Subject Index

Note: Page numbers in bold indicate glossary definitions. Page numbers in italic refer to illustrations.

abusive relationships 368
accentuation effect 449, 597
accessibility of information 98–9, 597
accommodation: relationships 367, 369
accountability, perceiver 111, 597
acclimatization 521–5, 597
attitudes to 523
bicultural identity integration 522–5
achievement
attributions 69–70
cultural value 496
needs 384
priming goal of 197–8
acquiescent responding 497, 499, 504, 597
actor-observer difference 81, 87, 597
intentional behaviours 86
reversing 82–3
actual and potential group performance 409–18
actual selves 135, 136
additive tasks 410, 411
motivation losses 415
social compensation 416
see also brainstorming
adjustment
heuristic, cognition 104, 105
marital 376
migrants 522
social, attitudes helping 181
advertising
and affective/cognitive needs 178–9
brand images and culture 498
dating adverts 361
Guardian advertising campaign 100–1
matching to consumer goals 221–2
matching message to product 223–4
and self-monitoring 183–4
subliminal 217–21
affective component of attitudes 175–6, 597
agency, sense of 145
aggression 275–307, 597
alcohol consumption 288–9
biological approaches 280–1
bullying 275, 298–300
displaced 281
gender differences 288
high temperature 289–90
individual differences 287–8
information sources 277–9
intergroup 300–4
intimate partner violence 275, 294–7
learning 284, 288, 294
measurement/study of 276–9, 295–7
and media violence 30–1, 277, 290–4
physical 278, 280, 285, 287, 295, 297
prevention and intervention 304–6
psychological approaches 281–6
sexual 277, 297–8
situational influences 288–94
social information processing models 284–5
as social problem 294–304
theories of 279–86
see also violence
Aggression Questionnaire (AQ) 277, 278, 597
aggressive cues 281–2, 305, 597
aggressive scripts 285, 597
alcohol consumption and aggression 288–9
and cognitive dissonance 228
escaping the self 165
taxation reducing 225
altruism 312–17, 597
evolution and genetics 336–9
life-threatening emergencies 341–3
altruistic punishment 338–9
ambivalence, attitudinal 180
analysis of non-common effects 62–3, 597
analytic versus holistic cognition 500, 501, 502–3
anchoring/adjustment heuristic 103–4, 105, 597
anger
aggression theories 282–3, 285
attributions 73, 74, 75
intergroup emotion 469–70
measuring using AQ 278
music reducing 306
and relationship deterioration 371
trait aggressiveness 287
anti-smoking campaigns 229
anxiety
attachment style 354–5, 356
existential 155
intergroup 481
archival data, aggression 279
archival research 29–30
argument quality
advertising messages 223–4
impact on implicit attitudes 216
minority-majority influence 252–4
and systematic message processing 212, 213, 214
arousal
aggression theories 283–4, 293, 294, 305
misattribution of 73–6, 364
arousal: cost-reward model 323–4, 325, 597
assumptive help 340–1
attachment theory 353–6, 597
and perceived responsiveness 375
and social appraisal 129
attention conflict, task performance 237
attitude-behaviour relation 191–9, 597
attitude change
implicit attitudes 216–17
incentive-induced 224–9
minority influence 255–6
persuasive communication 203–24
attitude components 174–9
attitude functions 181–4, 597
attitude measurement 13–14, 185–90, 191–2
attitude strength 185
attitude structure 179–80
attitudes 173–4, 597
attitudinal ambivalence 180, 597
attraction, psychological 360
attractiveness 356–7
contextual influences 359
features determining 357–9
self-enhancing illusion 146–7
attraction, psychological 360
attractiveness 356–7
contextual influences 359
features determining 357–9
self-enhancing illusion 146–7
attribution theories 16–17, 61–2, 597
achievement 69–70
arousal/emotion 73–6
conversations 88
correspondence inference 62–3
covariation 64–8
depression 70–3
intentional behaviour 85–6
naive scientist model 86–8
attributional biases 76, 597
actor–observer difference 81–4, 87
conversational approach 87–8
correspondence bias 76–81
self-serving 81, 83–5, 148, 150
audience inhibition 319, 322–3, 597
augmenting principle 66, 67, 597
authoritarian leadership 512
authoritarian personality 3, 69, 143–4, 597
authoritarianism, right-wing 444
as ideology 445–8
autobiographical memories 131–2
autocratic leadership 15, 17, 433, 435, 512
autokinetic effect 13–14, 238–9, 597
automatic processes 597
dispositional inferences 79–80
social cognition 96–108
social perception 90
autonomy/autonomous
helping style 341
independent self 140
individualist nations 494, 496–7
leadership 512, 513
self-regulation 166
availability heuristic 103, 105, 451, 597
