# Contents

## Series Preface

### Preface

### List of Contributors

## Basic Properties, Defects and Impurities, Surface properties and Synthesis

   - Gordon Davies
   - Page 3

2. **Transport Properties of Electrons and Holes in Diamond**
   - Jan Isberg
   - Page 29

3. **Point Defects, Impurities and Doping**
   - Alison Mainwood
   - Page 49

4. **Surface Conductivity of Diamond**
   - Lothar Ley
   - Page 69

5. **Recent Progress in the Understanding of CVD Growth of Diamond**
   - J.E. Butler, A. Cheesman and M. N. R. Ashfold
   - Page 103

6. **Heteroepitaxial Growth**
   - M. Schreck
   - Page 125

## Radiation Sensors

7. **Detectors for UV and Far UV Radiation**
   - Alan T. Collins
   - Page 165
8 Diamond Radiation Sensors for Radiotherapy 185  
   Mara Bruzzi

9 Radiation Sensors for High Energy Physics Experiments 207  
   H. Kagan and W. Trischuk

10 CVD-Diamond Detectors for Experiments with Hadrons, Nuclei, and Atoms 227  
   E. Berdermann and M. Ciobanu

11 Neutron Detectors 257  
   G. Verona-Rinati

Active Electronic Devices

12 High-Power Switching Devices 277  
   Jan Isberg

13 H-Terminated Diamond Field-Effect Transistors 289  
   Makoto Kasu

14 Doped Diamond Electron Devices 313  
   E. Kohn and A. Denisenko

15 Optoelectronic Devices Using Homoepitaxial Diamond $p-n$ and $p-i-n$ Junctions 379  
   Toshiharu Makino and Hiromitsu Kato

Electrochemical and Biological Sensors

16 Biofunctionalization of Diamond Surfaces: Fundamentals and Applications 401  
   J. A. Garrido

17 Diamond Electrochemical Sensors 439  
   John S. Foord

Micro-Electro-Mechanical Systems

18 CVD Diamond MEMS 469  
   J. Kusterer and E. Kohn
Superconductivity in CVD Diamond

19 Superconductivity in Diamond 549
   Yoshihiko Takano

Index 563
