIT), 132–133, 135
Ryerson University:
North House, 164, 164–165, 166–167, 168
S
Salt hydrates, in PCMs, 50
School of Business Building, 26–27, 27
Sean Godsell Architects:
Royal Melbourne Institute of Technology, 132–133, 135
self-cleaning concrete, 24, 25, 26–27, 27
self-healing materials, 47–48, 47–48
self-repairing concrete, 25
semitransparent PV glass, 53
sensors, 48–49, 49
SERA:
Collaborative Life Sciences Building and Skourtes Tower, 211, 212–218, 215, 217–218
service innovation, 177
Shanghai Natural History Museum, 218–219
219–227, 223, 225
shape-memory alloys (SMAs), 45, 45–47, 47
Shepley Bullfinch:
University of Michigan Cardiovascular Center, 27, 27
SHGC (solar heat gain coefficient), 27, 31
Simon Fraser University:
North House, 164, 164–165, 166–167, 168
simulations:
applications for, 81, 83
environmental, 98–99, 101
smart and responsive buildings:
with building automation systems, 49
in innovation, 17
technological innovations in, 163–165, 166–167, 168
smart materials, 21
SMAs (shape-memory alloys), 45, 45–47, 47
SMAS (solid material assembling system), 162, 162–163
Snøhetta:
James B Hunt Jr Library, 141, 142–143
solar heat gain coefficient (SHGC), 27, 31
solid material assembling system (SMAS), 162, 162–163
SPD (suspended particle device) glass, 33, 33
Stein, Joshua:
Reef (installation), 46, 47, 47
Strategie Architekten:
HEMA Building, 41, 43
strategy(ies):
corporate, and innovation, 171
for establishing culture of innovation, 248
for integrating innovation, 183
strong delivery firms, 172–173
strong idea firms, 172–173
strong service firms, 172–173
structural analysis:
computational, 103
in computational design, 101, 103, 105
for Hanjie Wanda Square, 209
for Shanghai Natural History Museum, 223, 225
Studio 804:
Center for Design Research, 186–191, 187, 191
purpose of, 187
Studiotrope:
Morgan Library, 31, 31
subtractive methods, of digital fabrication, 112, 113
suspended particle device (SPD) glass, 33, 33
Synthesis Design + Architecture:
The Groove, 148, 149, 150–151
T
Taichung Convention Center, 41, 41, 42
Tayo Europe:
ETFE-MFM (research project), 131, 133
technological innovations, 129–169
