Preface xxxi

Part I Introduction

1 Novel Omics Technologies in Food Nutrition
   Xuewu Zhang, Lijun You, Wei Wang, and Kaijun Xiao
   1.1 Introduction 3
   1.2 Transcriptomics in Nutritional Research 4
   1.3 Proteomics in Nutritional Research 5
   1.4 Metabolomics in Nutritional Research 7
   1.5 Systems Biology in Nutritional Research 9
   1.6 Conclusions 9
   References 10

2 Seafood Authentication using Foodomics: Proteomics, Metabolomics, and Genomics
   Karola Böhme, Jorge Barros-Velázquez, Pilar Calo-Mata, José M. Gallardo, and Ignacio Ortea
   2.1 Introduction 14
   2.2 Proteomic Approaches 15
   2.3 Metabolomic Approaches 19
   2.4 Genomic Approaches 20
   2.5 Conclusions 25
   References 26

3 A Foodomics Approach Reveals Hypocholesterolemic Activity of Red Microalgae
   Irit Dvir, Aliza H. Stark, and Shoshana (Malis) Arad
   3.1 Introduction 31
   3.2 Marine Functional Foods and Supplements 32
      3.2.1 Algae as a Functional Food 32
      3.2.2 The Nutritional Value of Algae 32
   3.3 Microalgae 33
      3.3.1 Red Microalgae 34
      3.3.2 Sulfated Polysaccharides from Red Microalgae 34
      3.3.3 Red Microalgae as a Hypocholesterolemic Agent 35
   3.4 Summary 37
   References 37

Part II Genomics

4 Gene-Diet Interaction and Weight Management
   Lu Qi
   4.1 Introduction 43
   4.2 Diet and Lifestyle Modifications in Weight Management 44

9 **Cancer Chemopreventive Phytochemicals Targeting NF-κB and Nrf2 Signaling Pathways** 102

*Hye-Kyung Na and Young-Joon Surh*

9.1 Introduction 102
9.2 Molecular-Based Cancer Chemoprevention 104
9.3 Nuclear Factor-Kappa B (NF-κB)
  9.3.1 Curcumin 106
  9.3.2 [6]-Gingerol 107
  9.3.3 Capsaicin 107
  9.3.4 Resveratrol 107
  9.3.5 Quercetin 108
  9.3.6 Sulforaphane 108
  9.3.7 Genistein 108
9.4 Nrf2
  9.4.1 Sulforaphane 108
  9.4.2 Curcuminoids 111
  9.4.3 EGCG 111
  9.4.4 Allyl Sulfides 111
  9.4.5 Resveratrol 112
  9.4.6 Pungent Vanilloids 112
  9.4.7 Lycopene 112
  9.4.8 Coffee-Derived Diterpenes 113
  9.4.9 Carnosol 113
  9.4.10 Xanthohumol 113
  9.4.11 Zerumbone 113
  9.4.12 Chalcones 114
9.5 Interplay/Crosstalk between Nrf2 and NF-κB Signaling Pathways 114
9.6 Conclusion 115

10 **The Beneficial Health Effects of Fucoxanthin** 122

*Kazuo Miyashita and Masashi Hosokawa*

10.1 Introduction 122
10.2 The Beneficial Health Effects of Carotenoids as Antioxidants 124
10.3 Anticancer Activity of Fucoxanthin 124
10.4 Anti-Obesity Effects of Fucoxanthin 126
10.5 Anti-Diabetic Effects of Fucoxanthin 127
10.6 Conclusion 130
References 131

11 **Nutrition, Genomics, and Human Health: A Complex Mechanism for Wellness** 135

*Okezie I. Aruoma*

11.1 Introduction 135
11.2 Nutrition Sciences and Clinical Applications in Nutritional Genomics 136
References 139
12 Application of Genomics and Bioinformatics Analysis in Exploratory Study of Functional Foods

