Index

Note: page numbers with an f indicates figures; those with a t, tables; those with an a, appendix

64 slice CT scanning, 114, 114f, 116f
AAI pacing, 449, 522–523, 522t
Abciximab (ReoPro), 134t, 138, 151, 350, 353
Abdominal aortic aneurysm, 146
Abdominal paradox, 407, 415
Abdominal ultrasound, 697, 699, 705
ABG (see arterial blood gas)
Abiocor TAH, 492
Abiomed AB ventricle, 481, 483, 490, 492f, 494
Abiomed BVS 5000, 483, 488, 489f
Abiomed Impella, 485, 487f, 488
Abscess, aortic root, 39
ACC (see American College of Cardiology)
Accupril (quinapril), 749a
ACE inhibitors (angiotensin-converting enzyme inhibitors)
and atrial fibrillation, 541
and hyperkalemia, 615
and perioperative hypotension (vasoplegia), 205, 246, 248, 313, 451, 585
and renal dysfunction, 595, 604–606, 608, 610, 615
drug dosages of, 749a
for congestive heart failure, 61, 710
for coronary artery disease, 3–4
for diastolic dysfunction, 457
for mitral regurgitation, 35
for postoperative hypertension, 332, 496, 506, 658
preoperative cessation of, 145, 150, 175, 206
upon hospital discharge. 710
Acetaminophen
and hepatic dysfunction, 703
dosage of, 287t, 650t, 733a, 735a–736a, 747a
Acetazolamide (Diamox), for metabolic alkalosis, 395, 624, 744a, 751a
Acetylcysteine (see N-acetylcysteine)
Acidosis (see metabolic or respiratory acidosis)
Aciphex (rabeprazole), 700
ACLS protocols, 506–512, 507f
ACT (see activated clotting time)
Activated charcoal, 508t
Activated clotting time (ACT)
and antiphospholipid syndrome, 139
and argatroban, 202, 203t
and bivalirudin, 202, 203t
and heparin-coated (biocompatible) circuits, 200, 241, 355
and protamine, 210, 246, 366
during left-heart bypass, 252
during OPCAB, 200, 213t, 214
with use of VADs, 480
Actos (pioglitazone), 749a
Acute abdominal pain, differential diagnosis of, 697
Acute adrenal insufficiency, postoperative, 446, 627–628
Acute cholecystitis, postoperative, 697–699
Acute coronary syndromes, 3–4, 7, 9, 133–138
Acute evolving infarction, 7
Acute kidney injury (see renal failure)
Acute lung injury, 406
Acute mitral regurgitation, 8, 33–35, 472
Acute pancreatitis, postoperative, 704–705
Acute pericarditis, postoperative, 320, 321f
Acute pulmonary edema (see pulmonary edema)
Acute respiratory failure/insufficiency, 405–412
etiology of, 405–407
evaluation of, 407–412
management of, 407–412, 408t
manifestations of, 407
predisposing factors to, 405–406
risk model for, 397f, 406
secondary to amiodarone, 141, 559
Acute tubular necrosis (see renal failure)
Addisonian crisis, 628
Additive EUROSCORE, 157, 161t
Adenine-saline, 366
Adenocaine, 268
Adenosine
dosage of, 562
drug profile of, 561–562
for measurement of fractional flow reserve, 106
for myocardial perfusion imaging, 91
for paroxysmal supraventricular tachycardia,
530t, 547, 561
for tachycardia with pulses, 511
in cardioplegic solutions, 268, 271
MRI scanning, 122
Adrenal insufficiency, 446, 627–628
Adsorption atelectasis, 392
Adult respiratory distress syndrome (ARDS), 141,
392, 406, 409, 413–414, 420, 676
Advanced cardiac life support (ACLS), protocols
for, 506–512, 507f
Advanced venous access devices, 178
AEG (see atrial electrogram)
AF (see atrial fibrillation)
Afterload
and aortic regurgitation, 26–27
and aortic stenosis, 18, 21
and low cardiac output syndrome, 446
and mitral valve surgery, 327
and ventricular septal rupture, 16
basic concepts of, 440, 444
mismatch, 327
reduction with vasodilators, 448t, 450
Aggrastat (Tirofiban), 4, 134t, 138, 176,
350, 353
AHA recommendations for endocarditis
prophylaxis, 683t
Air embolism
and CPB, 209, 216, 244, 249–250, 453
and left atrial lines, 294
and stroke, 684
and Swan–Ganz catheters, 292–293
Air leaks, 426
AKICS score, 593f
Alanine aminotransferase (ALT), 148, 699, 702 (see
also liver function tests)
Albumin, for expansion of intravascular volume
five percent, 314, 586–587
hetastarch versus, 371, 586–587
on CPB, 230, 242
salt poor (25%), 588
Albumin serum
and cirrhosis, 141
and serum osmolarity, 585–586
Albuterol (Ventolin, Proventil)
for bronchospasm, 284t, 404, 411, 428, 650t,
653, 731a, 736a
for hyperkalemia, 616t, 617
Alcohol abuse
preoperative risks with, 141
withdrawal from, 688
Alcohol septal ablation for HOCM, 41–42
Aldactone (spironolactone), 61, 624, 751a
Aldosterone, 584, 622–623
Alfentanil, 195t, 196t
Aliskiren, 604
Alkaline phosphatase, 148, 699, 702 (see also
liver function tests)
Alkalosis (see metabolic or respiratory)
and oxygen-hemoglobin dissociation curve,
391, 391f
Allen’s test, 144
Allergies (anaphylaxis), 144
to protamine, 211
Alpha-agents (see also phenylephrine,
norepinephrine)
after AVR for aortic regurgitation, 325
and arterial grafting, 469
and renal failure, 595t
and perioperative MI, 516
during CPB, 243, 246, 248
during dialysis, 613
during use of circulatory assist devices,
480, 482
for protamine reactions, 210–211
in aortic stenosis, 188
in HOCM, 42, 189
in vasodilated patients, 191, 197, 208, 315–316,
451–452, 589
use with inamrinone/milrinone, 454, 458,
470–471
weaning of, 470
Alpha receptors, 458
Alpha-stat, 241t, 245, 691
Alprazolam, 751a
ALT (alanine aminotransferase), 148, 699, 702 (see
also liver function tests)
Altace (ramipril), 506, 749a
Alveolar-arterial oxygen difference, 392, 423
Alveolar ventilation, basic concepts of, 393–395
Ambien (zolpidem), 752a
Ambu bag
during cardiac arrest, 508
for acute respiratory insufficiency, 407
American College of Cardiology (ACC)
guidelines for
anticoagulation, 326, 331, 545, 669–670, 670t
endocarditis prophylaxis, 683t
for antiplatelet therapy, 669
levels of evidence, 729a
management of heart failure, 61
non-STEMIs, 4
American College of Chest Physicians (ACCP),
guidelines for
anticoagulation, 326–327, 330–331, 656,
669–671, 670t
antiplatelet therapy, 669
VTE prophylaxis, 405, 656
American Heart Association (AHA) guidelines (see
ACC guidelines)
Amicar (see epsilon-aminocaproic acid)
Amiloride (Midador), 624, 751a
Aminocaproic acid (see epsilon-aminocaproic acid)
Aminoglycosides
and renal failure, 595t, 610
perioperative use of, 152, 154
Aminophylline
dosage of, 746a
for bronchospasm, 428
for myocardial protection, 272
for protamine reactions, 211
Amiodarone
and COPD, 412, 540
and hypotension, 658
and Maze procedures, 190, 330
and perioperative vasoplegia, 205, 246, 248, 451,
585
and thyroid function, 559, 710
dosages of, 286t, 304t, 539, 558, 732a–733a,
735a, 744a, 748a
drug interactions with, 559, 710
drug profile of, 558–559
during cardiac arrest, 507f, 510, 510t, 512,
530t, 553
electrophysiologic classification of, 554
for AF with WPW syndrome, 512
for PACs, 530t, 537
for prophylaxis of AF, 10, 207, 304t, 319–320,
412, 539–540, 649t, 735a
for PVCs, 530t, 551
for treatment of AF, 530t, 542t, 543f,
544–546
for ventricular fibrillation/tachycardia, 507f, 510,
510t, 512, 530t, 553
interaction with digoxin, 559, 562
interaction with dofetilide, 560
interaction with simvastatin, 559, 709
interaction with warfarin, 559
PAPABEAR trial using, 539
preoperative concerns with, 141, 148–149, 151
pulmonary toxicity from, 141, 559
upon hospital discharge, 710
Amipertnyline (Elavil), 692, 752a
Amlodipine (Norvasc)
for hypertension, 502, 506, 658
for radial artery prophylaxis, 11, 322, 500t,
506, 649t
dosage of, 287t, 502, 733a, 735a, 750a
Amoxicillin, 683t
Ampicillin, 683t
Amyl nitrite, for thiocyanate toxicity, 498
Amylase, 148, 704–705
Analgesia (see also ketorolac, morphine sulfate,
sedation)
during mechanical ventilation, 309–310,
389–390, 422
epidural, 308, 324, 331, 389–390, 399
intrathecal, 308, 324
Anaphylactic reactions, 446
to protamine, 211, 243
use of epinephrine for, 459
Ancef (see cefazolin)
Anemia (see also hematocrit, transfusions)
acceptable values (see hematocrit)
after OPCAB, 324
and sinus tachycardia, 450, 535
during CPB, 8, 241t, 243–244, 585, 598, 685
hemolytic, 708
postoperative, 311–312, 348, 442, 444, 452,
665–666
preoperative, 8–9, 147
transfusions for (see transfusions)
Anesthesia (see cardiac anesthesia)
Aneurysmectomy (see left ventricular aneurysm)
Aneurysms (see left ventricular aneurysms)
Angina
and aortic regurgitation, 26–27
and aortic stenosis, 18, 20
and coronary artery disease, 3–9
and HOCM, 41
and left ventricular aneurysms, 13
recurrent, postoperative, 651
Angiodysplasia, 701
Angiography (see coronary, CT, mesenteric, MRI,
radiouclide)
Angiomax (see bivalirudin)
Angioplasty (see percutaneous coronary
intervention)
Angiotensin-converting enzyme (ACE) inhibitors (see ACE inhibitors)
Angiotensin receptor blockers (ARBs) and hyperkalemia, 615
and perioperative hypotension (vasoplegia), 205, 246, 248, 313, 451, 585
and renal dysfunction, 604–606, 608, 610
drug dosages of, 750a
for congestive heart failure, 61
for postoperative hypertension, 506, 658
preoperative cessation of, 150, 175, 206
Anion gap, 621
Annular abscess, 27, 39
Annuloaortic ectasia, 26–28
Annuloplasty rings (see mitral valve repair)
Anorexia, postoperative, 696
Antacids, 610 (see also H2 blockers, proton pump inhibitors)
Antegrade cardioplegia, 240f, 268–273, 304t
Antegrade cerebral perfusion, 51, 192, 251, 333
Anterior ischemic optic neuropathy, 9, 244, 685
Antianginal medications, 747a
Antiarrhythmic medications (see also specific drugs)
doses of, 744a, 748a
drug profiles of, 554–564
electrophysiologic classification of, 554–555, 555f
Antibiotics and diarrhea, 702
for prevention of endocarditis, 683t
perioperative use of, 151–152, 153t, 154, 197, 205, 245, 730a, 733a, 735a
Anticardiolipin antibodies, 139
Anticoagulation (see also antplatelet medications)
after aortic valve surgery, 326–327, 669, 670, 671
after mitral valve surgery, 330–331, 670–671, 670t
and delayed tamponade, 660
and gastrointestinal bleeding, 699
and pregnancy, 707
for assist devices, 480
for atrial fibrillation, 541, 542t, 543, 543f, 545
for CPB, 199–202, 203t, 204, 241–242, 247
for heparin-induced thrombocytopenia, during CPB, 201–202, 203t, 204, 241–242
postoperatively, 666–669
for pulmonary embolism, 656
protocol to initiate, 671, 672t, 740a
related hemorrhage, 162t, 163, 671, 673, 673f, 707, 741a
reversal of, 671–673, 673t, 741a
Antidiuretic hormone, 628
Antiembolism stockings, 284t, 403t, 405, 648t, 655–656, 731a, 734a
Antiemetics, 696
Antifibrinolytic medications (see also aprotinin, epsilon-aminocaproic acid and tranexamic acid), 304t, 308, 352t, 353–354, 399
and aspirin, 352
dosages of, 199
for CPB, 198–199, 198t
for OPCAB, 198, 214, 324
in renal dysfunction, 596t, 597
Antihypertensive medications (see also vasodilators), 496–506
dosages of, 497t, 749a–750a
selection of, 505–506
Anti-inflammatory medications (see nonsteroidal anti-inflammatory drugs)
Antioxidant vitamins, 706
Antioxidants, in cardioplegia, 267
Antiphospholipid syndrome, 139
Antiplatelet therapy (see also aspirin, clopidogrel, prasugrel, ticagrelor)
after coronary bypass surgery, 322, 647, 660, 669
after valve surgery, 326, 330–331, 669–671, 670t
preoperative discontinuation of, 134t
preoperative use of, 9, 133
Antithrombin III concentrate, 139, 201, 247, 354, 370
Antithrombin III deficiency, 139, 201, 247, 354, 370
Anxiety disorders, 691
Anxiolytics, 194, 195t, 196t
Anzemet (dolasetron), 689, 696, 744a, 749a
AOO pacing, 449, 522, 522t
Aortic aneurysms (see thoracic aortic aneurysms)
Aortic arch repair, 52, 53f
Aortic calcification (see calcified aorta)
Aortic crossclamping and risk of stroke, 12, 215, 684, 686
and thoracic aortic aneurysms, 53
routine, 240f, 265
Aortic dissections, 43–46, 48
and abdominal pain, 47
and IABP, 472
anesthetic considerations with, 191–192
as cause of aortic regurgitation, 26, 43
cardiac catheterization and, 46
chest x-ray of, 45, 87, 88f
classification of, 43, 44f
CT scanning and, 46, 116, 117f, 118f
diagnostic techniques for, 46
during CPB, 249
echocardiographic evaluation of, 110, 111f, 186
indications for surgery in, 44–45
medical management of, 45
MRI scanning and, 121, 121f
pathophysiology of, 43
postoperative, and chest pain, 651
preoperative considerations in, 332–333
preoperative considerations in, 45–46
presentation of, 43–44
surgical procedures for, 46, 47f, 48
Aortic fenestration, 46–47, 332
Aortic regurgitation, 26–29
and aortic dissection, 26, 43
and cardioplegia delivery, 271
and IABP, 28, 472
anesthetic considerations in, 188
diagnosis of, 27
echocardiographic evaluation of, 27, 113t, 184, 188
indications for surgery in, 27
natural history of, 27
pathophysiology of, 26–27
postoperative considerations in, 325–326
preoperative considerations in, 27–28
root shot of, 27, 96, 99f
surgical procedures for, 28–29
Aortic root shot, 27, 96, 99f
Aortic size index, 49, 50f
Aortic stenosis, 18–26
anesthetic considerations in, 188
calculation of gradient in, 19
chest x-ray of, 88f
diagnosis of, 18–20, 19t
echocardiographic evaluation of, 18–20, 19t, 113t, 184, 188
hemodynamic tracing of, 97f
Heyde’s syndrome, 701
indications for surgery in, 20–21
left heart catheterization, 97f
low cardiac output/low gradient, 19–20, 94–95
natural history of, 20
pathophysiology of, 18
postoperative considerations in, 325
preoperative considerations in, 21
surgical procedures for, 21, 22, 23f–24f, 25–26, 25f–26f
Aortic valve
aortic valve-sparing operation, 28–29, 28f, 52, 185
area, calculation of, 19–20, 19t
commissurotomy, 22
debridement, 22
endocarditis, 110f
heart block and, 326, 532
percutaneous replacement of, 25–26, 26f
replacement/repair of, 21–26, 22f–26f, 28
transcutaneous implantation of (TAVI), 25–26, 26f
Aortic valve repair, 28
Aortic valve replacement, 21–22, 22f–26f, 28
anesthetic considerations during, 188
anticoagulation after, 326–327, 669, 670t, 671
myocardial protection for, 266
pacemakers after, 528
technique of, 22f
TEE for, 184–185
Aortic valve-sparing procedure, 28–29, 28f, 52, 185
Aortography, 96, 99f
Aphasia, 685
Apresoline (hydralazine), 497t, 504
Aprotinin, 199, 308, 354, 597
ARBs (see angiotensin receptor blockers)
Arch aneurysms (see thoracic aortic aneurysms)
Arctic Sun (see Kimberly–Clark)
ARDS (see adult respiratory distress syndrome)
Argatroban
for CPB with HIT, 202, 203t, 242, 354
for postoperative HIT, 668
Arginine vasopressin (see vasopressin)
Arrhythmias, 529–554 (see also specific arrhythmia)
assessment of, 529
etiology of, 529
Arrhythmogenic RV dysplasia, 57
Arrow CorAide, 488
Arterial blood gases
acceptable parameters for, 389, 400t–402t
during CPB, 241t
during mechanical ventilation, 388t, 389–391
preoperative use of, 132t, 140, 730a
prior to extubation, 400–401, 402t
weaning and extubation criteria, 400t–402t
Arterial blood pressure (see blood pressure)
Arterial cannulation, 233–238, 236f, 238f, 240f
Arterial line filter, 231f, 233
Arterial lines in the ICU, 289–290, 297
Arterial oxygen saturation (see arterial blood gases)
Arteriovenous hemofiltration, 614
Artificial heart, 492
Ascending aortic aneurysms (see thoracic aortic aneurysms)
Ascorbic acid, 541
Aspartate aminotransferase (AST), 148, 699, 702
(see also liver function tests)
Aspartate-glutamate, 268t, 270, 272
Aspiration pneumonia, 407, 413, 417, 651
Aspirin and bleeding time, 135
and delayed tamponade, 660
and gastrointestinal bleeding, 700–701
and ibuprofen, 663
and perioperative bleeding, 349t, 350, 364
following aortic valve surgery, 324, 326, 669, 670t, 671
following CABC, 287t, 322, 324, 647, 649t, 660, 669, 733a, 735a
following mitral valve surgery, 330–331, 670–671
following PCI, 5, 10
for coronary artery disease, 3, 90, 107, 133
for patent foramen ovale, 68
for postpericardiotomy syndrome, 663
preoperative discontinuation of, 9, 133–135, 134t, 150, 176, 352
resistance, 135
upon hospital discharge, 709
Assist devices (see circulatory assist devices)
Assist/control ventilation, 387, 419–420
AST (aspartate aminotransferase), 148, 699, 702
(see also liver function tests)
Asystole, 507f, 511, 616
Atacand (candesartan), 750a
Atelectasis after ITA grafting, 386
and respiratory insufficiency, 407
prevention of, 404
use of PEEP for, 409
Atelectrocardiogram (ECG) of, 522f
for atrial flutter, 523, 524f, 543
Atrioventricular node pacing for atrial flutter, 523, 524f, 543
Atrial arrhythmias (see specific arrhythmia)
Atrial electrograms, 518–519 (see specific arrhythmia)
Atrial fibrillation or flutter, 54–56, 537–547, 657
adverse effects of, 538
after aortic valve replacement, 325
after coronary bypass grafting, 320
after mitral valve surgery, 329–330
after OPCAB, 323, 537
and aortic stenosis, 18, 21, 188
and COPD, 412
and mitral regurgitation, 34
and mitral stenosis, 29, 31
and postoperative delirium, 688
and pulmonary embolism, 656
and stroke, 538, 682, 684, 687
and tricuspid valve disease, 36–37
anticoagulation for, 540t, 541, 543, 543f, 545
cardioversion for, 530t, 541, 542t, 543, 543f
ECGs of, 538f–539f
etiology of, 538
indications for surgery in, 54
PAPABEAR trial, 539
preoperative, 90, 149
prevention of, 538–541
rapid atrial pacing for, 543
risk factors for, 537
surgical procedures for, 55–56, 55f–57f
treatment of, 530t, 541–547, 542t, 543f
with aberrancy, 512, 552
Atrial flutter (see atrial fibrillation/flutter)
Atrial natriuretic peptide, 599, 609
Atrial overdrive pacing for atrial flutter, 523, 524f, 543
for junctional tachycardia, 549
for PACs, 537
for PVCs, 550
for ventricular arrhythmias, 523, 530t, 537, 550
technique of, 523, 524f
Atrial pacing, 311, 448t, 449, 519, 522–523
after aortic valve surgery, 325
dual-site, 530t, 537, 540, 542t
ECG of, 522f
for junctional bradycardia, 530t, 549
for PACs, 537
for sinus bradycardia, 531
indications for, 523
overdrive (see overdrive atrial pacing)
rapid (see also rapid atrial pacing)
INDEX 771
Beta-blockers (Continued)
  preoperative use of, 3–4, 9, 21, 27, 41–42, 45, 90, 149–150
  upon hospital discharge, 709–710
  with calcium channel blockers, 536, 544
  with pericardial effusions, 65
Beta-adrenergic blockers (see beta-blockers)
Betadine wound irrigation, 680
Beta-natriuretic peptide (BNP), 20, 132t, 141, 148, 730a
Beta-receptors, 458
Biatrial transseptal approach, 35, 329, 532
Bicarbonate (see sodium bicarbonate)
Bicuspid aortic valve, 18, 26, 28, 48, 52, 333
Bicuspidization, of tricuspid valve, 37
Bilateral arm pressures, 45, 146
Bilateral ITA grafting, 10, 143, 332, 349t, 677–678
Bilevel positive airway pressure (BiPAP), 404, 421–422
Biliary tract obstruction, postoperative, 703
Bilirubin, 141–142, 142t, 148, 699, 702–704
Biocompatible circuits (see also heparin-coated circuits), 200, 229, 355, 398
Biologic glue, and repair of aortic dissections, 46, 47f, 332
BioMedicus centrifugal pump
  during thoracic aortic surgery, 53, 252, 253f
  for circulatory assist, 485–486
Biomet sternal plates, 374
Bioprosthetic valves (see tissue valves)
Bisacodyl, 650t, 736a
Bisoprolol (Zebeta), 61, 540, 748a
Bispectral EEG analysis (BIS), 192, 194
Bivalirudin
  for CPB with antiphospholipid syndrome, 139
  for CPB with HIT, 202, 203t, 242, 354
  for PCI, 4, 107
  for postoperative HIT, 668
  preoperative discontinuation of, 134t, 137, 353
Biventricular pacing, 41, 319, 449, 520, 525
Bjork-Shiley valve, anticoagulation for, 671
Bladder distention, anticoagulation for, 671
Bladder scan, 606
Blake drains, 297, 347, 682
Bleeding
  anticoagulation-related, 163, 707
  gastrointestinal (see gastrointestinal bleeding)
  mediastinal (see mediastinal bleeding)
  retroperitoneal, 147, 697–698
Bleeding scan, 701
Bleeding time, 135, 351
Blood cardioplegia, 267–274
Blood donation, 149–150
Blood filters, 367–371
Blood filtration (see hemofiltration)
Blood gases (see arterial blood gases)
Blood glucose/sugar (see hyperglycemia, hypoglycemia)
Blood oxygen content, 391, 442
Blood pressure, by occlusion, 282, 289
Blood products, transfusion of (see types of blood products and transfusions)
Blood setup guidelines, 152, 154t
Blood substitutes, 371
Blood urea nitrogen (BUN), 132t, 147, 149, 605, 730a
BNP (beta-natriuretic peptide), 20, 132t, 141, 148, 730a
Body mass index chart, 757a
Body surface area nomogram, 756a
Body water distribution, 583–584
Bone wax, 677–678
Boost tube feedings, 705
Bosentan, 457
Bowel ischemia (see mesenteric ischemia)
Brachial plexus injury, 692
Bradycardia, sinus (see sinus bradycardia)
Bradykinin, and CPB, 584
Brevibloc (see esmolol)
Bridge to transplantation, 478–479, 481, 483–485, 488, 490, 492
British Pacing and Electrophysiology Group (BPEG), 520
Bronchial blockers, for pulmonary artery rupture from Swan–Ganz catheter, 180, 293
Bronchitis, 141, 413
Bronchodilators, 403t, 408t, 411, 415t, 416, 427–428, 653 (see also albuterol, Combivent, Duoneb, levalbuterol, racemic epinephrine)
Bronchoscopy
and pulmonary artery rupture from Swan-Ganz catheter, 180, 293
postoperative for secretions, 412
Bronchospasm, 141, 413–414, 415t, 416, 427–428
and use of beta-blockers, 428
from protamine, 211
medications for (see bronchodilators)
Bulk laxatives, 696
Bumetanide (Bumex), 607t, 608, 744a
Bundle branch block (see left bundle branch block)
Bupropion (Wellbutrin, Zyban), 140, 398, 750a
Buspirone (Buspar), 751a
Bypass grafting (see coronary artery bypass grafting)
Bystolic (Nevibolol), 750a
CABG (see coronary artery bypass grafting)
CABG–carotid endarterectomy, 144–146, 685
Calan (see verapamil)
Calcification of aorta, 89, 100f, 148, 686
Calcium channel blockers, 499–502, 500t (see individual drugs)
and aortic dissections, 332
and aortic stenosis, 21
and cardiac arrest, 508t
and heart block, 528, 535, 544
and mitral stenosis, 31
and perioperative vasoplegia, 205, 248, 451
and renal dysfunction, 585
dosages of, 497t, 501–502, 561, 748a
drug profile of, 561
during CPB, 599
electrophysiologic classification of, 554
electrophysiologic effects of, 499
for atrial fibrillation, 501, 530t, 542t, 544, 545t
for coronary artery disease, 3
for coronary spasm, 447, 500–502, 515, 517
for diastolic dysfunction, 318, 457
for HOCM, 41–42
for hypertension, 499–502, 506
for myocardial ischemia, 320, 659
for nonparoxysmal junctional tachycardia, 549
for PACs, 530t, 537
for paroxysmal junctional tachycardia, 548
for postoperative ECG changes, 515
for prevention of radial artery spasm, 11, 322, 500–502
for sinus tachycardia, 450–451, 536
for supraventricular tachycardia, 530t
hemodynamic effects of, 499, 500t
in cardioplegia solutions, 268t
indications for, 500
interaction with digoxin, 561
preoperative use of, 150
triiodothyronine with, 466
use with beta-blockers, 536, 544
withdrawal, and coronary vasospasm, 516
Calcium chloride
dosage of, 465, 618–619
during cardiac arrest, 508, 512
during CPB, 245–246
for citrate toxicity, 366
for hyperkalemia, 465, 616
for hypocalcemia, 366, 618–619
for hypotension, 282, 465, 619
for protamine reactions, 211
hemodynamic effects of, 459t, 465
indications for, 465
with catecholamines, 465, 619
with massive transfusion, 366
with protamine, 618
Calcium gluconate
during dialysis, 613–614
for hyperkalemia, 616, 616t
for hypocalcemia, 619
Caloric requirements, 706
Candesartan (Atacand), 750a
Candida, and circulatory assist devices, 493
Cangrelor, 136
Cannulation
axillary, 52, 237–238, 238f, 251, 331, 333
femoral, 21, 216, 234–235, 237, 240, 331, 333, 693
for circulatory assist devices, 480f
for CPB, 233–240, 236f, 238f–240f
Capillary leak syndrome (see systemic inflammatory response)
Capnography (see end-tidal CO2)
Capoten (captopril), 749a
Captopril (Capoten), 749a
Carafate (sucralfate), 286t, 699–700, 747a
Carbamazepine (Tegretol), 692, 752a
Carbicarb, 622
Carbon dioxide flooding, 249, 686
Cardene (see nicardipine)
Cardiac anesthesia, 175–216
considerations during bypass, 204–207
doses of medications for, 196t
for aortic dissections, 191–192
for aortic valve surgery, 188–189
for CABG, 187
for cardioversion, 193
Cardiac anesthesia (Continued)
for endocarditis surgery, 191
for HOCM surgery, 189
for ICD implantation, 193
for left ventricular aneurysm surgery, 188
for Maze procedures, 190
for MIDCAB, 188
for OPCAB, 187–188, 212–215
for mitral valve surgery, 189–190
for pericardial surgery, 192–193
for repair of VSD, 188
for thoracic aortic surgery, 193–194
for tricuspid valve surgery, 190–191
hemodynamics of medications for, 195t
induction and maintenance of, 194–197, 204t
monitoring during, 176–187
post-bypass considerations in, 207–212, 208t
pre-bypass considerations in, 197–204, 198t
preoperative discussion and consent, 175–176
transesophageal echocardiography during, 180–187
Cardiac arrest, 506–512
ACLS protocols for, 506–512, 507f
circulatory assist devices for, 478
emergency sternotomy for, 373–375, 506, 507f, 508t, 509
etiology of, 507–508, 508t
medications used during, 510–512, 510t
Cardiac arrhythmias (see specific arrhythmia)
assessment of, 529
etiology of, 529
Cardiac catheterization, 95–99 (see also specific diseases, coronary arteriography)
and aortic stenosis, 18–19, 97t
and mitral stenosis, 29–30, 98t
and renal dysfunction, 108, 595–596
contraindications to, 40, 46
hemodynamic norms during, 97t
in pericardiitis, 63, 64f, 663
left heart, 95, 96t, 97f, 98f
right heart, 63, 64f, 95, 96t, 98f, 663
Cardiac index (see cardiac output)
Cardiac massage, internal, 374, 506, 509
Cardiac output (see also low cardiac output syndrome)
basic concepts of, 439–441
diastolic dysfunction and low, 317, 440, 444, 446
formula for, 441t
thermodilution, 177–180, 291, 293, 327, 441–443, 453
vasoconstriction and, 312–313
Cardiac resynchronization therapy, 62
Cardiac tamponade, 372–375, 657–658
after mitral valve replacement, 330
after pacing wire removal, 518, 527, 657–658, 660
and cardiac arrest, 372–373, 507, 508t
and hepatic dysfunction, 704
and low cardiac output syndrome, 357–358, 407, 446, 604
and oliguria/renal failure, 604
and postoperative anticoagulation, 326, 656, 660, 671
and postoperative shortness of breath, 652
chest x-ray of, 362f, 372
CT scan for, 373
diagnosis of, 372–373
ECG changes of, 372, 535
echocardiographic evaluation of, 257t, 317, 357–358, 363t, 373, 661, 662f
from pleural effusion, 427
management of, 373–374
manifestations of, 372, 652
mediastinal bleeding and, 348, 371–374
operative mortality of, 162t, 163, 372
resterotomy for, 373–374
type A aortic dissection and, 43
Cardiac transplantation
circulatory assist devices before, 478–479, 481, 483–485, 488, 490, 492
for CHF, 63
Cardiogenic shock
and delirium, 687
and hepatic dysfunction, 703
and operative risk, 156, 158t, 161t
and renal failure, 545, 594f, 595t
circulatory assist devices for, 478
from acute aortic regurgitation, 26
from acute mitral regurgitation, 33–35
from ventricular septal rupture, 16, 188
IABP for, 16, 35, 472
Cardiolyte, 91
Cardiomyopathy, hypertrophic obstructive (see HOCM)
Cardiomyoplasty, 63
Cardioplegia, 265–274
additives to, 271–272
and hyperkalemia, 267, 268t
antegrade, 240f, 268–273, 304t
blood, 267–274
cannulas for, 270f
diastolic dysfunction and, 312–313
conduction abnormalities after use of, 532

