Subject Index

A17.2 Inspector Manual, 506
ABA (Architectural Barriers Act), 488–489
Accelerating moving walks, 233, 570–572
Acceleration, 77, 421–423
Acceptance, by owner, 508–509, 513–514
Accessibility. See also Disabled/handicapped persons
elevator arrangements, 50
operation and control, 154
short level change for, 568
standards for, 488–489
Accredited Elevator/Escalator Certification
Organization (AECO), 483, 484
ADA, see Americans with Disabilities Act
ADA/ABA AG, see Americans with Disabilities Act
and Architectural Barriers Act Accessibility
Guidelines
ADAAG, see Americans with Disabilities Act
Accessibility Guidelines
ADA and Vertical Transportation, 489
Adoption of codes and standards, 493–494
AECO, see Accredited Elevator/Escalator
Certification Organization
AGV (automated guided vehicle) systems, 471–474
AHJ, see Authorities Having Jurisdiction
AI, see Artificial intelligence
AIA (American Institute of Architects), 481
Aircraft carrier elevators, 445, 446
Airports, people movers in, 580
Alterations, during construction, 512–513
Alternating current elevators, motion control for,
143–144, 146
American Institute of Architects (AIA), 481
American Insurance Association, 487
American National Standards, Accessible and Usable
Buildings and Facilities (ICC/ANSI A117.1), 488
American National Standards Institute (ANSI), 484,
489, 493
American Society of Mechanical Engineers (ASME),
481, 482, 484, 485, 500
Americans with Disabilities Act (ADA), 23, 488–489
Americans with Disabilities Act Accessibility
Guidelines (ADAAG), 50, 255, 488, 489, 493
Americans with Disabilities Act and Architectural
Barriers Act Accessibility Guidelines
(ADA/ABA AG), 488, 489, 493
ANSI, see American National Standards Institute
ANSI/NFPA 70, 199, 200, 436, 486, 495
Apartments, 306–313
collective operation for, 160
critical traffic periods in, 32, 300
elevator capacity for, 84–85, 307–309
elevator doors for, 37
elevator operation and control in, 315–316
high call reversal in, 82
in multipurpose buildings, 382–383
in multistory buildings, 382–383
population, 307
sample calculations for, 309–313
service elevators for, 300, 308–309, 364
Single Automatic operation, 159
tenant garages, 309
waiting time, 299
Approvals, elevator installation, 510
Architectural Barriers Act (ABA), 488–489
Architectural standards, 490
Arrangements of elevator groups, 50–60
eight-car groups, 55–56
four-car groups, 53
front and rear entrances, 57–60
six-car groups, 54–55	hree-car groups, 51–52
two-car groups, 50–52
unique arrangements, 56–57
Artificial intelligence (AI), 171–178
channeling, 174–175
destination-based group supervisory systems,
172–174
for dispatching, 133
in group dispatchers, 171–172
multicar single hoistway, 176–178
Ascending car features (operation and control systems), 157
ASME, see American Society of Mechanical Engineers
ASME A17.1, 482, 484, 485, 506, 572
automatic materials handling, 449
commercial buildings, 279
elevator types, 26–27
escalators and moving walks, 240–241, 249–251
for freight and service elevators, 347, 367, 378
for inclined elevators, 403, 410
operation and control, 137, 148–150, 153, 154,
156, 165
for private residences, 319, 320
space and physical requirements, 189, 192, 194,
198
ASME A17.1/CSA B44, 482–486, 490, 491, 494,
496, 500
earthquake design, 430, 434–435
and fire service, 378
for freight and service elevators, 347
for inclined elevators, 403, 410
for mine elevators, 417
for shipboard elevators, 413
ASME A17.1/CSA B44.7, 485, 494–495, 506
ASME A17.1/CSA B44–2007, 485
ASME A17.1/CSA B44 Handbook, 482–483

