INDEX

ABC material handling, 428
Achieving enterprise excellence, 12, 13, 18
Affinity diagram, 109
Analysis of variance, 329
Analyze tollgate, 167
ANOVA gage R&R method, 320
Attribute control charts, 298, 327
Availability rate, 448

Bar chart, 156, 174
Baseline QMS requirements, 21
Bias, 312, 313
Black belts, 139

c control chart, 303
Cause and effect analysis, 109
CDOV, 146, 164, 170, 184, 189
Common cause variation, 284, 302
Communication, 31, 54, 59, 61
Communication, cooperation, and coordination, 59
Components of variation, 317
Concept development, 184, 191, 196
Confounding and aliases, 385
Continuous measurable improvement, 7, 9, 14, 437, 440
Control and continuous measurable improvement, 438, 440, 448

Control chart elements, 286
Control charts analysis, 283, 327
Cooperation, 59, 68
Coordination, 59, 70
Cost estimating and budgeting, 160, 174
Cost per unit, 127
$C_p$ index, 308
$C_{pk}$ index, 309
Customer requirements, 177
Customer satisfaction, 128
Cycle time reduction, 127
Cycle time, 396, 405, 414, 430, 436

Defect reduction, 127
Defects and defective units, 217
Degrees of freedom, 335, 358
Deployment by pilot study, 12
Deployment champions, 139
Deployment measurement, analysis and reporting, 140
Design development, 185, 198
Design for Lean Six Sigma, 150, 164, 171
Design of experiments, 370
Design qualification testing, 204, 206
Design requirements, 182, 196, 202
Design, 180
Developing Enterprise Excellence deployment plans, 136
Development of products, services and processes, 150, 171
DPM, 215, 240

Effective meetings, 52, 53
Enterprise Excellence deployment, 13, 14, 18, 79
Enterprise Excellence implementation, 144
Enterprise Excellence infrastructure, 79, 93, 139
Enterprise Excellence maturity assessment, 83, 94, 104, 140
Enterprise Excellence model, 7, 8, 9, 14
Enterprise Excellence planning toolkit, 108, 141
Enterprise Excellence policies, guidelines and infrastructure, 136, 143
Enterprise Excellence project decision process, 146, 171
Enterprise Excellence projects, 145, 170
Enterprise Excellence strategy, 95, 134, 143
Enterprise Excellence, 3
Enterprise management system, 7, 8, 11
Enterprise senior review group, 80, 94, 98, 136
Enterprise value stream mapping, 243, 249
Equipment effectiveness, 447, 448
Evaluating the results, 339, 363
Excitement attributes, 191
Exciters, 190
Expectors, 190
Experimental matrix, 371
Experimental run, 330, 371, 385

F critical, 332, 335, 383, 391
F ratio, 332, 358, 370, 383, 391
Failure modes and effects analysis, 212, 253, 263
First pass yield, 219, 221
Fisher’s F statistic, 331, 366, 370
FMEA, 212, 224, 253
Fractional factorial experiments, 384
Full factorial DOE summary, 383

Graphic work instructions, 438, 443, 450
Green belts, 80, 100, 140
HOQ, 182, 197, 207
House of quality, 179, 186, 191
Hypothesis testing, 330

Improve/Lean tollgate, 168
Improving products, services and processes, 151, 172
Interaction, 349
Interrelationship digraph, 109
Invent and innovate technology tollgate, 164
Inventing/innovating technology, 149, 171
Invention and innovation, 178

Just in time, 396, 402, 416, 437
Kanban, 396, 400, 417
Kano analysis, 186, 189, 210
Key roles, 46

Labor time, 407, 430
Law of Unintended Consequences, 1
Leadership principles, 30, 37
Leadership traits, 36, 41, 75
Leading and managing teams, 25
Leading Enterprise Excellence, 20
Lean, 2, 5, 7
Levels, 372
Linear contrasts, 363, 393
Linearity, 313

Machine time, 407, 428
Main effect, 350
Management and operations plans, 144, 169
Management system assessment, 84, 94, 136
Management system principles, 23, 74
Management systems, 20, 23, 438, 439, 450
Managing and leading Enterprise Excellence, 20
Manipulating and co-opting, 71
Market and customer research and communication, 4, 15, 16
Master black belts, 80, 100, 139
Matrix diagram, 122, 142
Mean squares, 332, 383, 391
Measure tollgate, 167
Measurement by part, 317, 319
Measurement system requirements, 314
Measurement systems evaluation (MSE), 311, 313, 328
Measurement, analysis and knowledge management, 4, 6, 16
Milestone chart, 148, 156, 170
Mistake proofing (poka-yoke), 438, 443, 450
Mixed-model production, 396, 428, 437
Multivariate ANOVA, 349