774 INDEX
INDEX 775

crystalloid, 267–268, 272
“hot shot”, 270, 273, 304t
principles of, 267–272, 268t
reperfusion after, 272
retrograde, 240f, 268–273, 270f, 304t
set-up for, 232
strategies for, 272–274
temperature considerations during, 268–269, 269f
tepid, 269–272
terminal warm (hot shot), 270, 273, 304t
warm, 269–273
warm induction, 270, 272
Cardiopulmonary bypass, 229–254
adverse effects of, 305–308, 347, 386–387, 584–585
air embolism from, 209, 249–250
and capillary leak syndrome (see systemic inflammatory response)
and cerebral perfusion, 243
and noncardiogenic pulmonary edema, 386
and platelet activation, 229
and thoracic aortic surgery, 52
anesthetic considerations during, 204–207
anticoagulation for, 199–202, 203t, 204, 241–242, 247
ARDS and, 413–414
cannulas/cannulation for, 233–240, 236f–240f
checklists for, 233, 234f
circuit for, 230–233, 231f
cirrhosis and, 141–142, 142t
effects on pulmonary function, 386–387
effect on renal and metabolic parameters, 584–585
fast-track recovery after, 304t
flow rates for, 205, 241t, 242–243
gas exchange during, 244
hematocrit and, 8, 241t, 243–244, 585, 598, 685
hemodilution and, 243–244
hemodynamic support after, 207–208, 246, 311–312, 316–318
heparin and protamine for, 199–200, 230, 241, 246, 364
inflammatory response to, 229, 244
measurement of ACT during, 200, 230, 241, 241t, 245
perfusion records for, 235f
pH management for, 245
potential problems during, 247–250, 247t
pulmonary dysfunction from, 386–387
renal dysfunction and, 244, 584–586
retrograde autologous priming for, 242, 304t, 352t, 356, 398
rewarming after, 244–245, 305–307
termination of, 207–212, 246–247
thrombocytopenia and, 349t, 350, 369, 666–669
ventilatory support after, 308–309
Cardiopulmonary resuscitation (see cardiac arrest)
Cardiotomy suction, 229, 232, 352t, 355, 398, 686
Cardiovascular management, 439–564
Cardioversion
for atrial fibrillation, 530t, 541, 542t, 543f
for paroxysmal supraventricular tachycardia, 530t, 547
for ventricular tachycardia/fibrillation, 506–507, 507f, 509–512, 530t, 553–554
Cardizem (see diltiazem)
CardioWest total artificial heart, 492
Cardura (doxazosin), 750a
Cardiac arrhythmias, 529–554 (see specific arrhythmia)
assessment of, 529
etiology of, 529
Cardiac care and complications, 439–563, 657–664
Cardiolite scanning, 91
Cardiomyopathy
and ventricular tachycardia, 56–59, 551
ischemic, 13, 15, 60–62
Cardiovascular magnetic resonance imaging, 115–116, 116f, 120–123, 121f–123f
Cariporide, 271, 513
Carmeda BioActive surface, 230
Carotid
arteriography, 143
bruits/disease, 143, 145–146, 685
Doppler studies, 143, 685
endarterectomy, 144–146, 495, 685, 687
MRI, 121, 123f
sinus massage, 547
stenting, 145–146
Carvedilol (Coreg)
dosage of, 286t, 542a, 649t, 733a, 735a, 750a
for CHF, 61
for hypertension, 505, 538–539, 709
for prophylaxis of AF, 538–539, 542a
Catapres (clonidine), 750a
Catastrophic pulmonary vasoconstriction, from protamine, 211, 453
Catecholamines (see specific drugs)
Catheter sepsis, 652
Catheters (see central venous, Swan-Ganz)
CAVH (continuous arteriovenous hemofiltration), 614
CEA (see carotid endarterectomy)
Cecostomy, 698
Cefazolin (Ancef, Kefzol) for endocarditis prophylaxis, 683t
perioperative use of, 152, 197, 674
prophylactic dosage of, 152, 153t, 154, 286t, 649t, 683t, 730a, 732a, 735a, 744a
Ceftriaxone, 683t
Cefuroxime, 151, 674, 744a
Celexa (citalopram), 750a
Celite ACT, 139
Cell-saving blood/devices, 233, 242, 350, 352t, 356, 368, 398, 690
Cellulitis, 678, 681
Central nervous system deficits (see neurologic complications),
Central respiratory drive, 623
Central venous oxygen saturation, 290–291
Central venous pressure (see also right atrial pressure), 97t, 176–177, 440
and RV failure, 327–328, 453
and tricuspid valve disease, 37, 190
for calculation of systemic vascular resistance, 441t
monitoring of, 290–291, 607
Centrifugal pump for cardiopulmonary bypass, 229–232, 309, 398
for circulatory assist, 485–486, 486f–487f, 488
for thoracic aortic surgery, 252, 253f
Centrimag, 486
Cephalexin (Keflex), 683t, 749a
Cephalosporins (see cefazolin)
Cerebral autoregulation, 242–243
Cerebral embolization and neurocognitive dysfunction, 690
and stroke, 684, 686
Cerebral hypoperfusion, 205, 242–243, 684–685, 690
Cerebral oximetry, 176, 197, 206, 206f, 243, 251, 686, 691
Cerebrospinal fluid (CSF) drainage, 53, 192, 334
Cerebrovascular accident (CVA) (see also neurologic complications)
in preoperative risk model, 158, 160t–161t
mortality of, 162t
nosocomial infections and, 475
with use of VADS, 494
Cerebrovascular disease assessment of, 143, 145–146, 686
operative risk assessment and, 158t, 160t–161t, 162
CeVox, 291
Chantix (see varenicline) 140, 398, 752a
Checklists perfusion, 233, 234f
preoperative, 154t
Chest pain, differential diagnosis of, postoperative, 651
Chest physical therapy, 404, 408t, 416
Chest radiography (see chest x-ray)
Chest tubes management of, 294–295
pneumothorax and, 425–426
removal of, 297
technique for insertion of, 759a–760a
Chest x-rays, preoperative of aortic dissection, 88f
of aortic stenosis, 88f
of cardiac tamponade, 360–361, 362f
of diaphragmatic dysfunction, 654
of mitral regurgitation, 88f
of mitral stenosis, 88f
of pericardial effusion, 88f
and position of Swan-Ganz catheter, 283t
during mediastinal bleeding, 360–361, 362f
for pneumothorax, 292, 425–426
postoperative use of, 283–287, 283t
preoperative use of, 87, 89, 148
Child–Turcotte–Pugh classification, 141–142, 142t
Chloral hydrate, 650t, 736a, 752a
Chlordiazepoxide, for alcohol withdrawal, 689, 751a
Chlorhexidine
0.12% oral rinse, 153t, 255, 287t, 417, 649t, 675, 705, 733a, 735a
-alcohol prep, 677
skin scrub, 153t, 155, 677, 730a
Chlorothiazide (Diuril), 607t, 608–609, 745a
Chlorpropamide, 749a
Cholecystectomy, 699
Cholecystitis and paralytic ileus, 698
postoperative, 697–699
Cholecystostomy, 699
Cholestatic jaundice, 703
Cholesterol-lowering medications, 750a
Chordal rupture, 33
Chronic kidney disease, 594, 603 (see also renal failure)
Chronic obstructive pulmonary disease (COPD), 139–141 (see also bronchospasm)
and acute respiratory insufficiency, 407
and amiodarone, 540
and atrial fibrillation, 537
and diaphragmatic dysfunction, 654–655
and hypercarbia, 414
and hypoxia, 413
and mechanical ventilation, 388
and operative risk, 158t, 160t–161t
and postoperative pulmonary embolism, 655
and postoperative pulmonary function, 387
and respiratory insufficiency, 413–414
and sternal wound infection, 675f, 677
and thoracic aneurysms, 51
and use of PEEP, 409
autoPEEP and, 388, 408, 420, 427
preoperative concerns with, 139–141
STS definitions of, 139, 753a
ventilator settings for, 388
Chronic passive congestion of the liver, 37, 148, 191, 698, 703
Chronic renal failure (see chronic kidney disease)
Chronic respiratory failure
etiology of, 413–415
management of, 415–418, 415t
manifestations of, 415
Chronic stable angina, 3–4, 6f–7f, 7
Chylothorax, 427
Ciaglia percutaneous dilatational tracheostomy, 761a–763a
Cigarette smoking, and pulmonary morbidity, 140
Cipro (ciprofloxacin), 417, 710, 749a
Ciprofloxacin (Cipro), 417, 710, 749a
Circulatory arrest
and bleeding, 349t
and early extubation, 397t
and heparin levels, 200
and temperature afterdrop, 306
during repair of aortic dissection, 46, 47f, 191, 332
during repair of thoracic aneurysms, 52–53, 192, 238, 333–334
for calcified aorta, 686
for calcification, 349t
indications for, 251
myocardial protection during, 274
sequelae of, 192, 333–334
steroids for, 52, 192, 251
Circulatory assist devices, 254, 478–494 (see also left or right ventricular assist devices)
anticoagulation for, 480, 482–483
as bridge to transplantation, 478–479, 481, 483–485, 488, 490, 492
available devices, 484–493, 486f–487f, 489f–493f
BiVAD, 482–483
complications of, 493–494
ECMO, 253–254, 483–484
for cardiac arrest, 478
indications for, 63, 209, 254, 311, 318–319, 448t, 449, 469, 478, 515
insertion techniques for, 480f
LVADs, 478–481, 479t, 480f
RVADs, 318, 481–482
weaning of, 481–483
Circumflex artery occlusion, 328
Cirrhosis
and postoperative hepatic dysfunction, 141–142, 702–704
and surgical risk, 141–142, 148, 158t
Child–Turcotte–Pugh classification of, 141–142, 142t
MELD score, 141–142
Cisatracurium, 197
dosage of, 196t
hemodynamics of, 195t
Citalopram (Celexa), 751a
Citrate for dialysis, 613–615
Citrate-phosphate dextrose (CPD), 267, 268t, 272
Citrate-phosphate double dextrose (CP2D), 267, 268t, 272
Citrate toxicity, 366
CK-MB (see creatine kinase-MB)
Clarithromycin, 683t
Clevidine (Cleviprex)
dosage of, 497t, 500, 732a
for postoperative hypertension, 286t, 304t, 319, 363, 472, 496, 497t, 500–501, 500t, 505
Cleviprex (see clevidine)
Clindamycin, 683t
Clonidine (Catapres), 308, 750a
Clopidogrel
and GI bleeding, 700–701
and hepatic dysfunction, 703

