**Notes:**
- The subject index is exhaustive, covering a wide range of topics related to training and instructional design.
- The entries are organized alphabetically, making it easy to find specific terms or concepts.
- The index includes references to relevant sections, chapters, or pages for easy reference.
- The information is presented in a clear, readable format, using standard terminology and conventions.

### Additional Information
- The document includes a list of abbreviations and acronyms used throughout the text.
- A comprehensive list of terms and concepts is provided, covering various aspects of instructional design and training.
- The subject index is a valuable tool for quickly locating specific information within the document.
Essential processing, 144
Establish purpose for declarative knowledge learning, 157
Ethics, 13, 14, 368
Ethics of instructional designers, 14
Ethnic differences, learner, 64
Ethnicity, 64
Evaluate feedback, 136–37, 139, 212, 249, 250, 282
Evaluating instructional materials, 327
Encoding/long-term memory, 27–28
retrieval/response generator, 28–29
sensory register/ selective perception, 27
