as treatment for depression 222
psychodynamic approaches 103–105
psychological well-being practitioners (PWP) 116
psychometric approach 47
psychopathology 5
criteria for defining 14–18
psychopathy 416–417, 429, 431
psychophysiological tests 54–55
psychic see psychotic symptoms
‘psychosis risk syndrome’ 247–248
psychosurgery 270, 280
psychotherapists 131
psychotic symptoms 237, 280–281
aetiology 238–243
treatments 270
antispsychotics 112–113
biological 270–272
community care 276–279
family interventions 275–276
PTSD see post-traumatic stress disorder (PTSD)
puppets, play therapy 556–557
PWP(s) (psychological well-being practitioners) 116
pyromania 428
qualifications, pre-requisite 257–264
for clinical psychology training 139
qualitative research methods 90–92
conducting and analysing qualitative studies 92–93
quantitative methods 90
questionnaire studies 212–213
quitting smoking 297–298
race 62
random assignment 81–82
randomized controlled trials (RCTs) 121
problems with 121–123
rape memories, recovering 487–488
ratio, emotive therapy (RET) 107–108
rationalization 24
RCTs see randomized controlled trials (RCTs)
reaction formation 24
reading disabilities 565, 568, 569–570
reading disabilities 565, 568, 569–570
reality-monitoring deficit 240, 480
reasoning bias 261–262, 460
Reasoning & Rehabilitation (R&R) cognitive skills programme 445
retribution training 224
recall of traumatic material 479
reciprocal inhibition 105–106
reciprocal social interaction, impairment in ASD 585–586
recognition, false 482
reconstructive memory 480
recovery rates 123
reflective practitioner model 138
regional secure units 133
regular use of substances, factors influencing cultural variables 318
long-term expectations and beliefs 317–318
mood alteration effects of drug use 315–316
self-medication 316–317
regulation of clinical psychology profession 138–139
rehabilitation programmes 493, 513–518
rejecting parents 257, 427, 435, 548, 549, 588
relapse-prevention training 396
relapse, schizophrenia 248, 270, 274, 275, 276, 281
high expressed emotion (EE) 513–518
reliability 44
reminiscence and schizophrenia 270
remote causes of sexual dysfunction 374, 378
repressed memories, recovery of 480–482
repression 24, 478
research 70
goals of 74–76
and science 71–73
research designs in clinical psychology 76–77, 94
correlational designs 77–78
epidemiological studies 80
experimental designs 80–84
longitudinal studies 78–79
meta-analyses 88–90
mixed designs 84–85
natural experiments 85–86
prospective designs 78–79
qualitative methods 90–93
single-case studies 86–88
systematic reviews 88–90
residential rehabilitation centres 322–323
residual stage, psychotic symptoms 248
response shaping 107, 108
restricted type anorexia nervosa 335
RET (rational emotive therapy) 107–108
retrograde amnesia 494
reward pathways in the brain and drug addiction 315–316
rigidity 349
risk factors 74
risk management, anorexia nervosa 355
risk use 286, 287
risperidone (Risperdal) 593
Ritalin (methylphenidate) 553
rogue representations 460
role-playing, dissociative symptoms as 483–484
Rorschach Inklbot Test 50, 51
rubella (German measles) 576, 580, 589
ruminination 213
ruminaton theory 213
SAD see seasonal affective disorder;
social anxiety disorder safety behaviours, employed by panic attack sufferers 167–168
Sally–Anne false belief task 591, 592
satiety, role of serotonin 346
savant syndrome 586–587
SBNT (social behaviour and network therapy) 294
scattergrams 77, 78
schema-focused cognitive therapy 445–446
schemata therapy 445, 446
schizoaffective disorder 245
diagnostic criteria 244
schizoid personality disorder diagnosis and features 414
prevalence 424
psychodynamic perspective 427
schizophrenia spectrum disorders 237
brief psychotic disorder 244
and Cluster A personality disorders 427
delusional disorder 243
historical perspective 237–238
prevalence 245–246
schizoaffective disorder 245
schizophrenia 244
see also psychotic symptoms schizophrenogenic mother 257
schizotypal personality disorder 245
stress 188
acute stress disorder (ASD) 188
 cortisol levels 204
experiences in childhood and anxiety disorders 547
see also post-traumatic stress disorder (PTSD)
stroke 502–503
strop task 535
Structured Clinical Interview for DSM-IV-TR (SCID) 46
structured interviews 46
student counsellors 114
stuttering 567
aetiology 569
treatment 570
sublimation, defence mechanism 24
substance abuse
 cannabis-psychotic symptoms 229–230
  repressions of 478, 481
comorbidity with personality disorders 425
definition 286
and eating disorders 337
individuals with psychotic symptoms 279
in pregnancy 576
substance dependence 286
substance use disorders (SUDs) 285–286, 329
aetiology 312–314
abuse and dependence 318–320
experimentation 314
regular use 315–318
comorbidity 289
definition 286
diagnosis 286–288