INDEX 777
Clopidogrel (Continued)
apirin with, 135–136, 701
delayed tamponade and, 660
for PCI, 5, 10, 107, 135–136, 176, 353
postoperative use of, 322, 324, 649t, 669, 735a
perioperative bleeding from, 135–156, 349t, 350, 364
platelet transfusions and, 135, 369
preoperative discontinuation of, 4, 9–10, 134t, 135–136, 150, 153t, 176, 352–353, 730a
preoperative use of, for CAD, 4, 9–10, 90
upon hospital discharge, 709
Closed mitral commissurotomy, 31
Clostridium difficile colitis, 652–653, 697–698, 701–702
CO2 laser for TMR, 13
Coagulase-negative staph, 39, 677, 708
Coagulopathy
after cardiopulmonary bypass, 12, 229, 347–348, 349t, 350–351, 356–366
after OPCAB, 347
after thoracic aneurysm repair, 333–334
and chronic passive congestion, 37, 191
and circulatory arrest, 333–334
and gastrointestinal bleeding, 699
and liver failure, 703
and renal failure, 592
transfusions for (see transfusions)
treatment of, 212, 363–371
Coapsys device, 63
Cockcroft-Gault equation, 590–591
Cognitive deficits, 689–691
Colace, 650t, 696, 736a
Colchicine, 662
Cold agglutinins, 250
Cold hemagglutinin disease, 250
Cold-reactive autoimmune diseases, 250
Colectomy, 698
Colitis, 697–698, 701–702 (see also Clostridium difficile)
Collagen-gentamicin sponges, 678
Colloids, for intravascular volume expansion, 314–316, 586–588
Colonic angiodysplasia, 701
Colonoscopy, 698
Coma, 685, 687, 755a
Combivent, 428
Common peroneal nerve palsy, 692–693
Common postoperative scenarios, 312–318
Common postoperative symptoms, 647, 651–653
COMPACT trial, 538
Compartment syndrome, 216, 237, 332, 693
Compazine (prochlorperazine), 650t, 735, 744a, 749a
Complement
and CPB, 229–230, 232, 386, 584
and protamine reactions, 211
Complete blood count, 132t, 147, 149, 652
Complete heart block (see heart block)
Computed tomographic scanning, for evaluation of
abdominal pain, 697–698, 705
aortic calcification, 96, 100f, 148
aortic dissections, 46, 117f–118f
coronary arteries, 112, 114f–115f, 116
endocarditis, 40
myxoma, 111f
pericardial disease, 64, 663
pulmonary embolism, 652, 656
seizures, 689
shortness of breath, 652
sinusitis, 652–653
sternal wound infection, 652, 679
stroke, 686
thoracic aortic disease, 116, 117f–120f, 118–120
Conduction abnormalities (see heart block)
Conduction velocity, and antiarrhythmics, 555, 555t
Confusion, 685, 688
Congenital heart disease, in adults, 67–68
Congestive heart failure (see also low cardiac output syndrome)
and acute respiratory insufficiency, 405
and aortic regurgitation, 26
and aortic stenosis, 18
and BNP levels, 141
and diastolic dysfunction, 61, 317
and endocarditis, 39
and HOCM, 41
and left ventricular aneurysms, 13
and mitral regurgitation, 33
and mitral stenosis, 29
and operative risk assessment, 156–157, 158t
and renal failure, 607–608
and venous thromboembolism, 655
early extubation and, 396, 397t
end-stage, 60–63
hemofiltration for, 233, 611–615
hypoxemia from, 602
medical treatment of, 61
myocardial viability and, 94
pathophysiology of, 60–61
surgical procedures for, 61–63
transplant for, 63
ventricular arrhythmias in, 61
Consent, 155, 176
Constipation, postoperative, 696–697
Constrictive epicarditis, 663–664
Constrictive pericarditis
anesthetic considerations in, 194
  catheterization findings of, 63, 64f
evaluation of, 64, 663
hemodynamics of, 63–64, 64f
indications for surgery in, 64–65
preoperative considerations in, 65
  square root sign in, 63, 64f, 663
surgical procedures for, 66, 663–664
Continuous arteriovenous hemofiltration (CAVH), 614
Continuous cardiac outputs, 176, 179, 179f, 291, 322
Continuous narcotic analgesia, 304t, 310, 390
Continuous positive airway pressure (CPAP), 390, 401, 404
Continuous renal replacement therapy (see renal replacement therapy)
Continuous venovenous hemo(dia)filtration, 611t, 613–615, 614f
Contractile reserve, 623
Contractility (see also inotropic medications)
  and low cardiac output syndrome, 446
  definition of, 440–441
  manipulation of, 449
Contraction alkalosis, 623
Contrast-enhanced MRI, 95, 122f
Contrast-induced nephropathy, 108, 595–596
Controlled mandatory ventilation, 182–183, 182f–185f
Controlled reperfusion, 272
COPD (see chronic obstructive pulmonary disease)
CorAide, 488
CorCap device, 63
Cordis introducer, 178, 178f, 291
Coreg (see carvedilol)
Coronary air embolism (see air embolism)
Coronary angiography (see coronary arteriography)
Coronary arteriography, 100–101, 102f–106f, 106–108
  and aortic dissections, 46
  and aortic stenosis, 21
  and thoracic aortic aneurysms, 49
  computed tomographic, 112, 114f–115f, 116
  contraindications to, 40, 46
  for assessment of coronary spasm, 517
  for assessment of polymorphic VT, 554
  for recurrent myocardial ischemia, 659–660
  magnetic resonance, 115–116, 116f
left, 102f–103f, 105f–106f
noninvasive, 112, 114f–116f, 115–116
  postoperative, 512, 515, 517, 651, 659
right, 104f, 105
Coronary artery anomalies, surgery for, 8
Coronary artery bypass grafting (CABG) (see also coronary artery disease)
anesthetic considerations in, 187
  antiplatelet therapy after, 322, 669
carotid endarterectomy with, 144–146, 685
critical pathway for, 644t–646t
diabetes and, 142–143
echocardiography during, 182–183, 182f–185f
  for end-stage heart failure, 61
  for ventricular arrhythmias, 59
  left ventricular aneurysms and, 16
  minimally invasive, 11–13
off-pump (OPCAB), 11–12, 12f
  perioperative MI and, 320–322, 321f, 513–516
  postoperative care after, 318–322
  preoperative considerations in, 8–10
  risk models for, 156–157, 158t, 159f, 160t–161t
  radial artery grafting for, 10–11, 322
  surgical procedures for, 10–13, 11f–12f
  surgical ventricular restoration with, 15–16, 62–63
ventricular septal defects and, 17
Coronary artery disease, 3–13
  bypass grafting for, 10–13, 11t–12t
  echocardiography in, 113t
  indications for surgery in, 5, 6f–7f, 7–8
  management of, 3–4
  pathophysiology of, 3
  PCI for (see percutaneous coronary intervention)
  preoperative considerations in, 8–10
  procedure selection for, 4–5
  risk factors for, 3
Coronary artery spasm (see coronary vasospasm)
Coronary embolism, 453, 513
Coronary endarterectomy, and perioperative MI, 513
Coronary sinus rupture, 232, 249, 271
Coronary steal, from nitroprusside, 498
Coronary vasospasm, 320, 446–447, 516–517
  and cardiac arrest, 508, 508t
  and low cardiac output syndrome, 446–447
  and perioperative MI, 513, 516–517, 659
medications for, 499–502
Coronary-subclavian steal, 660
Corticosteroids (see steroids)
Cortisol
   for adrenal insufficiency, 628
levels, and CPB, 584, 624
Cosyntropin, 628
Coudé catheter, 144
Coumadin (see warfarin)
Coumadin embryopathy, 707
Counterpulsation (see intra-aortic balloon counterpulsation)
Cox-2 inhibitors, 603
Cox-Maze procedure (see Maze procedure)
Cozaar (losartan), 750a
CP2D, 267, 268t, 272
CPAP (see continuous positive airway pressure)
CPD (citrate-phosphate-dextrose), 267, 268t, 272
Crawford classification, 51f
C-reactive protein, 3, 148
Creatine kinase, for diagnosis of MI, 321–322, 514–515
Creatinine
   postoperative, 590, 601–602, 601t, 605, 605t
   preoperative, 147, 149, 207
Creatinine clearance, 590–591 (see also glomerular filtration rate)
Crestor (rosuvastatin), 750a
Critical illness polyneuropathy, 414, 691–692
Critical care pathways, 643, 644t–646t
Cryoablation
   for atrial fibrillation, 31, 55, 330
   for ventricular tachycardia, 59, 335
Cryopreserved homografts (see homografts)
CRRT (see renal replacement therapy)
Cryoprecipitate
   after thrombotic therapy, 353, 371
Cryosurgery, for ventricular tachycardia, 59, 335
Cryptogenic stroke, and PFOs, 67–68
Crystalloid cardioplegia, 267–268, 272
CSF (cerebrospinal fluid) drainage, 52, 192, 334
CT coronary angiography (see computed tomographic scanning)
CT scanning (see computed tomographic scanning)
Cuff leak test, 403, 422
Cuirass respirator, 655
CVA (see neurologic complications)
CVP (see central venous pressure)
Cyanide toxicity, from nitroprusside, 470, 498
Cyclic AMP, 458, 462
Cyclic GMP, 458
Cyclokapron (see tranexamic acid)
Cyclooxygenase, 133, 138
Cyclophosphamide, 494
Cystatin C, 584, 602
Cytokines
   and blood transfusions, 367–368
   and CHF, 61
   and CPB, 229, 232, 386, 584
Cytomegalovirus, 367, 703.
Danaparoid sodium, 203t, 204, 668–669
DDAVP (see desmopressin)
DDD pacing, 449, 522, 522t, 523–527
   during cardiac arrest, 511
   for heart block, 283, 524, 530t, 533–534
   in HOCM, 41
D-dimers
   and aortic dissections, 44
   and fibrinolysis, 359, 369
DeBakey classification of aortic dissections, 43
DeBakey Micromed assist device, 63, 490, 491f
Debranching operation, 52, 53f, 251, 333
Decubitus ulcer, 652
Deep hypothermic circulatory arrest (see circulatory arrest)
Deep sternal wound infections, 677–681
Deep venous thrombosis (see also venous thromboembolism), 652, 655–656
Defibrillation, for ventricular tachycardia/fibrillation, 507, 507f, 509–510
Delayed afterdepolarizations, 551, 555
Delayed extubation, 159, 162, 385, 390, 396–398, 397t
Delayed-onset HIT, 667
Delayed paraplegia, 334
Delayed tamponade, 407, 657–658, 660–661, 662f, 664 (see also cardiac tamponade)
Delirium
   and adrenal insufficiency, 628
   and patient-ventilator dyssynchrony, 394
   and respiratory failure, 414
   management of, 688
   postoperative, 141, 685, 687–689
   risk factors for, 687
Dementia, 687–688
Demerol (meperidine), 286t, 304t, 306, 364, 395, 496, 733a, 743a
Dental disease
   AHA recommendations for endocarditis prophylaxis, 683t
   and valve surgery, 21, 28
   preoperative evaluation of, 145
Depression, 691
Dermabond, 644t, 674, 678
Desflurane, 187, 195–196, 244
Desmopressin (DDAVP)
  dosage of, 366
  for diabetes insipidus, 628
  for uremic platelet dysfunction, 212, 363t, 366
Destination therapy, 478, 490, 492
DeVega tricuspid annuloplasty, 37
Dexaide, 488
Dexamethasone
  for laryngeal edema, 422
  for pituitary apoplexy, 628
  perioperative use of, 151, 198, 304t, 399
  to prevent atrial fibrillation, 541
Dexmedetomidine
  and delirium, 688
  dosage of, 197, 286t, 304t, 733a, 745a
  during surgery, 187, 197
  for postoperative sedation, 286t, 304t, 308, 310, 364, 390, 395, 399, 410, 411f
  for shivering, 306
  for weaning from ventilation, 308, 401, 421
DFTs (defibrillation thresholds), 60
DHCA (see circulatory arrest)
DiaBeta (glyburide), 749a
Diabetes insipidus, 628
Diabetes mellitus
  and bilateral ITA grafting, 143, 677–678
  and coronary artery disease, 3
  and delirium, 687
  and diaphragmatic dysfunction, 89, 143, 654
  and hyperglycemia (see hyperglycemia)
  and leg wound infections, 681
  and neurocognitive dysfunction, 689
  and operative risk assessment, 142–143, 158t, 160t
  and peroneal nerve palsy, 693
  and pharyngeal dysfunction, 696
  and preoperative insulin doses, 143
  and renal dysfunction, 142
  and sternal wound infections, 677
  and stroke, 142, 683, 685
  diabetic ketoacidosis, 620–621, 626
  hemoglobin A1c, 132t, 143, 625
  hyperosmolar, hyperglycemic, nonketotic coma, 620
  NPH insulin and protamine reactions, 143, 210
  postoperative complications with, 142, 654, 677, 681, 683
  STS definition of, 753a
  Diabetic ketoacidosis, 620–621, 626
  Diabinase (chlorpropamide), 749a
  Diagnostic techniques in cardiac surgery, 87–123
  Dialysis (see renal replacement therapy)
  Diamox (acetazolamide), 395, 624, 744a, 751a
  Dianear, 614
  Diaphragmatic dysfunction, 414, 654–655
    etiology of, 386–387, 654
    fluoroscopy for, 416, 655
    from iced slush, 387, 414, 654
    from ITA takedown, 386–387, 654
    in diabetics, 143, 654
    plication for, 415–416, 655
  Diarrhea, 621, 701–702
  Diastolic arrest, from cardioplegia, 267, 268t, 269
  Diastolic collapse, from tamponade, 373, 427
  Diastolic dysfunction
    and aortic stenosis, 18
    and end-stage heart failure, 61, 141
    and HOCM, 41
    and milrinone, 462
    postoperative, 317, 440, 444, 446, 457, 652
  Diastolic filling period, 30
  Diazepam (Valium), 689
  Diclofenac, 310
  Diet (see also nutrition)
    after discharge, 710
    postoperative, 648t, 734a
  Difficult intubation, 401
  Diffusion capacity, and amiodarone, 141
  Diffusion-weighted MRI scanning, 683–686, 689–691
  Digibind, for treatment of digoxin toxicity, 508t, 548, 563
  Digital ischemia, 290
  Digoxin
    and amiodarone, 559, 562
    and renal failure, 562, 610
    and verapamil, 562
    dosages of, 545, 562, 748a
    drug profile of, 562–564
    for atrial fibrillation, 31, 54, 530t, 545
    for nonparoxysmal junctional tachycardia, 530t, 549
    for PACs, 537
    for supraventricular tachycardias, 530t, 548
    levels of, 562
    preoperative use of, 150
    toxicity from, 562–564
    ventricular ectopy, 563
    with phenytoin (Dilantin), 563–564
Dilantin (see phenytoin)
Dilaudid (hydromorphone), 743a, 747a
Diltiazem, 501–502, 747a
   dosage of, 11, 497t, 502, 542t, 544, 548, 561, 649t, 735a, 748a
   drug profile of, 500t, 561
   for atrial fibrillation, 189, 501, 530t, 542t, 543f, 544
   for AV nodal reentrant tachycardia, 530t, 548
   for coronary spasm, 447, 502, 517, 735a
   for hypertension, 501–502, 505–506, 658
   for postoperative ECG changes, 320
   for prevention of radial artery spasm, 11, 286t, 322, 502, 649t, 735a
   for prevention of renal dysfunction, 599–600
   for supraventricular tachycardia, 511, 530t, 548
   hemodynamic effects of, 500t, 501
   indications for, 501–502, 561
   preoperative use of, 3, 150
   use with beta-blockers, 536, 544
   Dimensionless index, 19t
Diovan (valsartan), 750a
Dip and plateau pattern, 64f
Diphenhydramine (Benadryl)
   dosage of, 752a
   for attenuation of platelet reactions, 369
   for attenuation of protamine reactions, 211
Diprivan (see propofol)
Dipyridamole
   for pulmonary hypertension, 455
   -MRI scanning, 122
   -thallium scanning, 49, 91
Direct thrombin inhibitors, 202, 303t, 241–242, 353 (see also argatroban, bivalirudin, and lepirudin)
Discharge planning, 708–710
Disopyramide
   dosage of, 557
   drug profile of, 556–557
   electrophysiologic classification of, 554
   for HOCM, 41
Dissections (see aortic dissections)
Diuretics
   and metabolic alkalosis, 622
   continuous infusion of, 410, 589–590, 607t, 608
   for oliguria/renal insufficiency, 607t, 608–609
   for postpericardiotomy syndrome, 663
   for respiratory insufficiency, 408t, 410, 415t, 416
   for stroke, 687
   in mitral valve disease, 31, 35
   in tricuspid valve disease, 37
   postoperative use of, 404, 589–590
   potassium-sparing, 751a
   preoperative use of, 31, 35, 37, 150
   tolerance to, 590
Diuril (chlorothiazide), 745a
Diverticulitis, postoperative, 697
Dobutamine, 461–462
   after CABG, 319
   after mitral valve surgery, 328
   and calcium chloride, 619
   comparison with dopamine, 461
   comparison with epinephrine, 458, 461
   comparison with levosimendan, 467–468
   comparison with milrinone, 461–462
   dosage of, 285t, 460t, 462, 732a
   for inotropic support, 209, 285t, 319, 448t, 469, 732a
   for protamine reactions, 211
   for RV failure/pulmonary hypertension, 191, 328, 454–455, 454t
   hemodynamic effects of, 459t, 461
   indications for, 461–462
   -MRI, 122
   -stress echo, 19–20, 94–95, 112
   use with inamrinone/milrinone, 462, 469
   weaning of, 470–471
Docusate (Colace), 650t, 696t, 736a
Dofetilide
   and amiodarone, 560
   and verapamil, 560
   dosage of, 541, 542t, 546–547, 560
   drug profile of, 560
   electrophysiologic classification of, 554
   for atrial fibrillation, 541, 542t, 543f, 546–547
Dolasetron
   dosage of, 744a, 749a
   for delirium, 689
   for nausea, 696
Dopamine
   after CABG, 319
   and excessive urine output, 316, 470
   dosage of, 285t, 460t, 461, 732a
   during cardiac arrest, 511
   for inotropic support, 285t, 319, 448t, 461, 469
   for oliguria/renal failure, 461, 609–610
   for prevention of renal dysfunction, 207, 600
   for sinus bradycardia, 531
   hemodynamic effects of, 459t, 460–461
   indications for, 461
   to improve urine output, 590
use with diltiazem, 600
use with furosemide and mannitol, 607t, 609
Dopexamine, 468
Doppler (see echocardiography)
Dor procedure, 15–16, 15f
Double lumen tubes
for minimally invasive surgery, 215–216
for pulmonary artery rupture, 180, 293
for thoracic aortic surgery, 192
Doxacurium (Nuromax), 195t–196t, 745a
Doxazosin (Cardura), 750a
dp/dt
and aortic dissection, 45, 332
and use of nitroprusside, 498
Dronedaron, 540, 559–560
Droperidol, 696, 744a
Drotrecogin (Xigris), 676
Drug abuse (see substance abuse)
Drug doses, 743a–752a
Drug-eluting stents, 5, 10, 136, 176
Drug fever, 652
D-STAT dry, 478
Dual chamber pacing, for HOCM, 41
Dual-site atrial pacing, 530t, 537, 540, 542t
Dulcolax, 650t, 736a
Duodenal ulcer, postoperative, 697, 699
Duroge, 428, 650t, 653, 736a
Duraflo II, 230
Duragesic, 405
Duramorph, 324
DVI pacing, 449, 522, 522t, 524–525, 527, 533
DVT (see deep venous thrombosis)
Dysarthria, 685
Dyslipidemia, STS definition of, 753a
Dysphagia, 404, 696
Early extubation, 303, 308, 323, 396–398
exclusionary criteria for, 396–397, 397t
Early postoperative care, 303–335
Ecarin clotting time (ECT), 202, 203t
ECG (see electrocardiography)
Echo score, 29
Echocardiography, 108f–112f, 110, 177, 180–187
and aortic atherosclerosis, 234
and dysphagia, 696
complications of, 181, 696
dobutamine-stress, 19–20, 94–95, 112
during aortic valve surgery, 184–185
during left ventricular aneurysm surgery, 189
during minimally invasive surgery, 183–184
during mitral valve surgery, 185–186
during off-pump surgery, 183, 213, 322–323
during transcutaneous aortic valve implantation, 188–189
during use of VADs, 480–482
epiaortic, 89, 686
exercise, 94
for evaluation of
aortic dissection, 46, 111f, 113t, 186, 191
aortic regurgitation, 27, 113t, 188
aortic stenosis, 18–20, 19t, 113t, 184–185, 188–189
atrial septal defects (PFO), 67–68
cardiac tamponade, 113t–114t, 357–358, 357t, 363, 363t, 373, 447, 658, 661, 662f
cardiac tumors, 111f
coronary vasospasm, 517
diastolic dysfunction, 113t–114t, 317, 325
diabetes, 64, 194, 663
diabetic ketoacidosis, 113t, 187
intracardiac masses, 111f, 113t
left ventricular aneurysms, 13–14
low cardiac output states, 373, 447
mediastinal bleeding, 357–358, 361, 363t, 373, 447
mitral regurgitation, 33–34, 108, 108f–109f, 112f, 113t–114t, 185–186, 190
mitral stenosis, 29, 113t, 189
myocardial ischemia, 113t, 187
paravalvular leak, 114t, 186f
pericardial disease, 64, 194, 663
pericardial effusion, 113t, 187
tricuspid valve disease, 36, 113t
ventricular septal defects, 16, 188
images of, 108f–112f
intraoperative use of, 177, 180–187, 181t, 182f–185f, 198, 216, 234, 246, 271
pharyngeal dysfunction and, 696
postoperative use of, 114t, 186, 208, 208t, 316–317, 357–358, 408, 447, 653
preoperative use of, 113t
prior to cardioversion, 193, 545
three-dimensional, 110, 112f, 186
views of, 181–186, 182f–185f
ECLIPSE Trial, 500–501
ECMO (see extracorporeal membrane oxygenation)
Edecrin (ethacrynic acid), 745a
Edrophonium, 548
Effective refractory period (ERP), 555, 555t
Effexor (venlafaxine), 751a
Ejection fraction, assessment of, 95, 98f, 291, 440
Elastic stockings (see T.E.D. stockings)
Elavil (amitriptyline), 692, 752a
Electrocardiography (ECG) (see specific arrhythmia)
atrial electrograms, 518–519
and coronary spasm, 516
during cardiac arrest, 506–512
for evaluation of arrhythmias, 529
for exercise stress test, 91, 92f
in aortic dissection, 45
of acute pericarditis, 320f
of hyperkalemia, 616
of hypokalemia, 618
of myocardial ischemia, 320f
postoperative, 282–283, 288, 320, 323, 325, 328
preoperative, 89–91, 149
Electroencephalography (EEG), 251
Electrolytes, preop, 132t, 147, 149, 730a
Electromyography, for evaluation of brachial plexus injury, 692
Electrophysiologic properties, 551t
Electrophysiology studies, 59, 320, 553
Elephant trunk procedure, 52
Elevated hemidiaphragm, 89 (see also diaphragmatic dysfunction)
ELISA for HIT, 201, 351, 667
Embolectomy, for pulmonary embolism, 656
Embolism (see air, cerebral, fat, and pulmonary)
Embol-X catheter, 233, 686
Emergency sternotomy, 506, 507t, 509