Necessary non-value added/business value added activities, 244
Negotiation and agreement, 58, 71, 74
Network diagrams, 156, 174
Non-value added activities, 244
np control chart, 303, 304

One piece flow, 396, 431
One-way ANOVA, 331, 366

One-way linear contrasts, 364
Optimize design phase, 201
Optimize technology tollgate, 165
Optimize tollgate, 166
Optimize, 176, 201, 206
Organizational value stream mapping, 250
Orthogonal array, 367, 374, 388
Overcoming resistance to change, 20, 54

p control chart, 298, 303
Percent contribution, 339, 362
Performance rate, 448
Performance testing, 204
Planning the Enterprise Excellence project, 154, 173
Policies and guidelines, 80, 105, 136
Process availability analysis, 396, 411
Process capability analysis, 274, 307, 328
Process decision program chart, 120, 142
Process FMEA, 226, 253, 257, 265
Process identification, 227
Process mapping, 105, 141, 212, 225, 266
Process measurement, 274, 292, 326
Process variation, 212, 214
Process walkthrough, 212, 251, 253, 266
Process yield measures, 412
Product and service support, 8
Product FMEA, 253, 258, 263
Product service and process design, 4, 14, 16, 19
Product, service and process commercialization, 16
Project notebook, 169, 175
Project selection matrix, 123
Project selection, 184
Project sponsors, 80, 139
Project-by-project deployment, 12
Pugh analysis, 199, 210
Quality function deployment (QFD), 180, 198, 207, 210
Quality rate, 448

R charts, 285, 294, 327
Randomization, 376
Rapid improvement events, 439, 449
Repeatability, 311, 315, 323
Repetitive manufacturing, 417
Research and technology development, 4, 14, 19
Response, 376
Risk assessment, 180, 196
Robust design testing, 204, 207
Robustness, 179, 202
Rolled throughput yield, 221
Routing analysis, 396, 405, 436
RTY, 221, 222

Sample size (replication), 375
Sampling strategy, 280
Sampling, 280, 304
Scheduling, 148, 154, 173
Secondary (passive) data, 277, 326
Setup time, 407, 413, 464, 430
Shine, 397
Sift, 396, 399
Single-minute exchange of die (SMED), 438, 444, 450
6S, 396, 403, 436
Six Sigma, 2, 5, 7
Sort, 397, 399
Sources of variability, 219
Spaghetti diagram, 396, 406
Special cause variation, 277, 284, 305
Stages of team development, 49, 50
Stakeholder analysis, 105, 131, 143
Standardize, 397, 419
Statistical process control, 274, 277, 326, 438, 440
Strategic planning, 4
Stress testing/evaluation, 179, 204
Sum of the squares, 357
Sum of the squares for interactions, 354, 356

Sum of the squares total (SSTotal), 351
Sum of the squares treatment (SSTreatment), 351
Sum of the squares within (SSWithin), 343
Sum of the squares, 333
Sustain, 397, 399, 418
Takt time, 396, 403, 415, 424, 430
Team building, 45, 76
Team dynamics, 47, 51
Team members, 45, 80, 110, 137
Technology development, 178, 209
The seven forms of waste, 396, 399, 436
Tollgate reviews, 164, 175
Total productive maintenance
Transactional MSE, 323
Treatment combination, 374, 379
Treatment interactions, 359, 380
Treatment main effects, 358, 381
Treatment, 330
Two-way ANOVA, 340
Two-way linear contrasts, 367
Types of data, 274, 276, 285, 326
Types of FMEA, 253, 258
Types of processes, 228

u control chart, 305
Understanding and overcoming resistance to change, 54

Value added activities, 244
Value stream analysis, 243, 249, 251
Value stream mapping, 237, 243, 249
Variable control charts, 283, 285, 296, 327
Variance, 278, 285, 303, 314
Variation, 212, 214, 221, 223, 276
Verify capability, 180, 185, 203
Verify tollgate, 166
Verify, 178, 196, 203
Visual controls, 438, 441, 450
