**Part One: Foundations of Health Promotion Programs**  1

**Chapter 1  What Are Health Promotion Programs?**  3  
*Carl I. Fertman, Diane D. Allensworth, and M. Elaine Auld*

Health, Health Promotion, and Health Promotion Programs  3

Historical Context for Health Promotion ........................................... 6

*Healthy People*: A National Public-Private Partnership 
  to Promote Health ................................................................ 10

Impact of the Patient Protection and Affordable Care Act on Health Promotion  12

Health Education and Health Promotion ......................................... 15

Settings for Health Promotion Programs ......................................... 16

Stakeholders in Health Promotion Programs .................................... 19

Advisory Boards ........................................................................ 20

Health Promotion, Health Care, and eHealth .................................. 21

Summary .................................................................................. 23

For Practice and Discussion ........................................................... 23

Key Terms ................................................................................ 24

References .............................................................................. 25

**Chapter 2  Advancing Equity and Eliminating Health Disparities**  29  
*Francisco Soto Mas, Diane D. Allensworth, Camara Phyllis Jones, and Holly E. Jacobson*

Population Groups Experiencing Health Inequities and Disparities  29

Understanding Racial and Ethnic Differences in Health .................. 36
# CONTENTS

Program Strategies to Achieve Health Equity and Eliminate Health Disparities Among Minorities .......................................................... 37

Engage Minority Groups and Communities Directly in Addressing Health Promotion Issues ................................................................. 38

Summary ................................................................................................. 46

For Practice and Discussion .................................................................. 47

Key Terms ............................................................................................... 48

References .............................................................................................. 48

## Chapter 3  Theory in Health Promotion Programs  ...................................... 53

*Melissa Grim and Brian Hortz*

Theory in Health Promotion Programs .................................................. 53

Foundational Theories/Models: Intrapersonal Level .................................. 55

Foundational Theories/Models: Interpersonal Level ................................. 59

Foundational Theories/Models: Population Level ..................................... 62

Foundational Theories/Models Applied Across the Levels ....................... 66

Health Promotion Program Planning Models ........................................... 67

Using Health Theories and Planning Models ............................................ 75

Summary ................................................................................................. 75

For Practice and Discussion .................................................................. 76

Key Terms ............................................................................................... 77

References .............................................................................................. 77

## Part Two: Planning Health Promotion Programs ........................................ 83

## Chapter 4  Assessing the Needs of Program Participants  ........................... 85

*James H. Price, Joseph A. Dake, and Britney Ward*

Defining a Needs Assessment .................................................................. 85

Conducting a Health Needs Assessment .................................................... 92

Promoting a Needs Assessment ............................................................... 92

Using Primary Data Methods and Tools ................................................... 93

Using Secondary Data Methods and Tools ................................................. 99

Reporting and Sharing the Findings ......................................................... 101

Summary ................................................................................................. 107

For Practice and Discussion .................................................................. 108

Key Terms ............................................................................................... 109

References .............................................................................................. 110
## Chapter 5  Making Decisions to Create and Support a Program  ...  113

*Jiunn-Jye Sheu, W. William Chen, and Huey-Shys Chen*

- Identifying a Mission Statement, Goals, and Objectives ... 113
- Writing Program Objectives ... 115
- Deciding on Program Interventions ... 119
- Selecting Health Promotion Materials ... 122
- Using Evidence-Based Interventions ... 124
- Developing Effective Policies and Procedures ... 130
- Transitioning to Program Implementation ... 135
- Summary ... 137
- For Practice and Discussion ... 138
- Key Terms ... 139
- References ... 139

## Part Three: Implementing Health Promotion Programs  141

### Chapter 6  Implementation Tools, Program Staff, and Budgets  ... 143

*Jean M. Breny, Michael C. Fagen, and Kathleen M. Roe*

- From Program Planning to Action Planning ... 143
- Preparing a Logic Model ... 145
- Using a Gantt Chart to Guide Implementation ... 149
- Additional Implementation Planning Tools ... 152
- Planning for Implementation Challenges ... 153
- Hiring and Managing High-Quality Program Staff ... 157
- Budgeting and Fiscal Management ... 161
- Summary ... 166
- For Practice and Discussion ... 167
- Key Terms ... 168
- References ... 168

