C, E, H
  cache organization, 44, 46, 86, 106
  control theory, 4, 5, 9, 10, 65
  end-to-end (E2E), 12–14, 23, 24, 30
  Hopfield neural network (HNN), 41

I
  internet of things (IoT), 1, 3
  internet service provider (ISP), 4, 26, 35, 122
  IPTV, 2, 20, 30, 137

K
  key performance indicator (KPI), 6, 13, 16, 17, 19
  key quality indicator (KQI), 6, 7, 13

M
  MAB paradigm, 108
  Maryland routing simulator (MaRS), 79, 81
  mobility management (MM), 28

N, O
  networking, 2, 11, 12, 26, 137
  next-generation networks (NGN), 1, 2, 11, 38, 62, 138
  optimized network engineering tool (OPNET), 79, 81, 84, 86

P
  packet delivery ratio (PDR), 83, 103
  perception metrics, 3, 6, 138
  Poisson process, 87

Q
  Q-learning, 51, 60, 63, 65, 66, 68
  Q-routing, 41, 53, 61, 62
  Q-value, 41, 57–61, 71, 72, 74, 76
  QoE-based CDN architecture (QCDNA), 12, 135
  quality of experience (QoE) measurement methods, 11, 20, 22, 70, 97, 123
  metrics, 16, 17, 31, 52
  quality of multimedia streaming metric (QMS), 28

R
  radio access networks (RANs), 28
  routing protocol, 36, 37, 39, 61–63, 80, 81, 84, 95

S
  server placement, 35, 43, 46, 86, 106
  server selection, 4, 35, 42, 46–48, 52, 79, 105, 106
service-level agreement (SLA), 8, 13, 24, 38, 139
simulated annealing (SA), 41

T, U, V
time to live (TIL), 79, 121
