CONTENTS

Preface to the Fifth Edition  xiii
Acknowledgments  xix
About the International Board of Standards for Training, Performance, and Instruction  xxi
Advance Organizer  xxiii
About This Book  xxvii

PART ONE: OVERVIEW  1

1  An Overview of Instructional Design  3
   Instructional Design: An Emerging Profession  4
   Instructional Design: Focused on Establishing and Maintaining Efficient and Effective Human Performance  5
   Instructional Design: Guided by a Model of Human Performance  7
   Instructional Design: Carried Out Systematically  11
   Instructional Design: Based on Open Systems Theory  11
Instructional Design: Oriented to Finding and Applying the Most Cost-Effective Solutions to Human Performance Problems 13

Criticisms of Traditional Instructional Approaches 14

PART TWO: PLANNING AND ANALYZING FOR INSTRUCTIONAL DESIGN 17

2 Conducting a Needs Assessment 19
   Defining Terms 23
   Steps in Developing Needs Assessment 29
   Developing a Needs Assessment Plan: A Case Study 35
   Solving Problems in Conducting Needs Assessments 36
   Identifying Instructional Problems 38
   Ethical Issues in Needs Assessment 38

3 Collecting and Analyzing Data for Instructional Design Projects 41
   The Nature of Data 41
   The Data Collection Process 45
   Data Analysis 58

4 Identifying the Target Population and Environmental Characteristics 61
   Selecting Learner Characteristics for Assessments 62
   Selecting Learner Characteristics: A Case Study Example 71
   When Should Learner Characteristics Be Assessed? 73

5 Using Analytical Techniques to Determine Instructional Content 90
   Identify Content Aligned with Needs Assessment Findings 91
   Elicit, Synthesize, and Validate Content from Subject Matter Experts 91
   Analyze Instructional Products to Determine the Adequacy of Content, Instructions, and Learning to Determine Content Coverage 92
   Determine Subordinate and Prerequisite Skills and Knowledge 93
   Analyze Content 97

6 Analyzing the Potential Use of Existing and Emerging Technologies 98
   E-Learning 100
   The Effectiveness of Today’s Instructional Technology 110
PART THREE: DESIGNING AND DEVELOPING FOR INSTRUCTIONAL DESIGN  117

7  Using an Instructional Design Process Appropriate for a Project  119
   Selecting or Creating an Instructional Design Process Based on the Project  123
   Modifying the Instructional Design Process as Project Parameters Change  123
   Describing a Rationale for the Selected, Created, or Modified Instructional Design Process  124

8  Organizing Instructional Programs and/or Products  125
   Determine the Overall Scope of Instructional Programs  125
   Specify and Sequence the Anticipated Learning and Performance Outcomes  138

9  Designing Instructional Interventions  145
   Identifying Instructional Strategies Aligned with Instructional Goals and Anticipated Learning Outcomes  149
   Choosing an Appropriate Instructional Strategy  155
   Choosing Media and Delivery Methods  159
   Selecting Delivery Modes  162
   Appreciating the Learner’s Perspective: A Brief Overview of Cognitive Strategies  164
   Using Appropriate Message, Visual, and Motivational Design Principles  165
   Accommodating Social, Cultural, Political, and Other Individual Factors Influencing Learning  169

10 Planning Noninstructional Interventions  171
    Identifying Appropriate Noninstructional Interventions  172
    Feedback Options  173
    Job Performance Aids  176
    Reward Systems  179
    Employee Selection Practices  181
    Organizational Redesign  184
    Justifying Appropriate Noninstructional Interventions  187
    Creating Design Specifications for Noninstructional Interventions  188
11 Selecting or Modifying Existing Instructional Materials 189
  Selecting, Developing, or Modifying Instructional Materials 189
  Conducting Cost-Benefit Analyses to Decide Whether to Use or Modify Existing Materials 194
  Validating Selection or Modification of Existing Instruction 195

12 Developing Instructional Materials 196
  Developing Media Specifications 196
  Producing Instructional Materials in Various Delivery Formats 213
  Developing Materials Aligned with Content Analysis, Proposed Technologies, Delivery Methods, and Instructional Strategies 214
  Collaborating with Production Specialists 214

13 Designing Learning Assessments 215
  Introduction 215
  An Overview of Steps in Preparing Instruments 221
  Constructing Reliable and Valid Methods of Assessing Learning and Performance 228
  Ensuring the Assessment Is Aligned with Instructional Goals, Anticipated Learning Outcomes, and Instructional Strategies 229

PART FOUR: EVALUATING AND IMPLEMENTING INSTRUCTIONAL DESIGN 231

14 Evaluating Instructional and Noninstructional Interventions 233
  Purpose and Definitions of Evaluation 234
  Formative Evaluation 239
  Developing a Formative Evaluation Plan 240
  Four Major Approaches to Conducting Formative Evaluation 246
  Summative Evaluations 251
  Reporting Evaluation Results 259
  Creating the Report 261
  Disseminating the Report 262
15 Revising Instructional and Noninstructional Solutions Based on Data 263
   Types of Revisions 264
   Gaining Stakeholder Support for Revisions 267
   Implementing Revisions to Delivery of Products/Programs 269

16 Implementing Instructional and Noninstructional Interventions 271
   Creating a Vision for Change 272
   Planning for the Implementation and Dissemination of the Intervention 276
   Planning for Diffusion of the Intervention 285
   Encouraging and Achieving Adoption and Buy-In 285
   Compliance versus Gaining Commitment 286
   Monitoring Implementation, Dissemination, and Diffusion to Identify Potential Adjustments 287
   Taking Action on Deviations or Problems Surfaced through Monitoring 288

PART FIVE: MANAGING INSTRUCTIONAL DESIGN 289

17 Applying Business Skills to Managing the Instructional Design Function 291
   Where Instructional Design Fits into the Larger Organization 292
   Contributing to the Organizational Purpose and Strategy 295
   Implementing Standards 299
   Leveraging Internal and External Resources to Accomplish Project Goals and Objectives 301
   Managing Instructional Design Talent 303
   Marketing and Communicating about Instructional Design 313
   Navigating Organizational Culture, Structure, Politics, and Processes 314

18 Managing Partnerships and Collaborative Relationships 317
   Identifying and Engaging Stakeholders 318
   Building Relations between Instructional Designers and Individuals or Group Members 322
Managing Cross-Functional Teams 327
Securing Commitment 331
Conducting Project Reviews 333

19 Planning and Managing Instructional Design Projects 334
Unique Challenges Posed by Project Management 335
Allocating Resources to Support the Project Plan 338

PART SIX: PREDICTING THE FUTURE OF INSTRUCTIONAL DESIGN 341

20 Predicting the Future of Learning and Instructional Design 343
Technological Advances to Improve Delivery and Design 343
The Impact of Neuroscience Research on Instructional Systems Design 357
A Final Word 361

About the Authors 363