### Chapter 7  Advocacy  ... 171

*Regina A. Galer-Unti, Kelly Bishop, and Regina McCoy Pulliam*

- Creating an Advocacy Agenda for a Program ... 171
- Advocacy as a Professional Responsibility ... 174
- Examples of Successful Health Policy Advocacy ... 175
- Becoming Fluent in the Language of Advocacy ... 176
- Forming Alliances and Partnerships for Advocacy ... 181

| Chapter 9 | Where Money Meets Mission: Developing and Increasing Program Funding | 219 |
| Carl I. Fertman, Karen A. Spiller, and Angela D. Mickalide |
| Knowing Program Funding | 219 |
| Sources of Program Funding | 220 |
| Funding Varies by Program Participants and Setting | 224 |
| Writing a Grant Proposal | 226 |
| Maintaining Relationships with Funders | 232 |
| Fundraising | 234 |
| Working with Board Members | 237 |
| Summary | 239 |
| For Practice and Discussion | 239 |
| Key Terms | 240 |
| References | 240 |

| Part Four: Evaluating and Sustaining Health Promotion Programs | 243 |
| Chapter 10 | Evaluating Health Promotion Programs | 245 |
| Joseph A. Dake and Timothy R. Jordan |
| Why Evaluate a Health Promotion Program? | 245 |
| How Do I Get Started? | 246 |
Evaluation Frameworks .............................................. 257
Evaluation Design ................................................. 260
Data Collection and Analysis ..................................... 263
Evaluation Reports ................................................. 264
Implementing an Evaluation ...................................... 266
Summary ............................................................... 270
For Practice and Discussion ...................................... 271
Key Terms ............................................................. 272
References ............................................................. 272

Chapter 11  Big Data and Health Promotion Programs ....... 275
Carl I. Fertman, Joseph A. Dake, and Margaret Wielinski
What Is Big Data? ................................................... 275
Data Mining with Health Promotion Big Data ............... 279
Big Data Enhances the Impact and Sustainability of Health
Promotion Programs ............................................. 284
Big Data Challenges ............................................... 286
Health Information Management and Health Informatics
  Professionals: Big Data Professional Fields ................. 289
Summary ............................................................... 292
For Practice and Discussion ...................................... 292
Key Terms ............................................................. 293
References ............................................................. 293

Chapter 12  Leadership for Change and Sustainability ....... 295
Sara L. Cole and David A. Sleet
Catalyzing and Mastering Change ............................... 295
Engaging Participants and Building Support ............... 298
Collective Impact .................................................... 302
Networking, Outreach, and Referrals ......................... 304
Online Communities .............................................. 305
Ensuring Competence Through Credentialing ............... 308
Implementation Science to Improve Program
  Effectiveness ....................................................... 312
Enhancing Program Impact and Sustainability ............. 313
Summary ............................................................... 316
For Practice and Discussion ...................................... 316
Key Terms ............................................................. 317
References ............................................................. 317
Part Five: Health Promotion Programs in Diverse Settings

Chapter 13  Promoting Health in Schools and Universities  
Diane D. Allensworth, Jim Grizzell, Beth Stevenson,  
and Marlene K. Tappe

Rationale for Promoting Health in Schools and Universities  
Evolving Role of Promoting Health in Schools  
and Universities  
Current Role of Promoting Health: Preschool Through  
Postsecondary Schooling and Universities  
Resources and Tools  
Challenges  
Career Opportunities  
Summary  
For Practice and Discussion  
Key Terms  
References

Chapter 14  Patient-Centered Health Promotion Programs  
in Health Care Organizations
Louise Villejo, Cezanne Garcia, and Katherine Crosson

Historical Context and Evolution of Engaging Patients  
and Families in the Design and Delivery of Health Promotion  
Programs  
Effective Programs in Health Care Organizations  
Health Promotion Resources  
Challenges for Programs in Health Care Organizations  
Career Opportunities  
Summary  
For Practice and Discussion  
Key Terms  
References

Chapter 15  Health Promotion Programs in Workplace Settings
Laura Linnan and Anna Grummon

Workplace Health Promotion—A Brief History  
and Current Trends  
Leading by Example: Workplace Success Stories  
The Future of Workplace Health Promotion
Career Opportunities in Workplace Health Promotion .... 384