technique of, 373–375
Emphysema (see chronic obstructive pulmonary disease)
Enalapril, 749a
Enalaprilat, 496, 497t, 504
Encephalopathy (see also delirium)
and respiratory failure, 414
from hyperammonemia, 704
postoperative, 687–689
End–stage heart failure (see congestive heart failure)
End–tidal CO₂, 176, 389
Endoaneurysmorrhaphy technique, 15–16, 15f
Endocardial resection, 59, 335
Endocarditis, 39–41
and postoperative fevers, 652
AHA recommendations for prevention of, 683t
anesthetic considerations in, 191
aortic valve, 27, 39–40, 191
as preoperative risk factor, 158t, 161t
echocardiography in, 40, 110f, 113t
fungal, 39
indications for surgery in, 39
mitral valve, 33–34, 40
pathophysiology of, 39
preoperative considerations in, 40
prevention of, 683t
prosthetic valve, 21, 39–40, 708
surgical procedures for, 35, 40–41
tricuspid valve, 36, 39–41
VADs and, 494
Endoclamp, 216
Endoscopic
CABG (TECAB), 13
radial artery harvesting, 10–11, 322, 501–502, 682
vein harvesting, 10, 681, 693
Endoscopy, for gastrointestinal bleeding, 700
Endothelin-receptor antagonists, 457
Endotracheal tubes, weaning and extubation, 400–403, 400t–402t
Endovascular stents
for aortic dissection, 44–46, 48, 192
for thoracic aneurysms, 53, 192–193, 334
Endoventricular patch plasty, 15–16, 15f
Enoxaparin (Lovenox) (see low-molecular-weight heparin)
Enoximone, 468
Ensure, 705
Enterobacter, 417
EOPA cannula, 236f, 237t, 249
Eosinophilia, and postpericardiotomy syndrome, 663
EP studies (see electrophysiologic testing)
Epiaortic echocardiography, 89, 686
Epicardial constriction, 66, 663–664
Epicardial pacing wires (see pacing wires)
Epidural analgesia, 308, 324, 331, 389–390, 399
Epinephrine, 458–459
adverse effects of, 470
after CABG, 319
after mitral valve surgery, 328
and CPB, 584, 624
calcium chloride and, 619
comparison with dobutamine, 458, 461
dosage of, 285t, 459, 460t, 732a
during cardiac arrest, 459, 507f, 510–511, 510t
during OPCAB, 187, 215
for bronchospasm, 428, 458
for inotropic support, 209, 215, 285t, 319, 448t, 469, 732a
for laryngospasm, 428
for protamine reactions, 211
for RV failure/pulmonary hypertension, 328, 454
for sinus bradycardia, 459, 531
hemodynamic effects of, 458–459, 459t
indications for, 459
metabolic acidosis from, 458, 619
racemic, 428
selection of, 469
use with milrinone, 458, 462, 469
via endotracheal tube, 510
weaning of, 471
Epithelial casts, 605, 605t
Eplerenone, 61, 624, 751a
Epogen (erythropoietin), 149, 352t, 666
Epoprostenol
for CPB with HIT, 202
for pulmonary hypertension/RV failure, 189, 328, 454t, 456
use with RVAD, 482
Epsilon-aminocaproic acid (EACA, Amicar), 352t, 353–354, 359, 596t, 597
dosage regimens of, 199, 304t
Eptifibatide (Integrilin), 4, 134t, 138, 176, 350, 353
Erythrocyte sedimentation rate, and postpericardiotomy syndrome, 663
Erythromycin, and feeding tube placement, 705
Erythropoietin, 149, 352t, 666
Esmolol
after aortic valve replacement, 325
and bronchospasm, 428
dosage of, 285t, 497t, 503, 558, 732a, 743a
for aortic dissection, 45, 332
for atrial fibrillation, 189, 544
for hyperdynamic heart, 318, 503
for hypertension, 304t, 305, 363, 496, 503
for myocardial ischemia, 187
for myocardial protection, 272
for sinus tachycardia, 451, 536
indications for, 503, 505
Esophageal Doppler, 293, 295f
Esophageal pathology, and TEE, 181
Esophagitis, and postoperative chest pain, 651
Ethacrynic acid (Edecrin), 745a
Etomidate, 193–194, 195t, 196t
European Society of Cardiology guidelines, 322, 330, 669
EUROSCORE, 157, 161t
Exploratory laparoscopy/laparotomy, 697, 702, 705
Exercise echocardiography, 94
Exercise tolerance test, 91, 92f
External defibrillator pads, 197, 198t
Failure criteria, during ventilator weaning, 401t
Fat embolism, 232–233
Fatty acids, 541
Femoral cannulation, 21, 216, 234–235, 237, 240, 331, 333, 693
Fenofibrate, 21, 216, 234–235, 237, 240
Fenoldopam
dosage of, 286t, 497t, 503, 505, 599, 732a
for hypertension, 496, 497t, 504–505
for oliguria/renal failure, 607t, 609
intraoperative use of, 192, 204t, 207, 304t, 316, 334, 399, 505, 596t, 599–600
Fentanyl
dosage of, 196t, 304t, 743a
epidural analgesia with, 308
for anesthesia, 187, 195, 196t, 387
for postoperative sedation, 309 390, 395, 398, 410, 411f
hemodynamics of, 195t
in fast-track protocol, 304t
patch, for postoperative pain, 405
via PCA pump, 310, 390, 405
Ferrous gluconate, 665
Ferrous sulfate, 665
FEV1 (forced expiratory volume in one second), 140, 386, 753a
Fever, postoperative, differential diagnosis of, 652
Fiberoptic oximetry, 179
Fibrillatory arrest, 266, 266t
Fibrin split products, 359, 368
Fibrinogen, 359, 365, 365f, 370–371
Fibrinolysis and assist devices, 493
postoperative, 247, 349t, 351, 359
Fibrointimal hyperplasia, 322
Fibro-oligosaccharides, 706
Fick equation, 443
Fighting the ventilator, 394–395, 424
Filters (see blood filters)
Filtration fraction, 584
First degree heart block, 524, 532–533, 532f
Fish allergies, and protamine, 210
Fish oils, 139, 350, 541, 706
Flagyl (metronidazole), 653, 701–702
Flavonoids, 139
Flaxseed oil, 139
Flecainide, 554
Flexible bronchoscopy (see bronchoscopy)
FloTrac device, 177, 180, 190, 213, 291, 293, 294f, 327, 408, 441, 453
Flowsheet, in ICU, 737a
Fludrocortisone, for adrenal insufficiency, 628
Fluid management body water distribution, 583–584
postoperative, 586–590
Flumazenil, 402, 746a
Fluorodeoxyglucose, for SPECT, 94
Fluoroscopy, 96
and diaphragmatic dysfunction, 416, 655
for detection of aortic wall calcium, 96, 100f
for detection of valve thrombosis, 96, 101f
Fluoxetine (Prozac), 751a
Fluvastatin (Lescol), 750a
Folate/folic acid, 141, 689
Foley (urinary) catheter, 144, 296–297, 606, 607, 610
Fondaparinux
after valve surgery, 327
and perioperative bleeding, 340t, 350
for HIT, 668
for VTE prophylaxis, 9
preoperative discontinuation of, 9, 134t, 137, 151, 176, 349t, 350, 352
Forced air warming systems, 192, 214, 306, 307f, 363
Forced expiratory volume in one second (FEV1), 140, 386, 753a
Forced vital capacity (FVC), 386
Forearm neurologic symptoms, 694
Fractional excretion of sodium, 605t, 606
Fractional flow reserve, 106
Free radical scavengers, 267
Free water clearance, and CPB, 585
Fresh frozen plasma (FFP) for heparin resistance, 139, 201, 241, 247, 354, 370
for overanticoagulation, 351, 672f, 741a
for postoperative bleeding, 191–192, 212, 353, 363t, 364, 365f, 370
Fresh whole blood, 368
Functional classification of New York Heart Association, 133, 133t, 729a
Functional residual capacity (FRC), 386, 404
Functional tricuspid regurgitation (see tricuspid regurgitation)
Fungal infections, and assist devices, 494
Furosemide continuous infusion of, 410, 589, 594, 607t, 608
dopamine and mannitol with, 607t, 609
dosage of, 589, 650t, 745a, 751a
during cardiac catheterization, 494
for hyperkalemia, 616t, 617
for oliguria/renal failure, 607t, 608
for prevention of renal dysfunction, 207, 316, 334, 600
for routine diuresis, 404–405, 410, 589–590, 650t, 736a
FVC (see forced vital capacity)
Gabapentin (Neurontin), 692, 752a
Gadolinium-enhanced MRI, 95, 121, 122f
Ganglionic plexus mapping, 56
Garlic, 139
Gas embolism, 231, 233, 249–250, 684
Gas exchange, on CPB, 244
Gastric distention, 529, 535, 698
Gastric lavage, 508t
Gastric ulcer, postoperative, 697
Gastritis, 697
Gastroesophageal reflux, and postoperative chest pain, 651
Gastrointestinal bleeding, 141, 144, 699–702
and elevations in BUN, 605
and mesenteric ischemia, 701
and OPCAB, 695
lower, 701
upper, 699–701
Gastrointestinal complications, 694–705
Gelatin solutions, 588
Gentamicin, 154
GFR (see glomerular filtration rate)
GI bleeding (see gastrointestinal bleeding)
Gingko preparations, 139, 350
Glasgow coma score, 418
Glipizide (Glucotrol), 749a
Glomerular filtration rate (GFR)
and CPB, 206, 584–585
and digoxin levels, 563
and renal failure, 590–592, 591t, 601–603, 601t
as operative risk factor, 147, 590–593
calculation of, 590–591
effects of diuretics on, 589
Glomerulonephritis, 595t
Glucophage (metformin), 108, 144, 595, 595t, 749a
Glucotrol (glipizide), 749a
Glucose-insulin-potassium (GIK), 467
Glutamate, 272
Glyburide (Micronase), 749a
Glycoprotein IIb/IIIa inhibitors
and perioperative bleeding, 349t, 350, 369
and thrombocytopenia, 201, 350
for CPB with HIT, 241
preoperative cessation of, 10, 134t, 138, 151, 153t, 176, 364
preoperative use of, 4, 10, 90, 353
Gorlin formula
for aortic stenosis, 19
for mitral stenosis, 30
Graduated compression stockings, 405, 655–656
(see also T.E.D. stockings)
Granisetron (Kytril), 696
Granular casts, 605, 605t
Grape juice, 139
Grapefruit juice, 559
Groin cannulation (see femoral cannulation)
H₂ blockers, 144, 296, 369, 417, 700, 747a
Hair clipping, 155, 677
Halcion (triazolam), 752a
Haldol (see haloperidol)
Haloperidol
and torsades de pointes, 552
dosage of, 745a, 751a
for postoperative delirium, 411f, 688
and use of amiodarone, 710
HDL cholesterol, 3
Heart block, 532–535
after aortic valve replacement, 326, 532
after mitral valve surgery, 532
and cardiac arrest, 508
and digoxin toxicity, 563
and endocarditis, 27, 39–40, 191
AV pacing for, 524, 530t, 534 (see also DDD pacing)
ECGs of, 532f–534f
first degree, 524, 532–533, 532f
from Swan-Ganz catheter, 149, 180, 292, 524, 532–533
permanent pacer for, 528, 535
secondary to beta-blockers, 528, 535
second-degree, 524, 528, 533–534, 533f
third-degree (complete), 524, 528, 530t, 534–535, 534f
treatment of, 528, 530t, 532–534
Heart failure (see congestive heart failure)
Heart rate
after MIDCABs, 324
and low cardiac output states, 446, 448t, 449
effects of anesthetic agents on, 195t
vasoactive drugs and, 459t
HeartAssist 5 (Debakey), 490, 491f
HeartMate II, 63, 483, 488, 490, 490f
HeartMate XVE VAD, 481, 492, 493f, 494
HEARTSTRING device, 12, 215, 324, 686
HeartWare, 491f
Heated humidifiers, 306, 363
Heimlich valve, 426
Hemagglutinin disease, 250
Hematocrit (see also transfusions)
after catheterization, 8, 147
during bypass, 8, 241t, 243–244, 585, 598, 685
postoperative, 311–312, 348, 442, 444
preoperative, 8–9, 147
transfusions and, 147, 311–312
Hematologic complications, 665–668
Hemiarch repair, 52
Hemicolectomy, 698
Hemiparesis/hemiplegia, 685
Hemothorax, 200, 354
Hemodialysis, 612–613
and nutrition, 610–611, 611t, 706
for hyperkalemia, 617
preoperative, in chronic kidney disease, 597, 612
Hemodilution, and CPB, 8, 243–244, 350, 584–586, 598
Hemodynamic formulas, 441t
norms, 97t
support, 311–312, 445t (see cardiovascular management)
Hemofiltration
and blood conservation, 368, 399
and dialysis, 596t, 598, 611–615
on CPB, 233
Hemoglobin (see also hematocrit)
based oxygen carriers, 371, 588
-oxygen dissociation curve, 367, 391–393, 391f, 623
Hemoglobin A1c, 132t, 143, 625, 730a
Hemoglobinuria, and renal failure, 595t
Hemolysis
and hyperbilirubinemia, 703
and renal failure, 595t
from prosthetic valves, 703, 708
Hemoptysis, from Swan-Ganz catheter, 180, 292–293
Hemopure, 371
Hemothorax, 407
Heparin, unfractionated
and ACTs, 200–201, 210, 230, 241
and adrenal insufficiency, 627
and argatroban, 668
and delayed tamponade, 660
and gastrointestinal bleeding, 699
and IABP, 476
and pituitary apoplexy, 628
and pregnancy, 707
and protamine, 199–200, 210, 246, 354, 363t, 364, 365f
coated circuits, 200, 229–230, 241, 309, 352t, 597
during CPB, 199–201, 230, 241, 354
during OPCAB, 213–214
during ultrafiltration/dialysis, 612–613, 615
during use of ECMO/VADs, 480, 482–483
following valve surgery, 326–327, 330–331, 671
for acute coronary syndrome, 4, 9, 136
for arterial lines, 289–290
for left heart bypass, 252
for left ventricular aneurysms, 14
for postoperative atrial fibrillation, 542t, 543f, 545
for preoperative atrial fibrillation, 137
for protamine reactions, 211
for pulmonary embolism, 656
for stroke, postoperative, 687
for VTE prophylaxis, 137, 284t, 403t, 405, 649t, 653, 656, 731a, 735a
-induced thrombocytopenia (see heparin-induced thrombocytopenia)
low-molecular-weight (see low-molecular-weight heparin)
postoperative use of, 326–327, 330–331, 647, 649t, 671, 731a, 735a
preoperative use of, 4, 9, 31, 90, 107, 134t, 136–137, 151, 153t, 176, 351
-protamine titration test, 139, 200, 210, 241, 246, 352t, 354
protocol for postoperative anticoagulation, 672t, 740a
rebound, 210, 349t, 350
removal device for, 212
resistance to, 201, 241, 247, 247t, 354
Heparinase, 212
Heparin-bonded circuits, 229–230, 309, 352t, 597
ACT for, 200, 241, 355
Heparin-induced platelet aggregation, 201, 667
Heparin-induced thrombocytopenia
and circulatory assist devices, 494
and dialysis, 612
diagnostic tests for, 147, 201, 667
management of, during CPB, 201–202, 203t, 204, 241–242
postoperative, 666–669
preoperative, 9, 137, 147, 350–351
Hepatic congestion
and paralytic ileus, 698
and tricuspid regurgitation, 37, 148, 191, 703
Hepatic dysfunction, postoperative, 702–704
and hypoglycemia, 627
and metabolic acidosis, 620
Hepatitis
posttransfusion, 149, 703
preoperative, 141
Hepatitis B, 367–369
Hepatitis C, 149–150, 367, 703
Hepatocellular necrosis, 703
Hepcon system, 200, 241, 246, 354, 366
Herbs, 139, 350
Hespan (see hetastarch)
Hetastarch
and bleeding, 357, 371, 582
and CPB, 230
contraindications to, 209
dosage of, 587
for volume expansion, 314, 586–587
Hextend (see hetastarch)
Heyde’s syndrome, 701
Hibiclens scrubs, 153t, 155, 677, 730a
HIDA scan, 697, 699, 703
High-intensity frequency ultrasound (HIFU), 31, 55, 190
Histamine blockers, 211, 369
History, preoperative, 133–145
Hirudin (see lepirudin)
HIT (see heparin-induced thrombocytopenia)
HIV (human immunodeficiency virus), 149–150, 367, 369–370
Hoarseness, 694
HOCM (see hypertrophic obstructive cardiomyopathy)
Holmium-YAG laser, 13
Homograft valves, 22, 40
Hot shot cardioplegia, 270, 273
Human immunodeficiency virus (HIV), 149–150, 367, 369–370
Humulin insulin, 626t, 736a
Humulog, 626t
Hyaline casts, 605t
Hydralazine, 497t, 504
Hydrochloride acid, for metabolic alkalosis, 624
Hydrochlorothiazide (Hydrodiuril), 609, 751a
Hydrocortisone and atrial fibrillation, 541
before platelet transfusions, 369
for attenuation of protamine reactions, 211
for treatment of adrenal insufficiency, 628
Hydrodriuril (hydrochlorothiazide), 609, 751a
Hydomorphine (Dilaudid), 743a, 747a
Hydrogen ion acidosis, and cardiac arrest, 508t
Hyperadenergic state, 538
Hyperammonemia, 704
Hyperamylasemia, 704
Hyperbilirubinemia, 702–703
Hypercalcemia, and digoxin toxicity, 563–564
Hypercapnea (see hypercarbia)
Hypercarbia and acute respiratory insufficiency, 406
and arrhythmias, 529
and cardiac arrest, 507
and chronic respiratory insufficiency, 414–415
and hypertension, 495
and low cardiac output syndrome, 446
and mitral valve surgery, 189–190
and PA pressures, 395
and sinus tachycardia, 535
from sedation, 189–190
manifestations of, 395
treatment of, 395
Hypercatabolism, and elevation in BUN, 605
Hypercholesterolemia, 3
Hyperdynamic left ventricle, 318, 325, 495
Hyperglycemia, 143, 312, 624–627, 665
and CPB, 147, 207, 241t, 246, 399, 598, and excessive urine output, 316
and neurocognitive dysfunction, 625, 690
and nosocomial infections, 674
and renal failure, 610
and sternal wound infections, 677
and stroke, 686
diabetic ketoacidosis, 620–621, 626
etiology of, 624
hyperosmolar hyperglycemic, nonketotic coma, 626
insulin preparations for, 626t
manifestations of, 624–625
protocol for, 399, 738a
treatment of, 625, 626t, 665
Hyperkalemia, 615–617
and adrenal insufficiency, 628
and arrhythmias, 529, 616
and cardiac arrest, 507, 508t
and dialysis, 611–612, 611t
and metabolic acidosis, 615, 620
and renal failure, 594, 597, 665
calcium chloride for, 616
calcium gluconate for, 616, 616t
diuretics for, 616t, 617
during CPB, 246, 316
ECG changes of, 616
etiology of, 615
manifestations of, 615–616
treatment of, 616–617, 616t
Hyperlipidemia, and pulmonary embolism, 655
Hypermagnesemia, 414
Hypernatremia and diabetes insipidus, 628
and hyperglycemia, 626
from sodium bicarbonate, 621
Hyperosmolar, hyperglycemia, nonketotic coma, 620
Hyperphosphatemia, 597
Hypersplenism, and thrombocytopenia, 350
Hypertension, pulmonary, 318 (see also right ventricular failure)
etiology of, 452–453
treatment of, 453–457
Hypertension, systemic, 495–496, 658
  after aortic valve replacement, 325
  and operative risk assessment, 158t
  and risk of stroke, 683
  assessment of, 495
  during CPB, 205
  etiology of, 495
  hypothermia with, 312–313, 495
  inotropes and, 495
  medications for, 496–506, 497t, 500t
  on postoperative floor, 658
  treatment of, 495–496
Hyperthermia, and neurocognitive dysfunction, 246, 454t, 686, 690–691
Hypertonic saline, 588
Hypertrophic obstructive cardiomyopathy (HOCM), 41–43
  anesthetic considerations in, 189
  indications for surgery in, 41–42
  pathophysiology of, 41
  surgical procedures for, 42f, 43, 58
Hypocalcemia, 414, 618–619
  during cardiac arrest, 512
Hypocarbia, 393–394
Hypochloremia, and metabolic alkalosis, 622–624
Hypoglycemia, 495, 626–627
Hypoglycemia drugs (see oral hypoglycemics)
Hypokalemia, 617–618
  and arrhythmias, 529, 538, 618
  and cardiac arrest, 507, 508t
  and digoxin toxicity, 563–564
  and metabolic alkalosis, 617, 623
  and renal failure, 414, 597, 610
  etiology of, 617
  manifestations of, 617–618
  postoperative treatment of, 618
Hypomagnesemia, 414, 618–619
  and arrhythmias, 529, 538
  and coronary vasospasm, 516, 619
  and digoxin toxicity, 563
  and renal failure, 597
  and respiratory failure, 414
  treatment of, 619
  with hypocalcemia, 618
Hyponatremia, 65, 583
  and renal failure, 594, 597, 610
  from adrenal insufficiency, 628
Hypoperfusion, and renal failure, 603–604
Hypophosphatemia, 414
Hypophysectomy, 628
Hypotension (see also low cardiac output syndrome/vasodilation)
  causes of, on postoperative floor, 658–659
  during CPB, 204t, 205, 242–243
  emergency treatment of, 282
  renal dysfunction and, 595t
  vasodilation and, 313–315
Hypothermia
  adverse effects of, 305
  after CPB, 305–307
  and activated clotting time, 200
  and aortic aneurysms, 192
  and arrhythmias, 529
  and cardiac arrest, 508t
  and coronary vasospasm, 516
  and hypertension, 312–323, 495
  and myocardial protection, 268–270
  and oxygen-hemoglobin dissociation curve, 391, 391f
  and renal function, 584–585
  and respiratory alkalosis, 389
  and rewarming from, 305–307, 307f
  and ventilator settings, 389
  during CPB, 205, 244–245, 584–585
  effect of, on coagulation cascade, 363
  in the ICU, 305–307
  metabolic acidosis from, 619
  OPCAB and, 214
  phrenic nerve injury from, 414, 654
  shivering from, 305
  vasoconstriction from, 312–313
Hypothermic circulatory arrest (see circulatory arrest)
Hypothermic fibrillatory arrest, 266, 266t
Hypothyroidism, 627
  and central respiratory drive, 414, 416
Hypoxemia (see also acute respiratory insufficiency)
  and acute respiratory insufficiency, 405–406
  and arrhythmias, 529, 535, 538
  and cardiac arrest, 507, 508t
  and chronic respiratory insufficiency, 413
  and hypertension, 407, 495
  and low cardiac output syndrome, 446, 453
  and mitral valve surgery, 189–190
  and pulmonary vascular resistance, 453
  and sinus tachycardia, 535
  management of, 407–418
Hypoxia (see hypoxemia)
Hypoxic vasoconstriction, 407, 416, 455, 498
IABP (see intra-aortic balloon counterpulsation)
Ibuprofen, for postpericardiotomy syndrome, 663, 747a
Ibutilide
dosage of, 542t, 546, 560
drug profile of, 560–561
electrophysiologic classification of, 554
for atrial fibrillation, 530t, 542t, 543f, 546
ICD (see implantable-cardioverter defibrillator)
Iced saline slush, and phrenic nerve paresis, 387, 414, 654
ICU flowsheet, 737a
Idiopathic thrombocytopenic purpura (ITP), 158t, 350
Ileus, postoperative, 584, 627, 697–698
Iloprost
during mitral valve surgery, 189
for CPB with HIT, 204
for RV failure/pulmonary hypertension, 328, 454t, 456
with RVADs, 482
IMA (see internal thoracic artery)
Imdur (isosorbide dinitrate), 11, 287t, 322, 517, 649t, 735a, 748a
Immunoglobulins, 494
Impact tube feedings, 706
Impella devices, 485, 487f, 488
Implantable cardioverter-defibrillators
and MRI scanning, 120
anesthetic considerations in, 193
for end-stage heart failure, 62
for HOCM, 41
for postoperative ventricular tachycardia, 58–59, 320, 512, 553, 657
indications for, 58–59, 62, 90, 320
postoperative considerations for, 335
preoperative considerations for, 59, 91
procedures for, 59–60, 60f
IMV (see intermittent mandatory ventilation)
Inadequate venous drainage, 247t, 248
Inamrinone (see also milrinone)
and thrombocytopenia, 463, 470
comparison with dobutamine, 462
dosage of, 460t, 463
hemodynamics of, 462, 469t
for inotropic support, 448t
for protamine reaction, 211
for right ventricular failure, 454, 454t, 462
Inapsine (droperidol), 744a
Incentive spirometer, 284t, 403t, 404, 434a, 648t, 653, 730a, 734a
Incomplete revascularization, 513
Index of transmission, 410
Indium-111 leukocyte scanning, 679
Indomethacin, for postoperative analgesia, 310, 390
Infections, after open-heart surgery (see also specific site)
leg wounds, 681–682
nosocomial, 674–676
radial artery site, 682
risk model for, 675f
sepsis, 676
sternal wound, 677–681
Inferior vena cava
cannulation of, 238, 239f
filter, 656
Informed consent, 155, 176
Inhalational anesthetics, and early extubation, 194–196
Inhaled nitric oxide (see nitric oxide)
Inocor (see inamrinone)
Inotropic drugs, 457–472
after CABG, 319
after CPB, 245
after mitral valve surgery, 328–329
and diastolic dysfunction, 318
dosages of, 460t
during OPCAB, 215
for acute mitral regurgitation, 34–35
for right ventricular dysfunction, 317–318, 454–455, 454t
hemodynamic effects of, 459t
mechanism of action of, 458
medications, 458–468
selection of, 468–470
weaning of, 470–472
INR (see international normalized ratio)
Inspiratory plateau pressure (IPP), 420
Inspra (epleronone), 61, 624
Insulin
and CPB, 207, 245, 399
for hyperglycemia, 625–626
for hyperkalemia, 616t, 617
for myocardial protection, 272
hyperglycemia protocol for, 738a
in cardioplegia solutions, 268t, 271
NPH and protamine reactions, 143, 210
preoperative dosing of, 151, 176
preparations, 626t, 736a
resistance to, 624, 665
sliding scale, 650t, 736a
Integucel, 677
Integrilin (see tirofiban)
Intensive care unit
admission to, 281–283, 283t
common scenarios in, 312–318
early care in, 303–335
fast-track protocol, 304t
flowsheet for, 737a
mediastinal bleeding in, 308, 347–375
monitoring in, 287–296, 288f, 294f–295f
order sheet for, 284t–287t, 731a–733a
removing lines in, 296–297, 647
transfer orders from, 648t–650t, 734a–736a
Intercostal analgesia, 331
Interleukin-18 (IL-18), 584, 602
Intermittent hemodialysis (see hemodialysis)
Intermittent ischemic arrest, 266t, 267
Intermittent mandatory ventilation (IMV), 288t, 388, 388t, 419–420
Intermittent pneumatic compression devices, 405, 655–656
Intermittent positive pressure breathing (IPPB), 404
Internal cardiac massage, 374, 506, 509
Internal cardioversion, 547
Internal mammary artery (see internal thoracic artery)
International normalized ratio (INR)
after valve surgery, 326–327, 330–331, 669–671, 670t
and argatroban, 668
and hepatic dysfunction, 703–704
and tricuspid valve disease, 37
and vitamin K, 137–138, 351, 672–673, 673f, 741a
during pregnancy, 707
management of high, 671–672, 672f, 741a
postoperative, 357t, 358–359, 363t, 364, 365f, 370
preoperative, 139, 151, 351
Internal thoracic artery (ITA)
and alpha-agents, 465
and brachial plexus injury, 692
and diabetes, 143, 349t, 677–678
and freedom from reoperation, 10
and phrenic nerve injury, 143, 386–387
and pulmonary dysfunction, 386
and sternal wound infections, 677–678
and subclavian stenosis, 146
and ventilator settings, 394
angiogram to assess location of, 106f
chest x-ray to assess location of, 89, 148
for coronary artery disease, 5, 10, 11f, 12–13, 12f
-pulmonary artery fistula, 660
International Registry of Acute Aortic Dissection (IRAD), 43, 45, 48
Interstitial nephritis, 595t
Intestinal angiodysplasia, 701
Intestinal pseudo-obstruction, 698
Intra-aortic balloon counterpulsation, 472–478
and abdominal pain, 476
and aortic dissections, 472, 476
and aortic regurgitation, 28, 472
and atheryoembolism, 476
and heparin, 351
and heparin resistance, 201
and hyperkalemia, 615
and renal failure, 595t
and thrombocytopenia, 476, 666
and vascular disease, 146, 472
complications of, 475–476
contraindications to, 472
during OPCAB, 187–188, 215
ECMO with, 484
following cardiac arrest, 512
for acute mitral regurgitation, 35, 472
for acute VSD, 16, 188, 472
for cardiogenic shock, 188, 472
for low cardiac output states, 209, 215, 311, 316, 319, 448t, 449, 452, 469, 472
for myocardial ischemia/infarction, 90, 136, 320, 472, 515, 659
for right ventricular failure, 454, 454t, 472
indications for, 472
principles of, 473, 473f
removal of, 477–478, 477f
techniques for insertion of, 473–474
timing of, 474, 474f, 475f
weaning of, 474–475f
Intracoronary shunting, 11, 214–215, 265, 266t
Intrahepatic cholestasis, 703
Intravascular ultrasound (IVUS), 106, 107f
Intravenous drug abuse, and endocarditis, 36, 39–41
INVOS Somanetics (see cerebral oximetry)
Ipratropium (Atrovent), 427–428, 653
IRAD (see International Registry of Acute Aortic Dissection)
Irbesartan (Avapro), 750a
Iron therapy, 149, 665
Ischemia
from IABP, 476
mesenteric (see mesenteric ischemia)
myocardial (see myocardial ischemia)

