SRB see sulphate-reducing bacteria (SRB)
Stafne defect 337–8, 360
standardized mortality ratios (SMR) 38–40
Staphylococcus spp. 195
stereolithography 116–17
stenal anomalies 350–1
Streptococcus spp. 195
stress fractures 317
stress indicators 60
subadult populations
  growth profiles 365, 368–9, 373
  metabolic bone disease 215–43
  population analysis 31
  underrepresentation 33, 367
sulphate-reducing bacteria (SRB) 20–1
symphalangism 355, 357
syphilis
  dental enamel hypoplasia 284
  differential diagnosis 201
  molecular palaeopathology 147
talipes equinovarus 357
tanning 14–15, 22
taphonomy
  definition 4
  population analysis 31–2
  trauma 309, 324
  teeth 283–309
  abscesses 293–297
  age determination 129–30
  alveolar responses 283
  attrition eruption 290–1
  compensatory/continuous eruption 290–1, 292–3
  computed tomography 103
  cuspal malformations 284–88, 298
dental enamel hypoplasia 284–88, 298, 372–3
diagenetic processes 4, 11–25
disease classification 293–8
enamel erosion 299–300
epidemiology 45
growth profiles 371–3, 373–6
metabolic bone disease 215
molar incisal hypomineralization 298
periapical voids in jaw bones 283, 293–298
periodontal disease 288–93, 299–300
structure 9–10
temporal styloid anomalies 341
terminology 61, 69
tetanus 149
thalidomide 329, 352
Tollund Man 112–13, 114
trabecular bone loss 227, 229
trauma 309–25
  accidental 314–17
  amputations 311
decapitation 320
dislocations 318–19
eyearly European populations 323
interpersonal violence 312–15, 324
mass graves 321–3
pathological 315
quantitation 317
spondylolysis 318
trepanation 319–20
see also fractures
trench fever 160
trepanation 319–20
treponematosis
differential diagnosis 191–214
radiography 81
Trypanosoma cruzi 47, 160–1
tuberculosis
differential diagnosis 191, 193, 198–200
molecular palaeopathology 152–3, 155–7, 162–5
tumour-like processes 253–78
tumours see neoplasms
tunnelling 16–20
Tuthmosis IV 103
tympanic plate anomalies 340
typhoid fever 148, 160
Tyrolean Iceman 106, 115
ultrasonication 126
undulant fever 161–2
upper limb anomalies 352–5
variable-number tandem repeat (VNTR) 163–4
vertebral border shifts 342
vertebral column anomalies 340–9
viral infections 236
visual observation see macroscopic analysis
vitamin C deficiency see scurvy
vitamin D deficiency see osteomalacia; rickets
VNTR see variable-number tandem repeat (VNTR)
water
  bone 5, 11
  diagenetic processes 4, 11–16, 22–3
Wellcome Osteological Research Database (WORD) 181–2, 183, 187
Western Hemisphere Project 65
WORD see Wellcome Osteological Research Database (WORD)
X-ray microtomography 121
see also computed tomography (CT); radiography
yaws 205
Yersinia pestis 159–60, 167, 182
Yersinia pseudotuberculosis 167
zoonoses 148, 168, 257
