Table of Contents

Tribute in the Memory of Manav Yadav vii
About the Editors ix
List of Contributors xv
Foreword by Prof. Geoffrey Hawtin xix
Foreword by Dr. R S Paroda xxi
Preface xxiii
Acknowledgments xxv

Chapter 1: Impact of Climate Change on Agriculture Production, Food, and Nutritional Security
Shyam S. Yadav, Danny Hunter, Bob Redden, Mahboob Nang, D. K. Yadava, and Abdul Basir Habibi 1

Chapter 2: Challenge for Future Agriculture
Jerry L. Hatfield and John H. Prueger 24

Chapter 3: Global Warming and Evolution of Wild Cereals
Eviatar Nevo and Robert Henry 44

Chapter 4: Wild Relatives for the Crop Improvement Challenges of Climate Change: The Adaptation Range of Crops
Robert Redden 61

Chapter 5: The Importance of Crop Wild Relatives, Diversity, and Genetic Potential for Adaptation to Abiotic Stress-Prone Environments
Rodomiro Ortiz 80

Chapter 6: Conservation Planning for Crop Wild Relative Diversity
Nigel Maxted, Alvina Avagyan, Lothar Frese, José Iriondo, Shelagh Kell, Joana Magos Brehm, Alon Singer, and Ehsan Dulloo 88

Chapter 7: Research on Conservation and Use of Crop Wild Relatives
Mohammad Ehsan Dulloo, Elena Fiorino, and Imke Thormann 108

Chapter 8: Research on Crop Wild Relatives in Major Food Crops
Enrico Porceddu and Ardeshir Damania 130
Chapter 9: Utilization of Wild Relatives in the Breeding of Tomato and Other Major Vegetables
Andreas W. Ebert and Roland Schafleitner

Chapter 10: Conservation Roles of the Millennium Seed Bank and the Svalbard Global Seed Vault
Ruth J. Eastwood, Sarah Cody, Ola T. Westengen, and Roland von Bothmer

Chapter 11: Seed Biology
Sarah E. Ashmore, Amelia Martyn, Karen Sommerville, Graeme Errington, and Catherine A. Offord

Chapter 12: Biotechnology and Genomics: Exploiting the Potential of CWR
Peter G. Walley and Jonathan D. Moore

Chapter 13: Unavailability of Wild Relatives
Eve Emshwiller, Germán Calberto-Sánchez, Gezahegn Girma, Shelley Jansky, Julie Sardos, Charles Staver, Frederick L. Stoddard, and Nicolas Roux

Chapter 14: Synthetic Engineered Genes, GMOs, and Hybridization with Wild Relatives
Nelli A. Hovhannisyan and Aleksandr H. Yesayan

Chapter 15: Using Genomic Approaches to Unlock the Potential of CWR for Crop Adaptation to Climate Change
Gregory J. Baute, Hannes Dempewolf, and Losren H. Rieseberg

Chapter 16: The Economics of Crop Wild Relatives under Climate Change
Nicholas Tyack and Hannes Dempewolf

Chapter 17: Potential of Minor Fruit Crop Wild Relatives (CWR) as New Crops in Breeding for Market Diversification
Vojtěch Holubec, Tamara Smekalova, František Paprštein, Lenka Štočková, and Vojtěch Řezníček

Chapter 18: The Australian Vigna Species: A Case Study in the Collection and Conservation of Crop Wild Relatives
R. J. Lawn

Chapter 19: Beyond Biodiversity: Ecosystem Services of Crop Wild Relatives
Abdullah A. Jaradat

Chapter 20: CWR and the Prebreeding in the Context of the International Treaty on Plant Genetic Resources for Food and Agriculture
Shakeel Bhatti, Mario Marino, Daniele Manzella, Jan Petter Borring, and Álvaro Toledo
