INDEX

Abbey, Ed, 121–122
Accreditation, 56
Accuracy standards, 42–43
Action research: defined, 152; mathematics teacher training case study and, 152–154; overview of, 153
Activities documentation, 17, 18, 62, 65
Activity outputs documentation, 18
Advocacy, 160
Advocacy case study: activities and findings summary, 162–168; challenges faced in, 160–162; evaluation plan, 162; evaluator, 159; final thoughts, 168; observations carried out in, 162–163; observer effect noted in, 165–166; program overview, 160–162
AEA. See American Evaluation Association
After the fact evaluation. See Ex post facto evaluation
After-school initiative case study: activities and findings summary, 143–144; after-school program examples in, 139; challenges faced by, 142–143; evaluation plan, 140–143; evaluator, 137–138; final thoughts, 144; higher collaboration of services and, 140; partnering and, 139; program outline, 138–140; RFP and, 138
Aggregating, 161
American Evaluation Association (AEA): Joint Committee and, 42; overview about, 11
Applied research approach, 10
Approach, evaluation: CIPP model and, 48–50; consumer-oriented, 44, 55; decision-based, 44, 47–50; defined, 43; eclectic, 56, 59; expertise-oriented, 44, 55–56; goal-free, 44, 45–46; objectives-based, 44–47; overview, 43–44; participatory, 44, 50–55, 89–97; summary, 56–57; Tylerian, 44, 46–47
Archival data: as baseline data, 30; defined, 29; disadvantages of, 30–31; as supplementary, 31; types of, 29–30
Authentic assessment movement, 104
Award, 74, 76
Barriers: defined, 124; high school science case study and, 124–126
Baseline data, 30, 131
Benchmarks: defined, 14; evaluation objectives and, 45; need for project and, 73; professional development technology case study and, 113–114; Tylerian approach and, 46–47
Benson, Sarah, 174
Blended approach, 7
Body, of evaluation report, 32–35
Brothers, Stephanie, 89–91
Brown, Samantha, 111–112
Budget, 74
Budget narrative, 74

Capacity, evaluation: community-based mentor program and, 92, 93, 95; defined, 92; preestablished instruments and, 93
Capacity objective, 60–61, 65
Checklist: portfolio analysis, 107; survey and, 24, 26
CIPP model: context evaluation and, 48–49; creation of, 48; defined, 48; input evaluation and, 50; process evaluation and, 50; product evaluation and, 50
Client, 6, 71
Community-based mentor program case study: activities and findings summary, 97; evaluation capacity and, 92, 93, 95; evaluation matrix for, 94; evaluation plan, 92–96; evaluator for, 89–91; final thoughts, 97; focus group and, 95; goals, 91, 92; mixed-methods approach to, 92; participatory approach and, 89–97; participatory evaluation model and, 90; purpose, 91–92; SINI and, 91; surveys and, 95–96
Competitive funds, 138
Confidentiality: defined, 161; school advocacy case study and, 159–168
Conflicting interests, 54
Consumer-oriented approach, 44, 55
Context. See CIPP model
Context evaluation, 48–49
Cover page, 32
Curriculum, 138
Data analysis: portfolios and, 107; triangulation, 31
Data collection: alternative forms of, 29; archival, 29–31; baseline data and, 30, 131; capacity objective and, 60–61, 65; data sources and, 20–21; evaluation matrix and, 19–20; factors influencing, 20; focus group and, 27, 28–29; intent objective and, 60–61, 65; item analysis and, 148; journal, 29; needs assessment and, 148; observations as, 148–149; one-to-one interviews, 27, 28, 29; participatory approach and, 54–55; photography as, 29; portfolios and, 107; program evaluation, 6; surveys and, 20–27; tools, 20–31
Debrief, 163
Decision-based approach: CIPP model, 48–50; defined, 47–48; overview, 44
Demographics sections, of surveys, 25, 27
Director of special projects, 172
Documentation: activities, 17, 18, 62, 65; activity outputs, 18; end outcomes, 18; program implementation, 17–18
Eclectic approach, 56, 59
Eligibility, RFP and, 74, 75
End outcomes: defined, 64; documentation, 18; as evaluation objective, 66
English language learners, 173
e-portfolios, 105–106
Ethics: defined, 41; examples, 41–42; Joint Committee standards and, 42–43
Evaluation accountability standards, 43
Evaluation approach: CIPP model and, 48–50; consumer-oriented, 44, 55; decision-based, 44, 47–50; defined, 43; eclectic, 56, 59; expertise-oriented, 44, 55–56; goal-free, 44, 45–46; objectives-based, 44–47; overview, 43–44; participatory, 44, 50–55, 89–97; summary, 56–57; Tylerian, 44, 46–47
Evaluation capacity: community-based mentor program and, 92, 93, 95; defined, 92; preestablished instruments and, 93
Evaluation findings: dissemination of, 35–36; overview, 14; responsibilities surrounding, 35; summer camp example, 36–37; use of, 36
Evaluation matrix: for community-based mentor program, 94; defined, 78; inquiry-based instruction in mathematics, 78, 80; structure of, 19–20; summer camp project, 19; trust and, 20
Evaluation objectives: activities documentation, 17, 18, 62, 65; activity outputs documentation, 18; benchmarks and, 45; capacity, 60–61, 65; categories, 17–18; defined, 15; developing, 16–17; end outcomes, 66; end outcomes documentation, 18; established, 16; evaluation matrix and, 19–20; example, 45; fidelity, 62, 65; how to use, 64, 66; inquiry-based instruction in mathematics, 79–80; intent, 60–61, 65; intermediate outcomes, 64, 65; outputs of activities, 63, 65; participant satisfaction, 63, 65; program implementation documentation, 17–18; project goals and, 16–17; rater reliability and, 61–62; summary, 66–67; summer camp project illustrating, 15, 16–17, 33, 36; sustainability, 66; teacher candidates using technology case study, 102; trust and, 16; validation, 61–62, 65; variety of, 60
Evaluation plan: community-based mentor program, 92–96; defined, 73; high school science case study, 122–124; inquiry-based instruction in mathematics, 78–81; mathematics teacher training case study and, 149–151; overview, 14; parent involvement case study, 172–176; professional development technology case study, 113–116; reading achievement case study, 131; RFP and, 73; school advocacy case study, 162; special education teacher training case study, 182–185; statewide after-school initiative case study, 140–143; teacher candidates using technology case study, 102–107
Evaluation program theory, 89
Evaluation report: body of, 32–35; cover page, 32; executive summary, 32; guidelines, 31–32; participatory approach and, 53; sections, 32–35; summer camp example, 33–35; writing of, 31–35
Ex post facto evaluation: defined, 115; professional development technology case study and, 111–117

