Academic performance, 75
Actuarial versus clinical debate, 8–9, 67, 115
Addington v. Texas, 156
Adjustment Disorder with Depressed Mood, in sample report, 279
Adolescent offenders. See Juvenile offenders
Adult court, transfer to, 233–234
Adult relationships:
  juvenile offenders, and loss of, 227
  sexual offenders, and romantic relationships, 193–194
Adversarial nature of legal proceedings, 30
Adversity in early home life, 220–221
Affect, negative, 74
Age:
  death penalty case and, 246 as risk factor, 70–71
  sexual offenders and, 188–189, 194
Alcoholism. See Substance abuse/alcoholism
Americans with Disabilities Act (1990), Title II, 158
Anamnestic approach, 94–98, 177

Anger as risk factor, 73
Antisocial attitudes, 73
Antisocial lifestyle, sexual offenders, 188
Antisocial personality disorder (APD):
  Foucha v. Louisiana, 42, 43, 159
gender differences, 73
  pervasiveness in prison, 242–243
  predictive value of, 70, 242
  in sample reports, 274, 294
  sexual offenders and, 43–44, 188
Archival sources versus self-report, base rate variation, 50–51
Arrest rates, 52
Arson, 37
Attachment, 75
Authority, positive response to, 75

B

Barefoot v. Estelle, 5–6, 7, 115, 237, 251–252
Base rate(s), 21, 22–23, 45–66
  actuarial instruments for identifying/estimating:
    described, 62–64
    generalizability, 64–65
Base rate(s) (Continued)
  limitations to the use of, 64–65
  scope of inquiry, 65–66
dehth penalty cases, 238–241
defined, 45
illustration of, 54–55
importance of to violence risk
assessments, 46–48
juvenile offenders, 208–209
key factors, 59
local, 60–62
model for risk assessment,
overview, 21, 22–23
overview table, base rates of
violence or reoffense across
studies and populations,
56–58
as point of reference, 126–127
sample/examinee characteristics
and, 59
serious mental illness, 161–163
setting/context characteristics
and, 59
sexual offenders, 183–185
time-frame characteristics and, 54, 59
trickiness of for violence risk
assessment, 48–54
undetected information, 53–54
using, 55–60
varying:
  by method of detection, 50–53
  by type of violence, 49–50
  over time, 54
violence characteristics and, 37, 59
Base rate fallacy, 48
Base rate neglect, 48
Baxstrom v. Herald, 3
Beasley v. Molett, 183
Berberoglu, Linda (sample risk
assessment report), 270–275
Borum, R., 47–48, 207, 218, 231
Brinkley, Chad (sample risk
assessment report), 297–307
Burgess, A. W., 185

model for risk assessment, overview, 21, 26–27
options, 100–109
risk estimates (categorical versus numerical), 102–109
style (descriptive versus prediction-oriented versus management-oriented), 100–102

practical guidance, 117–133
acknowledging limits, 131–132
articulating clearly reasoning behind conclusions, 123–124
assuming role of educator, 119–120
avoiding red herring data, 121–122
delineating procedure used to arrive at risk opinion, 120
emphasizing context, 128–131
knowing your audience, 133
multiple formats, 124–126
point of reference, 126–128
presenting relevant data clearly, 120
reiterating referral question and evaluation boundaries, 117–119
tests and test results, 123
using clear, simple, and precise language, 132
preferences:
clinician, 109–112
court, 112–117
judges, 112–114
laypersons and mock jurors, 114–117
research on, 100–117
resources, 133–134
court testimony guides, 134
report writing generally, 134
serious mental illness, 174–176
sexual offenders, 196–199
Risk estimates, 102–109
categorical, 102–106
clinician practices/preferences, 109–112
numerical (probability or frequency), 102, 106–109
Risk management, 13–15, 21, 27–28, 135–152
common errors, 138–140
conditional model of risk, 13
context, importance of, 13, 14
death penalty cases, 252–253
gang association, 253
levels of custody available, 253
limiting telephone usage and visitation privileges, 253

doctrine of least restrictive alternative, 138
dynamic risk factors, 13
financial costs, relative, 137–138
formulating plan for, 138–142
planning process, 140–142
responsivity principle, 141
risk factors, analysis of, 141
historical perspective on, 13–15
juvenile offenders, 230–232
model for risk management, overview, 21, 27–28
principles, 145–152
clarification on confidentiality and legal reporting, 150–151

clear channels of communication identified, 148
clearly identified centralized entity monitoring plan, 146–147
identified risk factors directly linked to management strategies, 146
immediate intervention and graduated response, 149–150
maximum energy/resources devoted to individuals at highest risk for violent behavior, 145–146
regular reassessment and modification, 151–152
specificity and flexibility, 148–149
tailoring plans to situational realities, 147–148
thinking beyond conventional treatments, 147
risk status versus risk state, 13
sample plan for, 142–145
serious mental illness, 176–178
coercion, and impact on treatment, 176
outpatient commitment, 176
psychopathy, 177
psychotropic medication, 176–177
sexual offenders, 199–201
cognitive behavioral approach, 200
containment approach, 200–201
medication, 200
therapeutic jurisprudence, 136–138
Risk/protective factors, empirically supported, 21, 23–24, 67–82
death penalty defendants, 241–244
instruments, 75–81
admission as evidence, 76
appropriateness to task, 76–77
pure actuarial approach, 79
selection, 80–81
standard psychological test batteries, 78–79
structured guide to risk assessment, 79–80
juvenile offenders, 212–223
metaphor offered for, 132–133
model for risk assessment, overview, 21, 23–24
protective factors, 74–75
risk factors, 68–74
age, 70–71
anger, 73
antisocial attitudes, 74
dynamic factors, 73–74
gender, 72–73
impulsiveness, 74
impulsivity, 73–74
mood, 73
negative affect, 74
past history of violent behavior, 68–69
poor treatment compliance, 74
problems in interpersonal relationships, 74
psychopathy, 69
psychosis, 74
static factors, 68–72
substance abuse, 71, 73, 74
supervision violation, 71–72
risk management and, 80, 141, 146
scientific literature on risk assessment, 82
serious mental illness, 163–170
sexual offenders, 185–191
third party information, 81–82
Risk status versus risk state, 13
