root
anterior 240
incisor, increased torque, 244–6
maxillary, convergence 240–41
growth in transplanted teeth 234
resorption of 2nd deciduous molars with missing permanent successors 212
rotation (with mixed dentition) 243
center of (Crot) 237–9
first/second/third-order 237
RUNX2 mutation 32
Schwarz appliance 71
second-order couple 239
second-order rotation 237
selective tooth agenesis hypodontia 35
sella–nasion–A point (SNA) angle
class II malocclusions 93
class III malocclusions 139, 140
sella–nasion–B point (SNB) angle, class II malocclusions 94, 98
serial extraction
deciduous molars in mixed dentition 217
severe tooth size arch length discrepancy 78
severity of malocclusion
assessing severity 22–8
class III, chincup effects on 164
orthodontic mechanics and 164
timing of treatment and 4
shape. see morphology
single bracket and one couple 239–40
single gene defects 31–2
single-point forces 237–8
size
arch (incl. arch length) 42, 54–5
crowding and 50
discrepancies between tooth size and 42, 43, 50, 55–8
mandibular (incl. mandibular length), in class II malocclusions 100
tooth, class III malocclusion and 148–9
tooth, discrepancies between arch length and (TSALD) 42, 43, 45, 50, 54–57
severe, serial extraction 77–81
small to moderate 56–7
zero to minor 55–6
tooth, serial extraction (in severe tooth size arch length discrepancy) and deficiency in 77–8
skeletal dysplasias 30, 32, 35, 37–9
skeletal effects of maxillary expansion 159
skeletal imbalance and serial extraction in severe tooth size arch length discrepancy 77
skeletal relationships, interarch, and class III malocclusion 147
skill (surgeon’s) in serial extraction 79–80
skull base. see cranial base
sleep apnea 101
obstructive 14, 101
SNA. see sella–nasion–A point angle
SNB (sella–nasion–B point) angle, class II malocclusions 92, 94, 98
space (interdental - in dental arches)
closure with missing 2nd deciduous premolars 213–24
creation/gaining 12, 13, 15, 17, 19, 20
class I malocclusion 50
at stage 2 development 12
at stage 4 development 15
loss 49, 50, 55, 78, 212, 213
with ankylosed deciduous/primary molars 78, 215
ectopically erupted molars and 78
eruption problems associated with 50–51
maintenance 12–14, 16, 18–20
with missing deciduous premolars without successors 216–18
at stage 2 development 12
at stage 3 development 14
at stage 4 development 15
at stage 5 development 17
at stage 6 development 18
at stage 7 development 19
regaining
at stage 2 development 12
at stage 3 development 14–15
at stage 4 development 15–16
at stage 6 development 18
at stage 7 development 19
spinal muscular atrophy 102
stage 1 of occlusal development 8–10
stage 2 of occlusal development (completion of deciduous dentition) 10–14
disturbances in eruption 202
stage 3 of occlusal development (eruption of 1st permanent molars) 14–15
disturbances in eruption 202–204
stage 4 of occlusal development (permanent incisor eruption) 15–17, 47
disturbances in eruption 204
stage 5 of occlusal development (eruption of mandibular canines and 1st premolars) 17–18
disturbances in eruption 204
stage 6 of occlusal development (eruption of 2nd premolars) 18–19
stage 7 of occlusal development (eruption of maxillary canines and second molars) 19–20
structural tooth alterations 35–37
subtractive couples 238
sucking habits 189–90
breaking the habit 191–3
nutritive vs non-nutritive 189–90
at stage 2 of development 12–13
Summers’ occlusal index 23
supernumerary teeth 35
surgical skill in serial extraction 79–80
swallowing (deglutition) 190
tongue thrusting and 190–91
taurodontism 39
teeth. see dentition
temporary teeth. see deciduous teeth
temporomandibular joint and chincups 163
third-order couple 236, 238, 244
third-order rotation 237
timing
of eruption, serial extraction and 78, 79
of orthodontic treatment 1–6
class II malocclusions 109
class III malocclusions 158
tip (second-order rotation) 237
tongue
forward resting posture 190–91
physiology 191
thrusting 190–91
tongue spurs 193
tonsils, enlarged
class II malocclusions 101
class III malocclusions 145
tooth. see dentition

- torque 238, 244
  - anterior incisor root, increased 244–6
- transitional dentition. see mixed dentition
- translation, mixed dentition 239–41
- transseptal fibers and crowding 50
- traumatic loss of anterior maxillary teeth 229
- incisors 229
- trisomy 21 (Down syndrome) 30–31
- tubes, molar 240

- two brackets 241–4
- two-by-four fixed therapy 71–2
- two-couple system 243–4
- vertical categories/characteristics, class II malocclusions 91, 93, 113
- Wits appraisal
  - class II malocclusions 98
  - class III malocclusions 144
- X-ray radiographs. see radiographs
