Introduction to Science and Engineering Principles for the Development of Bioinspired Materials 1
Muhammad Wajid Ullah, Zhijun Shi, Sehrish Manan, and Guang Yang

I.1 Bioinspiration 1
I.2 Bioinspired Materials 1
I.3 Biofabrication 2
I.3.1 Summary of Part I Biofabrication 2
I.4 Biofabrication Strategies 3
I.4.1 Conventional Biofabrication Strategies 3
I.4.2 Advanced Biofabrication Strategies 3
I.5 Part II Biomacromolecules 5
I.5.1 Summary of Part II Biomacromolecules 5
I.5.2 Carbohydrates 5
I.5.3 Proteins 8
I.5.4 Nucleic Acids 9
I.6 Part III Biomaterials 11
I.6.1 Summary of Part III Biomaterials 11
I.6.2 Features of Biomaterials 12
I.6.3 Current Advances in Biomaterials Science 13
I.7 Scope of the Book 13
Acknowledgments 14
References 14

Part I Biofabrication 17

1 Biotemplating Principles 19
  Cordt Zollfrank and Daniel Van Opdenbosch
1.1 Introduction 19
1.2 Mineralization in Nature 20
1.2.1 Biomineralization 20
1.2.2 Geological Mineralization 21
1.3 Petrified Wood in Construction and Technology 23
1.4 Structural Description and Emulation 24
1.4.1 Antiquity 24
1.4.2 Modern Age: Advent of the Light Microscope 24
1.4.3 Aqueous Silicon Dioxide, Prime Mineralization Agent 25
1.4.4 Artificial Petrification of Wood 25
1.5 Characteristic Parameters 28
1.5.1 Hierarchical Structuring 28
1.5.2 Specific Surface Areas 32
## Contents

1.5.3 Pore Structures  32  
1.6 Applications  34  
1.6.1 Mechanoceramics  34  
1.6.2 Nanoparticle Substrates  35  
1.6.3 Filter and Burner Assemblies  35  
1.6.4 Photovoltaic and Sensing Materials  36  
1.6.5 Wettability Control  37  
1.6.6 Image Plates  38  
1.7 Limitations and Challenges  38  
1.7.1 Particle Growth  38  
1.7.2 Comparison with Alternating Processing Principles  40  
1.7.3 Availability  40  
1.8 Conclusion and Future Topics  42  
  
### Acknowledgments  42  
### Notes  42  
### References  43  

## 2 Tubular Tissue Engineering Based on Microfluidics  53  
*Lixue Tang, Wenfu Zheng, and Xingyu Jiang*  
2.1 Introduction  53  
2.2 Natural Tubular Structures  53  
2.2.1 Blood Vessels  53  
2.2.2 Lymphatic Vessels  53  
2.2.3 Vessels in the Digestive System  54  
2.2.4 Vessels in the Respiratory System  54  
2.2.5 The Features of the Natural Tubular Structures  54  
2.3 Microfluidics  54  
2.3.1 An Introduction to Microfluidics  54  
2.3.2 Microfluidics to Manipulate Cells  55  
2.4 Fabrication of Tubular Structures by Microfluidics  58  
2.4.1 Angiogenesis  58  
2.4.2 Tissue Engineering of Natural Tubes  58  
2.4.3 Tissue Engineering of Other Tubular Structures  62  
2.5 Conclusion  64  
  
### Acknowledgments  64  
### References  64  

## 3 Construction of Three-Dimensional Tissues with Capillary Networks by Coating of Nanometer- or Micrometer-Sized Film on Cell Surfaces  67  
*Michiya Matsusaki, Akihiro Nishiguchi, Chun-Yen Liu, and Mitsuru Akashi*  
3.1 Introduction  67  
3.2 Fabrication of Nanometer- and Micrometer-Sized ECM Layers on Cell Surfaces  68  
3.2.1 Control of Cell Surface by FN Nanofilms  68  
3.2.2 Control of Cell Surface by Collagen Microfilms  72  
3.3 3D-Tissue with Various Thicknesses and Cell Densities  75  
3.4 Fabrication of Vascularized 3D-Tissues and Their Applications  77  
3.5 Conclusion  80  
  
### Acknowledgments  80  
### References  80  

## 4 Three-dimensional Biofabrication on Nematic Ordered Cellulose Templates  83  
*Tetsuo Kondo*  
4.1 Introduction  83  
4.2 What Is Nematic Ordered Cellulose (NOC)?  84  
4.2.1 Nematic Ordered Cellulose  84
4.2.2 Various Nematic Ordered Templates and Modified Nematic Ordered Cellulose 87
4.3 Exclusive Surface Properties of NOC and Its Unique Applications 89
4.3.1 Bio-Directed Epitaxial Nano-Deposition on Molecular Tracks of the NOC Template 89
4.3.2 Critical Factors in Bio-Directed Epitaxial Nano-Deposition on Molecular Tracks 90
4.3.3 Regulated Patterns of Bacterial Movements Based on Their Secreted Cellulose Nanofibers Interacting Interfacially with Ordered Chitin and Honeycomb Cellulose Templates 93
4.3.4 NOC Templates Mediating Order-Patterned Deposition Accompanied by Synthesis of Calcium Phosphates as Biomimic Mineralization 97
4.3.5 Three-Dimensional Culture of Epidermal Cells on NOC Scaffolds 98
4.4 Conclusion 100
References 101

