I. PROJECT DEVELOPMENT

1. Assessing Project Needs 1
   Interviewing Clients and the Design Team 1
     Clients 1
     Clients’ Expectations 1
     Maintenance 2
       Landscape Maintenance 2
       Lighting Maintenance 3
     Budget 3
     Deadlines 3
     Other Design Team Members 4
   Reviewing Architectural and Landscape Plans 4
   Visiting the Site 6
     Documenting Site Conditions 7
     Soil Considerations 7
   Synthesizing the Information 10
   References 11

2. Vision and Perception of Light 13
   How the Eye Works 13
   Designing for the Eye 15
   Perception 16
   References 17

3. Luminous Composition 19
   Defining Objectives 19
   Expressing Ideas 19
     Observation 21
     Imagination 21
   Composition Elements 22
     Depth 22
   Visual Boundaries 22
   Quality and Direction of Light 27
   View 27
   Mood or Atmosphere 29
   Balance 32
   Focal Points 32
   Cohesion 32

4. The Design Process: Documenting and Installing Landscape Lighting 33
   Project Communications 34
   Computer-Aided Design (CAD) 34
     Document Standards 35
     CAD Standards 35
   Conceptual Design Phase Documents 35
     Presentation Drawings 36
     Types of Presentation Drawings 39
     Mock-up Sessions 40
     Preliminary Budget 44
   Design Development Phase 45
   Construction or Contract Documents 46
     Plans or Working Drawings 46
     Index of Drawings 46
     Project Layout Key 46
     Standard Symbols and Abbreviations 47
     Notes 47
   Lighting Layout, Schedule, and Detail Sheets 48
     Details Including Schedules 51
     Specifications 51
     General Section 51
     Lighting Fixture Section 52
     Three Typical Fixture Specification Formats 53
     Cut Sheets 53
   Bidding Process Phase 54
   Construction Phase 58
     Submittal Drawings and Samples 58
     Construction 58
     Locating Fixtures On Site 59
     Locating Tree-Mounted Fixtures 59
   Aiming and Adjusting the Lighting System 60

5. Follow-up Work: Record Documents and Project Maintenance 65
   Record Documents Package 65
     Updated Design and Installation Documents 67
     Updated Lighting Plans 67
     Fixture Location 67
     Using Photographs to Locate Lighting Equipment 68
     Lamping Information 68
     Aiming Notation 69
     Shielding Notation 69
     Updated and New Project Schedules 69
Contents

Project Service Directory 70
Controls Adjustments and Settings 71
Maintenance Documents 71
Maintenance Issues 71
Maintenance Equipment and Spare Parts 74
Maintenance Work 74
Focus Adjustment 75
Lamp Replacement 75
Fixture Cleaning 77
Maintaining the Proper Fixture Aiming 78
Stocking and Restocking Supplies 78
Design Adjustment 79
Reaiming Existing Fixtures 81
Relamping Existing Fixtures 81
Relocating Existing Fixtures 81
Removing Existing Fixtures 82
Adding New Fixtures 82
Updating the Record Documents 82
References 83

II. MATERIALS AND TECHNOLOGY 85

6. Light Sources 87
   New Lamps 87
   - Light Emitting Diodes (LED) 87
   - LED Color 89
   - LED Configuration, Output, and Beamspread 90
   - LED Lamp Types 90
   Traditional Lamps 92
   - Incandescent and Filament Lamps 92
   - Tungsten-Halogen Lamps 92
   - Frequently Used Types 92
     - MR Lamps 93
     - PAR Lamps 93
     - R Lamps 94
     - Miniature and Subminiature Lamps 94
   Comparing 120-Volt and Low-Voltage Lamps for Landscape Use 94
   Discharge Lamps 95
   - High-Intensity Discharge Lamps 97
     - Mercury Vapor 97
     - Metal Halide 97
     - High-Pressure Sodium 98
     - Low-Pressure Sodium 98
   Fluorescent Lamps 98
   - Cold Cathode, Including Neon 98

   Functional and Operating Characteristics 99
   - Physical Characteristics 100
     - Bulb or Envelope 100
     - Shapes and Sizes 100
     - Base 101
     - Filament, Electrodes, and Arc Tubes 101
     - Physical Dimensions 101
   - Operating Characteristics 102
   - Lamp Operating Position 102

   Bulb-Wall and Base Operating Temperature 102
   Voltage 102
   Beam Spread 102
   Life and Lumen Depreciation 103
   Understanding Color of Light Produced 103
   U.S. Government Phase-Out of Traditional Lamps 104
   Evaluating Lamps for Use in Landscape Lighting 104
   References 104