Ischemic
bowel/colitis, 697, 701 (see also mesenteric ischemia)
cardiomyopathy, 13, 15, 60–62
leg, 216, 237, 693
mitral regurgitation, 33
optic neuropathy, 9, 244, 685
postconditioning, 267
preconditioning, 266t, 267
pulmonary edema, 7
reperfusion injury, 229, 444
ventricular tachycardia, 56–59, 551–552

Ismo (isosorbide mononitrate), 287t, 748a
Isosorbide dinitrate (Isordil), 748a
Isosorbide mononitrate, for coronary spasm, 517, 748a
Isosource, 706
ITA (see internal thoracic artery)

Lasix (see furosemide)
LDH (lactate dehydrogenase), 703, 708
LDL cholesterol, 3
Left anterior descending (LAD) artery, 6f–7f, 8, 102f–103f, 105f
Left atrial lines, 293–294
after mitral valve surgery, 329
removal of, 294, 297
Left atrial pressure (see also pulmonary capillary wedge pressure)
after mitral valve surgery, 329
and mitral stenosis, 189
and PEEP, 410
and preload, 439
Left atrial reduction procedure, 328
Left bundle branch block
after aortic valve surgery, 532
and insertion of Swan-Ganz catheter, 90, 149, 178, 180, 292
and permanent pacemakers, 528
and perioperative ischemia/infarction, 90, 515
postoperative, 322, 532
Left heart bypass, 53, 192, 252, 253f
Left heart catheterization, 95, 96t, 97f, 98f
Left internal thoracic artery (see internal thoracic artery)
Left main disease, 6f–7f, 8, 105f, 107
Left ventricular dysfunction (see low cardiac output syndrome)
function, hyperdynamic, 318, 495
function after mitral valve surgery, 328–329
end-diastolic dimension, 27, 62
end-diastolic pressure (LVEDP), 439, 444
and aortic stenosis, 18
and endocarditis, 39
at catheterization, 95, 97t
basic concepts of, 44, 439
end-diastolic volume (LVEDV)
and aortic regurgitation, 328
and diastolic dysfunction, 317
and mitral valve disease, 33, 327, 329
and preload, 439–440
and surgical ventricular restoration, 16, 62
end-systolic dimension
and aortic regurgitation, 27
and mitral regurgitation, 34
end-systolic volume (ESV), 62, 439
hypertrophy, 18, 315
myotomy-myectomy, 42f, 43
outflow tract obstruction, 41–42, 329, 446
rupture, 13, 330
stroke work index, 441t
Left ventricular aneurysm, 13–16
and coronary artery disease, 13, 16
and ventricular tachycardia, 13
anesthetic considerations in, 188
indications for surgery for, 13
pathophysiology of, 13
postoperative considerations in, 335
preoperative considerations in, 13–14
surgical procedures for, 14–16, 14f–15f
Left ventricular assist devices, 478–481
anticoagulation for, 480
cannulation for, 479, 480f
complications of, 493–494
contraindications to, 479
devices for, 484–492, 486f–487f, 489f–493f
indications for, 479, 479t
management of, 479–481
principles of, 478
results of, 481
weaning from, 480–481
Left ventriculogram, 33, 98f, 99f
Leg wound infections, 681–682
Lepirudin
for CPB with HIT, 202, 203t, 242
for postoperative HIT, 668
Lescol (fluvastatin), 750a
Leukocyte filters, during CPB, 229, 309, 398, 596t
Leukocyte depletion/reduction, 367–368, 398, 597
Levalbuterol (Xopenex), 428, 650t, 653, 736a
Levitrion (Centrimag), 486
Levosimendan
comparison with dobutamine and milrinone, 468
dosage of, 469
for right ventricular failure, 455
hemodynamics of, 467
indications for, 467–468
Levothyroxine, for treatment of hypothyroidism, 627
Librium (chlordiazepoxide), 689, 751a
Lidocaine
after CABG, 207, 286t, 319, 732a
after endocardial resection, 335
dosage of, 286t, 557, 732a, 744a
drug profile of, 557
during OPCAB, 187, 214
electrophysiologic classification of, 554
for cardiac arrest, 507f, 510, 510t
for digoxin toxicity, 563–564
for PVCs, 530t, 550–551
for ventricular tachycardia, 530t
in cardioplegia solutions, 268, 271
via endotracheal tube, 510
Lipase levels, 704
Lipitor (atorvastatin), 11, 541a, 750a
Lisinopril (Zestril), 506, 649t, 735a, 749a
Liver failure, 141, 620, 702–703
Liver function tests
and statins, 141, 148
postoperative, 697–699, 702–703
preoperative, 132t, 141, 148, 148t, 730t
Logistic EUROSCORE, 157, 161t
Lone atrial fribillation, 54
Loop diuretics, 589–590, 622–623 (see also furosemide)
Lopressor (see metoprolol)
Lorazepam
and delirium, 410, 688
dosage of, 196t, 745a, 751a
for alcohol withdrawal, 689
for postoperative sedation, 398, 410
hemodynamics of, 195t
Losartan (Cozaar), 750a
Lovastatin (Mevacor), 750a
Lovenox (see low-molecular weight heparin)
Low cardiac output syndrome, 316–317, 444–457
after mitral valve surgery, 327–328
and gastrointestinal complications, 695
and hepatic dysfunction, 703
and hyperkalemia, 615
and mesenteric ischemia, 791
and metabolic acidosis, 619–620
and perioperative MI, 515
and renal dysfunction, 594, 595t, 600, 603, 607t
assessment of, 446–447
etiology of, 446
IABP for, 209, 215, 311, 316, 448t, 449, 452, 469, 472
management of, 445t, 448t, 447–457
Lower gastrointestinal bleeding, 701
Low-flow, low-gradient aortic stenosis, 19–20, 94–95
Low-molecular-weight heparin
and argatroban, 668
and perioperative bleeding, 349t, 350
and renal failure, 610
following valve surgery, 326–327, 331, 545, 670–671
for VTE prophylaxis, 284t, 405, 649t, 653, 656, 731a, 735a
preoperative discontinuation of, 9, 31, 134t, 137, 151, 153t, 176, 349t, 350–351
preoperative use of, 4, 9, 137, 351
reversal of effect with platelet factor 4, 212
Low tidal volume ventilation, 410, 420, 676
Lupus anticoagulant, 139
Lung function tests (see pulmonary function tests)
Lusitropic medications, 318, 325, 328, 457, 462
LVADs (see left ventricular assist devices)
Lymphocytosis, and postpericardiotomy syndrome, 663
MACE (major adverse cardiac events), 5
MADIT trial, 553
Magnesium sulfate
and response to epinephrine, 619
dosage of, 286t, 619, 733a
during cardiac arrest, 510t, 511
for coronary spasm, 517
during circulatory arrest, 192
during CPB, 245
during OPCAB, 187, 214
for diastolic dysfunction, 457
for hypomagnesemia, 619
for PACs, 530t, 537
for prevention of AF, 207, 286t, 304t, 320, 323, 540, 542t, 733a
for PVCs, 550
for torsades de pointes, 512, 554
for treatment of AF, 540–542t
in cardioplegia, 268, 268t, 271
Magnetic resonance angiography (see magnetic resonance imaging)
Magnetic resonance imaging (MRI)
diffusion-weighted, of brain, 683–686, 689–691
for assessment of myocardial viability, 95
for carotid disease, 123f, 685
of aortic dissection, 46, 121, 121f
of coronary artery disease, 115–116, 116f
of pericardial disease, 64
of thoracic aortic disease, 120–123, 121f–123f
of myxoma, 111f
Major adverse cardiac events (MACE), 5
Malignant
pericardial effusions, 63
ventricular arrhythmias, 13, 551–554
Malnutrition, and respiratory failure, 414
Malperfusion, and aortic dissections, 44–46, 48, 249, 332
Mannitol
during CPB, 245, 316
for cerebral edema, 628, 687
for oliguria, 609–610
for pituitary apoplexy, 628
for prevention of renal dysfunction, 334, 600
in cardioplegia, 267
Marcaine (bupivacaine), 308, 324, 389
Marfan syndrome, and thoracic aortic aneurysms, 27–28, 48–49, 52
Massage, cardiac, technique of internal, 374
anesthetic considerations in, 190
indications for, 149
left-sided, 55, 55f–56f
right-sided, 56, 57f
MDRD equation for GFR, 591
Mean arterial pressure (MAP), 441t
Mechanical valves
anticoagulation for, 326–327, 331, 670t, 671
in endocarditis, 40
Mechanical ventilators (see ventilators)
Mediastinal bleeding, 163, 308, 347–375
after OPCAB, 324, 347
after profound hypothermia and circulatory
arrest, 192
after minimally invasive surgery, 331
after pacemaker wire removal, 518, 527, 657, 660
and cardiac arrest, 507
and circulatory assist devices, 493
and gastrointestinal complications, 695
and sternal wound infection, 677, 680–681
and surgery for thoracic aneurysms, 192
assessment of, 356–362, 357t, 360f–362f
etiology of, 348–351, 349t
management of, 363–366, 363t, 365t
prevention of, 163, 351–356, 352t
resternotomy for, 373–375
risk factors for, 348–349, 349t
Mediastinal reexploration for bleeding, guidelines
for, 372
Mediastinal wound infection (see sternal wound
infection)
and circulatory assist devices, 493–494
perioperative risk of, 160t, 162t
tracheostomy and, 418
Mediastinitis (see sternal wound infection)
Medical history, 133–145
Medications, doses of, 743a–752a
Medium chain triglycerides, for chylothorax, 427
Medtronic 5388 pacemaker, 520f, 522–523
Medtronic 6500 pacing wires, 518, 518f, 527, 660
MELD score, 141–142
Melena, 700
Membrane oxygenator (see also ECMO)
and stroke, 686
and systemic inflammatory response, 229,
309, 398
Memory problems, 691
Meperidine, for shivering, 286t, 304t, 306, 364,
395, 496, 733a, 743a
Mesenteric arteriography, 697, 701–702
Mesenteric ischemia, 697, 701–702
and aortic dissection, 44–45
and GI bleeding, 701
and hyperkalemia, 615
and metabolic acidosis, 619, 621
and paralytic ileus, 698, 791
and postoperative abdominal pain, 697, 701
Metabolic acidosis, 619–622
adverse effects of, 620–621
and arrhythmias, 529
and cardiac arrest, 507, 508t, 512
and compensatory respiratory alkalosis, 652
and dialysis, 611
and hyperglycemia, 620
and hyperkalemia, 615, 620
and hypertension, 495
and low cardiac output syndrome, 445–446, 453, 619
and pulmonary vascular resistance, 620
and renal failure, 594, 597, 610, 620
during CPB, 241t, 245
etiology of, 619–620
from epinephrine, 458, 619, 621
from mesenteric ischemia, 620, 701
from nitroprusside, 498
lactic, 245, 444, 619–621, 704
treatment of, 621–622
Metabolic alkalosis, 622–624
adverse effects of, 623
and central respiratory drive, 416
and hypokalemia, 617, 623
contraction, 623
etiology of, 622
treatment of, 623–624
Metamucil, 696
Metformin (Glucophage), 108, 144, 595,
595t–596t, 749a
Methemoglobinemia, 392
and cyanide toxicity, 498
and nitric oxide, 456
from nitroglycerin, 392, 470, 499
Methicillin-resistant Staphylococcus aureus
(see MRSA)
Methylene blue
for methemoglobinemia, 499
for protamine reactions, 211
for vasoplegia, 246, 248, 452
Methylprednisolone (Solumedrol)
during circulatory arrest, 52, 192, 251
for bronchospasm, 428
for cerebral protection, 192, 251
for laryngeal edema, 422
for prevention of AF, 541
in fast-track protocols, 304t
perioperative use of, 151, 198, 399
Metoclopramide
and paralytic ileus, 698
and torsades de pointes, 552
dosage of, 287t, 650t, 733a, 735a, 744a, 749a
for feeding tube placement, 705
in fast-track protocols, 304t, 696
to improve GI motility, 416, 696
Metolazone (Zaroxolyn), 608, 751a
Metoprolol (Lopressor) (see also beta-blockers) and aortic dissections, 45, 332
and bronchospasm, 428
dosage of, 286t, 503, 558, 733a, 735a, 748a
for CHF, 61
for hypertension, 503, 505
for prevention of AF, 286t, 304t, 320, 503, 538, 542t, 649t
for sinus tachycardia, 318, 536
for supraventricular tachycardia, 548
for treatment of AF, 542t, 543f, 544
postoperative, 318, 709

Metronidazole, for *Clostridium Difficile* colitis, 653, 701–702

Mevacor (lovastatin), 750a

Mexiletine, 554

Microaggregate blood filters, 367–371

Micromed Heart Assist 5, 63, 490, 491f

Micronase (glyburide), 749a

Microplegia systems, 232

Midador (Amiloride), 751a

Midazolam and vasodilation, 313
dosage of, 196t, 286t, 304t, 733a, 745a
during cardioversion, 193
hemodynamics of, 195t
for hypertension, 496
for postoperative sedation, 286t, 310, 364, 390, 395, 411f
preoperative use of, 176
use during surgery, 187, 194–195, 304t, 387

MIDCAB (see minimally invasive direct coronary artery bypass)
Midcavity obliteration, in aortic stenosis, 325
Midodrine, 613
Milk of magnesia, 650t, 696, 735a
Miniplegia, 267, 279
Minipress (prazosin), 750a
Mitral annular calcification, 89
Mitral commissurotomy, 31
Mitral insufficiency (see mitral regurgitation)
Mitral regurgitation, 33–35
acute, 8, 33–35, 472
and CABG, 34–35
and endocarditis, 33–35, 40
and HOCM, 41
and IABP, 35, 472
anesthetic considerations in, 190
chest x-ray of, 88f
chronic, 33
diagnosis of, 33–34
echocardiographic evaluation of, 33–34, 108, 108f–109f, 112f, 113t, 190
indications for surgery in, 34
ischemic, 33
left ventriculogram of, 99f
pathophysiology of, 33
postoperative, and shortness of breath, 652
Mitral regurgitation (Continued)
postoperative considerations in, 327–331
preoperative considerations in, 34–35
surgical procedures for, 35, 36f
Mitral stenosis, 29–31
anesthetic considerations in, 189
chest x-ray of, 88f
diagnosis of, 29–30, 29t
echocardiographic evaluation of, 29–30, 113t
Gorlin formula for, 30
hemodynamic tracing of, 98f
indications for surgery in, 30
mitral valvuloplasty for, 30
natural history of, 29
pathophysiology of, 29
postoperative considerations in, 327–331
preoperative considerations in, 30–31
surgical procedures for, 31, 32f
Mitral valve area, calculation of, 30
Mitral valve disease
endocarditis, 33–34, 40, 180f
imaging of, 108f–110f
valve repair for, 35, 36f
valve replacement for, 31, 32f, 35
Mitral valve exposure, and arrhythmias, 35, 329, 532
Mitral valve repair
and left ventricular aneurysm, 16
anticoagulation after, 330, 670t, 670–671
in end-stage CHP, 61
postoperative considerations after, 327–331
techniques of, 35, 36f
TEE during, 185
Mitral valve replacement
anticoagulation after, 330–331, 670–671,
670t
cannulation for, 238
for HOCM, 43
indications for, 31, 35
in mitral regurgitation, 35
in mitral stenosis, 31, 32f
myocardial protection for, 266
postoperative considerations after, 327–331
technique of, 32f
Mixed venous oxygen saturation, 176, 179,
290–291, 311–312, 322, 442–443
Mobitz type heart block, 533, 533f
Modification of diet in renal disease (MDRD) formula, 591
Modified barium swallow, 696
Modified reperfusion, 272
Modified ultrafiltration, 233
Monitoring techniques
in the ICU, 287–296, 288f, 294f–295f
in the operating room, 176–187
Monoclonal granulocyte antibody scintigraphy, 679
Monomorphic ventricular tachycardia, 551–553
Morbid obesity (see obesity)
Morbidity, predictors of, 157, 159, 160t, 163
Morphine sulfate
continuous infusion of, 304t, 310, 390, 399
dosage of, 286t, 733a, 735a, 743a
for epidural analgesia, 308, 324
for postoperative hypertension, 363, 496
for postoperative sedation/analgesia, 286t, 304t,
364, 390, 395, 399, 403t, 649t, 735a
reversal of effects with naloxone, 402
use during cardioversion, 193
via PCA pump, 304t, 310, 390, 405, 653
Mortality risks models, 157, 158t, 159f,
160t–161t
MRA (see magnetic resonance imaging)
MRI (see magnetic resonance imaging)
MRSA, 144, 155, 417, 674
Mucomyst (see N-acetylcysteine)
Multidetector row CT angiography (MDCTA), 112, 114f–115f, 115–116, 117f–120f,
118–119
Multisystem organ failure
and assist devices, 481
and critical illness polyneuropathy, 691
and sepsis, 676
and sternal wound infections, 681
from acute mitral regurgitation, 34–35
from transfusions, 367
from ventricular septal rupture, 16
Mupirocin (Bactroban), 153t, 155, 163, 287t, 649t,
675, 677, 730a, 733a, 735a
Muscle relaxants, 194–197, 195t, 196t
Musculoskeletal pain, 651
MUSST trial, 553
Myectomy, 42f, 43
Myocardial infarction
and arrhythmias, 514, 516, 529, 549
and cardiac arrest, 508t
and heart block, 514, 532
and hypomagnesemia, 619
and low cardiac output syndrome,
446, 515
and sinus tachycardia, 535
definitions of, 321–322, 514–515, 755a
diagnosis of, 320, 513–514
manifestations of, 515–516
mechanisms of, 513
mortality associated with, 162t
perioperative, 320–322, 321f, 513–516
predisposing factors to, 513
prognosis after, 516
Myocardial infarction, surgery for, 7
Myocardial ischemia
and arrhythmias, 514, 529, 549
and coronary spasm, 513, 516–517, 659
and low cardiac output syndrome, 446
and postoperative chest pain, 651
and postoperative shortness of breath, 652, 654
and sinus tachycardia, 535
ECG of, postoperative, 321f
intraoperative, 187, 197, 515
postoperative, 320, 659–660
use of IABP for, 312, 472
use of nitroglycerin for, 187, 197, 320, 499
Myocardial oxygen demand, 443–444, 449
and inotropic medications, 459t
and milrinone/inamrinone, 462
and myocardial protection, 267–268, 269f
and norepinephrine, 464
Myocardial perfusion imaging, 49, 91–92, 93f, 94–95
Myocardial pH, 269
Myocardial protection, 265–274 (see also cardioplegia)
Myocardial stunning, 319, 446, 512–513
Myosplint, 63
Myotomy-myectomy, 42f, 43
Myoview, 91
Myxedema, 64
Myxoma, imaging of, 111f
N-acetylcysteine
and cardiac catheterization, 108, 596, 596t
for renoprotection during surgery, 600
in cardioplegia solutions, 271–272
N-acetylprocainamide (NAPA), 556
N-3 fatty acids, 139, 350, 541
Na+-K+ exchange inhibitors, 268t, 271, 513
Nadolol, 150
Naloxone (Narcan), 402, 746a
Narcan (naloxone), 402, 746a
Narcotics (see specific drugs)
Nasogastric tubes, 296, 647, 695, 698, 700
NASPE code, 520, 521t
National Kidney Foundation, definition of renal failure, 591, 591t
Nausea, postoperative, 696
Near-infrared spectroscopy (see cerebral oximetry)
Needle aspiration, of sternal wound, 679
Negative inspiratory force, and extubation criteria, 402t
Neomycin, for liver failure, 704
Neostigmine, 698
Neo-Synephrine (see phenylephrine)
Nephropathy, contrast-induced, 595–596, 595t
Nepro, 706
Nesiritide
after aortic valve surgery, 325
dosage of, 286t, 455, 460t, 467, 599, 732a
during mitral valve surgery, 189
for diastolic dysfunction, 457
for low cardiac output, 318, 467
for oliguria/renal failure, 467, 607t, 609
for renal protection, 204t, 207, 304t, 334, 399, 596t, 598–599
for RV dysfunction, 318, 328, 454t, 455
hemodynamics of, 459t, 466
indications for, 467
Neurocognitive dysfunction, 625, 689–691
Neurohormonal activation, and CHF, 61
Neurologic complications, 682–694
Neurologic symptoms, preoperative, 143
Neuromuscular blockers, 194–197, 195t, 196t, 745a
Neurontin (gabapentin), 692, 752a
Neutrophil gelatinase-associated lipocalin (NGAL), 584, 602
Nevibolol (Bystolic), 750a
New York Heart Association functional classification, 133, 133t, 729a
NGAL (neutrophil gelatinase-associated lipocalin), 584, 602
Niacin (Niaspan), 750a
Niaspan (niacin), 750a
Nicardipine
after CABG, 319
comparison with clevidipine, 500
comparison with nitroprusside, 501
dosage of, 286t, 497t, 501, 517, 732a, 748a, 750a
for coronary spasm, 517
for postoperative hypertension, 286t, 304t, 363, 472, 496, 505, 658
hemodynamics of, 500t, 501
indications for, 501, 505
to prevent radial artery spasm, 322, 501, 517
Nicorandil, 268
Nifedipine