ASME A17.7.1/CSA B44.7.1, 484
ASME A17.7/CSA B44.7, 483–484, 494–495
ASME A17 Code Coordinating Committee, 499–500
ASME A117.1, 150, 154
ASME B20, 347
ASME/QEI (ASME Qualification of Elevator Inspectors), 499
ASME QEI-1 (Standard for the Qualification of Elevator Inspectors), 485
ASME Qualification of Elevator Inspectors (ASME/QEI), 499
ASTM, 489–490
ASTM 152, 186
ASTM E-84, 489
ASTM E648, 489
ASTM International, 481
ATBCB (United States Architectural and Transportation Barriers Compliance Board), 489
Authorities Having Jurisdiction (AHJ), 482, 483
Automated cart lifts, 465–469
Automated guided vehicle (AGV) systems, 471–474
Automated materials-handling systems, 449–480
automated cart lifts, 465–469
automated guided vehicle systems, 471–474
electric “car on track” conveyer systems, 458–464
full-time employee equivalents for, 475–479
history of, 449–450
in-floor track systems, 470, 471
overhead track systems, 470, 471
pallet lifts, 474
pneumatic tube systems, 451–454
in public buildings, 451
selective vertical conveyors, 454–458
tote box lifts, 464–465
value of, 474–475
Automated people movers, 578–580
Automated “trolley cars,” 574, 578
Automatic elevators:
energy required for, 213–215
service and freight, 365
Automatic operation, 159
collective operation, 160–162
group, 162–164, 169
group automatic supervisory systems, 164–166
Ballrooms:
elevator operation and control in, 316
freight elevators for, 306
Balustrades, for escalators and moving walks, 251,
252
Basement traction machines, 222, 224–228
Basic Building Code, 487
BCMC (Board for the Coordination of Model Codes), 481
Bidding:
negotiation, 507
performance criteria, 506–507
preparing for, 503
proposal, 507
on scope or specifications, 503–505
Board for the Coordination of Model Codes (BCMC), 481
BOCA (Building Officials and Code Administrators International), 487
Branching multizone pneumatic tube systems, 453
Building codes, 482, 487–488, 495, 500
Building compression, 419–421
Building Construction and Safety Code (NFPA 5000), 486–488
Building Officials and Code Administrators International (BOCA), 487
Building sway, 424–428

Building Transportation Standards and Guidelines, see NEII-1

Build-up time, 152

Bypassed landing calls, 87, 113, 119, 120

Cable-driven people movers (cable cars), 578–580

Cable-drive vehicles, 580

Cafeterias, 281, 290

Call buttons, 38–39

Campus office buildings, 289

Canadian codes and standards, 485, 490–491

Canadian Electrical Code (CAN/CSA C22.1), 485

Canadian Elevator Code, see CSA B44

Canadian Standards Association (CSA), 482, 485

Canadian Standards Association (CSA), 482, 485

CAN/CSA-B44.1/ASME A17.5, 485

Capacity, elevator, see Elevator capacity

Car call buttons, 38–39

Cargo elevators (ships), 414–415

Car loading:
  in manual traffic surveys, 552–553
  simulation template, 562
  trend in, 566

“Car on track” conveyer systems, 458–464

Car riding quality, 421–423, 513

Car-switch operation, 158–159

Cart lifts, automated, 465–469

CCDs (Code Compliance Documents), 484

CEN (European Union Standards), 491, 500, 506

CEN81, 506. See also EN 81

Changes, during construction, 512–513

Channeling, 91, 174–175

Classroom buildings, 324, 337, 338
  elevator operation, 345
  elevator traffic, 326
  population, 325

Closed-loop door control, 150–152

Clubs, service elevators for, 281

Codes and standards, 481–502, 506. See also specific standards
  accessibility standards, 488–489

Collective operation, 160–162

Colleges, 337–339
  classroom buildings, 338
  laboratory buildings, 338–339
  library buildings, 339

Commercial buildings, 261–297
  definition of, 261
  elevator operation, 274–281
    cafeterias and restaurants, 281
    service elevators, 279–281
    special requirements, 274, 279
  elevator traffic in, 264–270
    capacity and speed, 267–270
    interfloor traffic, 266–267
    interval time, 267
  escalators in, 233
  garages, 291–295. See also Garages
  industrial buildings, 296–297. See also Industrial buildings
    interval and waiting time for, 100, 267
    layout and grouping of elevators, 270–273
    merchandise marts, 296
    office buildings, 282–289. See also Office buildings
    population of, 261–264
    professional buildings, 295–296. See also Professional buildings
      shopping malls, 290–291
      stores, 289–291
      transfer floors, 273–274

Communication systems, for commercial buildings, 279

Computer operation and control technology, 131–136
  artificial intelligence, 171–178
Computer operation and control technology

