1 Introduction 1
Pauline Barrieu and Luca Albertini

PART I NON-LIFE SECURITISATION 7

2 Non-life Insurance Securitisation: Market Overview, Background and Evolution 9
Jonathan Spry
2.1 Market overview 9
2.2 Market dynamics 14
2.3 The question of basis risk remains 16
2.4 ILS and the credit crunch 18

3 Cedants’ Perspectives on Non-life Securitization 19
3A Insurance-linked securities as part of advanced risk intermediation 21
Insa Adena, Katharina Hartwig and Georg Rindermann
3A.1 Motivation for Allianz to take part in ILS activities 21
3A.2 Objectives of insurance companies 23
3A.3 Case study: Blue Fin Ltd 24
References 28

3B Reinsurance vs Securitisation 29
Guillaume Gorge
3B.1 Keeping risk vs transferring it 29
3B.2 Reinsurance vs securitisation 30
3B.3 Application to main P&C risks 31
3B.4 Case studies: AURA RE and SPARC 32
3B.5 Limits and success factors to securitisation 33
References 34

3C Securitisation as a diversification from traditional retrocession 35
Jean-Luc Besson
4 Choice of Triggers 37
Dominik Hagedorn, Christian Heigl, Andreas Müller and Gerold Seidler
4.1 General aspects 37
4.2 Indemnity triggers 38
4.2.1 Scope of coverage 39
4.2.2 Payout timing 39
4.2.3 Loss verification 40
4.2.4 Transparency 40
4.3 Non-indemnity triggers 41
4.3.1 Parametric triggers (pure and index) 41
4.3.2 Industry loss triggers 43
4.3.3 Modelled loss triggers 45
4.4 Choosing the optimal trigger 45
4.4.1 Comparison of trigger types 46
4.4.2 Choice of trigger and alternative solutions 47

5 Basis Risk from the Cedant’s Perspective 49
David Ross and Jillian Williams
5.1 Introduction 49
5.2 Investor vs sponsor risk 50
5.3 Trigger types 50
5.4 Catastrophe models 52
5.4.1 Key components of catastrophe models 52
5.4.2 Uncertainty 54
5.5 Sources of basis risk 55
5.5.1 Source 1: Catastrophe model error/shortcomings 55
5.5.2 Source 2: Discrepancy between the modelled index loss and the modelled company loss 56
5.5.3 Source 3: Dynamic basis risk 56
5.6 Defining basis risk 56
5.7 Quantifying basis risk 58
5.7.1 Measures for pro rata hedges 58
5.7.2 Measures for digital hedges 59
5.7.3 Measuring positive basis risk 59
5.8 Minimising basis risk 60
5.8.1 Over-hedging 60
5.8.2 Choice of index 62
5.8.3 Reset clauses 62
5.8.4 Cat model input 63
5.9 Conclusion 63
Acknowledgements 63
References 64

6 Rating Methodology 65
Cameron Heath
6.1 Standard & Poor’s ratings services’ rating process 65
6.1.1 Initial interaction 65
6.1.2 Risk analysis 65

# Contents

8.2.3 Other considerations regarding the proceeds and payment of interest 109
8.2.4 The risk analysis 110
8.2.5 Opinions 110
8.3 Types of transactions 110
8.3.1 Parametric, index and modeled loss transactions 111
8.3.2 Indemnity transactions 111
8.4 Conclusion 115

9 The Investor Perspective (Non-Life) 117
Luca Albertini
9.1 The creation of a sustainable and liquid market 117
9.1.1 Creation of common terminology 118
9.1.2 Risk analysis 119
9.1.3 Correlation with other investments in the portfolio 119
9.1.4 Relative value 121
9.1.5 Valuation and liquidity 121
9.2 Key transaction features from the investor perspective 122
9.2.1 Assessment of the underlying risks being securitised 122
9.2.2 Risk assessment of the instrument 124
9.2.3 Pricing and risk-return profile 125
9.3 Market evolution: the investor perspective 127
9.3.1 Collateral arrangements 127
9.3.2 Data transparency 128
9.3.3 Exposure monitoring 129
9.3.4 Modelling rigour 129

