Contents

1 Introduction ................................................................................. 1
  1.1 What Does TLC Mean? ...................................................... 1
  1.2 When Is TLC Used? ......................................................... 2
  1.3 Where Is TLC Used? ....................................................... 3
  1.4 How Is the Result of a TLC Represented? .......................... 4
    1.4.1 Retardation Factor .................................................. 4
    1.4.2 Flow Constant ....................................................... 6
    1.4.3 Other TLC Parameters .......................................... 7
  1.5 What Kinds of Reference Substances Are Used in TLC? .......... 8
  1.6 The Literature on TLC .................................................... 9
    1.6.1 General Literature ................................................ 9
    1.6.1.1 Books and Information Sheets in German .............. 9
    1.6.1.2 Books in English ............................................. 11
    1.6.1.3 Book in Another Language ................................ 11
    1.6.2 Journals ........................................................... 12
      1.6.2.1 German Language Journals Containing Articles on TLC
              (Selection) ....................................................... 12
      1.6.2.2 English Language Journals on TLC .................... 12
      1.6.2.3 English Language Journals Containing General Articles
              on Chromatography (Selection) .......................... 12
    1.6.3 Abstracts .......................................................... 13
    1.6.4 Pharmacopoeias .................................................... 13

2 Precoated Layers ..................................................................... 15
  2.1 Precoated Layers – Why? ............................................... 15
  2.2 What Are Precoated Layers Produced? ............................... 16
    2.2.1 Sorbents ................................................................ 16
    2.2.2 Supports for Stationary Phases ............................... 19
    2.2.3 Additives .......................................................... 20
  2.3 What Types of Precoated Layers Are There? ....................... 21
  2.4 What Are the Uses of Precoated Layers? ............................ 27
2.5 Criteria for the Selection of Stationary Phases in TLC .................. 27
2.5.1 How Can the Choice of the Stationary Phase be Made? ............. 28
2.5.2 How Can the Recommendations for Stationary Phases
Found in Pharmacopoeias be Applied to Precoated Layers? ........... 28
2.6 Effect of the Stationary Phase When Mobile Phases Are Identical ..... 30
2.7 Advice on the Ordering and Storage of Precoated Layers .......... 31
2.8 Problems in the Naming and Arrangement of Precoated Layers .... 33

3 Before the TLC Development Process ....................................... 35
3.1 Handling of Precoated Layers ............................................. 35
3.1.1 Film and Foil .............................................................. 35
3.1.2 Glass Plates ............................................................... 36
3.2 Prewashing ........................................................................... 41
3.3 Activation ............................................................................. 43
3.4 Conditioning .......................................................................... 44
3.5 Impregnation .......................................................................... 46
3.5.1 Impregnation by Dipping .................................................... 46
3.5.2 Impregnation by Spraying .................................................... 46
3.5.3 Impregnation by Predevelopment ......................................... 47
3.6 Application of Samples ......................................................... 50
3.6.1 Manual Application of Samples ........................................... 51
3.6.2 Semiautomatic Application .................................................. 56
3.6.3 Fully Automatic Application ................................................ 61
3.7 Positioning of the Samples ...................................................... 65
3.8 Drying Before the Development .............................................. 67

4 Solvent Systems, Developing Chambers and Development ............ 69
4.1 Solvent Systems ...................................................................... 69
4.1.1 Choice of Solvent Systems .................................................. 70
4.1.2 Preparation and Storage of Solvent Systems ........................... 79
4.1.3 Problematical Solvent System Compositions ........................... 82
4.2 TLC Developing Chambers ...................................................... 87
4.2.1 What Types of TLC Developing Chambers Are There? .......... 87
4.2.1.1 TLC Chambers for Vertical Development ......................... 88
4.2.1.2 TLC Developing Chambers for Horizontal Development ..... 90
4.2.2 Influence of the Chamber Atmosphere .................................. 91
4.2.2.1 The Unsaturated N-Chamber ........................................... 93
4.2.2.2 The Saturated N-Chamber ............................................... 94

## Contents

### 6.5 Further Treatment of Derivatized Chromatograms
- 6.5.1 Effect of Heat
- 6.5.2 Stabilization of Colored and Fluorescent Zones

### 7 Evaluation After Derivatization
- 7.1 Visual Evaluation
- 7.1.1 Visual Qualitative Evaluation
- 7.1.2 Visual Semiquantitative Evaluation
- 7.2 Evaluation Using a TLC Scanner
- 7.2.1 Qualitative Evaluation
- 7.2.2 Quantitative Evaluation
  - 7.2.2.1 Absorption Measurement
  - 7.2.2.2 Fluorescence Measurement
  - 7.2.2.3 Comparison of “Parallel” With “Transverse” Measurement
- 7.3 Evaluation Using a Video System
- 7.3.1 Qualitative Video Evaluation
- 7.3.2 Quantitative Video Evaluation
- 7.3.3 Comparison of the TLC Scanner With Video Evaluation
- 7.4 Evaluation by Flat-Bed Scanner
- 7.5 Evaluation Using a Digital Camera

### 8 Documentation
- 8.1 Description of a Thin-Layer Chromatogram
- 8.2 Documentation by Drawing, Tracing and Photocopying
- 8.3 Photographic Documentation
  - 8.3.1 Photography Using the Polaroid Camera MP-4
  - 8.3.2 Photography Using 35-mm Cameras
  - 8.3.2.1 Photography in 254-nm UV Light
  - 8.3.2.2 Photographs in 365-nm UV Light
  - 8.3.2.3 Photographs in White Light
  - 8.3.3 Archiving of 35-mm Films
- 8.4 Video Documentation
- 8.5 Documentation With Digital Cameras
- 8.6 TLC Scanner Documentation
- 8.7 Flat-Bed Scanner Documentation
- 8.8 Bioluminescence Measurements
  - 8.8.1 Toxicity Screening Using the Bioluminescent Bacteria *Vibrio fischeri*
  - 8.8.2 Detecting Bioluminescence With the BioLuminizer™