do dosage of, 748a
for coronary spasm, 447, 502, 517
for ECG changes, 320
for postoperative hypertension, 502
hemodynamic effects of, 500t, 502
Nimbex (cisatracurium), 195t, 196t, 197
Nipride (see nitroprusside)
Nitrates (see nitroglycerin)
Nitric oxide
and assist devices, 482
and vasoplegia, 452
during mitral valve surgery, 189
for RV failure/pulmonary hypertension, 318, 328, 454t, 455–457
Nitroglycerin
adverse effects of, 499
after CABG, 319–320
and heparin resistance, 201
and hypoxic vasoconstriction, 416
and methemoglobinemia, 392, 470, 499
do dosage of, 11, 286t, 322, 497t, 499, 732a–733a
for coronary vasospasm, 447, 499, 517, 733a
for myocardial ischemia, 9, 187, 197, 499, 515, 659
for postoperative ECG changes, 320, 515, 659
for protamine reactions, 211
for RV failure/pulmonary hypertension, 189, 327–328, 455–456, 499
for systemic hypertension, 448t, 496, 499, 505
hemodynamic effects of, 499
in aortic stenosis, 21
in coronary artery disease, 3–4, 9, 90
indications for, 320, 499, 505
intraoperative use of, 187, 197
to prevent radial artery spasm, 11, 287t, 322, 733a
with phenylephrine for preoperative ischemia, 465, 499
Nitropaste, 748a
Nitroprusside, 497–498
adverse effects of, 498, 620
after CABG, 319
and cardiac arrest, 508
and hypoxic pulmonary vasoconstriction, 407, 416, 455, 498
and metabolic acidosis, 498, 620
and renal function, 598
comparison with clevidipine, 500–501
comparison with nicardipine, 501
cyanide/thiocyanate toxicity from, 470, 498
do dosage of, 286t, 497t, 498, 732a
for aortic dissections, 45, 332
for postbypass hyperthermia, 307, 313
for postoperative hypertension, 286t, 304t, 313, 319, 363, 448t, 496–497, 505
for RV failure/pulmonary hypertension, 455
hemodynamic effects of, 497
indications for, 497–498, 505
use with norepinephrine, 458
weaning of, 472
Nitrous oxide, 189–190, 196
Nizatidine (Axid), 747a
Nodal bradycardia (see junctional rhythms)
Nomogram for body surface area, 756a
Noncardiogenic pulmonary edema, 386, 406, 413–414
Noninvasive positive-pressure ventilation, 404, 421
Nonischemic ventricular tachycardia, 57–58
Nonocclusive mesenteric ischemia, 701
Nonoliguric renal failure, 602
Nonparoxysmal AV junctional tachycardia, 530t, 548–549, 563
Nonpulsatile centrifugal pumps (see centrifugal pumps)
Nonpulsatile perfusion, and renal function, 584
Non-rebreather mask, 403–404
Non-ST segment elevation myocardial infarction, 3–4, 7, 107, 322, 669
Nonsteroidal anti-inflammatory drugs and hyperkalemia, 615
and renal dysfunction, 595t, 603, 605, 610
for pericardial effusion, 65
for postoperative pain, 310, 389, 399, 405
(see also ketorolac)
for postpericardiotomy syndrome, 427, 661–663
preoperative discontinuation of, 138–139
Nonthyroidal illness syndrome, 584, 627
Nonsustained ventricular tachycardia (NSVT), 320, 551, 553
Norcuron (vecuronium), 195t, 196t, 197, 745a
Norepinephrine
after AVR, 326
and aortic stenosis, 188
and renal function, 451, 464
and splanchnic perfusion, 451, 470
dosage of, 285t, 460t, 464, 732a
during CPB, 205, 243, 584, 598, 732a
for low cardiac output syndrome, 464
for protamine reactions, 211
hemodynamic effects of, 459r, 464
in vasodilated patients, 205, 208–209,
246, 285t, 315, 326, 448t, 451,
469, 589
indications for, 464, 469
levels, and CPB, 584
use with dobutamine, 464
use with milrinone/inamrinone, 458
use with sodium nitroprusside, 458
Normal saline, for expansion of intravascular
volume, 314, 586
Normal sinus rhythm, ECG of, 519f
Normodyne (see labetalol)
Normosol, 230
Norpace (disopyramide), 41, 554, 556–557
North American Society of Pacing and
Electrophysiology (NASPE), 520, 521t
Northern New England (NNE) risk analysis, 157,
160t, 677, 682
Norvasc (amlodipine)
dosage of, 11, 287t, 322, 649t, 733a, 735a
for hypertension, 502, 506, 648, 649t
for prevention of radial artery spasm, 11, 322,
502, 506, 648
Nosocomial infections, 674–676, 675f
Novasource renal, 706
Novolin insulin, 625, 626t, 736a
Novolog, 626t, 738a
NPH insulin, 626t
and protamine reactions, 143, 210
NSAIDs (see nonsteroidal anti-inflammatory
drugs)
Nuclear stress test, 91–95, 93f, 659
Nuromax (doxacurium), 195t–196t, 745a
Nutrition
and renal failure, 607t, 610–611
and respiratory failure, 415t, 416
and sepsis, 676
postoperative, 705–706
Obesity
and coronary artery disease, 3
and leg wound infections, 681
and operative risk assessment, 160t
and respiratory failure, 414
and sternal wound infections, 677
and venous thromboembolism, 655
Obstructive uropathy, 606
Occlusion blood pressure, 282, 289
Occult renal insufficiency, 591–292
Octreotide, 427, 701
Octylcyanoacrylate (Dermabond), 644t,
674, 678
Off-pump coronary artery bypass (OPCAB),
11–12, 12f, 265, 266t
and atrial fibrillation, 12, 537
and delirium, 687
and renal function, 12, 585, 596t, 597
and stroke, 12, 682, 685–686
anesthetic considerations during, 187–188,
212–215, 213t
cogulopathy after, 347
GI complications and, 695
hemodynamics during, 214–215
heparinization for, 200, 213–214, 241
hypercoagulability after, 135, 324
indications for, 12
liver disease and, 142
monitoring during, 187, 212–213
neurocognitive dysfunction and, 689
postoperative care after, 322–324
right heart bypass for, 252
temperature management during, 323
use of IABP during, 187–188, 215, 472
Ogilvie’s syndrome, 698
Olanzapine (Zyprexa), 688, 751a
Oliguria (see renal insufficiency)
Omega-3 fatty acids, 139, 350, 541, 706
Omentum, and sternal wound infection, 680
Omeprazole (Prilosec), 700, 748a
Ondansetron (Zofran)
and coronary vasospasm, 516
dosage of, 287t, 650t, 733a, 735a, 744a,
749a
for delirium, 689
for nausea, 696
use with amiodarone, 710
One-lung anesthesia
during minimally invasive surgery, 215–216
during thoracic aortic surgery, 52, 192
On-pump beating-heart surgery, 12, 265, 266t
On-Q, 310, 385, 389
OPCAB (see off-pump coronary artery bypass)
Open chest massage, technique of, 374
Open mitral commissurotomy, 31
Operative consent, 155
Operative morbidity, predictors of, 157, 159,
162–163
Operative mortality, risk models for, 157, 158t,
159f, 160t–161t
Ophthalmoplegia, 628
Optic neuropathy, 9, 244, 685
Optisol-AS, 368
Oral hypoglycemics, 143, 151, 176, 625, 627, 650a, 665, 736a, 749a
Order sheets
  postoperative ICU, 284t–287t, 731a–733a
  preoperative, 153t, 730a
  transfer from ICU, 648t–650t, 734a–736a
Osmotic diuresis, from hyperglycemia, 316, 624
Osteomyelitis, of sternum, 677–681
Over-anticogulation, algorithm for, 671, 673f, 741a
Overdrive atrial pacing
  for arrhythmias, 520, 523, 530t, 537, 543, 549–550
technique of, 523, 524f
Overdrive ventricular pacing, 520, 525, 553
Oxepa tube feeding, 706
Oximetry
cerebral, 176, 197, 206, 206f, 243, 251, 686, 691
pulse, 140, 281, 287, 289–290, 388t, 389, 392, 403t, 404
Oxycontin, 286t, 405, 650t, 733a, 735a, 747a
Oxy/hemoglobin dissociation curve, 367, 391–393, 391f, 623
Oxyvita, 588
Pacemakers, pacing, and pacemaker wires, 517–528
  atrial (see atrial pacing)
  atroventricular (see AV pacing)
after aortic valve surgery, 325
  after CABG, 319
  after Maze procedure, 330
  after MIDCAB, 324
  after mitral valve surgery, 329
  after OPCAB, 323
  after tricuspid valve surgery, 37
  and minimally invasive surgery, 331
  beta-blockers and, 528, 535, 544
  biventricular, 41, 319, 449, 520, 525
  bleeding after removal of, 518, 527, 657–658, 660
diagnostic use of, 518–519
dual chamber, 41
dual site atrial, 530t, 537, 540, 542t
during cardiac arrest, 507f, 511
during OPCAB, 214
epicardial, 296, 517–519, 518f, 522–527, 657–658
for heart block, 319, 326, 530t
for hemodynamic support, 448t, 449
identification codes for, 521t
indications for permanent, 528, 531
modes of, 522, 522t
MRI and, 120
nomenclature for, 521t, 522t
overdrive atrial pacing, 520, 523, 530t, 537, 543, 549–550
overdrive ventricular pacing, 520, 525, 553
paceport catheters, 179, 215–216, 324, 522, 527–528
permanent, 528, 531
pictures of, 518f, 520f
problems with, 526–527
rapid atrial (see overdrive atrial)
temporary pacing wires (see pacing wires, epicardial)
transesophageal atrial, 214, 528
transvenous, 40, 91, 191, 526–527
therapeutic use of, 311, 519–520
ventricular (see ventricular pacing)
Paceport catheters, 179, 215–216, 324, 522, 527–528
Packed red cells, 367–368 (see also transfusion)
Packing head in ice, 52, 191–192
PACs (see premature atrial complexes)
Pancuronium
  and sinus tachycardia, 535
dosage of, 196t, 745a
during surgery, 197
  for shivering, 364, 395
hemodynamics of, 195t
Pancreatitis, 697–698, 704–705
INDEX  803

