Index

Adaptive relaying, 5, 285
Agents, 132
Amplitude modulation, 71
Analog-to-digital converter, 8, 15
Anti-aliasing, 8, 83
Architecture, 6
Area control error (ACE), 302
Artificial Neural Networks, 129
Auto-correlation, 95
Auxiliary current transformer, 8
Auxiliary relays, 222

Back-up, 21
BEAMA, 220
Bewley lattice diagram, 259
Blackman Harris Window, 123
Breaker health monitoring, 250
Bus protection, 28, 189
Butterworth filter, 17, 120

Capacitive voltage transformer, 47, 221
Chebyshev, 17
Circuit breaker, 27
Clarke components, 169
Computer relaying, 1
Convolution, 76
Covariance, 91

Cross-correlation, 191, 271
CT, 8, 27
Current transformer, 27, 164
Cut-off frequency, 83
CVT, 27, 180

Data window, 126
DC component, 51
DC offset, 149
Removal, 163
Decision Trees, 131
Dependability, 28
DFT, 84
Difference Equation, 171
Differential equation algorithm, 159
Differential protection of stator windings, 200
Differential relay, 40, 191
Digital filters, 113
Directional relay, 30
Discrete Fourier Transform (DFT), 84
Discrete Time Systems, 109
Convolution, 110
Fourier Transform, 118
Ideal Low-pass, 118
Discriminant function, 267
Distance relay, 35, 170

Computer Relaying for Power Systems 2e by A. G. Phadke and J. S. Thorp
© 2009 John Wiley & Sons, Ltd
Electromagnetic interference (EMI), 217
EMP, 217
EPROM, 7
Equal area criterion, 297
Estimation, 92
excitation systems, 302
Expectation, 89

FACTS, 249
Fast Transient test, 218
Fault classification, 130
Fault location algorithms, 2
FFT, 85
Filter Bank, 126
Filter Synthesis, 124
Flattop Window, 123
Forward waves, 259
Fourier series, 55
Exponential, 58
Sine-cosine, 60
Fourier transform, 63
Fourier-Walsh expansion, 63
Fractional cycle windows, 151

Gain error, 13
Gaussian density, 34
Gaussian pulse, 74
Generator protection, 189

Hamming Window, 121
Histogram, 87
HVDC lines, 249

IEC, 220
IEC61850, 133
IEEE, 6
Incipient fault detection, 248
Information matrix, 101
Integration, 4
Interarea Oscillations, 249
Interface panel, 223
Interpolation, 107

Inverse Fourier Transform, 65
Inverse time, 179
Inverse z Transform, 115
Islanding, 303

Joint distribution, 90

k-algorithm, 173
Kalman filter, 96
Karrenbauer transformation, 267

Least square solution, 93
Linear Phase, 70, 122
Load shedding, 233
Loss of Field, 203, 302
Low pass filters
    Butterworth, 120
    Chebyshev, 17
    Ideal, 67

Maintenance, 213
Modal quantities, 262
Modes of propagation, 266
Modulation, 71
MOV, 9
Multiplexer, 10
Multi-terminal lines, 273

NAVSTAR satellites, 234
Negative sequence, 43, 180
Nonlinearity, 13
Nyquist rate, 83

Offset error, 13
Orthogonal expansions, 62
Out-of-step relaying, 43, 203, 295
Overcurrent relay, 26, 204
Over-defined equations, 92
