## Contents

*Author Biographies* xi  
*Preface* xiii  
*Acknowledgments* xv  
*List of Acronyms* xvii  

1. **Introduction** 1  
   1.1 Time in Chemistry 1  
   1.2 Mass Spectrometry 3  
   1.3 Time-resolved Mass Spectrometry 5  
   1.4 Dynamic Matrices 6  
   1.5 Real-time vs. Single-point Measurements 6  
   1.6 Further Reading 7  
   References 7  

2. **Ion Sources for Time-resolved Mass Spectrometry** 11  
   2.1 Electron Ionization 12  
   2.2 Chemical Ionization 14  
   2.3 Atmospheric Pressure Chemical Ionization 18  
   2.4 Electrospray Ionization 19  
   2.5 Atmospheric Pressure Photoionization 24  
   2.6 Desorption/Ionization 25  
      2.6.1 Fast Atom Bombardment 26  
      2.6.2 Laser Desorption/Ionization 27  
   2.7 Innovations in the 21st Century 33  
      2.7.1 Ion Sources Derived from Electrospray Ionization 34  
      2.7.2 New Ion Sources Derived from Laser Desorption/Ionization 39  
      2.7.3 Plasma-based Ion Sources 40  
   2.8 Concluding Remarks 43  
   References 43  

3. **Mass Analyzers for Time-resolved Mass Spectrometry** 53  
   3.1 Overview 53  
   3.2 Individual Mass Analyzers 54  
      3.2.1 Time-of-flight Mass Analyzers 54  
      3.2.2 Quadrupole Mass Analyzers 57  
      3.2.3 Sector Mass Analyzers 67  
      3.2.4 Fourier-transform Mass Analyzers 70  

Contents

6.5 Influence of Data Acquisition Speed 187
6.6 Concluding Remarks 187
References 189

7. Microfluidics for Time-resolved Mass Spectrometry 195
7.1 Overview 195
7.2 Fabrication 195
7.3 Microreaction Systems 197
7.4 Hydrodynamic Flow 198
7.5 Coupling Microfluidics with Mass Spectrometry 200
7.6 Examples of Applications 204
7.7 Digital Microfluidics 209
7.8 Concluding Remarks 211
References 212

8. Quantitative Measurements by Mass Spectrometry 217
8.1 The Challenge of Quantitative Mass Spectrometry Measurements 217
8.1.1 (I) Instrument 218
8.1.2 (II) Sample 219
8.2 Selection of Instrument 221
8.3 Solutions to Quantitative Mass Spectrometry 221
8.3.1 Quantification with Separation 221
8.3.2 Quantification without Separation 226
8.4 Data Treatment 227
8.5 Concluding Remarks 228
References 228

9. Data Treatment in Time-resolved Mass Spectrometry 231
9.1 Overview 231
9.2 Definition of Terms 232
9.3 Spectral Patterns 232
9.3.1 Accurate Mass 233
9.3.2 Mass Calibration 235
9.3.3 Singly Charged Molecules 235
9.3.4 Multiply Charged Molecules 238
9.4 Mass Accuracy 238
9.5 Structural Derivation 240
9.5.1 Unsaturation and Ring Moieties 241
9.5.2 Nitrogen Rule 241
9.5.3 Functional Groups 241
9.6 Molecule Abundance 242
9.6.1 Signal Intensity 242
9.6.2 Quantity Calibration 243
Contents

9.6.3 Dynamic Range 244
9.7 Time-dependent Data Treatment 245
References 246

10. Applications in Fundamental Studies of Physical Chemistry 249
10.1 Overview 249
10.2 Chemical Kinetics 250
   10.2.1 Quantum Chemistry 250
   10.2.2 Reaction Kinetics 253
10.3 Chemical Equilibrium 259
References 263

11.1 Organic Reactions 270
11.2 Catalytic Reactions 279
11.3 Photochemical Reactions 282
11.4 Concluding Remarks 284
References 284

12.1 Electrospray Ionization in Protein Studies 292
12.2 Mass Spectrometry Strategies for Ultra-fast Mixing and Incubation 295
12.3 Hydrogen/Deuterium Exchange 296
12.4 Photochemical Methods 301
12.5 Implementation of Ion-mobility Spectrometry Coupled with Mass Spectrometry 304
12.6 Concluding Remarks 305
References 307

13. Applications of Time-resolved Mass Spectrometry in Biochemical Analysis 315
13.1 Enzymatic Reactions 315
   13.1.1 Requirements of Time-resolved Mass Spectrometry in Biocatalysis 315
   13.1.2 Off-line and On-line Methods 316
   13.1.3 Time-resolved Mass Spectrometry Studies of Enzyme Kinetics 317
   13.1.4 Application of Microfluidic Systems 322
   13.1.5 Biochemical Waves 323
13.2 Time-resolved Mass Spectrometry in Systems and Synthetic Biology 324
13.3 Monitoring Living Systems 328
   13.3.1 Microbial Samples 328
   13.3.2 Plant and Animal Samples 329
13.4 Concluding Remarks 330
References 331
14. Final Remarks 337
14.1 Current Progress 337
14.2 Instrumentation 338
14.3 Software 339
14.4 Limitations 340
References 340