features of specific 290
alcohol use disorder 290–295
 cannabis use disorder 298–302
hallucinogen-related disorders 308–309
sedative use disorders 306–307
stimulant use disorders 302–306
  tobacco use disorder 295–298
prevalence 288–289
treatment 321–322
behavioural therapies 323–324
biological treatments 326–327
cognitive behaviour therapies 324–326
community-based programmes 322–323
family and couple therapy 326
substantia nigra 507
suffocation alarm theories 165
suicide 229–230
identifying and preventing 232–233
risk factors 231–232
superego 23–24
supported employment 272–273
autistic spectrum disorder 594–595
supportive family management 276
symbolic loss 265
symptom validity testing (SVT) 472
synapses 22
synaptic transmission 21–22
syndrome, definition 37
systematic amnesia 472
systematic desensitisation 105
anxiety-based problems in children 554
treatment for specific phobias 155
systematic reviews 88–90
treatment effectiveness 123
systemic family therapy 535
systemic theory 111
Tajim-kyofusho (TKS) 150
tangentiality, speech disorder, schizophrenia 240
tardive dyskinesia 271
TAT (Thematic Apperception Test) 50, 51
Tay–Sachs disease 574–575
Teaching mothers 577–578, 580
telephone therapy 113–116
telepsychiatry 115–116
television violence and aggression in children 540
temporal cortex abnormalities 255
temporal lobe 21, 494
temporoparietal areas of the brain and dyslexia 568–569
test batteries 495–496
test-retest reliability 44
testosterone 375
anti-androgen drugs reducing in paraphilics 393–394
decrease in during menopause 375
and hormone replacement therapy 379
reduction in regular cannabis users 301–302
tests see psychological tests
THC (tetrahydrocannabinol) 299
Thematic Apperception Test (TAT) 50, 51
time pressure management 514
tobacco use disorder 295
costs of nicotine use 297–298
diagnostic criteria 296–297
prevalence 295–296
token economy 10–11, 106–107
tolerance 287
TOM see theory of mind (TOM) deficits
Tourette’s syndrome 545, 546
toxins and neurological damage 577
trail making test 496, 535
training 139–141
clinical training 139–141
pre-training qualifications and experiences 139
training programmes
for individuals with autism 594
for people with intellectual disabilities 580
transdiagnostic models of eating disorders 352
transference, psychoanalysis 104
transvestic disorder 384–385
trauma
in childhood 586
aetiology of anxiety disorders 547
predictor of adult mental health problems 528
experience/events and dissociative disorders 470, 474, 476
re-experiencing (abreaction) 486
recall of, state-dependent memory 479
memories
false recovery of 481–482
repression of 478, 481
see also post-traumatic stress disorder (PTSD)
traumatic brain injury
neurocognitive disorders due to
shaken baby syndrome 577
treatments for psychopathology 102, 125–126
evaluation of 118–124
mode of delivery 113–117
theoretical approaches 103–113
trial of impairments, autistic spectrum disorder 585
communication delay 586
imagination and flexibility of thought 586
reciprocal social interaction 585–586
trichotillomania 178
tricyclic antidepressants (TCAs) 363
112, 202, 221, 466, 513
twin studies 19–20
autistic disorder 588
bipolar disorder 218
schizophrenia 230
two-factor model of sexual dysfunction, Masters and Johnson 372–373
unconditional positive regard 111
understanding, research aim 75
unipolar depression (major depression) 198
aetiology 201–213
diagnosis & prevalence 198–201
 treatments 219–226
unobtrusive heroin user 307
vacuum erection device (VED) 380
vaginismus 372
validation 44, 45
variant Creutzfeldt-Jakob disease (vCJD) 500–501
vascular neurocognitive disorder 502–503
ventral tegmental area (VTA) 315, 316
ventricles, enlarged in schizophrenia 254
verbaly accessible memory (VAM) system 190
Viagra (sildenafil citrate) 378–379
videoconferencing
therapy 115–116
violence
media and peer influences 540
in schizophrenia 278–279
violent crime, and antisocial personality disorder 430
viral infections during pregnancy, psychosis aetiology 256
virtual reality programmes, for brain injury patients 514, 516
visual imagery mnemonics 517
visual-perceptual functioning deficits 495
visuospatial deficits, rehabilitation programmes 514–515
voices, hearing, psychotic symptom 263–264
voluntary, defined 97
voyeuristic disorder 386
VTA (ventral tegmental area) 315, 316
vulnerability factors for PTSD 189
WAIS-IV (Wechsler Adult Intelligence Scale, 4th edn) 53, 495–496
waiting list control 121
Wechsler Adult Intelligence Scale (WAIS-IV) 53, 495–496
weight gain management, anorexia nervosa 355
Wernicke’s aphasia 494
Wisconsin card sorting task 495
withdrawal from drugs 287–288
withholding of benefits, ethical issue in research 98
word salad, schizophrenic language 240, 241
worrying, in generalized anxiety disorder (GAD) 170, 173
yohimbine 379