Pantoprazole, 287t, 650t, 700, 704, 733a, 735a, 743a, 748a
PAPABEAR trial, 539
Papaverine, for mesenteric ischemia, 702
Papillary muscle rupture, 33, 35, 108f
Papilledema, 244
Paradoxical abdominal breathing, 407, 415
Paradoxical embolism, 67–68
Paralytic ileus, postoperative, 697–698
Paralytic drugs, 195t, 196–197, 196t, 745a
Paraplegia
  after CABG, 692
  after surgery for thoracic aneurysms, 51, 53, 192, 334
  and aortic dissections, 44, 48, 192, 332, 692
  and intraaortic balloon pump, 476, 692
  delayed, 334
Parasternal intercostal blocks, 310
Paravalvular leak
  and hemolysis, 708
  echo of, 186f, 209
Parenteral nutrition, 611, 622, 624, 698, 705–706
  and cholecystitis, 699
  and elevations in BUN, 605
  and hyperbilirubinemia, 703
  and hyperglycemia, 624
  and metabolic alkalosis, 622
  and renal failure, 611
Paroxetine (Paxil), 751a
Paroxysmal atrial fibrillation, 54
Paroxysmal atrial tachycardia, 547–548
Paroxysmal cold hemoglobinuria, 250
Paroxysmal supraventricular tachycardia, 523, 530t, 547–548, 548f, 563
Parsonnet score, 157, 158t, 159f
Partial thromboplastin time (PTT)
  and antiphospholipid syndrome, 13
  and postoperative coagulopathy, 212, 358, 364–365, 365f
  during pregnancy, 707
  preoperative test, 132t, 139, 147, 351, 358
Passive liver congestion, 37, 148, 191, 698, 703
PAT (paroxysmal atrial tachycardia), 547–548
Patent foramen ovale, 67–68
Patient-controlled analgesia (PCA), 304t, 310, 390, 405, 653
Patient history, 133–145
Patient-ventilator dysynchrony, 394, 401, 421
Pavulon (see pancuronium)
Paxil (paroxetine), 751a
PCA pump (see patient-controlled analgesia)
PCI (see percutaneous coronary intervention)
PCWP (see pulmonary capillary wedge pressure)
Peak expiratory flow rate, 386
Pectoralis muscle flaps, for sternal wound infection, 680
PEEP (see positive end-expiratory pressure)
Pentastarch, 357, 587
Pentobarbital, for cerebral protection, 192
Pepcid (famotidine), 747a
Pepic ulcer, postoperative, 697, 699
Percoct (oxycodone), 286t, 405, 650t, 733a, 735a, 747a
Percutaneous aortic valve (see transcatheter aortic valve implantation)
Percutaneous ASD closure, 68
Percutaneous balloon mitral valvuloplasty, 30
Percutaneous circulatory assist devices, 478, 484–486, 486f–487f
Percutaneous coronary intervention (PCI), 4, 5, 7–8, 10, 51, 90, 135–137, 321, 659
Percutaneous gastric feeding tube (PEG), 705
Percutaneous tracheostomy, 418
  technique of, 761a–763a
Perforated viscus, postoperative, 697
Perfusion records, 234f–235f
Perfusion-assisted direct coronary artery bypass (PADCAB), 252–253, 266t
Pericardial constriction (see constrictive pericarditis)
Pericardial disease, 63–66
  anesthetic considerations for, 193–194
  CT scans in, 64
  indications for surgery in, 64–65
  MRI in, 64
  pathophysiology of, 63–64
  preoperative considerations in, 65
  surgery for, 65–66, 66f
Pericardial effusions
  and atrial fibrillation, 537
  causes of, 63
  chest x-ray of, 88f
  echocardiogram of, 662f
  postoperative, 660
  preoperative considerations with, 65
Pericardial tamponade (see cardiac tamponade)
Pericardial valves, durability of, 708
Pericardial window, 65, 661
Pericardiectomy
  for constrictive pericarditis, 66, 663–664
  for delayed tamponade, 661
  for postpericardiectomy syndrome, 663
Pericardiocentesis
  anesthetic considerations for, 193
Pericardiocentesis (Continued)
for delayed tamponade, 661
for pericardial effusion, 65, 508t
for postpericardiotomy syndrome, 663
Pericarditis (see also constrictive pericarditis)
and atrial fibrillation, 538
from renal failure, 63
postoperative, 321, 321f, 651
Peridex rinse (see chlorhexidine)
Perioperative bleeding (see mediastinal bleeding)
Perioperative myocardial infarction (see myocardial infarction)
Peripheral vascular disease
and endovascular stents, 146
and femoral cannulation, 146, 237
and IABP, 146, 472
and operative risk, 146, 158t
and risk of stroke, 683
preoperative assessment of, 132t, 146, 158t
STS definition of, 753a
Peritoneal dialysis, 61
Permanent atrial fibrillation, 54
Permanent pacemakers (see pacemakers)
Permcaths, 612
Peroneal nerve palsy, 692–693
Persantine (see dipyridamole)
Persistent atrial fibrillation, 54
PET scanning, 92
Plexizumab, 272
PFO (patent foramen ovale), 67–68
PGE1 (prostaglandin), 456–457
pH
during CPB, 241t, 245
gastric, 700
hyperkalemia and, 615
myocardial, 269
-stat, 241t, 245
Pharyngeal dysfunction, 691, 696
Phentolamine, use with norepinephrine, 464
Phenylephrine (see also alpha-agents)
and coronary vasospasm, 465, 516
and renal failure, 451, 464
and splanchnic perfusion, 470
dosage of, 285t, 460t, 465, 732a
during CPB, 205, 243, 598
following AVR, 326
for myocardial ischemia, 465, 499
for protamine reactions, 211
hemodynamic effects of, 459, 464
in patients with aortic stenosis, 188
in vasodilated patients, 205, 208–209, 246, 285t, 315, 326, 448t, 451, 465, 589
indications for, 465, 468
norepinephrine and, 464–465
use with milrinone/inamrinone, 458, 462, 470–471
use with nitroglycerin, 465, 499
weaning of, 470–471
Phenytoin
electrophysiologic classification of, 554
for digoxin toxicity, 563–564
for nonparoxysmal AV junctional tachycardia, 530t, 549
for supraventricular tachycardia, 548
Phosphodiesterase inhibitors (see inamrinone, milrinone or sildenafil)
Phrenic nerve palsy (see diaphragmatic dysfunction)
Phrenic nerve stimulation, 655
Physical examination, 132t, 145–146
Physical therapy, 652
Pioglitazone (Actos), 749a
Pitressin (see vasopressin)
Pituitary apoplexy, 628
Plasma (see fresh frozen plasma)
Plasmalyte, 230
Plasmapheresis, intraoperative, 355
Plasmin, 353–354
Platelet aggregation testing (aggregometry)
for ASA/clopidogrel resistance, 5, 135, 351
for diagnosis of HIT, 147, 667
to assess postoperative bleeding, 357t
Platelet count (see also thrombocytopenia)
and heparin, 137
postoperative, 212, 357t, 358–359, 365, 365f
preoperative, 132t, 137, 147, 153t, 730a
Platelet dysfunction (see aspirin, clopidogrel, prasugrel)
Platelet factor 4, 212
Platelet gel, 678
Platelet pheresis, 355
Platelet transfusions
and antiplatelet drugs, 136, 369
and stroke, 369–370, 694
filters for, 369
postoperative, 212, 363t, 364–365, 365f, 369–370, 666
Platypnea-orthodeoxia syndrome, 67
Plavix (see clopidogrel)
Pleural effusions, 386, 426–427
Plication of diaphragm, 415–416, 655
PMEA coating, 230
Pneumatic compression devices (Venodyne), 403t, 405, 655–656
Pneumatosis intestinalis, 702
Pneumomediastinum, 410
Pneumonia
and blood transfusions, 674
and respiratory insufficiency, 407, 408t, 413–414, 415t, 416–417
and postoperative chest pain/shortness of breath, 651, 654
fever from, 652
ventilator-associated, 417, 674
Pneumothorax
and acute ventilatory insufficiency, 407, 651, 654
and arrhythmias, 529
from barotrauma, 410
cardiac arrest from, 507, 508t
from Swan-Ganz catheter insertion, 292
postoperative, 425–426, 651, 654
tension, 407, 426, 446, 453, 507, 508t, 535
Point-of-care testing, 245, 245f, 354
Polarized arrest, 268
Polymerase chain reaction testing, 155, 675
Polymerized hemoglobin preparations, 371
Polymorphic ventricular tachycardia, 540, 551–554
Polyneuropathy, critical illness, 414, 691–692
Porcelain aorta, 100f
Porcine valves, durability of, 708
Portal hypertension, 141
Positive emission tomography (PET), 92
Positive end-expiratory pressure (PEEP)
and hypocarbia, 394
and low cardiac output syndrome, 446
and pneumothorax, 410
and Swan-Ganz catheter readings, 410
auto-PEEP, 388, 408, 420, 427
beneficial effects of, 409
deleterious effects of, 409–410
during mechanical ventilation, 388, 388t, 394
for acute respiratory insufficiency, 408t, 409–410
for mediastinal bleeding, 363t, 364
for pulmonary artery rupture, 180, 293
weaning from, 400
Post-cardiac injury syndrome, 660
Post-extubation respiratory care, 403–405, 403t
Positive pressure ventilation (see ventilator support)
Postoperative bleeding (see mediastinal bleeding)
Postoperative care
after aortic valve surgery, 325–327
after CABG, 318–322
after mitral valve surgery, 327–331
after MIDCAB, 324–325
after minimally invasive surgery, 331–332
after OPCAB, 322–324
after repair of aortic dissection, 332–333
after thoracic aortic surgery, 333–334
basic features of, 303–312
cardiovascular management, 439–564, 657–664
common postoperative scenarios in, 312–318
fast-track protocols, 304t
laboratory tests for, 285a, 732a
mediastinal bleeding, 347–375
metabolic problems, 615–629
monitoring techniques, 287–296, 288f, 294f–295f
renal management, 583–615
respiratory management, 385–428, 653–656
routines, 647
orders for, 284t–287t, 648t–650t, 731a–736a
Postoperative orders
transfer, 648t–650t, 734a–736a
typical adult cardiac postoperative, 284t–287t, 731a–733a
Postpericardiotomy syndrome, 427, 652, 660–663
Posttransfusion hepatitis, 703
Potassium channel openers, 268
Potassium channel blockers, 547, 554, 559
Potassium chloride
dosages of, 650t, 736a
for cardioplegia, 267–268, 268t
for digoxin toxicity, 563
for hypokalemia, 508t, 618, 650t, 736a
for metabolic alkalosis, 623
for nonparoxysmal junctional tachycardia, 549
for PVCs, 530t, 550
for supraventricular tachycardias, 548
for torsades de pointes, 554
infusion rate of, 733a
Povidone-iodine wound irrigation, 680
Prasugrel
preoperative discontinuation of, 4, 9, 134t, 136, 150, 176, 349t, 350, 353
preoperative use of, 4, 9–10, 107, 136
Pravachol (pravastatin), 750a
Pravastatin (Pravachol), 750a
Prazosin (Minipress), 750a
Prealbumin, 706
Precedex (see dexametomidine)
Predictors
of operative morbidity, 157, 159, 162–163
of operative mortality, 156–157, 158t, 159f, 160t–161t
Prednisone
    for bronchospasm, 428
    for postpericardiotomy syndrome, 663
Pregnancy
    anticoagulation during, 707
    mitral valve procedures during, 31
Preload
    and aortic stenosis, 21, 188, 325
    and HOCM, 42, 189
    and low cardiac output syndrome, 447–449, 448t,
        453–454, 454f
    and mitral regurgitation, 33, 35, 189
    and mitral stenosis, 30–31, 189
    and pericardial effusions, 65, 193
    and vasoconstriction, 313
    and vasodilation, 314–315
    basic concepts of, 439–440
    excessive, 448–449
    manipulation of, 453–454, 588–589
Premature atrial complexes (PACs), 536–537
    ECG of, 537f
    from hypokalemia, 618
    treatment of, 523, 530t, 537, 540
Premature ventricular contractions (PVCs),
    549–551
    and digoxin toxicity, 563
    ECG of, 550f
    treatment of, 523, 550–551, 530t
Preoperative
    blood donation, 149–150
    blood setup guidelines, 152, 154t
    checklist, 154
    history, 133–145
    laboratory tests, 147–148, 153t, 730a
    medications, 150–152, 176
    order sheet, 153t, 730a
    physical examination, 132t, 145–146
    preparation, 131–155
Pressure-controlled ventilation, 420
Pressure-limited ventilation, 419–420
Pressure-support ventilation, 394, 420,
    424–425
Prevacid (lansoprazole), 700, 748a
Prilosec (omeprazole), 700, 748a
Primacor (see milrinone)
Procaridine
    dosage of, 555
    drug profile of, 555
    electrophysiologic classification of, 554
Procardia (see nifedipine)
Prochlorperazine (Compazine), 650t, 735a, 744a,
    749a
Procrit (erythropoietin), 61, 149, 352t, 666
Profamilne, 673, 673f, 741a
Profound hypothermia (see circulatory arrest)
Prolonged ventilation, 159, 162, 385, 396–398,
    397t, 405–406
Pronephel (see procanainamide)
Propafenone
    dosage of, 541, 557
    drug profile of, 557–558
    electrophysiologic classification of, 554
    for atrial fibrillation, 530t, 541, 542t, 543f, 546
Prophylactic antibiotics, 151–152, 153t, 154,
    674–675, 677 (see also cefazolin,
    vancomycin)
Prophylaxis for VTE, 137, 284t, 403t, 405, 649t,
    653, 655–656, 731a, 735a
Propofol
    and vasodilation, 313
    dosage of, 196t, 286t, 304t, 733a, 745a
    for anesthesia, 187, 189, 194, 195t, 196t, 387
    for cardioversion, 193
    for hypertension, 363, 496
    for postoperative sedation, 286t, 304t, 308–310,
        364, 388t, 389–390, 395, 399, 410, 411f
    hemodynamics of, 195t
Prostacyclins
    during mitral valve surgery, 189
    for CPB with HIT, 204
    for RV failure/pulmonary hypertension, 318,
        328, 454t, 456
Prostaglandin E1 (PGE1), 456–457
Prostate disease, 144
Prosthetic heart valves (see mechanical
    or tissue valves)
Prosthetic valve endocarditis, 21, 39–40, 708
Protamine, 208, 210–212
    adverse reactions to, 207, 210–211, 243, 246,
        446, 453
    and insulin, 143, 210
    and low-molecular-weight heparin, 137
    and NPH insulin, 154, 210
    excessive bleeding from, 349t, 350, 354, 363t,
        364–366, 365f
    for reversal of heparin, 210, 215, 246, 352t, 363t,
        365f, 366
    dosage of, 210, 354
    heparin-protamine titration test, 139, 200, 210,
        241, 246, 352t, 354
    with calcium chloride, 618
Protein C deficiency, 139, 668
Protein intake, 706
Protein S deficiency, 139
Prothrombin complex concentrate (Profilnine), 673, 673f, 741a
Prothrombin time (PT) and hepatic dysfunction, 704
postoperative, 212, 357f, 358, 364, 365t, 732a, 734a
preoperative, 132t, 147, 730a
Proton pump inhibitors, 144, 296, 415t, 417, 610, 676, 700–701, 704
Protonix (see pantoprazole)
Proventil (albuterol), 284t, 404, 411, 428, 616t, 617, 650t, 654, 731a, 736a
Prozac (fluoxetine), 751a
Pseudomonas aeruginosa, 417, 493
Pseudo-obstruction, of colon, 698
Psychiatric disorders, 691
Psychotherapy, 689
PT (see prothrombin time)
PTCA (percutaneous transluminal coronary angioplasty) (see percutaneous coronary intervention)
PTT (see partial thromboplastin time)
Pullback gradient, 19, 95, 97f
Pulmocare, 416
Pulmonary artery catheters (see Swan-Ganz catheters)
Pulmonary artery diastolic pressure (see preload)
Pulmonary artery perforation, 180, 292–293
Pulmonary autograft (Ross procedure), 21–22, 24f, 185
Pulmonary capillary wedge pressure (PCWP) (see also preload)
and calculation of PVR, 441t
and left ventricular aneurysms, 335
and low cardiac output, 447
at catheterization, 95, 96t–97t
basic concepts of, 439–440
during surgery, 177, 179f
to identify ischemia, 187, 197
to measure mitral valve area, 29–30
to measure PVR, 441t
to measure transpulmonary gradient, 440
measurement of, with use of PEEP, 410
Pulmonary complications, 425–428, 653–656
Pulmonary edema
and acute aortic regurgitation, 26
and acute mitral regurgitation, 33–35
and acute respiratory insufficiency, 406–407, 654
and ARDS, 413–414
and chronic respiratory insufficiency, 413–414
and ventricular septal rupture, 16
as indication for CABG, 7
during pericardiectomy, 194
from CPB, 386
from protamine reaction, 211
noncardiogenic, 386, 406, 413–414
Pulmonary embolism
and acute respiratory distress, 407
and cardiac arrest, 507, 508t
and RV failure, 453
embolectomy for, 656
from endocarditis, 37
postoperative, 651–652, 655–656
Pulmonary embolization for PA rupture, 180
Pulmonary function
extubation criteria and, 402t
optimization of, 140–141, 398–399
postoperative changes in, 386–387
testing, preoperative, 139–140, 753a
Pulmonary hypertension (see also pulmonary vascular resistance, right ventricular failure)
after mitral valve surgery, 318, 327–329, 452–457, 454t
and mitral valve disease, 29–31
and right ventricular failure, 453–457
and tricuspid valve disease, 191
and weaning from ventilator, 401
catastrophic, from protamine, 211, 453
management of, 454t, 454–457, 482, 499
Pulmonary infarction, from Swan-Ganz catheter, 292
Pulmonary toxicity from amiodarone, 141, 559
Pulmonary vascular resistance (see also pulmonary hypertension)
and acidosis, 454, 620
and acute respiratory failure, 409
and blood transfusions, 318, 387, 440
and mitral valve disease, 31, 189
and PEEP, 409
and protamine reactions, 210–211
and RV failure, 318
and tricuspid valve disease, 31, 37, 191
formula for, 441t
medications to reduce, 189, 318, 328, 454–457, 454t, 482
Pulmonary vasodilators
for RV failure/pulmonary hypertension, 189, 318, 328, 454–457, 454t, 482
use with RVADs, 482–483
Pulmonary vein isolation, 55, 190, 330
Pulsatile pumps, 488, 489f–490f, 490, 492, 492f
PulseCO, 213
Pulse oximetry, 140, 281, 287, 289–290, 388t, 389, 392, 403t, 404
Pulseless electrical activity (see cardiac arrest)
Pulsus paradoxus, 652, 661
PVD (see peripheral vascular disease)
PVR (see pulmonary vascular resistance)
Pyogenic pericarditis, 63, 66
Q waves, 90, 513–515
Quetiapine (Seroquel), 689, 751a
Quinidine, 554
QT prolongation
from 5-HT3 antagonists, 696
from amiodarone, 546, 559
from dofetilide, 547, 560
from dronedarone, 559
from ibutilide, 546, 561
from procainamide, 556
hypocalcemia and, 618
potassium chloride for, 554
torsades de pointes and, 551
Quinapril (Accupril), 749a
R2 external defibrillator pads, 197, 198t
Rabeprazole (Aciphex), 700
Racemic epinephrine, 428
Radial artery grafting
and alpha agents, 465
for CABG, 10–11, 322
infections after, 682
medications to prevent spasm with, 11, 322,
500–502
Radial nerve palsy, 692
Radiation pericarditis, 63, 65
Radiofrequency ablation
of atrial fibrillation, 51, 55, 190, 330
of ventricular tachycardia, 57
Radiography (see chest x-ray)
Radionuclide angiography, 92, 94
Ramipril (Alace), 506, 749a
Ramsey scale, 410, 411t
Ranitidine (Zantac) (see also H2 blockers)
and platelet reactions, 369
and protamine reactions, 211
dosage of, 743a, 747a
for GI bleeding, 700
Rapid atrial pacing
for atrial flutter, 520, 523, 524f, 530t, 542t, 543
for supraventricular tachycardia, 520, 547
technique of, 523, 524f
Rapid shallow breathing index, 400t, 423
Rapid ventricular pacing, for ventricular
tachycardia, 520, 525, 553
Recombinant activated protein C (Xigris), 676
Recombinant erythropoietin, 149, 352t, 666
Recombinant factor VIIa, 212, 352t, 363t, 366,
673, 673f, 741a
Recombinant hirudin (see lepirudin)
Recombinant platelet factor 4, 212
Rectus flap, for sternal wound infection, 680
Recurrent laryngeal nerve injury, 694
Recurrent myocardial ischemia, postoperative,
659–660
Red cells (see transfusions)
Red-neck syndrome, 154
Redon catheters, 680
Reentrant arrhythmias, 520
Reexplanation for bleeding, guidelines for, 371–373
Refludan (see lepirudin)
Regional cerebral oxygen saturation (see cerebral
oximetry)
Reglan (see metoclopramide)
REMATCH trial, 492
Remifentanil
dosage of, 196t, 304t
for early extubation, 187, 195, 308–309, 387
hemodynamics of, 195t
via PCA pump, 310, 390, 405
Removal of lines and tubes, 296–297, 647
Renal atheroembolism, 595t
Renal blood flow, 584
and dopamine, 590
and fenoldopam, 599
Renal dysfunction/failure (acute kidney injury),
590–615, 664
and alpha agents, 451, 464, 595t
and antifibrinolytics, 199, 308, 354, 597
and circulatory assist devices, 494
and CPB, 584–585
and delayed tamponade, 661
and hetastarch, 587
and hyperkalemia, 615
and low hematocrit, 244, 585
and metabolic acidosis, 594, 620
and OPCAB, 12, 585, 596t, 597
and operative risk, 591–594
and sternal wound infections, 677
and stroke, 683
and thoracic aortic surgery, 334
assessment of, 605–606, 605t
biomarkers for, 584, 602
chronic, 594
classification of, 594, 595t
definition of, 590–591, 601, 755a
dialysis for (see renal replacement therapy)
digoxin toxicity and, 562–563
drug modification in, 743a–752a
etiology of, 594, 595t, 603–604
management of, 606–615
medications to prevent, 108, 192, 204t, 207, 304t, 334, 399, 505, 596t, 598–600
mortality of, 591t, 592, 594
nutrition during, 607t, 610–611
occult, 591–592
oliguric, 600–602, 601t
patterns of, 604–605, 604f
postoperative, 600–615
preoperative, 590–594
prevention of, 159, 206, 590–600
renal replacement therapy for, 611–615, 611t
risk factors for, 593–594
risk models for, 592, 592f–594f
use of acetylcysteine and, 596, 596t
use of diuretics for, 607t, 608–609
use of dopamine and, 461, 609–610
use of fenoldopam for, 607t, 609
use of nesiritide for, 467, 607t, 609
VADs and, 494
Renal failure (see renal dysfunction/failure)
Renal management, routine, 586–590
Renal replacement therapy (RRT), 601–602, 611–615, 611t
continuous arteriovenous hemodialysis, 615
continuous venovenous hemodialysis, 611t, 613–615
for hyperkalemia, 611–612, 611t, 617
hemodialysis, 611t, 612–613
indications for, 611–612
in sepsis, 676
preoperative, 597, 612
Renal ultrasound, 606
Renin-aldosterone, 584
Renin inhibitors, 604
Reoperation for bleeding, guidelines for, 371–373
ReoPro (abciximab), 134t, 138, 151, 350, 353
Reperfusion injury (see ischemia/reperfusion injury)
Respirators (see ventilators)
Respiratory acidosis (see hypercarbia)
Respiratory alkalosis, 393–394
(see also hypocarbia)
Respiratory complications, postoperative, 425–428, 653–656
Respiratory failure/insufficiency
acute, 405–412 (see also acute respiratory failure)
and circulatory assist devices, 494
and nutrition, 415t, 416, 706
and operative risk, 139–140, 157, 162t
chronic, 413–418 (see also chronic respiratory failure)
risk model for, 397f
Respiratory management, postoperative, 385–428, 653–656
Respiratory mechanics, and extubation criteria, 402t
Respiratory quotient, 416
Rest-redistribution imaging, 94
Resternotomy, emergent, 373–375, 506, 507f, 509
Restoril (temazepam), 752a
Restriction, 64
Restrictive lung disease, and mechanical ventilation, 388
Resynchronization therapy, 62
Reticulocyte count, and hemolysis, 708
Retinol-binding protein, 597
Retrograde autologous priming (RAP), 242, 304t, 352t, 356, 398
Retrograde cardioplegia, 240f, 268–273, 270f, 304t
Retrograde cerebral (SVC) perfusion, 52, 192, 250, 252, 333
Retroperitoneal bleeding, 147, 697–698
Reversible neurologic deficits, 685
Rheumatic fever, and mitral stenosis, 29
Richmond agitation scale, 410, 412t
RIFLE criteria, 601–602, 601t
Right heart bypass, 12, 252 (see also right ventricular assist devices)
Right heart catheterization, 95, 96t
in pericarditis, 63, 663
Right heart failure (see right ventricular failure)
Right upper quadrant ultrasound, 699
Right ventricular assist devices, 481–482
 cannulation for, 480f, 482
 complications of, 493–494
 indications for, 454t, 457, 479t, 482
 management of, 482
 results of, 482
Right ventricular dysfunction (see right ventricular failure)
Right ventricular failure
after mitral valve surgery, 327–328
and hepatic dysfunction, 703
and low cardiac output syndrome, 317–318, 446, 452–457, 454t
and tricuspid regurgitation, 36–37, 703
from blood transfusions, 318, 387, 453
IABP for, 454, 454t, 472
Ringer’s lactate, 230, 314, 586, 588, 623
Risk assessment, 155–163
Risk models
  for infection, 675f
  for mortality, 157, 158t, 159f, 160t–161t
  for renal failure, 592f–594f
  for respiratory failure, 397f
Risperidone (Risperdal), 689, 751a
Robotic surgery, 13, 188
  anesthetic considerations in, 215–216
  postoperative care after, 331–332
Rocuronium, 195t–196t, 197, 745a
R-on-T phenomenon, 288
Root shot, 96, 99f
Rosiglitazone (Avandia), 749a
Ross procedure (pulmonary autograft), 21–22, 24f, 185
Rosuvastatin (Crestor), 750a
ROTEM (thromboelastometry), 359
Routine fluid management, postoperative, 586–590
rt-PA (see thrombolytic therapy)
Rupture of
  coronary sinus, 232, 249, 271
  left ventricle, 13
  pulmonary artery, 180, 292–293
RVAD (see right ventricular assist devices)
Salt-poor albumin, 588
Sandostatin (Octreotide), 427
Saphenous vein grafting
  antiplatelet therapy after, 322, 669
  for CABG, 10
  in diabetics, 143
  neuropathy after, 694
  preoperative evaluation for, 144, 146
Saphenous vein stripping, 144, 146
Sarns Delphin pump, 486
Schatzki’s ring, 181
Sciatic nerve palsy, 692–293
SCUF (slow continuous ultrafiltration), 611t, 613–615
Second degree heart block, 524, 528, 533–534, 533f
Sedation
  algorithm for, 411f
  during mechanical ventilation, 309–310, 389–390, 411f, 422
  during weaning from ventilator, 410, 415t, 416, 422
  for acute respiratory failure, 410, 411f
  for hypertension, 496
  medications for, in the ICU, 286t, 411f, 745a
Sedation
  for hypertension, 496
Seizures
  from lidocaine, 557, 689
  postoperative, 689
Select 3D cannula, 236f, 237t
Selective antegrade cerebral perfusion
  (see antegrade cerebral perfusion)
Selective brachiocephalic perfusion (see antegrade cerebral perfusion)
Selective decontamination of the gut, 417
Sepsis
  and acute abdomen, 697
  and cardiovascular instability, 446
  and circulatory assist devices, 695
  and critical illness polyneuropathy, 691
  and early extubation, 397t, 398
  and endocarditis, 27, 37, 39
  and hyperglycemia, 624
  and mesenteric ischemia, 701
  and metabolic acidosis, 620
  and paralytic ileus, 697
  and postoperative delirium, 688
  and postoperative fever, 652
  and postoperative shortness of breath, 652
  and renal failure, 545t, 676
  and respiratory insufficiency, 414
  and sinus tachycardia, 535
  and sternal wound infections, 676, 678
  and thrombocytopenia, 666
  management of, 676
Septal alcohol ablation, 42
Septal myectomy, 8, 42f, 43
Sequential compression devices, 405, 653, 655–656
Seroquel (quetiapine), 689, 751a
Serotonin release assay, 147, 201, 667
Sertraline (Zoloft), 751a
Serum albumin
  and cirrhosis, 141
  and serum osmolarity, 583–584
  and total calcium levels, 618
SESTAMIBI, 49, 94
Sevoflurane, 187, 195–196, 244, 309
Shivering
  and metabolic rate, 305
  medications to control, 304t, 306, 364, 395, 496
Shock liver, 703
Shortness of breath, differential diagnosis of, 651–652
Sick sinus syndrome, 90, 531, 657
Sildenafil, 454, 457, 482
SIMV (see synchronized intermittent mandatory ventilation)
Simvastatin (Zocor)
  and amiodarone, 559, 709
  and dronedarone, 559
dosage of, 287t, 559, 649t, 709, 735a, 750a
Sinus bradycardia, 529, 531
  and digoxin toxicity, 563
  ECG of, 531f
  pacing for, 523, 531
  treatment of, 523, 530t, 531
Sinus rhythm, ECG of, 519f
Sinus tachycardia, 535–537
  adverse effects of, 450–451
  ECG of, 536f
  etiology of, 515, 535
  treatment of, 530t, 536
Sinus tracts, 679–680
Sinusitis, 652
Skin preparation, preoperative, 153t, 155, 730a
Sliding plasties, 36f, 329
Slow continuous ultrafiltration (SCUF), 611t, 613–615
Slow junctional rhythm, atrial pacing for, 523
Small bowel obstruction, 697
Smoking
  and coronary artery disease, 3
  and extubation criteria, 398
  and surgical risk, 140, 653–654, 683
  preoperative evaluation of, 140
Smooth muscle myosin heavy chains, 44
Sniff test, for diaphragmatic motion, 416, 654
Society of Thoracic Surgeons
database, 131, 133t, 157, 677, 682
definition of myocardial infarction, 321–322, 514–515, 755a
guidelines
  for antibiotics, 152, 154, 674
  for antiplatelet therapy, 322, 669
risk models for
  infection, 675f
  prolonged ventilation, 397f
  renal failure, 594f
  specifications, 753a–755a
Socks, antiembolism (see T.E.D. stockings)
Sodium bicarbonate
dosage of, 622
during CPB, 245
during dialysis, 613–614
  for cardiac arrest, 508t, 512
  for cyanide toxicity from nitroprusside, 498
for hyperkalemia, 616t, 617
  for metabolic acidosis, 245, 621–622, 704
  for renoprotection during catheterization, 108, 595
  for renoprotection during surgery, 207, 399, 596t, 599
Sodium channel blockers, 547, 554, 559
Sodium-hydrogen exchange inhibitors, 268t, 271, 513
Sodium nitrite, for thiocyanate inhibitors, 498
Sodium nitroprusside (see nitroprusside)
Sodium polystyrene sulfonate (Kayexalate), 616t, 617
Sodium thiosulfate, for cyanide toxicity, 498
Soft-Flow cannula, 233, 236f, 237t, 249
Solumedrol (see methylprednisolone)
Somanetics (see cerebral oximetry)
Somatostatin, for GI bleeding, 700–701
Sonata (zalepon), 752a
Sonoclot analysis, 359, 361f
Sorbitol
  with kayexalate, for hyperkalemia, 616t, 617
  with lactulose, for hyperammonemia, 704
Sotalol
dosage of, 540, 542t, 560, 748a
  drug profile of, 560
  electrophysiologic classification of, 554
  for prevention of atrial fibrillation, 540, 542t
  for treatment of atrial fibrillation, 542t, 546
Spasm, coronary artery (see coronary vasospasm)
SPECT scanning, 91, 94–95, 691
Spinal cord ischemia
  and aortic dissections, 44, 48, 192, 332, 692
  and thoracic aortic surgery, 51, 53, 192, 334
Spironolactone (Aldactone), 61, 624, 751a
Splanchnic hypoperfusion
  and CPB, 243, 248, 695
  and GI complications, 694, 695, 699, 701
  and norepinephrine, 451, 470
  and phenylephrine, 470
  and vasopressin, 452, 470, 589
Splinting, 403
Spontaneous breathing trials, 401, 423
Square-root sign, in constrictive pericarditis, 63, 64f, 663
Stanford classification of aortic dissections, 43, 44f
Staphylococcus aureus, 678, 708
  and circulatory assist devices, 493
  endocarditis from, 39
  methicillin-resistant, 144, 155, 417, 674
Staphylococcus aureus (Continued)
mupirocin for, 153t, 155, 163, 287t, 649t, 675, 677, 730a, 733a, 735a
nosocomial, 674
Staphylococcus epidermidis, 39, 677, 708
Starling’s law, and fluids, 583–584
Starr-Edwards valve, and anticoagulation, 671
Statins
and amiodarone, 559, 709
and aortic stenosis, 18
and atrial fibrillation, 151, 541
and delirium, 151, 686
and elevated LFTs, 141, 703
and hepatic dysfunction, 141, 703
preoperative use of, 3, 4, 10, 151, 541
upon hospital discharge, 709
Stem cell transplantation, 63
STEMI, 3–4, 7, 16, 107, 138, 353, 513
Stent thrombosis, 5, 10, 352
Stentless valves, 21, 23f, 28
Stents (see percutaneous coronary intervention)
Stents, endovascular (see endovascular stents)
Sternal debridement, 680
Sternal talons, 374
Sternal wound infections, 677–681
and circulatory assist devices, 493
and hyperglycemia, 143, 625
and postoperative chest pain, 651
and tracheostomy, 418
evaluation of, 679
mortality associated with, 162t, 677, 681
presentation of, 678–679
prevention of, 163, 677–678
risk factors for, 677
treatment of, 679–681
Sternocutaneous fistula, 679
Sternotomy
emergency, 373–375
infection of (see sternal wound infection)
pulmonary function after, 386–387
Steroids (see also dexamethasone, methylprednisolone)
and elevations in BUN, 605
and protamine reactions, 211
and systemic inflammatory response, 229, 309
during circulatory arrest, 52, 192, 251
following stroke, 687
for air embolism, 250
for bronchospasm/COPD, 141, 411, 416
for delayed paraplegia, 334
for fast-track protocols, 304t, 399
for laryngeal edema, 422
for pericardial effusions, 663
for pituitary apoplexy, 628
for platelet transfusions, 369
for postpericardiotomy syndrome, 663
for prevention of AF, 541
for sepsis, 676
perioperative use of, 10, 151, 198
STICH trial, 16, 62
Stool softeners, 650t, 696, 736a
Stored blood, 368
Streptococcus viridans, 39, 708
Stress imaging (see also dobutamine)
postoperative, 651, 659
preoperative, 91, 92f
Stress tests, 91–92, 93f, 94–95
Stress ulcer prophylaxis, 415t, 417, 676, 695, 699–700, 704
Stridor, 422, 428
Stroke (see also neurologic complications), 682–694
and aortic dissection, 44
and chronic respiratory failure, 414
and circulatory assist devices, 494
and CPB, 244
and hematocrit on CPB, 685
and OPCAB, 682, 685–686
and operative risk assessment, 160t, 162
evaluation of, 686
mechanisms causing, 244, 684–685
preoperative, 143
presentation of, 685
prevention of, 685–686
prognosis after, 687
risk factors for, 682–684
treatment of, 687
Stroke volume, formula for, 441t
Stroke volume index, 441t, 450
STS (see Society of Thoracic Surgeons)
ST-segment elevation infarction (STEMI), 3–4, 7, 16, 107, 138, 353, 513
Stunned myocardium, 319, 446, 512–513
Subcutaneous emphysema, 295, 410, 426
Substance abuse
and delirium, 687
and endocarditis, 36, 39–41
preoperative risk with, 158t
Subxiphoid pericardial window, 65, 66f, 194, 508t, 661
Subxiphoid pericardiostomy, 65, 66f
Succinylcholine, 194
dosage of, 196t
hemodynamic effects of, 195t
Sucralfate (Carafate), 144, 286t, 296, 415t, 417, 676, 700, 733a, 747a
Suction embolectomy, for pulmonary embolism, 656
Sudan III staining, for triglycerides, 427
Sudden death
and aortic stenosis, 20
and HOCM, 41
and left ventricular aneurysms, 13
implantable cardioverter-defibrillator for, 58
Sufentanil, 309
dosage of, 196t
for anesthesia, 187, 195, 304t, 387
hemodynamics of, 195t
Superior vena cava (SVC)
cannulation of, 238, 239t
retrograde perfusion of, 52, 192, 250, 252, 333
Supracoronary grafting, 22, 51
Suprapubic tubes, 144
Supraventricular tachycardia, paroxysmal, 547–548
ECG of, 548f
from hypokalemia, 618
overdrive pacing of, 523, 530t, 547
Surgical anterior ventricular endocardial restoration (SAVER), 15–16, 15f, 62–63
Surgical ventricular restoration, 15–16, 15f, 62–63
Sustained ventricular tachycardia, 551–554
(see also cardiac arrest)
SVC (see superior vena cava)
SVG (see saphenous vein grafts)
Swallowing tests, 696
Swan-Ganz catheter, 176–180, 291–293
and continuous cardiac outputs, 176, 179, 179f, 213, 291
and diastolic dysfunction, 317
and left bundle branch block, 149, 180, 292
and low cardiac output syndrome, 316
and mixed venous oxygen saturation, 179, 290–291
and right heart catheterization, 95
and thrombocytopenia, 282
and tricuspid regurgitation, 177, 291, 293, 327, 443, 453
as cause of arrhythmias, 292, 529, 549
complications of, 292–293
during OPCAB, 213
during surgery for aortic dissections, 191
during surgery for left ventricular aneurysms, 188
during surgery of pericardium, 193
during tricuspid valve surgery, 190
during thoracic aortic surgery, 192
for detection of cardiac tamponade, 357, 372
for detection of myocardial ischemia, 187, 197
for diagnosis of ventricular septal rupture, 16
pacing catheters, 179, 215–216, 324, 522, 527–528
postoperative uses in ICU of, 208, 208t, 291–293, 408, 439–440, 607
pressure measurements during use of PEEP, 410
pulmonary artery rupture from, 180, 292–293
removal of, 296, 647
technique of insertion of, 178, 178f–179f
volumetric catheters, 180
Sweep rate, 232, 244
Sympathoadrenal axis, 584
Synchronized IMV (see synchronized intermittent mandatory ventilation)
Synchronized intermittent mandatory ventilation, 387, 401, 419, 422–424
Syncope
and aortic dissection, 44
and aortic stenosis, 18–19
SYNTAX score, 5, 8
Synthes titanium fixation plates, 374, 681
Synthroid (levothyroxine), 627
Systemic embolism (see air, fat, or gas embolism)
Systemic hypertension (see hypertension, systemic)
Systemic inflammatory response syndrome, 229, 244, 309, 312, 314–315, 385, 393, 398, 413, 584, 690
Systemic vascular resistance (see also alpha agents, and afterload, ACE inhibitors and ARBs, and vasodilators)
and CPB, 242–243
and hypothermia, 305
and perioperative MI, 515
and protamine reactions, 210–211
basic concepts of, 440
effect of anesthetic drugs on, 195t
formula for, 441t
manipulation of, 449–450
Systolic anterior motion (SAM)
and HOCM, 41–42
and mitral valve surgery, 114t, 186, 329
Systolic ejection period (SEP), 19
SaO2 (see arterial blood gases)
INDEX