(continued)

group dispatching, 132–133
intelligent dispatching, 133–134
microprocessor controllers, 131–133
report generation, 136
solid-state technology, 134–135
system monitoring, 135–136

Condominiums, 307

Configuration of systems, 519–525
escalators, 525
full-rise vs. low-rise, high-rise systems, 519–525
shuttle elevators, 525

Conflict resolution, for codes and standards, 495–499

Construction of elevators, 509–510
changes and alterations, 512–513
delivery scheduling, 511
installation approvals, 510
and work by other trades, 512

Construction Specification Institute, 505

Construction tolerance, 187–192

Consultants, 537–538, 582

Contingencies, providing for, 169

Contracting, 503–516
acceptance by owner, 508–509, 513–514

bidding phase:
    negotiation, 507
    performance criteria, 506–507
    preparing for, 503
    proposal, 507
    on scope or specifications, 503–505
changes and alterations, 512–513
completion and acceptance phase, 513–514
establishing a contract, 507–508
installation phase, 509–510
for maintenance and repair:
    guidelines, 528–529
    proposals, 529–532
for modernization, 515
new installation service in, 509
performance criteria, 506–507
and temporary operation, 508

Controllers, 137–139. See also specific types of control

Conveying systems, 505. See also Automated materials-handling systems
electric “car on track” systems, 458–464
selective vertical conveyors, 454–458
track systems, 470–471

Cooperatives, 307

Coordination of codes and standards, 499–500
Corner-post elevators, 229, 230

Counterweights:
    and earthquake design, 430–431, 433
    for rear-opening elevators, 228–229
    safeties, 228
    for shipboard elevators, 414
    traction elevators, 185

Courthouses, 324, 325, 339–340

CPM (Critical Path Method), 510

Crisscross escalators, 242, 243

Critical elevator traffic periods, 31–32. See also Peak traffic
    for residential buildings, 300, 307
    for two-way traffic, 98

Critical Path Method (CPM), 510

CSA, see Canadian Standards Association

CSA B44, 482, 485, 506

CSA B44.1/ASME A17.5, 485

Custom-designed elevators, 526

Deceleration, 77, 421

Delivery scheduling (construction), 511

Destination-based dispatching, 63, 172–174, 519, 532, 568

Destination-based group supervisory systems, 172–174

Directional indicators, for elevators, 37–38

Disabled/handicapped persons. See also Accessibility
codes/requirements for arrangements, 50
elevator lighting and signals for, 39
handicapped lifts for, 22, 23, 25–27, 319–321
residential elevators for, 306, 308
transfer time requirements for, 75

Dispatching:
    artificial intelligence for, 133, 171–172
destination-based, 63, 172–174, 519, 532, 568
group, 132–133
    intelligent, 133–134
    relay-based, 132
    service and freight elevators, 365–366

Diversified office buildings, 262, 282–283
elevator capacity and speed, 268
elevatoring calculations for, 282–283
peak traffic periods, 266

Doors, 148, 149
    arrangements of, 35–37
    for freight elevators, 351–356, 376–379
    open/close buttons for, 42
    sliding, 148–150
space and physical requirements, 185–186
Door control, 148–153
Door operating time:
   for incoming traffic, 76
   for service and freight elevators, 368
Door protection devices, 154–155
Dormitories, 313–314
   elevator operation and control in, 315–316
   two-way peak in, 299–300
Double-deck elevators, 386–394, 522, 524
   applications of, 393–394
   calculations for, 390–393
   history of, 389–390
   operation, 386–389
Dover Elevator, 164
Down-peak traffic, see Outgoing traffic
Downtime reports, 146
Down traffic:
   during up-peak, 93–95
   zoning, 168
Dumbwaiters, 20, 22, 24, 449
   for hospitals, 331
   layouts, 224–228
   major components of, 450
Duplex Collective operation, 161–162
Dwell-time, 150, 152