averaging 59, 597
avoidant attachment style 354, 356
back-translation 497, 597
balance theory 16, 597–8
base rate information 102–3, 598
battered women, investment model analysis 368
behavioural component of attitudes 176–7, 598
belongingness, need for 352–3, 604
benevolent sexism 442, 470–1
Bennington study, social influence 14, 598
better than average effect (BAE) 505–6, 598
bias(es) correspondence 63, 76–81, 88, 501, 502–3
discussion biases, groups 420–1
due to stereotype activation 100–1, 115
evaluation, groups 421–2
false consensus 76
hostile attribution 287–8
self-enhancing 83, 147, 151
self-protective 83, 129
self-serving 81, 83–5, 150
see also ingroup bias
Bible text, inciting aggression 292–3
bicultural identity 522, 598
bicultural identity integration 522, 524–5, 598
biological approaches
aggression 280–1
group formation 382
see also social neuroscience
Bobo Doll paradigm 284
bogus pipeline procedure 452
bookkeeping model, stereotype change 482
brain mapping/brain activation 22, 65
brainstorming 410, 598
consensus information 64–5, 67
coordination losses 412, 414
individual capability losses/gains 417–18
interactive versus nominal 412, 414
brand choice, subliminal priming influencing 220–1
brand images and culture 498
‘broken windows theory’ of crime 242
bullying 275, 598
cyberbullying 298, 299
link to suicide 299
school and workplace 298–300
bystander effect 318, 598
decision-making model 319, 322–3
and emergency situations 320–1
Kitty Genovese case 317–18
overcoming 322–3
and social identity 328–9
see also prosocial behaviour
Capgras Syndrome, attributions 72
categorization 97–9, 598
centration effects 449
impression formation 110–13
judgemental heuristics 101–5
priming, effects on behaviour 105–8
schemas 100–1
self-categorization 131, 256–7, 261–2, 464
stereotype activation and goals 109
stereotype suppression 110–20
varying levels of 476–80
catharsis 304–5, 598
causal attribution 61–88, 598
accuracy of 85
bias in 76–85
in conversations 88
 correspondent inference 62–3
covariation 64–8
depression 70–3
emotion/arousal 73–6
and intentions 85–6
naive scientist metaphor 86–8
success and failure 69–70
causal power 68, 598
causal schemas 66–7, 598
central trait 58, 598
charismatic (transformational) leaders 430–1, 432, 512, 513, 608
charitable donation 311, 328–9, 333, 339
coefficient of relatedness (r) 336–7, 598
cognitive algebra model 59, 598
cognitive closure, need for 213–15, 604
cognitive component of attitude 174–5, 598
cognitive dissonance 177, 598
cognitive dissonance theory 18, 225–7, 598
and group initiation 388
and incentives/sanctions 228
self-perception theory challenging 227–8
cognitive miser 105, 451, 598
cognitive neo-associationist model 282–3, 598
cognitive response model, persuasion 204–6, 598
cognitive restriction 417, 598
cognitive stimulation 418, 598
cognitive styles 500–3, 598
cohesiveness, group 398, 399
and groupthink 27, 28, 262, 263
collective violence 300, 598
collectivism/collectivist cultures 494–5
cognitive style 500–3
conformity 499, 511–12
and group honour 517, 517–18
interdependency 140, 504
interpersonal relations 509–10
negotiation 518
self-enhancement biases 151
situational attributions 80–1
social identity theory 515–17
social loafing study 514–15
commitment
groups 386–90, 395
relationships 365, 367, 368–9
common ingroup identity model 326, 477, 598
dual categorization 479–80
communal relationships 371–2, 598
companionate love 365, 598
comparison with others 243–5
comparison, group polarization 260–1
comparison level, relationships 366
competence versus warmth 51, 470, 472
competition
‘boys camp’ study 454
and intergroup comparison 402, 403
social 415, 416, 516, 517
social facilitation effect 10–12, 235–7
swimming, motivation gains 417
compliance 243–7, 598
confederate 37, 598
configural model 59, 599
conflict
attention 237
between injunctive & descriptive norms 242
during group development 393
group decision making 423–4
intergroup 27, 467–8
intergroup, and social change 484–5
majority-minority influence 251, 251–2, 254
over resources 462
realistic conflict theory 3, 454, 462, 464
Conflict Tactics Scales (CTS) 295, 297, 599
conformity 243, 248–50
Asch’s studies 7–8, 247–9
cultural differences 499, 511–12
to group norms 394–5, 464–5
normative & informational influence 243–4
reasons for 249–50
referent informational influence 257
to social norms and prejudice 446, 448
confound, experimental 41
conjunctive tasks 411, 415, 416, 417, 422
consensus information 64–5, 67, 599
consistency information 64–5, 67, 599
consistency, minority influence 251, 599
consistency theories 16, 599