Kohsuke Hayamizu and Aiko Manji

12.1 Introduction
12.2 Analysis Tools
  12.2.1 GeneSpring GX
  12.2.2 Bioconductor
  12.2.3 Others
12.3 Interpretation Tools
  12.3.1 Go Analysis Tools
  12.3.2 Pathway Analysis Tools
  12.3.3 Association Network Analysis Tools
12.4 Application Example of Kale (Brassica oleracea L. Var Acephala DC)
  12.4.1 Animal Study and DNA Microarray Analysis
  12.4.2 Data Analysis
  12.4.3 Result
12.5 Conclusion

References

13 Omics Analysis and Databases for Plant Science

Masaaki Kobayashi, Hajime Ohyanagi, and Kentaro Yano

13.1 Introduction
13.2 NGS Technologies and Data Processing
13.3 De novo Plant Genome Assembly by NGS
  13.3.1 Basics of Plant Genome Assembly
  13.3.2 Plant Genome Assembly by NGS Short Reads
  13.3.3 Hybrid-Type Assembly
13.4 Plant Genome Resequencing by NGS
  13.4.1 Conventional Resequencing Technologies
  13.4.2 GBS/RAD-Seq
13.5 Plant Transcriptome Analysis by NGS
  13.5.1 Transcriptome Analysis with Reference Genome Sequences
  13.5.2 Reference-Free Transcriptome Analysis
13.6 Plant Genome and Annotation Databases
  13.6.1 TAIR (Arabidopsis)
  13.6.2 RAP-DB (Rice)
  13.6.3 Other Plants
13.7 Plant Omics Databases
  13.7.1 Transcriptome Databases
  13.7.2 Gene Expression Network Databases
  13.7.3 Metabolic Pathway Databases
  13.7.4 Other Databases for Omics Integration
13.8 Conclusion

15 Combinatorial Approaches Utilizing Nutraceuticals in Cancer Chemoprevention and Therapy: A Complementary Shift with Promising Acuity
Madhulika Singh and Yogeshwer Shukla

15.1 Introduction
15.2 Nutraceuticals
15.3 Nutraceuticals and Key Events in Cancer Development
15.3.1 Inflammation
15.3.2 Oxidative Stress
15.3.3 Antiproliferation
15.3.4 Cell-Cycle Arrest
15.3.5 Apoptosis
15.3.6 Transforming Growth Factor-β (TGF-β)/Smad Signaling Pathway
15.3.7 β-Catenin
15.4 Nutraceuticals in Combinatorial Therapy of Human Cancer: A Pledge of the Future
15.4.1 Nutraceuticals in Cruciferous Vegetables: Potential for Combination Therapy
15.4.2 Indole-3-Carbinol (I3C) and Combinations
15.4.3 Phenethylisothiocyanate (PEITC) and Combinations
15.4.4 Sulforaphane (SFN) and Combinations
15.4.5 Synergism among Cruciferous Compounds
15.4.6 Combinations of Cruciferous Compounds with Conventional Cancer Chemotherapeutics
15.5 Curcumin: Potential for Combination Therapy
15.5.1 Curcumin with Xanthorrhizol
15.5.2 Curcumin with Docosahexaenoic Acid (DHA, Polyunsaturated Fatty Acids Present in Fish Oil)
15.5.3 Curcumin and Genistein
15.5.4 Curcumin and Resveratrol
15.5.5 Curcumin and EGCG
15.5.6 Curcumin and Citrus Limonoids
15.5.7 Curcumin with Apigenin
15.5.8 Curcumin and Triptolide
15.5.9 Combinations of Curcumin with Conventional Cancer Chemotherapeutics
15.6 Resveratrol: Potential for Combination Therapy
15.6.1 Resveratrol and Genistein
15.6.2 Resveratrol and Piperine
15.6.3 Resveratrol and Black Tea Polyphenols
15.6.4 Resveratrol and Melatonin
15.6.5 Synergism among Resveratrol and Other Grapes’ Polyphenols
15.6.6 Resveratrol in Combination with Anticancer Drugs
15.7 Lycopene (a Carotenoid): Potential for Combinations Therapy
15.7.1 Lycopene and Genistein
15.7.2 Lycopene and Sc-allyl Cysteine
15.7.3 Lycopene and 1,25-Dihydroxyvitamin D3
15.7.4 Lycopene with Selenium
15.7.5 Lycopene and FruHis (Ketosamine)
15.7.6 Combination of Lycopene with Cancer Chemotherapeutic Drugs
15.8 Soy Nutraceuticals: Potential for Combination Therapy
15.8.1 Genistein and Daidzein
15.8.2 Genistein and 3,3’-Diindolylmethane 203
15.8.3 Genistein and Capsaicin 204
15.8.4 Combination of Genistein with Conventional Cancer Chemotherapeutics 204
15.9 Tea Polyphenols Potential for Combinatorial Therapy 204
15.9.1 Green Tea and Quercetin 205
15.9.2 EGCG and Soy Phytochemical 205
15.9.3 EGCG and Thymoquinone 205
15.9.4 EGCG and Trichostatin A 205
15.9.5 EGCG and Luteolin 205
15.9.6 EGCG and Pterostilbene (a Stilbenoid Derived from Blueberries) 205
15.9.7 EGCG and Panaxadiol 206
15.9.8 Polyphenon E 206
15.9.9 EGCG with Conventional Cancer Chemotherapy 206
15.10 D-Limonene: Potential for Combination Therapy 207
15.10.1 D-Limonene and Chemotherapeutic Drugs 207
15.11 Miscellaneous: Novel Nutraceuticals Formulation 207
15.11.1 Collect: A Dietary Supplement 207
15.11.2 BreastDefend: A Natural Dietary Supplement 208
15.11.3 ProstaCaid: A Dietary Supplement 208
15.12 Conclusion 208