7. Light Fixtures 105
   Selection Criteria 105
   - Aesthetics 105
   - Function 106
   - Construction 106
   - Cost 106
   Fixture Components 106
   - Fixtures using LED Lamps 106
     - LED Replacement Lamps 106
     - Permanent or Replaceable Module LED Lamps 107
     - Self Contained LED Lamp Unit 109
   - Wattage and Beamspeed Options 109
   - Parts that comprise an LED System 109
     - Printed Circuit Board 109
     - Driver 110
   - LED/LED Fixture System Tests 111
   - Fixtures using Traditional Lamps 111
     - Lamp Type and Wattage 111
     - Adjustment Capabilities 113
     - Ability to Add Accessories 113
     - Mechanical Features 114
     - Construction 114
     - Custom Design or Modification 117
     - Attachment of Lenses 117
     - Access to Lamp, Transformer, and Ballast Compartments 117
     - Waterproofing 117
     - Locking Mechanisms 118
     - Lamp Shielding 118
     - Optics 119
     - Environmental Considerations 119
     - Thermal Considerations 119
   Fixture Types 119
   - Decorative Fixtures 119
   - Lanterns 120
   - Bollard and Path Fixtures 120
   - Post, Wall-Mounted, Ceiling Mounted and Hanging Fixtures 121
   - Functional Fixtures 121
   - Surface or Tree-Mounted Fixtures 122
   - Ground-Mounted Adjustable Fixtures 124
   - Hanging Fixtures 125
   - Ground-Recessed Fixtures 125
   - Underwater Accent Fixtures 127
   - Underwater Niche Fixtures 128
   - Wet-Dry Fixtures 128
   - Strip Light Fixtures 128

References 104
8. Corrosion, Materials, and Finishes 137

Corrosion 137
Water 137
Soil 138
  Presence of Soil Moisture 138
  Oxygen Supply 138
  pH Value 138
  Temperature 139
  Prevention 139
Atmosphere 139
Corrosion Protection 140
Types of Corrosion 141
Uniform Corrosion 141
Pitting Corrosion 141
Crevice Corrosion 141
Deposit Corrosion 141
Erosion Corrosion 141
Bimetallic or Galvanic Corrosion 141
Stray-Current Corrosion 142
Selective or Dealloying Corrosion 142
Materials 142
  Ferrous Metals 142
  Cast Iron 143
Stainless Steel and Alloys 143
Nonferrous Metals and Alloys 143
  Aluminum and Alloys 143
Copper and Alloys 145
  Brass 145
  Bronzes 146
Zinc 146
Glass 146
  Plastics 148
Polyvinyl Chloride (PVC) 149
  Acrylonitrile-Butadiene-Styrene (ABS) 149
Epoxy 149
  Silicone 149
Poly(methyl Methacrylate (Acrylic) 149
Polycarbonate (Lexan) 140
Ethylene Propylene Diene Monomer Rubber (EPDM) 150
  Neoprene 150
Finishes 150
  Anodizing 151
    Clear Anodize and Dye 151
    Two-Step or Two-Step Electrolytic 151
  Duranodic (Alcoa) or Kalcolor (Kaiser) 151
  Powder Coat 152
  Verdigris or Verdi Green 152
  Temporary Finish 153

References 153

9. Controls 155

Control System Issues 155
Designing Control Systems 156
  Residential Spaces 157
  Commercial Spaces 159
  Single-Use Spaces 159
  Multiple-Use Spaces 159
Types of Control Devices 160
  Manual Switches 161
  Dimming Switches 161
  LED Dimming 161
    Phase Control 161
    DALI 161
    DMX512 161
  Incandescent Dimming 163
  Preset Incandescent Dimming Systems 164
  Fluorescent Dimming 164
  HID Dimming 165
  Photoelectric Controls 165
  Time Switches 166
  Motion Detectors 167
  Wireless Controls 167

10. Wiring 169

Power and Power Distribution 169
  Safety 170
  Complying with the National Electrical Code 171
  Grounding 173
  Fuses and Circuit Breakers 173
  12 Volts versus 120 Volts 174
  Type, Size, and Condition of a Site 175
  Lamps and Fixtures 175
  Amperage 175
  Fixture Mounting 176
  Connections 178
  Voltage Drop 178
Elements of a Wiring System 180
  Conductors 180
  Electrical Connections 182
  Conduits 184
Contents

