List of Abbreviations, vii  
Preface, xi  
Acknowledgements, xiii  

## PART I The basics

1. About this book and how to use it, 3  
2. Basic neuroanatomy, 4  
3. Neurological history, examination, signs and localisation, 7  
4. Neurological investigations, 21  

## PART II Complaints: Face-to-face with the patient

5. Headache, 31  
6. Blackouts, 34  
7. Visual disturbances, 36  
8. Dizziness and vertigo, 39  
9. Weak legs, 41  
10. Numbness and sensory disturbance, 44  
11. Gait assessment and disturbance, 46  

## PART III Conditions: Applying the basics

12. Headache, 51  
13. Transient ischaemic attacks (TIAs), 55  
14. Stroke I: Thromboembolic stroke and syndromes, 59  
15. Stroke II: Intracerebral haemorrhage, 65  
16. Stroke III: Subarachnoid haemorrhage, 68  
17. Epilepsy, 75  
18. Multiple sclerosis, 80  
19. Parkinson’s disease and other related syndromes, 84  
20. Other movement disorders, 88  
21. Central nervous system infections: Meningitis, 91  
22. Central nervous system infections: Cerebral abscess, 94  
23. Radiculopathy and disc herniation, 97  
24. Peripheral neuropathies’ syndromes, 100  
25. Common peripheral nerve lesions: Mononeuropathies, 104  
26. Motor neurone disease (MND), 108  
27. Myasthenia gravis and Lambert–Eaton myasthenic syndrome, 111  
28. Diseases of the muscle, 114  
29. Alzheimer’s disease and other dementia syndromes, 118  
30. Raised intracranial pressure and herniation syndromes, 122  
31. Coma and brainstem death, 127
Contents

32 Head injury: General approach and management, 130
33 Head injury: Subdural haematoma, skull fractures and contusions, 135
34 Head injury: Extradural haematoma, 141
35 Spinal injuries and spinal cord syndromes, 144
36 CNS neoplasia, 151
37 Hydrocephalus, 155

Appendices

Appendix 1 Management of status epilepticus (SE), 163
Appendix 2 Glasgow Coma Scale (GCS), 164
Appendix 3 Primary neuroepithelial tumours of the central nervous system, 166
Appendix 4 Other tumours affecting the central nervous system, 173

Index, 181