Executive summary, 32
Expertise-oriented approach: accreditation and, 56; defined, 55; internalized criteria used in, 55–56; overview, 44
External evaluators: challenges of, 12–13; defined, 72; participatory approach and, 50–51; perspective and, 11; role of, 12; trust and, 12–13
Extraneous variables, 130

Feasibility standards, 42
Fidelity objective, 62, 65
Findings, evaluation: dissemination of, 35–36; overview, 14; responsibilities surrounding, 35; summer camp example, 36–37; use of, 36
Focus group: community-based mentor program and, 95; data collection and, 27, 28–29; defined, 27; high school science case study and, 125; precautions, 28–29; principles of, 27, 28; recording, 29
Formative evaluation: applied research approaches compared with, 10; defined, 4; purpose of, 9–10; summative evaluation compared with, 9
Free response items, 26–27
Fuller, Dennis, 129
Funding agency: defined, 74; RFP and, 74–75
Funding cycle, 130

Goal-free approach: defined, 45; objectives-based approach compared with, 45–46; overview, 44

Grant writer, 73
Grassroots reading curriculum, 132–133

Hernandez, Sophia, 174
High school science case study: barrier faced by, 124–126; evaluation plan, 122–124; evaluators, 121–122; final thoughts, 126; focus group and, 125; meta-evaluation and, 121–126; program outline, 122; Science Away! and, 123–124
Higher collaboration of services, 140

Input. See CIPP model
Input evaluation, 50
Inquiry-based instruction in mathematics case study: activities and findings summary, 81–86; components desired for, 77–78; evaluation matrix, 78, 80; evaluation objectives, 79–80; evaluation plan, 78–81; evaluator, 71–76; final thoughts, 86; needs assessment for, 76–77; phases, 78, 79; professional development and, 76; program, 76–78; project narrative and, 73; RFP and, 73–76; semistructured interviews and, 82; student outcomes, 84
Intent objective, 60–61, 65
Intermediate outcomes, 64, 65
Internal evaluators: advantages of, 13; perspective and, 11; role of, 12; trust and, 13
Inter-rater reliability, 61–62
Interviews: one-to-one, 27–29; protocol, 27; semistructured, 82, 149–150; structured, 82; teacher candidates using technology case study and, 103–104
Intra-rater reliability, 61
Item analysis, 148

Jackson, Dan, 181–182
Jackson, Linda, 171
Jackson, Matt, 171
Jackson, Seth, 147–148
Johnstown School District. See Professional development technology case study
Joint Committee on Standards for Educational Evaluation: AEA and, 42; standards, 42–43
Jones, Miss (advocacy mentor), 165
Journals, 29
Key informant, 172