Wiring Approaches 186
  Fixtures Mounted at Grade 186
  Daisy Chain Wiring Method 187
  Loop Wiring Method 187
  Multiple-Feed Wiring Method 187
  Multiple-Transformer Wiring Method 190
  Fixtures Mounted in Trees 190
Planning for the Future 191

III. APPLICATIONS 193

11. Residential Spaces 195
  Working with the Owner 195
  Design Considerations 196
    Property Characteristics 196
    Arrival 198
    Circulation 198
    Views 198
    Owner’s Preference 199
    Equipment Selection 200
    Light Sources 200
    Fixtures 201
    Controls 203

12. Public Spaces 205
  Design Issues 205
    Nature of Public Projects 205
    Safety and Security 205
    Circulation 206
    Anticipated Activities 206
    Image 207
    Controls 208
    Equipment Selection 208
    Light Sources 208
    Fixtures 209
    Project Management 209

13. Atria 211
  Residential Spaces 211
  Commercial Spaces 212
  Lighting for Plant Growth 213
    Quality of Light 213
    Quantity of Light 215
    Light and Dark Time Periods 215
    Intensity Levels 216
    Acclimatizing Plants for Atrium Life 217
    Direction of Light 217
  References 217

IV. ELEMENTS OF DESIGN 219

14. Plant Materials 221
  Techniques for Lighting Plants 221
  Evaluating Plant Materials 222
    General Plant Considerations 224
      Name including Genus, Species and Variety 224
    Deciduous or Evergreen 224
    Form 225
    Leaf Density and Overlap 225
    Size at Planting 225
    Mature Height and Spread 226
    Growth Rate 226
    Special Features 226
  Selected Specimen Considerations 229
    Location on Site 229
    Health 229
    Size 229
    Specific Growth/Form/Habit 229
    Importance to Visual Composition 229
    Interference Regarding Light Distribution 229
    Future Growth 231
    Pruning Plan 231
  Physical Characteristics 232
    Texture 232
    Leaf Type 232
    Branching Pattern 232
    Foliage Color 234
    Branch/Trunk Characteristics 234
    Flowering Characteristics 234
    Dormancy Characteristics 235
  Physical Appearance 235
  Growth 238
  The Plant’s Role in Composition 239
  Direction of Light 241
    Front Lighting 241
    Back Lighting 242
    Side Lighting 242
    Uplighting 243
    Downlighting 247
  The Role of the Transition Plant 249
    Boundary or Divider Role 249

15. Garden Evolution: Changes That Affect Lighting 251
  Lighting System Infrastructure 251
  Garden Evolution 251
  Changes Through the Seasons of One Year 251
    Winter 253
    Spring 253
    Summer 254
    Fall 254
  Changing Roles 255
    Growth of an Individual Plant 255
    Garden Evolution Influences Plant Role 259
    Gradual Change 259
    Radical Change 262
    The Relationship of Pruning with Lighting 263

  Sculptures 269
    Uplighting versus Downlighting 269
    Techniques 273
17. Walkways and Stairs 281
Walkways 281
  Planning Issues 283
  Lighting Level 283
  Safe Movement 284
  Paving or Path Material 284
  Light Patterns 285
  Fixture Selection 286
    Decorative Fixtures 287
    Hidden Fixtures 289
City Streets and Sidewalks 290
Steps and Staircases 292
  Downlight 293
  Sidelight 293
  Tread-Integrated Light 294
  Decorative Fixtures 294

18. Building Elevation Lighting 297
Luminous Composition 297
  Floodlighting 300
  Grazing 300
  Patterns of Light 301
  Internal Building Lighting 301
  Color 301
  Fixture Location 302
  Equipment 304
    Light Sources 304

Incandescent 305
  Fluorescent 305
  High-Intensity Discharge 306
  Fixtures 306
  Lighting Levels 306
  Maintenance 308

19. Water Features 309
Design Considerations 309
  Physical Properties of Light 309
  Refraction of Light 309
  Effect of Light on Aerated or Turbulent Water 310
  Effect of Light on Flat or Smooth Water 310
  Dispersion of Light in Water 310
  Fixture Location 310
  Locating Fixtures Below the Water’s Surface 310
  Locating Fixtures Above the Water’s Surface 312
Types of Water Features 313
  Waterfalls 313
  Fountains 314
  Pool and Pond Surfaces 315
Safety 316
  Equipment for Underwater Use 316
    Lamps 316
    Fixtures 316
  Shore-Scraping 317
  Fiber Optics 317