5 Preparation and Application of Biomimetic Materials Inspired by Mussel Adhesive Proteins 103
Heng Shen, Zhenchao Qian, Ning Zhao, and Jian Xu
5.1 Introduction 103
5.2 Various Research Studies 104
5.3 Conclusion 116
References 116

6 Self-assembly of Polylactic Acid-based Amphiphilic Block Copolymers and Their Application in the Biomedical Field 119
Lin Xiao, Lixia Huang, Li Liu, and Guang Yang
6.1 Introduction 119
6.2 Micellar Structures from PLA-based Amphiphilic Block Copolymers 119
6.2.1 Preparation and Mechanism of Micellar Structures 120
6.2.2 Stability and Stimuli-Responsive Properties: Molecular Design and Biomedical Applications 122
6.3 Hydrogels from PLA-based Amphiphilic Block Copolymers 125
6.3.1 Mechanism of Hydrogel Formation from PLA-based Amphiphilic Block Copolymers 125
6.3.2 Properties and Biomedical Applications of Hydrogel from PLA-based Amphiphilic Block Copolymers 126
6.4 Conclusion 127
Acknowledgments 127
References 127

Part II Biomacromolecules 131

7 Electroconductive Bioscaffolds for 2D and 3D Cell Culture 133
Zhijun Shi, Lin Mao, Muhammad Wajid Ullah, Sixiang Li, Li Wang, Sanming Hu, and Guang Yang
7.1 Introduction 133
7.2 Electrical Stimulation 133
7.3 Electroconductive Bioscaffolds 135
7.3.1 Conductive Polymers-based Electroconductive Bioscaffolds 135
7.3.2 Carbon Nanotubes-based Electroconductive Bioscaffolds 137
7.3.3 Graphene-based Electroconductive Bioscaffolds 140
7.4 Conclusion 145
Acknowledgments 145
References 145

8 Starch and Plant Storage Polysaccharides 149
Francisco Vilaplana, Wei Zou, and Robert G. Gilbert
8.1 Starch and Other Seed Polysaccharides: Availability, Molecular Structure, and Heterogeneity 149
8.1.1 Molecular Structure and Composition of Seeds and Cereal Grains 149
8.1.2 Starch Hierarchical Structure from Bonds to the Granule 149
8.1.3 Crystalline Structure 149
8.1.4 Granular Structure 150
11 Polypeptides Synthesized by Ring-opening Polymerization of N-Carboxyanhydrides: Preparation, Assembly, and Applications 201
Yuan Yao, Yongfeng Zhou, and Deyue Yan
11.1 Introduction 201
11.2 Living Polymerization of NCAs 201
11.2.1 Transition Metal Complexes 201
11.2.2 Active Initiators Based on Amines 203
11.2.3 Recent Advances in Living NCA ROP Polymerization, 2013-2016 204
11.3 Synthesis of Traditional Copolypeptides and Hybrids 204
11.3.1 Random Copolypeptides 205
11.3.2 Hybrid Block Polypeptides 205
11.3.3 Block Copolypeptides 206
11.3.4 Non-linear Polypeptides and Copolypeptides 206
11.4 New Monomers and Side-Chain Functionalized Polypeptides 208
11.4.1 New NCA Monomers 208
11.4.2 Glycopolypeptides 208
11.4.3 Water-soluble Polypeptides with Stable Helical Conformation 209
11.4.4 Stimuli-responsive Polypeptides 210
11.5 The Self-assembly of Polypeptides 212
11.5.1 Chiral Self-assembly 212
11.5.2 Self-assembly with Inorganic Sources 213
11.5.3 Microphase Separation of Polypeptides 214
11.5.4 Self-assembly in Solution 214
11.5.5 Polypeptide Gels 215
11.6 Novel Bio-related Applications of Polypeptides 216
11.6.1 Drug Delivery 216
11.6.2 Gene Delivery 216
11.6.3 Membrane Active and Antimicrobial Polypeptides 217
11.6.4 Tissue Engineering 217
11.7 Conclusion 219
References 219

12 Preparation of Gradient Polymeric Structures and Their Biological Applications 225
Tao Du, Feng Zhou, and Shutao Wang
12.1 Introduction 225
12.2 Gradient Polymeric Structures 225
12.2.1 Gradient Hydrogels 225
12.2.2 Gradient Polymer Brushes 230
12.3 Gradient Polymeric Structures Regulated Cell Behavior 241
12.3.1 Gradient Cell Adhesion 241
12.3.2 Cell Migration 244
12.4 Conclusion 247
References 247

Part III Biomaterials 251

13 Bioinspired Materials and Structures: A Case Study Based on Selected Examples 253
Tom Masselter, Georg Bold, Marc Thielen, Olga Speck, and Thomas Speck
13.1 Introduction 253
13.2 Fiber-reinforced Structures Inspired by Unbranched and Branched Plant Stems 253