E. V. Haughwout & Company, 1
Earthquake design, 430–435
Economics:
   and automated materials-handling systems, 474–475
   and configuration of systems, 519–525
   escalators, 525
   full-rise vs. low-rise, high-rise systems, 519–525
   shuttle elevators, 525
   costs of systems, 517–519
   installation costs, 517–518
   operational costs, 518–519
   custom-designed elevators, 526
   preengineered elevators, 526
   return on investment, 519
Elderly housing, 314–316
Electric “car on track” conveyer systems, 458–464
Electric elevators:
   ascending car overspeed detection, 157
   car-switch operation, 158–159
   handrope operation, 157
   history of, 4
   layouts, 204–212
Elevators. See also specific types and applications
in combination with escalators, 254, 258
   custom-designed, 526
   escalators vs., 253–254
   full-rise vs. low-rise, high-rise, 519–525
   “hardened,” 500
   literature on, 585–588
   preengineered, 526
   shuttle, 525
Elevator and Escalator Electrical Equipment
   Standard, 485
Elevator capacity, 34–35. See also Loading capacity
calculating, 189, 191–192
in commercial buildings, 267–270
for incoming traffic, 83–85
for museums, exhibits, sports arenas, and
   observation towers, 343
for passenger traffic, 67
for two-way traffic, 102

Passenger demand (continued)  
traffic analyzers, 544–547
Passenger elevators:  
for commercial buildings, 268  
for eating facilities, 281  
future for, 581  
in garages, 291–295  
for hospitals, 332–333  
for institutional buildings, 324, 327  
for stores, 290
Passenger traffic requirements, 63–69  
critical elevator traffic periods, 31–32  
destination-based operating systems, 63  
good elevator service, 64–65  
multistop elevators, 68  
probable stops, 68–69  
time factors for, 64–69  
two-stop elevators, 65–68
Paternoster elevator, 99–100
Peace Tower, 403–409
Peak traffic. See also Critical elevator traffic periods  
escalators and moving walks, 254–258  
incoming, see Incoming (up-peak) traffic  
and installation costs, 518  
outgoing, see Outgoing (down-peak) traffic  
requirements for passenger elevators, 64, 66–67  
and smoking prohibition, 567  
two-way, 97
Pedestrian planning, 32–43  
door arrangement, 35–37  
elevator platform shape, 32–36  
lighting and signals, 37–43
People movers, 574, 577–578. See also Moving  
walks  
automated, 580  
cable-driven, 578–580
Performance-Based Safety Code for Elevators and  
Escalators, see ASME A17.7/CSA B44.7
Performance criteria, 506–507
Performance standards, 490
Performance time, 153
Pit space, 192–199
Platform:  
freight elevators, 363  
shapes of, 32–36  
space and physical requirements, 184–185  
usable area of, 187–188
Platform lifts, 319, 320, 445, 447
Pneumatic tube systems, 451–454
Point-to-point pneumatic tube systems, 452–453
Population of buildings:  
commercial buildings, 261–264  
evacuation time for, 119  
as factor in elevating, 31  
and full-trip probability, 81  
and incoming traffic flow, 71–73  
and installation costs, 518  
institutional buildings, 323–325  
residential buildings, 299  
and traffic demand, 543  
and two-way traffic, 98
Position indicators, for elevators, 42
Positioning, 43–59  
arrangements of elevators within groups, 50–60  
escalators, 43  
grouping of elevators, 45–50
Power:  
for escalators or moving walks, 249  
for freight elevators, 377, 378  
for machine rooms, 212–215
Powered and free track conveyors, 470
Powered door-closing time, 28–29
Powered door-opening time, 29
Power failure, 215–219
Predestination, 91
Preengineered elevators, 526
President’s Commission on Housing, 481
Prisons, 340–341
Private residences, 319–321
Probable stops:  
incoming traffic, 73, 74, 81  
interfloor traffic, 102–103  
outgoing traffic, 122–123  
passenger traffic requirements, 68–69  
two-way traffic, 101–102
Professional buildings, 262, 295–296  
elevator capacity and speed, 268  
peak traffic periods, 266  
service elevators, 280
Proposal bidding, 507
Protective devices:  
for doors, 154–155  
for elevators, 41–43
Rack and pinion elevators, 417–419
Rails, 181–182  
and building compression, 419–421  
earthquake design, 431  
for freight elevators, 360–362  
for trailer truck elevators, 438–439
Rail support, 182–183
Real-time system monitoring, 135
Rear openings, layouts with, 228–229
Refreshment services, 342
Relay-based dispatching, 132
Relay logic controllers, 134–135, 138
Rentals (residential), 307
Repair, see Maintenance and repair