T3 (see triiodothyronine)
Tachy-brady syndrome, 90, 528, 531, 657
Tachycardia (see specific tachycardia)
Tamponade (see cardiac tamponade)
Tandem Heart, 485–486, 486f
TAVI (see transcatheter aortic valve implantation)
Technetium sestamibi (Cardiolyte), 91
T.E.D. stockings, 284t, 403t, 405, 648t, 655–656, 731a, 734a
Tegretol (cabamazepine), 692, 752a
Tekturna (aliskiren), 604
Temazepam (Restoril), 752a
Temperature
afterdrop, 192, 205, 306
gradient during bypass, 246, 252
management systems, 188, 214, 306, 323, 334
Temperature probe Foley catheter, 296
Temporary transvenous pacing wires, 40, 91, 191, 526–527
Tenormin (atenolol), 428, 538, 558, 748a
Tension pneumothorax
and acute respiratory failure, 407, 426
and cardiac arrest, 507, 508t
and low cardiac output syndrome, 446, 453
and sinus tachycardia, 535
Tepid cardioplegia, 269–272
Terlipressin, 246
Terminal warm blood cardioplegia, 270, 273, 304t
Tetrastarch (Voluven), 357, 587–588
Tetrofosmin (Myoview), 91, 93f
TEVAR (see thoracic endovascular aortic repair)
Tezosentan, 457
Thallium, scanning, 49, 91–92, 94
THAM (trinemethamine)
for treatment of metabolic acidosis, 622, 704
in cardioplegia, 267, 268t
Theodur (theophylline), 752a
Theophylline (Theodur), 752a
Thermocardiac output, 177–180
and tricuspid regurgitation, 177, 291, 293, 327, 443, 453
Thermogard, 214, 323
Thiamine, 141, 689
Thiazides, 607t, 608–609, 623, 745a, 751a
Thiocyanate toxicity, from nitroprusside, 470, 498
Thiopental (see also barbiturates)
during circulatory arrest, 192
for induction, 194, 195t, 196t
Third degree (complete) heart block, 524, 528, 530t, 534–535, 534f
Third nerve palsy, 628
Thoracentesis
for pleural effusion, 416, 427
technique of, 758a
Thoracic aortic aneurysms, 48–53
anesthetic considerations for, 192–193
arch aneurysms, 49, 52, 53f, 192, 333–334
Crawford classification of, 51f
descending, 49, 52–53, 192–193, 334
imaging of, 116, 118–123, 117f–123f
indications for surgery in, 48–49
left heart bypass for, 53, 192, 252, 253f
Marfan syndrome and, 27–28, 48–49
pathophysiology of, 48
postoperative care for, 333–334
preoperative considerations in, 49, 51
size and risks of complications, 48–49,
49f–50f
surgical procedures for, 25f, 51–53, 53f
thoracoabdominal, 49, 52–53, 192–193, 334
Thoracic duct ligation, for chylothorax, 427
Thoracic endovascular aortic repair, 48, 53, 334
Thoracic epidural analgesia (see epidural analgesia)
Thoracoabdominal aneurysms (see thoracic aortic aneurysms)
Thoracostomy tubes (see chest tubes)
Thoratec HeartMate II, 63, 483, 488, 490, 490f
Thoratec HeartMate XVE, 481, 492, 493f, 494
Thoratec pneumatic VAD, 483, 488, 490, 492
Three-dimensional echocardiography
(see echocardiography)
Thrombate III (antithrombin III concentrate), 139, 201, 247, 354, 370
Thrombin time, 200, 241
Thrombocytopenia (see also platelet counts)
and inamrinone, 463, 470
and mediastinal bleeding, 349t, 350, 358–359, 365, 365f, 369–370
causes of, 666
from CPB, 350
from IABP, 476, 666
heparin-induced (see heparin-induced thrombocytopenia)
idiopathic thrombocytopenic purpura (ITP), 158t, 350
postoperative, 350, 365, 365f, 369, 666–669
preoperative, 349t, 350
thrombotic thrombocytopenic purpura (TTP), 666
use of platelets for, 212, 363t, 364–366, 365f, 369–370, 666
Thromboelastogram, 212, 357t, 359, 360f, 364 from prosthetic heart valves, 706–707
Thromboembolism (see also anticoagulation, venous thromboembolism) and left ventricular aneurysms, 13 and mitral stenosis, 30
from circulatory assist devices (VADs), 494
prophylaxis for VTE, 137, 284t, 403t, 405, 649t, 653, 655–656, 731a, 735a
Thrombolysis, and emergency heart surgery, 138, 151, 349t, 350, 353
Thrombosis, of heart valves, 96, 101f, 707
Thrombotic thrombocytopenic purpura, 666
Thromboxane, 133, 135, 211
Thyroid hormone (see triiodothyronine, thyroxine) Thyroid-stimulating hormone (TSH), 132t, 148
Thyroxine, for hypothyroidism, 627
Tibial nerve palsy, 692–693
Ticagrelor, 134t, 136, 150
Time-tension index, 473
Tirofiban (Aggrastat) and perioperative bleeding, 350
for acute coronary syndrome, 4
for CPB with HIT, 204
preoperative cessation of, 134t, 138, 176, 353
Tissue oxygenation, basic concepts of, 442–443
Tissue valves and endocarditis, 40
anticoagulation for, 326, 330–331, 669–670, 670t
durability of, 708
use of, 21–22, 23f, 37
Titanium sternal plates (Synthes), 374
Tobacco use (see smoking)
Toradol (see ketorolac)
Torsades de pointes, 512, 551–552, 554
ECG of, 553f
from disopyramide, 557
from droperidol, 552, 696
from haloperidol, 552
from ibutilide, 546
from metoclopramide, 552
from procaainamide, 556
from sotalol, 540, 560
treatment of, 554
Total artificial heart, 492
Total parenteral nutrition (see parenteral nutrition)
Totally endoscopic coronary artery bypass (TECAB), 13
T-piece weaning, 401, 422–423
Tracheostomy after thoracic aortic surgery, 334
and sternal wound infection, 418
indications for, 415t, 416–418
technique of percutaneous, 761a–763a
Tracrium (atracurium), 195t–196t, 197, 745a
TRALI (transfusion-related acute lung injury), 367, 387, 392, 399, 407, 414
Trandate (see labetalol)
Tranexamic acid, 199, 304t, 308, 352t, 354, 596t, 597
Transcatheter aortic valve implantation (TAVI), 25–26, 26f, 29
Transcatheter ablation of AF, 54
Transcatheter pulmonary embolization, 293
Transcutaneous pacing, 511, 527
Transcutaneous phrenic nerve stimulation, 655
Transdiaphragmatic pressures, 655
Transeosophageal atrial pacing, 214, 528
Transeosophageal echocardiography (see echocardiography)
Transfer order sheets, 648t–650t, 734a–736a
Transferrin, 706
Transfusion reactions, 367–369
Transfusion-related lung acute lung injury (TRALI), 367, 387, 392, 399, 407, 414
Transfusions and 2,3 DPG, 367, 391–392, 412, 442
autologous, 149–150
autotransfusion, 295–296, 356, 368–369
blood, 365–369, 448t, 452 (see also transfusion trigger)
blood substitutes, 371
calcium chloride for, 366
complications from, 367, 387, 674, 677, 684, 695, 699, 702–703
cryoprecipitate (see cryoprecipitate)
for anemia, 147, 150
fresh frozen plasma (see fresh frozen plasma)
nosocomial infections and, 674
of shed mediastinal blood, 368–369
platelet (see platelet transfusions)
preoperative, 8, 147
preoperative blood setup guidelines, 152, 154t
pulmonary dysfunction and, 387, 413
religions concerns about, 149
sternal wound infection and, 677
Transfusions (Continued)

  - intraoperative, 244, 678
  - postoperative, 150, 311–312, 348, 365, 367, 399, 408t, 412, 442, 448t, 452, 665, 678
  - preoperative, 352t, 398
- Transient ischemic attacks, 143, 685, 753a, 755a
- Transmyocardial revascularization (TMR), 13
- Transplantation
  - for end-stage heart failure, 63
  - stem cell, 63
- Transpulmonary gradient, 440
- Transseptal approach to mitral valve, 329, 532
- Transthoracic echocardiography (see echocardiography)
- Transvenous pacing wires, 40, 91, 191, 526–527
- Transverse arch aneurysms (see thoracic aortic aneurysms)
- Transverse titanium plates, 374, 681
- Triazolam (Halcion), 752a
- Tricuspid annuloplasty, 37, 38f
- Tricuspid commissurotomy, 37
- Tricuspid regurgitation
  - and chronic passive congestion, 37, 148, 191, 703
  - and Swan-Ganz catheters, 177, 291, 293, 327, 443, 453
- Tricuspid valve replacement, 37
- Tricuspid valve disease, 36–38
  - anesthesia for, 190–191
  - chest radiograph in, 88f
  - echocardiography in, 36
  - indications for surgery, 37
  - repair or replacement for, 37, 38f, 40
  - pacemaker after repair of, 38
- Trifurcation graft, 52, 53f, 251, 333
- Triglycerides, and chylothorax, 427
- Triglycerides, and diabetes, 385
- Triglycerides, and dyslipidemia, 385
- Triglycerides, and hypokalemia, 427
- Triglycerides, and hyperglycemia, 385
- Triglycerides, and hyperlipidemia, 385
- Triglycerides, and hypothyroidism, 427
- Triglycerides, and hypertriglyceridemia, 385
- Triglycerides, and obesity, 385
- Triglycerides, and pancreatitis, 427
- Triglycerides, and xanthomas, 385
- Triglycerides, and xanthomatosis, 385
- Triglycerides, and xanthomatous, 385
- Troponin I or T
  - postoperative, 320, 322, 514–515
  - preoperative, 4
- Tuberculous pericarditis, 63, 66
- Tubular casts, 605, 605t
- Turtle shell incision, 664
- Tylenol (see acetaminophen)
- Tylenol #3, 650t, 735a
- Type A dissections (see aortic dissections)
- Type B dissections (see aortic dissections)

U waves, and hypokalemia, 618
Ulcer disease, prophylactic medications for, 144, 700
Ultrasound
  - of abdomen, 697, 699, 705
  - of bladder, 605
  - of diaphragm, 655
- UniVent tubes, 180, 192, 215–216, 293
- Unstable angina (see acute coronary syndromes)
- Ultrafiltration
  - continuous arteriovenous hemofiltration (CAVH), 615
  - continuous venovenous hemofiltration (CVVH), 611t, 613–615, 614f
  - intraoperative (MUF), 233
  - slow continuous (SCUF), 611t, 613–615
- Ultrasound
  - of abdomen, 697, 699, 705
  - of bladder, 605
  - of diaphragm, 655
- Uremia (see also renal insufficiency)
  - and coagulopathy/platelet dysfunction, 349t, 350, 364
  - and encephalopathy, 611
  - and pericarditis, 64, 611
  - dialysis for (see renal replacement therapy)
Urinalysis
in renal dysfunction, 605t
preoperative, 132t, 148, 730a
Urinary (Foley) catheter, 144, 296–297, 606, 607t, 610
Urinary tract infection
nosocomial, 652, 674
preoperative, 144, 148
Urine osmolality, 605–606, 605t, 628
Urinary output (see also oliguria)
and RIFLE criteria, 601–602, 601t
Urine sodium, 605t, 606
Urologic symptoms, 144

V/Q mismatch (see ventilation/perfusion mismatch)
V/Q scanning (see ventilation/perfusion scanning)
Vacuum-assisted closure
(VAC dressing), 680–681
Vacuum-assisted drainage, 231, 250
VADS (see ventricular assist devices)
Vagal stimulation, for paroxysmal supraventricular tachycardia, 547
Valium (diazepam), 689
Valsartan (Diovan), 750a
Valve-associated issues, 706–708
Valve thrombosis, 101f, 703, 707
Vancocin (see vancomycin)
Vancomycin
dosage of, 153t, 154, 286t, 649t, 730a, 733a, 735a, 744a
for Clostridium Difficile colitis, 701–702
for endocarditis prophylaxis, 683t
paste, 678
prophylactic use of, 151–152, 153t, 154, 197, 674
red-neck syndrome from, 154
Varenicline (Chantix), 140, 398, 752a
Varicose veins, 132t, 146
Vasculath, 612
Vascular resistance
systemic (see systemic vascular resistance)
pulmonary (see pulmonary vascular resistance)
Vasectomy, and protamine reactions, 210
Vasoconstriction, management of,
312–313 (see also vasodilators)
and low cardiac output syndrome, 450
from hypothermia, 305
Vasoactive medications (see inotropic drugs)
Vasodilation, management of, 313–315
(see also alpha-agents, norepinephrine, phenylephrine, vasopressin)

Vasodilators, 496–506
basic concepts of, 496
dosages of, 497t
for aortic regurgitation, 27, 188
for low cardiac output syndrome, 312–313, 450
for mitral regurgitation, 34–35, 190
for radial artery grafts, 11, 322, 501–502
for RV failure/pulmonary hypertension, 189, 318, 328, 454–457, 454t
for systemic hypertension, 319, 496–506, 658
selection of, 505–506
weaning of, 471–472
Vasodilatory shock (see vasoplegia)
Vasoplegia (vasodilatory shock), 209, 246, 248, 314–315, 451, 494, 589

Vasopressin
and circulatory assist devices, 482, 494
and coronary spasm, 452
and renal function, 452
and splanchnic vasoconstriction, 452, 470, 589
dosage of, 286t, 315, 452, 510t, 732a
during CPB, 205, 243, 574, 589
for cardiac arrest, 507f, 510–511, 510t
for GI bleeding, 701
for refractory hypotension (vasoplegia), 191, 209, 209, 246, 248, 286t, 315, 448t, 451–452, 589, 732a

Vasopressors (see inotropic medications)
Vasospasm (see coronary vasospasm)
Vasotec (enalapril), 749a
VATS, for pericardial window, 65
Vaughan-Williams classification, 554
Vecuronium (Norcuron), 197
dosage during surgery, 196t, 745a
for postoperative shivering, 395
hemodynamics of, 195t
Vegetations, 108, 110, 110f
Vein stripings, 132t, 144
Venlafaxine (Effexor), 751a
Venodyne boots, 403t, 405, 655–656
Venous cannulation, 237t, 238, 239f–240f, 240
Venous drainage, pump-assisted, 231, 250
Venous oxygen saturation (see also mixed venous oxygen saturation)
during CPB, 205, 241t
during OPCAB, 214, 242–243
Venous thromboembolism (VTE), 655–656
prophylaxis for, 137, 284t, 403t, 405, 649t, 653, 655–656, 731a, 735a
treatment of, 656
Ventavis (see Iloprost)

Ventilation, mechanical
complications of, 394, 401, 408, 417, 420, 427–428, 677, 695–696, 699
dependence on, 413–418
extubation criteria, 402t
initial settings for, 388, 388t
methods of ventilatory support, 418–421
predictors of prolonged, 159, 162, 396–398, 397t, 405–406
weaning from, 400–403, 400t–402t, 421–425

Ventilator-associated pneumonia, 415t, 417, 676

Ventilation/perfusion scanning, for pulmonary embolism, 656

Ventilation/perfusion mismatch, 501 (see also hypoxic vasoconstriction)
after cardiac surgery, 386, 389
and nicardipine, 561
and nitroprusside, 498

Ventilator settings, routine postoperative, 388, 388t

Ventilators
pressure-limited, 419–420
volume-limited, 418–419

Ventilatory support (see also ventilation, mechanical)
methods of, 418–421
tracheostomy for, 417–418

Ventolin (albuterol), 284t, 404, 411, 428, 616t, 650t, 653, 731a, 736a

Ventricular arrhythmias, 549–554, 657 (see also ventricular tachycardia and fibrillation)
after CABG, 207, 320, 516
and cardiac arrest, 506–512, 507f
and CHF, 62
and circulatory assist devices, 494
and coronary spasm, 516
and HOCM, 41
and hypomagnesemia, 619
and left ventricular aneurysms, 13
and low cardiac output syndrome, 446
and pacing wires/pacemakers, 525
and perioperative MI, 514, 516
pathophysiology of, 549–554
postoperative, 549–554
preoperative, 90
treatment of, 552–554

Ventricular assist devices (see circulatory assist devices)

Ventricular ectopy (see premature ventricular contractions)

Ventricular fibrillation, 551–554 (see also cardiac arrest)
and cardiac arrest, 83, 506–510, 507f
and hyperkalemia, 616
and hypokalemia, 618
and hypothermia, 508t
and metabolic acidosis, 620
and pacemakers, 552
ECG of, 553f
induction of, during ICD implantation, 60, 193
postoperative, 530t, 551, 553–554

Ventricular overdrive pacing, for ventricular tachycardia, 520, 525, 553

Ventricular pacing, 525–526
ECG of, 525f
for sinus bradycardia, 531
for slow ventricular response to atrial fibrillation, 525, 530t
for torsades, 554
indications for, 525
nomenclature for, 522t
rapid, for ventricular tachycardia, 520, 525, 553

Ventricular septal defect (see ventricular septal rupture)

Ventricular septal rupture, 16–17
and assessment of operative risk, 156, 158t, 161t
anesthetic considerations in, 188
echocardiographic evaluation of, 16
indications for surgery with, 16
IABP for, 16, 188, 472
pathophysiology of, 16
preoperative considerations in, 16
recurrent, postoperative, 114t, 632
surgical procedures for, 8, 17, 17f

Ventricular tachycardia, 56–60, 551–554 (see also cardiac arrest)
after CABG, 320
and cardiac arrest, 506, 507f, 509–510
and digoxin toxicity, 563
and HOCM, 41
and LV aneurysms, 13
ECGs of, 552f
from antiarrhythmic drugs, 559–561
from hypokalemia, 618
ICD for, 58–59, 335, 553–554
indications for surgery for, 58–59
inducible, 57–58, 553
monomorphic, 551–553
nonsustained, 320, 551, 552f, 553
pacemakers and, 525, 527
pathophysiology of, 56–57
polymorphic, 551–554
postoperative, 551–554
preoperative, 90
pulseless (see cardiac arrest)
surgical procedures for, 59–60
sustained, 530t, 551–554, 552f
treatment of, 58–59, 552–554
Ventriculogram, 98f–99f
Verapamil, 502
and digoxin levels, 561–562
dofetilide with, 560
dosage of, 497t, 502, 561, 748a
for coronary/radial spasm, 322, 517
for HOCM, 41
for hypertension, 502, 506
for paroxysmal supraventricular tachycardia,
530t
hemodynamic effects of, 500t
Vernakalant, 547
Versed (see midazolam)
VF (see ventricular fibrillation)
Viability studies, 94–95
Vicodin (hydrocodone), 405, 546a, 733a,
735a, 747a
Video-assisted thoracoscopic procedures (VATS),
65
Vigileo FloTrac, 177, 180, 190, 213, 291, 293, 294f,
327, 408, 441, 453
Visual deficits, postoperative, 9, 244, 685
Vital capacity, during weaning from mechanical
ventilation, 402t
Vitamin C, 541
Vitamin E, 139, 350
Vitamin K
for overanticoagulation, 672–673, 673f, 741a
preoperative use of, 137–138, 151, 351
use with warfarin, 673, 707
Vocal cord paralysis, 694
Volume–limited ventilators, 418–419
Volumetric Swan–Ganz catheters, 180, 189, 327
Voluven (tetrastarch), 357, 587–588
Von Willebrand’s disease/factor, 138, 349t, 350,
587, 701
use of cryoprecipitate for, 370–371
use of DDAVP for, 366
VOO pacing, 525
VSD (see ventricular septal rupture)
VT (see ventricular tachycardia)
VTE (see venous thromboembolism)
VVI pacing, 522, 525 (see also ventricular pacing)
and triggering of ventricular tachycardia,
525, 527
definition of, 521t–522t
Waffle procedure, for constrictive pericarditis, 66,
664
Warfarin
after aortic valve surgery, 326–327, 669,
670t, 671
after Maze procedure, 330
after mitral valve surgery, 330–331, 670,
670t, 671
and amiodarone, 559
and argatroban, 668
and delayed tamponade, 660
and gastrointestinal bleeding, 699
and hepatic dysfunction, 704
and HIT, 668
and mediastinal bleeding, 350
and Vitamin K, 673, 707
during pregnancy, 707
drug interactions with, 742a
for atrial fibrillation, 542t, 543f, 545
for mechanical valves, 326–327, 331,
670t, 671
for mitral rings, 330, 670–671, 670t
for patent foramen ovale, 68
for pulmonary embolism, 656
for tissue valves, 326, 330–331, 669–670, 670t
postoperative use of, 287t, 647, 649t,
733a, 735a
preoperative discontinuation of, 31, 134t,
137–138, 144, 151, 176, 349t, 350–351
protocol for initiation of, 672t, 740a
upon hospital discharge, 709
Warm cardioplegia, 269–273
Warm induction cardioplegia, 270, 272
Warming, techniques of, 188, 214, 284t, 323, 334,
305–307, 307f, 731a
Weaning
of intraaortic balloon, 471, 476–477
of VADs, 481–483
of vasoactive drugs, 470–472
of ventilator, 400–403, 400t–402t, 421–425
Wellbutrin (bupropion), 140, 398, 751a
Wenckebach, 533, 533f
White blood cell count, 132t, 147, 652
White blood cell scanning, 679
Withdrawal, alcohol, 687–689
Work of breathing, 418–419, 424
Wound aspiration, 679
Wound care, postoperative, 674

Xanax (alprazolam), 751a
Xigris (drotrecogin), 626
Xopenex (levalbuterol), 428, 650t, 653, 736a
Xylocaine (see lidocaine)

Zaleplon (Sonata), 752a
Zantac (see ranitidine)
Zaroxolyn (metolazone), 608, 751a
Zebeta (bisoprolol), 61, 540, 748a

Zemuron (rocuronium), 195t–196t, 197, 745a
Zestril (lisinopril), 506, 749a (see also ACE inhibitors)
Zetia (ezetimibe), 750a
Zinc deficiency, 696
Zinc sulfate, 704
Zocor (simvastatin), 287t, 559, 649t, 709, 735a, 750a
Zofran (see ondansetron)
Zoloft (sertraline), 751a
Zolpidem (Ambien), 752a
Zyban (bupropion), 140, 398, 751a
Zyprexa (olanzapine), 688, 751a
