Thoratec HeartMate XVE LVAD 63
Thoratec PVAD (pneumatic) 63
thrombocytopenia 25–6, 58
thromboembolic phenomena, heart transplants 202
thrombosis 25–6, 32–3, 58, 60–1, 62, 205–7
time-velocity integral (TVI) 34–5
titrate vasodilators 64–5
TOF see Tetralogy of Fallot
TOF/APV see Tetralogy of Fallot with absent pulmonary valve
TOF/PA see Tetralogy of Fallot with pulmonary atresia
tolazoline 20
total cavopulmonary connection (TCPC) 127–8, 161, 172–9
total heart transplant technique 205–7
definition 10, 12, 46–7
total pulmonary venous blood flow 12–15, 90–2, 161–80
definition 10, 12, 46–7
total systemic venous blood flow 12–15, 45–8, 53, 90–2, 161–80
totally anomalous pulmonary venous return (TAPVR) 12, 107–11, 237–8
see also partially... anatomy 107–8
anesthetic management 109–10
catheterization 110–11
definition 107–8
drainage patterns 107–8
long-term outcomes 110–11
physiology 108–9
post-CPB management 110–11
surgical therapy/management 109–10
tourniquets 189
Toyoba VAD 63
TPGs see transpulmonary gradients
trabeculated part of left atrium 4–5
see also primitive atrium
trabeculated part of left ventricle 4–5
see also primitive ventricle
trabeculated part of right atrium 4–5
see also primitive atrium
trabeculated part of right ventricle 4–5
see also primitive ventricle
trachea
lung transplants 219
vascular rings 191–4
tracheal extubation 38, 82, 179, 185
tracheal intubation 64–5, 203–15
tracheal stenosis 25, 44
tracheobronchomalacia 146
tranexamic acid 65
transcatheter radiofrequency perforation 127–8
transcellular hydrogen ion gradient 55–6
transcranial Doppler (TCD) background 34–5, 54–5, 57, 117–18, 120
monitoring 34–5, 54–5, 57
transesophageal echocardiography (TEE) 35, 36, 65, 82, 86, 96, 101, 105, 110, 114–16, 120–1, 123, 126–8, 139, 156, 162–6, 172, 185, 190, 203, 209, 222, 225–7, 242
transfusions 63–4
transitional AVC 93–6
transposition of the great arteries (TGAs) 11, 13–15, 73, 99, 101, 147–60, 163–6, 195–8
see also congenitally corrected... double-outlet right ventricle; individual specific lesions; intercirculatory mixing
anatomy 147–8, 157–8
anesthetic management 101, 155
arterial (Jatene) switch operation (ASO) 151–3, 156
catheterization 151
clinical subsets 148–51
definition 13, 147–8
LeCompte procedure 154–5, 157
Mustard procedure 153–4, 159, 237
Nikaidoh procedure 154–5
non-cardiac surgery 157
physiology 148–51, 158
post-CPB management 101, 155–7
Rastelli procedure 154–5, 158–60
Senning procedure 153–4, 159
surgical therapy/management 151–60
transposition physiology 10, 14
see also physiologic shunts
background 10, 14
definition 10
transpulmonary gradients (TPGs) 48, 50, 167, 172, 177–80
transthoracic echocardiography (TTE) 35, 127–8, 221–2
transthoracic intracardiac lines 32–3, 221–2
transthoracic pulmonary artery catheter 32–3, 202–3
see also pulmonary artery catheters
tricuspid atresia 11, 13–17, 161–6, 175, 195–8
anatomy 195, 196
anesthetic management 197
background 11–13, 15–17, 161–6, 175, 195–8
definition 195
physiology 195–7, 198
surgical therapy/management 197
types 195–8
tricuspid regurgitation (TR) 159–60, 205–15, 226–8, 239–42
tricuspid valve (TV) 4–5, 39–40, 65, 94–6, 97–101, 103–6, 125–9, 152–60, 195–8, 234–8, 239–42
see also Ebstein anomaly
Trisomy 13, 18 and 21 89, 97, 131
truncus arteriosus (TA) 4–5, 11, 13, 24, 32, 73–5, 103–6, 161
see also aorta; individual specific lesions; pulmonary trunk anatomy 103–4
anesthetic management 105–6
background 4–5, 11, 13, 24, 32, 73–5, 103–6, 161
catheterization 105
Collett and Edwards classifications 103–4
definition 103, 104
