6 Fuel Systems, Design, and Maintenance

6.1 Introduction

6.2 Detailed Design and Diesel Program

6.3 Marine Staging Tank Sited Location

6.3.1 Auxiliary Power

6.3.2 Marine Underwater Tank and Piping System

6.4 Codes and Standards

6.5 Recommended Practices for All Tanks

6.6 Fuel Distribution System Configuration

6.7 Day Tank Control System

6.8 Diesel Fuel and A Fuel Quality Assurance Program

6.8.1 Fuel Needs and Purchasing Guidelines

6.8.2 Diesel Fuel Storage and Piping Inspection

6.8.3 Analysis of Fuel Prior to Installation

6.8.4 On-Site Monitoring

6.8.5 Bunkery Fuel System Maintenance

6.8.6 Quarterly or Semiannual Bunkering of On-Shore Fuel Tanks

6.8.7 Conclusion

6.9 Conclusion

7 Power Transfer Switches, Technology, Applications, and Maintenance

7.1 Introduction

7.2 Transmission Switch Technology and Applications

7.3 Types of Power Transfer Switches

7.3.1 Bi-Rated Transfer Switches

7.3.2 Automatic Transfer Switches

7.4 Control Devices

7.4.1 Time Delays

7.4.2 In-Funnel Monitors

7.4.3 Test Switches

7.4.4 Enclosure Clamps

7.4.5 Voltage and Frequency Sensing Circuits

7.5 Design Features

7.5.1 Closed-Aperture High-Inrush Currents

7.5.2 Initial and Closing Ratings (W/3)

7.5.3 Contingent Full Rated Current Continuously

7.5.4 Interrupting Current

7.6 Additional Characteristics and Ratings of ATS

7.6.1 Minibus Classification

7.6.2 System Voltage Ratings

7.6.3 ATS Ratings

7.6.4 Reliability Requirement

7.7 Installation and Commissioning, Maintenance, and Safety

7.7.1 Installation and Commissioning
10. UPS Systems: Applications and Maintenance with an Overview of Current Technologies

10.1 Introduction

10.1.1 Group Technologies and Reliability Overview

10.2 Purpose of UPS Systems

10.3 General Description of UPS Systems

10.3.1 What is a UPS System?

10.3.2 How Does a UPS System Work?

10.3.3 Static UPS Systems

10.3.4 Online

10.3.5 Double Conversion

10.3.6 Double Conversion UPS Power Path

10.4 Components of a Static UPS System

10.4.1 Power Conversion Devices

10.5 Outdoor Loco: Intermountain UPS Systems

10.6 Offline (Standby)

10.7 The Evolution of Static UPS Technology

10.7.1 The Emergence of the IGU

10.7.2 Two- and Three-Phase Natural/Inverter Topology

10.8 Basic UPS Systems

10.8.1 UPSs Using Bipolar

10.8.2 Hybrid UPS Systems

10.9 Modular, Configurations, and Topology

10.9.1 N Configuration

10.9.2 N+1 Configuration

10.9.3 Distributed Redundancy Configuration

10.9.4 N+1 Configuration

10.9.5 2N Configuration

10.9.6 2N+1 Configuration

10.9.7 Distributed Redundant/Parallel Configuration

10.9.8 Power Module for Static UPS

10.9.9 Availability Calculations

10.10 Energy Storage Devices

10.10.1 Battery

10.10.2 Flywheel Energy

10.11 UPS: Maintenance and Testing

10.11.1 Physical Preventive Maintenance (PM)

10.11.2 Inspection Settings, Calibration, and Guidelines
13.3.1 Grounding and Access Flooring
13.3.2 Wire Conduits
13.3.3 Floor Whiskers

13.4 Paneling

13.4.1 Paneling Requirements for Paneling Panels
13.4.2 Paneling Panel Specifications
13.4.3 Paneling Installation Details
13.4.4 Paneling Maintenance

13.5 Access Floor Maintenance

13.5.1 Paneling for Standard High Pressure Laminate
13.5.2 Paneling for Vinyl Compounds and Static Discharge

13.6 Tiling

13.6.1 Tiling, Production Heights, and Adjustments
13.6.2 Tiling, Pre-Construction
13.6.3 Tiling, Construction (Panel, Standing, Tied)
13.6.4 Tiling, Subflooring/Grout/Grout Bedding
13.6.5 Tiling, Finishing Process
13.6.6 Tiling, Floor Coverings

13.7 Additional Design Considerations

13.7.1 UL/ULC Standard Requirements
13.7.2 Fire Protection and Smoke Control
13.7.3 Additional Design Considerations

13.8 Conclusion

14.1 Fire Protection
14.1.1 Fire Protection
14.1.2 Fire Safety
14.1.3 Alarm and Notification
14.1.4 Early Detection
14.1.5 Fire Suppression
14.1.6 Smart Design
14.1.7 Fire Detection
14.1.8 Fire Suppression Systems
Appendix A Policies and Regulations

A.1 Introduction
A.2 Industry Policies and Regulations
A.2.1 USA PATRIOT Act
A.2.3 Comprehensive Environmental Response, Compensation, and Liability Act of 1980
A.2.4 Economic Order 13117: Strengthening Federal Environmental, Energy, and Transportation Management
A.2.5 ENS02000 Homeland Security Management System (HSMCS)
A.2.6 The National Strategy for the Physical Protection of Critical Infrastructure and Key Assets
A.2.7 2003 National Infrastructure Protection Plan
A.2.8 Federal Advance Electronic Reliability and Compensation (FAERC) Critical Infrastructure Protection Program
A.2.9 U.S. Security and Hazardous Concentrations (SHC)
A.2.10 Second Practice to Strengthen the Resilience of the U.S. Financial System
A.2.11 CFI-4 Council, Control, Communications, Contingency, and Intelligence
A.2.12 Special III Amendment
A.2.13 Federal Reserve and Policymaking Model
A.2.14 Federal Reserve System Coordination Agencies and Regulating Organizations
A.2.15 Financial Management Institutions
A.2.16 National為Prevention Association (NPA)