16 Nutrigenomic Approaches to Understanding the Transcriptional and Metabolic Responses of Phytochemicals to Diet-Induced Obesity and its Complications 218
Myung-Sook Choi and Eun-Young Kwon

16.1 Introduction 218
16.2 Nutrigenomics 219
16.2.1 Tools for Bioinformatics and Systems Biology 219
16.3 Obesity and Cardiometabolic Syndrome 222
16.3.1 Obesity 222
16.3.2 Inflammation and Insulin Resistance in Obesity 223
16.3.3 Obesity and Cardiometabolic Syndrome: A Possible Role for Nutrigenomics 224
16.4 Anti-Obesity Action of Luteolin 225
16.5 Conclusion 226
Acknowledgments 226
References 226

17 Going Beyond the Current Native Nutritional Food Through the Integration of the Omic Data in the Post-Genomic Era: A Study in (Resistant) Starch Systems Biology 230
Treenut Saithong and Saowalak Kalapanulak

17.1 Introduction 230
17.2 Starch and its Yield Improvement in Plants 231
17.3 An Extension of the (Resistant) Starch Yield Improvement Research on the Systems Biology Regime: Integration of the Omic Data from the Post-Genomic Technology 233

Part III Proteomics 243

18 Proteomics and Nutrition Research: An Overview 245
Arun K. Tewari, Sudhasri Mohanty, and Sashwati Roy

18.1 Introduction 245
18.2 Proteomics 245
18.2.1 Proteomics Tools and Technologies 246
18.3 Nutrition and Proteins 246
18.4 Nutritional Biomarkers 248
18.5 Nutritional Bioactives 248
  18.5.1 Wheat Proteins 248
  18.5.2 Vitamins 248
  18.5.3 Glucose 249
  18.5.4 Wine and Soy Nutrients 249
18.6 Diet-Based Proteomics Application to Animal Products (Livestock Applications) 249
18.7 Proteomics and Food Safety 249
18.8 Conclusion 249
18.9 Significance 250
Conflict of Interests 250
References 250