10 ILS Portfolio Monitoring Systems 131
Tibor Winkler and John Stroughair
10.1 Introduction 131
10.1.1 Completing the circle 131
10.1.2 ‘Square peg in a round hole?’ 132
10.2 Miu – An ILS platform in a convergent space 133
10.2.1 Overview 133
10.2.2 Nuts and bolts – how the platform works 133
10.2.3 Step by step – entering a contract 134
10.2.4 Portfolio analysis 134
10.3 RMS library of cat bond characterisations 137
10.3.1 Motivation and objectives 137
10.3.2 How is it done? A bird’s eye view 137
10.3.3 Apples to apples – a leap for the market 138
10.4 Conclusion 138

11 The Evolution and Future of Reinsurance Sidecars 141
Douglas J. Lambert and Kenneth R. Pierce
11.1 A brief history of the brief history of sidecars 142
11.2 Sidecar structures 143
11.2.1 Basic structure 143
11.2.2 Market-facing sidecar 144
11.2.3 Non-market-facing sidecar 145
11.2.4 Capitalising sidecars 146
11.2.5 How sidecars and catastrophe bonds are different 147
11.3 The appeal of sidecars 148
11.3.1 From a cedant/sponsor perspective 148
11.3.2 From an investor perspective 149
11.4 Structuring considerations 149
11.5 The outlook for sidecars 150
11.6 Conclusion 151

12 Case Study: A Cat Bond Transaction by SCOR (Atlas) 153
Emmanuel Durousseau
12.1 Introduction: SCOR’s recent history 153
12.2 Atlas III and IV: Background 153
12.3 Atlas: Main characteristics 155
12.4 Basis Risk 158
  12.4.1 Reset 158
  12.4.2 Gross up 158
  12.4.3 Overlap 158
  12.4.4 Synthetic covers 159
12.5 Total Return Swap 160
12.6 Conclusion 160

Appendix A 161
  A.1 Definition of events 161
  A.2 Extension events 162

13 Case Study: Swiss Re’s New Natural Catastrophe Protection Program (Vega) 163
Jay Green and Jean-Louis Monnier
13.1 A positive evolution of Swiss Re’s ILS strategy 163
13.2 Swiss Re accesses multi-event natural catastrophe coverage 164
13.3 The first ILS to use a cash reserve account as credit enhancement 164
13.4 Innovation leads to more efficient protection 165

PART II LIFE SECURITISATION 167

14 General Features of Life Insurance-Linked Securitisation 169
Norman Peard
14.1 Life insurer corporate and business structures, risks and products 170
  14.1.1 Mutual life offices 170
  14.1.2 Proprietary life offices 171
  14.1.3 Other forms of life office 173
  14.1.4 Principal risks associated with life insurance business 173
  14.1.5 Principal product types and associated risks 176
14.2 Actors and their roles 177
  14.2.1 Sponsor 177
  14.2.2 Investors 179

PART III TAX AND REGULATORY CONSIDERATIONS 305

24 The UK Taxation Treatment of Insurance-Linked Securities 307

Adam Blakemore and Oliver Iliffe

24.1 The Directive and the taxation of UK ISPVs 308

24.1.1 The implementation of the Directive in the UK 308
24.1.2 Implementation of the ISPV framework in the UK 308
24.1.3 UK tax treatment of ISPVs 310

24.2 Non-UK insurance special purpose vehicles 315

24.2.1 Tax residence status of the issuer 316
24.2.2 Tax residence status of the issuer’s agents 317
24.2.3 Location and management of the issuer’s assets 318
24.3 Indirect taxes and withholding of income tax

Further reading

David S. Miller and Shlomo Boehm

25.1 Avoiding US corporate income tax for the issuer

25.1.1 Overview

25.1.2 Trade or business in the United States

25.1.3 Procedures followed by catastrophe bond issuers to avoid substantive business activities in the United States

25.1.4 Section 864(b)(2) safe harbor

25.2 Withholding tax and excise tax

25.2.1 Overview

25.2.2 Descriptions of insurance-linked instruments written on standard ISDA forms

25.2.3 Federal income tax definition of notional principal contracts

25.2.4 Put options

25.2.5 The Bank of America case (income not clearly described within any other generally recognised category)

25.3 US federal income tax treatment of an investor in a catastrophe bond issuer: overview

25.3.1 US investors

25.3.2 Timing and character of income and gain of the issuer with respect to the permitted investments, the total return swap and the insurance-linked instrument

25.3.3 Foreign investors

25.3.4 Notes that are treated as indebtedness for federal income tax purposes
