## Acknowledgments ix

### 1 Introduction to the Principles 1

1.1 The 10 principles of food industry sustainability 1
1.2 Principles–practices–potential 2
1.3 What is sustainability in the food industry? 2
1.4 The destructive course of the food system 3
  1.4.1 Climate change 4
  1.4.2 Natural resource depletion and degradation 6
  1.4.3 Pollution and toxicity 7
  1.4.4 Rural economy and development 7
  1.4.5 Food safety and nutrition 8
1.5 Reasons for principles for sustainability in the food industry 8
1.6 The business benefit 10
1.7 What needs to be done 11
  References 13

### 2 Agriculture and the Environment 15

2.1 Climate 15
2.2 Land and biodiversity 17
2.3 Water and pollution 20
2.4 Approaches to more sustainable agriculture 22
  2.4.1 Sustainable agriculture requirements and standards 24
  2.4.2 Unilever sustainable agriculture program 27
  2.4.3 Starbucks C.A.F.E practices 29
  2.4.4 Walmart sustainability index 29
  2.4.5 PepsiCo sustainable farming initiative 30
  2.4.6 Sysco Corporation’s sustainable agriculture/IPM initiative 30
2.5 Summary 31
  Resources 31
  References 32
3 Welfare and Environmental Considerations in Production and Harvesting of Animals, Fish, and Seafood

3.1 Livestock care
   3.1.1 Approaches to address livestock welfare

3.2 Fish and seafood
   3.2.1 Farmed fish
   3.2.2 Approaches to address seafood

3.3 Environmental impacts from livestock production
   3.3.1 Greenhouse gas emissions
   3.3.2 Land use and pollution from livestock production
   3.3.3 Approaches to address environmental impacts from livestock

3.4 Summary

Resources
References

4 Processing

4.1 Energy
   4.1.1 Energy sources and impacts
   4.1.2 Energy use in food processing
   4.1.3 Sierra Nevada’s energy and climate program
   4.1.4 Heinz’s energy effort in energy and greenhouse gas emissions

4.2 Water
   4.2.1 Nestlé
   4.2.2 The Coca-Cola Company water stewardship

4.3 Chemicals and other inputs

4.4 Lean, clean, and green processing

4.5 Summary

Resources
References

5 Packaging

5.1 Packaging hotspots
   5.1.1 Materials
   5.1.2 End of life
   5.1.3 Social hotspots

5.2 Responsible packaging
   5.2.1 Materials and sourcing
   5.2.2 Design and innovation
   5.2.3 End of life
   5.2.4 PepsiCo’s sustainable packaging program
   5.2.5 Sustainable Packaging Coalition

5.3 Summary

Resources
References
# 6 Distribution and Channels

6.1 Transportation  
   6.1.1 Refrigeration in transportation  
   6.1.2 EPA SmartWay  

6.2 Facility management  
   6.2.1 Refrigerants  
   6.2.2 Cleaning and indoor environmental quality management  
   6.2.3 Environmentally preferable purchasing  
   6.2.4 Construction  

6.3 Gordon Food Service distribution and facilities improvements  

6.4 Food retailer J. Sainsbury addressing the environment  

6.5 Subway restaurants showing how to green operations  

6.6 Summary  
   Resources  
   References  

# 7 Food Waste

7.1 The impacts from wastage  
7.2 Reducing wastage  
   7.2.1 Waste management  

7.3 Summary  
   Resources  
   References  

# 8 Nutrition, Security, and Equity

8.1 Nutrition  
   8.1.1 Food safety  
   8.1.2 Overnutrition and obesity  
   8.1.3 Food security  

8.2 Equity  
   8.2.1 Smallholders  
   8.2.2 Women empowerment  
   8.2.3 Farm labor  
   8.2.4 Local food  

8.3 Summary  
   Resources  
   References  

# 9 Sustainable Food Consumption and the Potential of the Principles

9.1 Sustainable consumption  
   9.1.1 Sustainable diets and behaviors  
   9.1.2 Double pyramid  
   9.1.3 Innocent promotes sustainable consumption  

9.2 The potential of the principles