construct: defined 27, 599
construct validity 41, 599
contact hypothesis 472–6, 599
extended version of 482–3
contempt, group-based 470
contingency approaches, leadership 428–30, 599
continuum model of impression formation 110–11, 599
control group: defined 39, 599
controlled processes 95, 97, 599
and correspondence bias 79, 80
dissociation model of stereotyping 113–15
motivational factors 112, 119
convergent validity 50, 599
conversion, minority influence 252, 599
conversion model, stereotype change 482
conversion theory, Moscovici study testing 255–6
coordinating losses 412–14, 599
correspondence bias 63, 76–81, 88, 599
cultural differences 501, 502–3
correspondent inference theory 62–3, 599
cost-reward model: emergency intervention 323–5
Cotard’s delusion, attributions 72
counterattitudinal behaviour 225–8, 599
covariation theory 17, 64–5, 599
cover story 43, 599
crime
alcohol’s causal effect 288
death penalty, attitudes to 198
heat hypothesis 289, 290
intimate partner 295
and norm violation 242–3
statistics 278, 288, 297
crisis in social psychology 17–19, 599
cross-cultural replication 491–2, 599
cultural masculinity-femininity 494, 599
culture 491–3, 599
cognitive styles 500–3
Hofstede’s dimensions 494–5
intercultural relations 519–25
intergroup relations 515–19
interpersonal relations 509–11
methodological issues 496–9
nations as cultures 493
and self-construal 503–8
values, Schwartz 495–6
Cyberball, social exclusion 352
cyberbullying 298, 299, 599
cybernetic systems 160
data collection methods 47–51
dating 361, 374
debriefing 38, 599
decategorization 476, 477, 478, 480, 599
decision making
groups 258–64
heuristics 101–5
hidden profile task 419–24
juries 259–60
defensive helping 341
deindividuation 241, 301, 599
delay of gratification paradigm 164
demand characteristics 18, 19, 42–3, 599
democratic leadership 15, 17, 433, 434, 435, 492, 512
dependency-orientated help 341
dependent variable 37–8, 599
depression
and attribution 70–3, 84
and self-regulation 165
depressive realism 73, 599
derogation of alternatives 369, 600

dieting and ego depletion 162–4

and escaping the self 165
diffusion of responsibility 319, 325, 600

desired selves 126, 135,
descriptive norms 238, 240, 241, 242, 600
direct aggression 276, 600
direct reinforcement 284, 600
directive leaders 435
disclosure 372–4
disclosure reciprocity 373, 600
disclosure 372–4
disclosing principle 66–7, 600
discourse analysis 35–6,
discordance: groups 390
displaced aggression 281, 302, 600
displacement: 600
displacement, emotional expression 506
dispositional attributions 61–2
dissonance theory see cognitive dissonance theory
distinctiveness information 64–5, 67, 600
distinctiveness theory 134–5
distinctiveness threat, groups 465–6
distraction 206, 600
divergence: groups 390
domestic violence 288, 289
by bystander intervention 329
intimate partner violence 294–7
door-in-the-face technique 245, 600
drive theory 236
dual categorization/identity model 478–80
dual process models 451–2
automaticity and control, Devine 113–15, 451–2
‘conversion theory’, Moscovici 251–2
persuasion 207–12, 600
social attitudes, Duckitt 448
eco-cultural theory 493, 500, 501, 600
effort withdrawal, women using as
self-handicap 152–3
egalitarianism 109, 110
moderating stereotypic activation 109, 110
replacing stereotypic thoughts with
versus hierarchy 496, 497
ego-defensive function 181–2, 600
ego depletion 162, 163–4, 600
egoism-altruism debate 313–16
egotism, implicit 149
egotism, narcissistic 158–9
elaboration likelihood model
(ELM) 39–40, 252–3
embeddedness versus autonomy 496, 497, 600
emergency intervention 317
arousal: cost–reward model 323–5
decision-making model 319, 322–3
impact of social identity 326–9
in life-threatening situations 342–4
situational determinants 317–19
violent situations 330–1
emotional contagion 395, 398, 600
emotional prejudice 469–70
emotional support 343, 350
emotions, attributions of bodily feelings 73–6
and helping behaviour 329
influence on attitudes 175–6
intergroup 468–71
love 365, 509–10
Schacter’s two factor theory 74
and the self 164, 165, 166
and self-presentation 149, 150
within groups 393, 395
see also anger; anxiety; fear
empathic concern 315, 316, 335, 600
empathy 311, 600
brain activation 340
contact promoting 481
interventions promoting 483
leading to helping behaviour 313–16, 329
measurement of prosocial personality 335
empathy-altruism hypothesis 313, 315, 316
encoding: defined 100, 600
entitativity 383, 384, 600
group identification 385–6
equality: and positive intergroup contact 484–5
equity theory 365–6, 600
escapist behaviour 165–6
