  apical five-chamber view 50
  left cranial transverse view 46
  measurements 86–89
  M-mode imaging 78–80
  reference values 95–103
  right parasternal heart base views 39–42
  right parasternal inflow outflow view 26, 28, 29
aortic body tumors 131–133
aortic valve 43
  endocarditis 133–135
  A peak, mitral valve 81, 82
  apical five-chamber view 50, 73–74
  apical four-chamber view 49, 69–73
  applications, echocardiography 1
cardiomyopathy
  dilated 120–123
  hypertrophic 29, 30, 92, 114–119
  unclassified 123–126
cats
  apical four-chamber view 72–73
  four-chamber view 32
  left auricle view 47–48, 69
  left ventricular inflow outflow view 29–31, 55–56
  orientation of heart in thorax 4
  reference values 95
chemodectoma 132–133
chordae tendineae
  right parasternal transverse view 38–39
  ruptured 106, 109
  compounding 23
contractility 91, 92, 94
  degenerative mitral valve disease 110, 112
  dilated cardiomyopathy 122
  cross beam 23
degenerative mitral valve disease 106–114
depth, adjusting 7–8
dilated cardiomyopathy 120–123
dogs
  apical four-chamber view 69–72
  four-chamber view 33–34, 35
  left ventricular inflow outflow view 25–29, 52–55
  orientation of heart in thorax 3
  reference values 96–103
dynamic range 15–16
diastolic 78–80
diastolic flow 112
endocarditis 133–135
  E peak, mitral valve 80–82
  E peak to septal separation (EPSS) 89–90, 103
  dilated cardiomyopathy 120, 121, 123
focus 18–19
  four-chamber view 31–35
  scanning technique 56–59
fractional shortening 91, 93–94
degenerative mitral valve disease 110, 112
dilated cardiomyopathy 120, 122
  reference values 95–103
frequency, transducer 8–10
  gain 10–11
  grey map 14–15
hair removal 4–5
harmonics 20–21
heart
  anatomy 2
  orientation in thorax 3–4
  base
  left cranial transverse views 45–48, 67–69
  right parasternal transverse views 39–42, 62–64
  heart rate (HR) 103
hemangiosarcoma 129–131
hypertrophic (obstructive) cardiomyopathy 29, 30, 92, 114–119
  image quality, improving 7–23
  imaging planes, two-dimensional 24–50