Lamb, Margaret, 129
Larson, Tina, 137–138
Likert scales, 22–25, 26
Lincoln, Barbara, 147–148
Logic model: defined, 114, 115; narrative and, 115; overview, 115; professional development technology case study and, 114, 115–116; special education teacher training case study and, 184; survey developed using, 116

Mathematics case study, inquiry-based instruction in: activities and findings summary, 81–86; components desired for, 77–78; evaluation matrix, 78, 80; evaluation objectives, 79–80; evaluation plan, 78–81; evaluator, 71–76; final thoughts, 86; needs assessment for, 76–77; phases, 78, 79; professional development and, 76; program, 76–78; project narrative and, 73; RFP and, 73–76; semistructured interviews and, 82; student outcomes, 84

Mathematics teacher training case study: action research and, 152–154; activities and findings summary, 151–154; challenges faced in, 149–151; evaluation plan and, 149–151; evaluators, 147–148; final thoughts, 154–155; needs assessment and, 148; observations used in, 148–149; program outline, 148–149; semistructured interviews used in, 149–150; top-down approach and, 151–152

Matrix, evaluation: for community-based mentor program, 94; defined, 78; inquiry-based instruction in mathematics, 78, 80; structure of, 19–20; summer camp project, 19; trust and, 20

Mentor program case study: activities and findings summary, 97; evaluation capacity and, 92, 93, 95; evaluation matrix for, 94; evaluation plan, 92–96; evaluator for, 89–91; final thoughts, 97; focus group and, 95; goals, 91, 92; mixed-methods approach to, 92; participatory approach and, 89–97; participatory evaluation model and, 90; purpose, 91–92; SINI and, 91; surveys and, 95–96

Meta-evaluation: defined, 122; high school science case study and, 121–126

Mixed-methods approach: to community-based mentor program case study, 92; parent involvement case study using, 171–177

Model: action research, 152–154; defined, 138; participatory evaluation, 90; top-down approach, 151–152
Model, CIPP: context evaluation and, 48–49; creation of, 48; defined, 48; input evaluation and, 50; process evaluation and, 50; product evaluation and, 50
Model, logic: defined, 114, 115; narrative and, 115; overview, 115; professional development technology case study and, 114, 115–116; special education teacher training case study and, 184; survey developed using, 116
Narrative: budget, 74; logic model and, 115; project, 73
National Council for Accreditation of Teacher Education (NCATE), 56
Need for project, 73
Needs assessment: defined, 76; for inquiry-based instruction in mathematics and, 76–77; mathematics teacher training case study and, 148
Nephews, Dana, 160
Objectives, evaluation: activities documentation, 17, 18, 62, 65; activity outputs documentation, 18; benchmarks and, 45; capacity, 60–61, 65; categories, 17–18; defined, 15; developing, 16–17; end outcomes, 66; end outcomes documentation, 18; established, 16; evaluation matrix and, 19–20; example, 45; fidelity, 62, 65; how to use, 64, 66; inquiry-based instruction in mathematics, 79–80; intent, 60–61, 65; intermediate outcomes, 64, 65; outputs of activities, 63, 65; participant satisfaction, 63, 65; program implementation documentation, 17–18; project goals and, 16–17; rater reliability and, 61–62; summary, 66–67; summer camp project illustrating, 15, 16–17, 33, 36; sustainability, 66; teacher candidates using technology case study, 102; trust and, 16; validation, 61–62, 65; variety of, 60
Objectives-based approach: activities documentation, 62, 65; benchmarks and, 45; benefits, 47; capacity and, 60–61, 65; defined, 44; disadvantages, 47; early, 46–47; end outcomes and, 18, 64, 66; as evaluation approach, 44–47; fidelity and, 62, 65; goal-free approach compared with, 45–46; inquiry-based instruction in mathematics, 71–86; intent and, 60–61, 65; intermediate outcomes and, 64, 65; as most utilized, 14; objectives use and, 64, 66; outputs of activities and, 63, 65; overview, 44–45; participant satisfaction and, 63, 65; rater reliability and, 61–62; RFP and, 73–76; summary, 66–67; sustainability and, 66; teacher candidates using technology case study and, 101–108; Tylerian approach and, 44, 46–47; validation and, 61–62, 65; variety of objectives and, 60. See also Evaluation objectives
Observation: mathematics teacher training case study and, 148–149; school advocacy case study and, 162–163
Observer effect, 165–166
One-to-one interviews: probes and, 27, 28; protocol, 27; recording, 29; summer camp example, 28
Open-ended or free response items, 26–27
Outputs of activities objective, 63, 65