physiology 104
surgical therapy/management 104–5
types 103–5
Van Praagh and Van Praagh classifications 103–4
TTE see transthoracic echocardiography
tuberculous sclerosis 24
tubing 52–8, 59–62
Turner syndrome 77
TV see tricuspid valve
two-ventricle (biventricular) repairs 11, 65, 101, 128, 161, 184–5, 238
U
UFH see unfractioned heparin
ultrafiltration 55
umbilical arteries 5–6, 31, 40–1
see also medial umbilical ligaments; superior vesicular artery
umbilical cord 5
umbilical vein 3–6, 39–40, 107–11
see also ligamentum teres
umbilicovitelline drainage system 107–11
umbilicus 5
unbalanced AVC 94–6, 100
unfractioned heparin (UFH) 57–8
unifocalization, definition 142–3
univent tubes 222–4
urine output, monitoring 54–5, 63
uterus 108–11
V
VA-ECMO see veno-arterial ECMO
VACTERL association 24–5
vacuum-assisted venous drainage 51–3
VADs see ventricular assist devices
vagolytic and vagotonic agents 214–15
vagus nerve 78–80, 213–15
dermal lesions’ assessments 50
valvular stenosis 16–17, 44, 77, 111, 113–16
Van Praagh and Van Praagh classifications, truncus arteriosus (TA) 103–4
VAS see ventriculoatrial septum
vascular rings 191–4
anatomy 191, 192
anesthetic management 192–4
catheterization 192
definition 191
physiology 191
surgical therapy/management 191–2
vascular smooth muscle (VSM) 20
vasodilator agents see also nitric oxide
pulmonary vascular resistance (PVR) 15–21, 37, 64–5, 82, 91–2, 109–10, 115, 156, 167–8, 209
vasopressin 28, 64–5, 123
VATER association 25, 73
vecuronium 36–7
veno-arterial ECMO (VA-ECMO) 59–62
veno-venous ECMO (VV-ECMO) 59–62
venoatrial connections, heterotaxy syndrome 233–4
venodilation 64–5
venous filters 52–8
venous reservoirs 52–8, 59–62
ventricles 3–5, 62–5, 199–215, 234–8
ventricular anatomy, heterotaxy syndrome 235–6
ventricular arrhythmias 28, 92, 96, 139, 157, 202–5, 212–13
ventricular assist devices (VADs) 62–5
see also mechanical support devices
anesthetic considerations 62–5
anesthetic induction 64–5
BiVAD insertion problems 65
bridge aspects 62
complications 62, 65
currently available devices 62–3, 64
definition 62
dysfunction 62–3
indications 62
monitoring 63–5
post-VAD placement management 65
preoperative evaluations 63–4
pulsatile/axial device comparisons 62, 63, 65
relative contraindications 62
ventricular end-diastolic pressure 21, 41–3
ventricular failure 105–6
ventricular fibrillation 105, 166
ventricular hypertrophy (VH) 8, 21, 24, 25, 96, 131–40
ventricular output 10–15, 64–5, 165–80, 239–42
ventricular pacing 116
see also individual specific lesions; simple anatomic shunts
anatomy 89, 90, 97–8
anesthetic management 91, 95
catheterization 91
definition 89, 97
non-cardiac surgery 92
physiology 89–90, 99, 100
post-CPB management 91–2
surgical therapy/management 91
ventricular tachyarrhythmia 24, 28
ventriculocardioarterial connections, heterotaxy syndrome 236–7
ventriculoatrial septum (VAS) 83–5, 95–6, 97–101, 239–42
ventriculography 41–3, 50
ventriculotomies 91, 138–9, 158–60
verapamil 215
video-assisted thorascopic surgery (VATS) 69–71
see also individual specific lesions
viruses, environmental factors causing CHD 3
VSDs see ventricular septal defects
VSM see vascular smooth muscle
VV-ECMO see veno-venous ECMO
W
Waterston and Potts shunts 135–6, 137
weight inhibitions, congestive heart failure 23
wheezing 23
Williams–Beurin syndrome 22, 113–16
Wolff–Parkinson–White syndrome (WPW) 239
see also Ebstein anomaly
Wood units 18, 50, 175, 201
see also pulmonary hypertension
Y
Yasui procedure 101, 189
see also Norwood...; Rastelli...
Z
Zellweger syndrome 24