19 Proteomics Analysis for the Functionality of Toona sinensis 253
Sue-Joan Chang and Chun-Yung Huang

  19.1 Introduction 253
  19.2 Toona sinensis 253
    19.2.1 Functions of Toona sinensis Leaf Extracts (TSLs) 254
    19.2.2 Preparation of TSLs 254
  19.3 TSLs Regulate Functions of Testes/Spermatozoa 254
    19.3.1 TSL-2 Exhibits Pro-oxidants but Protects Germ Cells from Apoptosis 254
    19.3.2 TSL-2P Exhibits Prooxidant Properties and Impairs Sperm Maturation 255
    19.3.3 TSL-6 Exhibits Antioxidant Properties and Enhances Sperm Functions 255
  19.4 TSLs Regulate Liver Metabolism 257
    19.4.1 TSL-CE Decreases Gluconeogenesis 257
    19.4.2 TSL-CE Enhances Lipolysis 258
    19.4.3 TSL-CE Decreases Glutamate Metabolism 258
    19.4.4 TSL-CE Alleviates Oxidative Stress 259
    19.4.5 TSL-CE Increases Protein Kinase C –λ 260
    19.4.6 TSL-CE Activates the PPARα/γ Pathway 260
    19.4.7 TSL-CE Inhibits the Polyol Pathway 260
  19.5 TSL as a Novel Antioxidant 261
  19.6 Possible Active Compounds in TSL Extracts 261
  19.7 Conclusion 261

20 Proteomic Approaches to Identify Novel Therapeutics and Nutraceuticals from Filamentous Fungi: Prospects and Challenges 265
Samudra Prosad Banik, Suman Khowala, Chiranjib Pal, and Soumya Mukherjee

  20.1 Introduction 265
  20.2 Mushroom Derived Immunomodulators and their Target Cells in the Immune System 266
    20.2.1 Macrophages 266
    20.2.2 Dendritic Cells 266
    20.2.3 NK Cells 269
  20.3 Mushroom Derived Metabolites in Treating Cancer 271
  20.4 Mushroom Derived Metabolites in Infectious Diseases 271
  20.5 Fungal Enzymes as Therapeutics and Dietary Supplements 274
  20.6 Identification and Characterization of Mushroom Derived Bioactive Therapeutics 275
    20.6.1 Proteomic Methodologies for Characterization of Fungal Complexes 276
  20.7 Challenges in Intracellular Proteome Preparation 279
## 20 Challenges in Extracellular Proteome Preparation
- Challenges in Extracellular Proteome Preparation: 279
- New Generation MS Technologies to Track the Dynamic Proteome: 280
- Glycoproteomics: A New Arsenal in the Proteomic Toolbox: 280
- Glycoproteomics of Filamentous Fungi: 281
- High-Throughput Approaches to Decipher Fungal Glycan Structures: 282
- Challenges in MS Studies of Glycans/Glycopeptides: 284
- Optimized MS Instrumentation for Glycan Analysis: 284
- Tandem Mass Spectrometry: 285
- Bioinformatics for Glycoproteomics: Hitting Databases with MS Peaks: 285
- Predicting Glycan Structures with Computational Tools: 286
- Concluding Remarks: The Road Ahead: 287

## 22.1 Chemoprotective Properties of GSPs
- Chemoprotective Properties of GSPs: 305
  - Components and Molecules: 305
  - Antioxidant Effects: 305
  - Anti-Nonglycemic Glycation and Anti-Inflammation Effects: 305
  - Protective Effects on the Cardiovascular System: 306
  - Protective Effects on Diabetes and its Complications: 307
  - Anti-Aging Effects: 308
  - Anti-Oncogenesis Effects: 308
  - Effect on Wound Healing: 309
  - Anti-Osteoporosis: 309

## 22.2 Proteomic Platform
Proteomic Platform: 309
- Based on Two-Dimensional Gel Electrophoresis (2-DE) Proteomics: 309
- “Gel-Free” Proteomics: 310
- Protein Chips: 311

## 22.3 Proteomics Analysis of the Actions of GSPs
Proteomics Analysis of the Actions of GSPs: 311
- Proteomics Analysis of the Actions of GSP in the Brain of Normal Rats: 311
- Proteomics Analysis of the Actions of GSP in Rats with Diabetic Nephropathy: 312
- Proteomics Analysis of the Actions of GSPB2 in the Aorta of db/db Mice: 314
- Proteomics Analysis of the Actions of GSPB2 in the Kidneys of db/db Mice: 315

## 22.4 Functional Confirmation of Proteins
Functional Confirmation of Proteins: 317
## 23 Genomic and Proteomic Approaches to Lung Transplantation: Identifying Relevant Biomarkers to Improve Surgical Outcome