Parent involvement case study: activities and findings summary, 176–177; evaluation plan, 172–176; evaluators, 171; final thoughts, 177; key informant and, 172; mixed-methods approach used in, 171–177; program overview, 171–172; survey used in, 172–173

Participant satisfaction objective, 63, 65

Participatory approach: challenges, 54–55; community-based mentor program and, 89–97; conflicting interests and, 54; data collection and, 54–55; evaluation report and, 53; evaluator and, 50–51; example, 51–52; overview, 44; stakeholders and, 52–53; strengths, 53

Participatory evaluation model, 90

Partner, 139

Perspective, 11

Phonics, 7

Photography, 29

Plan, evaluation: community-based mentor program, 92–96; defined, 73; high school science case study, 122–124; inquiry-based instruction in mathematics, 78–81; mathematics teacher training case study and, 149–151; overview, 14; parent involvement case study, 172–176; professional development technology case study, 113–116; reading achievement case study, 131; RFP and, 73; school advocacy case study, 162; special education teacher training case study, 182–185; statewide after-school initiative case study, 140–143; teacher candidates using technology case study, 102–107

Portfolios: authentic assessment movement and, 104; checklist for analysis of, 107; defined, 101; e-portfolios, 105–106; teacher candidates using technology case study and, 104–107; technology and, 105; uses of, 104–105

Post, Jonathan, 92

Preestablished instruments, 93

Probes, 27, 28

Process. See CIPP model

Product. See CIPP model

Professional development, 76

Professional development technology case study: activities and findings summary, 116–117; benchmarks and, 113–114; evaluation plan, 113–116; evaluator, 111–112; ex post facto evaluation and, 111–117; final thoughts, 117; logic model and, 114, 115–116; program outline, 112–113

Program: defined, 3, 5; implementation documentation, 17–18; merit determination, 43; types of, 5

Program evaluation: changing practice and, 6–8; data collection, 6; defined, 5; findings and recommendations, 8; formative and summative evaluation and, 8–10; internal and external evaluators, 11–13; objectives-based, 14; setting and participants, 6; summary, 37–38; training in, 10–11; vignette, 3–4.

Surveys: checklists and, 24, 26; community-based mentor program and, 95–96; data collection and, 20–27; data sources and, 20–21; demographics sections, 25, 27; designing, 21, 22–25; elements of successful, 21, 26; Likert scales and, 22–25, 26; logic model used to develop, 116; open-ended or free response items in, 26–27; parent involvement case study and, 172–173; scales for collecting data via, 21, 26–27; stakeholders and, 21; summer camp, 22–25; teacher candidates using technology case study and, 103–104
Sustainability objective, 66
Teacher candidate, 101
Teacher candidates using technology case study: activities and findings summary, 108; evaluation objectives, 102; evaluation plan, 102–107; evaluators, 101; final thoughts, 108; interview and, 103–104; objectives-based approach and, 101–108; portfolio analysis checklist, 107; portfolios and, 104–107; program outline, 102; surveys and, 103–104
Teacher training case study, mathematics: action research and, 152–154; activities and findings summary, 151–154; challenges faced in, 149–151; evaluation plan and, 149–151; evaluators, 147–148; final thoughts, 154–155; needs assessment and, 148; observations used in, 148–149; program outline, 148–149; semistructured interviews used in, 149–150; top-down approach and, 151–152
Teacher training case study, special education: activities and findings summary, 185; evaluation plan, 182–185; evaluators, 181–182; final thoughts, 185–186; logic model and, 184; program overview, 182; strong evidence and, 183
Technology, 105
Technology case study, professional development: activities and findings summary, 116–117; benchmarks and, 113–114; evaluation plan, 113–116; evaluator, 111–112;
Technology case study (continued)
ex post facto evaluation and, 111–117; final thoughts, 117;
logic model and, 114, 115–116; program outline, 112–113
Technology case study, teacher candidates using: activities and
findings summary, 108; evaluation objectives, 102;
evaluation plan, 102–107; evaluators, 101; final thoughts, 108; interview and, 103–104;
objectives-based approach and, 101–108; portfolio analysis
checklist, 107; portfolios and, 104–107; program outline, 102;
surveys and, 103–104
Thomas (program evaluator), 71–73
Tools, data collection, 20–31

Top-down approach, 151–152
Treatment, 10
Triangulation, 31
Trust: evaluation matrix and, 20; evaluation objectives and, 16;
external evaluators and, 12–13; internal evaluators and, 13
Tyler, Ralph, 46
Tylerian approach: benchmarks and, 46–47; defined, 46;
overview, 44
Utility standards, 42
Validation: defined, 61; overview, 65; rater reliability and, 61–62
Whole language, 7
Wright, Jennifer, 121–122