ethical issues
aggression/violence research 276, 330
bystander research 331, 342
obedience studies 268–9
research principles/standards 38
research strategy 31
ethnocentrism 441, 600
ethological perspective: aggression 280

Europe, development of social psychology in 19–21
European Association of Social Psychology (EASP) 20, 600
evaluation apprehension 236–7, 322, 600
evaluation bias, groups 421–2
evaluative conditioning 175, 600
changing implicit attitudes 216, 217
evaluative priming 187–8
evolutionary (social) psychology 21–2, 337, 600
female body symmetry 359
plot formation 382
group living 453
helping behaviour 336–9
mate preference 361
need to belong 352–3
role of attractiveness 357
xenophobia 461
exchange relationship 371, 372, 382, 600
excitation transfer theory 283–4, 600–1
exclusion, social 155, 351–2, 391–2
existential threats, groups 461–2
exit: from a group 390–1
expectancy-value models, attitudes 175, 195, 217, 225
expectation states theory 400–1, 601
experimental confound 41, 601
experimental group 39, 601
experimental method 13, 30
criticisms of 18, 45–6
experimental scenario 36–7, 601
experimenter expectancy effect 18, 19, 43, 601
experiments 30–3, 601
criticisms of 18, 45–6
design of 38–41
features of 36–8
validity threats 41–3
web-based 43–4
explicit measures of attitude 185, 186–7, 601
and attitude change 216–17
prejudice measures 193, 195, 452
reliability and validity 189–90
social desirability concerns 187, 452
explicit self-esteem 138, 140, 143
explicit self-knowledge 135–6
extended contact hypothesis 482–3, 601
external validity 43, 601
F-scale (Fascism) 444
facial features
and personality 59–60
physical attraction 359
self-enhancement bias 146–7
facilitation see social facilitation
factorial experimental design 39, 601
failure
attributions for 69, 84, 148
cultural differences 505, 506, 516
effect of closeness 150–1
group decision-making 27–8, 262
self-regulatory 163–4
to solve hidden profiles 419–22
false consensus bias 76, 601
familiarity: link to liking 360, 362
favouritism, ingroup 326, 338, 455–6
cultural differences 516–17
and group existence threats 461
minimal group paradigm 457–8
national group membership 301–2
and social reality constraints 463
fear
appeals, advertising 224
and attachment style 353, 354, 355
emotional prejudice 470
intergroup emotion theory 469
neuroscience of 22
of punishment 281
of subliminal advertising 218
triggering aggression 282–3
feeling versus thinking goods 222–3
field experiment: defined 6, 601
field theory 15, 601
films, embedding brand names in 221
foot-in-the-door technique 246, 267, 601
forgiveness 367–8, 601
friendship 372
cultural differences 497, 509
extended contact hypothesis 482
functions of 372
link to proximity 360, 362
predictor of reduced prejudice 477
similarity aiding 363–4
frustration-aggression hypothesis 281–2, 601
Fukushima 50’ volunteers 311–12
gender differences
attractiveness & status preference 361
helping behaviour 332
physical aggression 278, 288, 295–7
self-esteem 143
self-handicapping behaviour 152–3
self-knowledge 140, 143
gender roles
structural differences 494
helping behaviours 332
general aggression model (GAM) 285, 286, 601
explaining high temperature effect 289–90
genetic factors
aggression 279, 280
helping behaviour 336–8
need to belong 352–3
geographic regions approach 289, 601
global warming 290
globalization, effect on values 519–21
goal dependence 110, 601
goals 107, 601
abstract 161
activation of 107–8
and competitive behaviour 3–4
consumer 222
effect of priming on 107–8
group 243, 249, 383, 416, 434
implicit 108, 110
inferential 80
and intentions 197–8
overriding stereotype activation 108–10
path-goal theory, leadership performance 399
self-regulatory standards 160–1
superordinate 454, 455
goods, consumer 222–4
group-to-group transfer 425, 436, 601
group-to-individual-in-group transfer 425, 436
602
group-to-individual transfer 424–5, 436, 602
group cohesiveness 398
and groupthink 27, 28, 262, 263
and performance 399
group commitment 386–7, 601
and conformity to norms 395
and initiation rituals 388–9
maintenance stage 389–90
group composition 419–22, 601
group decision making 258–64
bystander behaviour 319–23
group polarization 258, 259, 260–3
hidden profiles 419–24
group design 434
group development 392–4, 435–6
group distinctiveness, threats to 465–6
group emotions 469–70, 601
group honour 517–18
group identification 458–61, 601
dual categorization/identity model 478–80
entitative groups 385–6
impact on social influence 256–7
measuring 391
and prejudice 458–61
and prosocial behaviour 325–6
and social identity 131, 458–9
