INDEX

6 to 4, 102
Access link identifier, 226
Access network multihoming, 219
Acknowledgment (ACK), 20–21, 28
Add/drop multiplexer (ADM), 146
Addr length, 100
Address family identifier (AFI), 44
Address sharing, 156
Address-and-control-field-compression (ACFC), 114
Admission control, 77–78
Anycast address, 102–103
Anycasting, 102
AppleTalk, 101
Arpanet, 31, 33
AS path length, 54–55
Asymmetrical digital subscriber line (ADSL), 2, 115
Asynchronous transfer mode (ATM), 3, 59, 64, 109, 112
Asynchronous-control-character-map (ACCM), 114
ATM adaptation layer 5 (AAL5), 112
AToM and L2TPv3, 127
Attribute value pairs (AVPs), 115
Authentication, 52–53, 86, 115, 129–130
Authentication extension header, 155
Autonomous system (AS), 34, 41, 98, 156
Backbone area, 51
Backscatter analysis, 182, 184
Backward explicit congestion notification (BECN), 111
Backwards compatibility, 152, 157
Bandwidth-tolerant, 197
Bidirectional tunneling, 202
Bilateral peering arrangement (BLPA), 32
Binding, 201
Binding cache, 213
Binding identifier, 203
Binding update, 201
Binding update message, 213
Border area router, 51
Border gateway protocol (BGP), 14–15, 35, 42, 53
Bot, 182
Bottom of stack, 64
Bridge, 3
Bridge protocol data unit (BPDU), 128
Broadcast IP, 11
CAIDA, 193
Care-of address, 213
Care-of address test, 215
Care-of init cookie, 216
Care-of keygen token, 216
Care-of nonce index, 216
Care-of test init message, 216
Cell loss priority (CLP) bits, 112–113
Certificate, 210
Checksum, 5, 20, 25–27, 52, 100, 130, 135
Clarification, 7
Class-based triggering mechanism, 86
Classless inter-domain routing (CIDR), 18, 44, 53
Codepoint, 76
Commercial internet exchange (CIX), 33
Common object request broker architecture (CORBA), 141
Common part convergence sublayer—service data unit (CPCSSDU), 112
Community, 56, 102
Complete prefix list, 226
Congestion control, 21–22, 24, 185
Connectionless network protocol (CLNP), 79
Constraint shortest path first (CSPF), 68
Controlled link sharing, 77
Core-based tree (CBT) protocol, 100
Correspondent deregistration, 218
Correspondent registration, 215
Count-to-infinity problem, 46, 37

Data link connection identifier (DLCI), 119
Datagram, 1
Default PHB (DE PHB), 82
Delay, 22–23, 37, 52, 75, 77, 84, 197, 213
Denial-of-service (DoS), 86, 101
Denial-of-service attack, 182, 208–209
Destination address, 5, 13, 43, 60, 95, 98, 102, 132, 134, 152, 154
Differentiated services (DiffServ, DS), 81
Differentiated services code point (DSCP), 76, 82
Digital subscriber line access multiplexer (DSLAM), 115
Dijkstra algorithm, 48, 87, 98
Directed graph, 87, 89, 166, 172
Discard eligibility (DE), 111
Distance vector, 41, 99
Distance vector multicast routing protocol (DVMRP), 97, 99–100
DNA protocol, 226
Domain name system (DNS), 17, 25, 32, 104
DoS attack pattern, 87
DoS detection, 86
Dropper, 82
DS codepoint, 81

Dual stack, 157
Duplicate address detection, 222, 225
DVMRP, see Distance vector multicast routing protocol (DVMRP)
Dynamic host configuration prefix (DHCP), 17
Dynamic host configuration protocol for IPv6 (DHCPv6), 223
Dynamic routing, 40, 134

E-bit, 98
Edge network, 13
Edge network topology, 16, 198–199
EEAC-SV, 83
Element management system (EMS), 141
Emulated virtual circuits, 110
Encapsulating security payload extension header, 155, 215
Encapsulation, 109
Encryption, 29, 86, 129
Enhanced interior gateway routing protocol (EIGRP), 41
Equal-cost multipath (ECMP), 171, 176
Ethernet, 2–4, 7
Ethernet 802.1q VLAN, 113
Ethernet emulation, 59, 67, 71–72
Ethernet pseudowire, 124
Ethernet virtual LAN (Ethernet VLAN), 113, 123–124
Expedited forwarding PHB (EF PHB), 82
Experimental bits (EXP), 64
Explicit endpoint admission control (EEAC), 83–85
Explicit forward congestion indication (EFCI), 112–113
Exterior gateway protocol (EGP), 42
External BGP (eBGP), 53, 56, 133

Fail-over, 197, 219
Fast rerouting, 71
Fast router advertisement, 225–226
Fault tolerance, 198
Federal internet exchange (FIX), 33
Fiber-switch capable (FSC), 146
File transfer protocol (FTP), 2, 10, 25
Fine two-phase routing (F-TPR), 176
Flooding, 176
Flooding attack, 26–28, 182, 209, 214
Flow control, 21–23
Flow descriptor, 80
Flow label, 154
Flowspec, 79–80
Forging, 196
Forward compatibility, 157, 160
Forward explicit congestion notification (FECN), 111
Forwarding equivalent class (FEC), 61
Fragmentation extension header, 155
Frame, 1, 3, 5
Frame relay, 109, 111, 123, 126, 128

Generalized multiprotocol label switching (GMPLS), 123, 137
Generic routing encapsulation (GRE), 124, 175
Generic routing encapsulation (GRE) tunnel, 130, 175

Header, 4–5
Hello, 48, 51, 69, 98, 100, 117
Hierarchical routing, 51
High-level data link control (HDLC), 114, 139
Home address, 213
Home address test, 215
Home deregistration, 215
Home init cookie, 215
Home keygen token, 216
Home link, 213
Home nonce index, 216
Home registration, 213
Home test init message, 215
Hop limit, 135
Hop-by-hop options extension, 155
Hose model, 164
Host, 1–2, 4
Host address, 7
Host identity protocol, 204–205, 207, 210–211
Host route, 104, 200
Hypertext transfer protocol (HTTP), 2, 19, 25

ICMP traceback, 189
Impersonation attack, 206
Information elements, 231
Input driver, 78

Integrated services (IntServ), 77, 81–82
Integrated services digital network (ISDN), 115
Interexchange carrier (IXC), 143
Interior gateway protocol (IGP), 41
Interior gateway routing protocol (IGRP), 41
Intermediate model, 164
Intermediate system to intermediate system (IS-IS), 41, 61, 133, 143, 173
Internet, 1, 31
Internet architecture board, 18
Internet control message protocol (ICMP), 79
Internet control message protocol for IPv6 (ICMPv6), 224
Internet engineering task force (IETF), 2, 18, 59, 76, 145
Internet exchange point (IXP), 31–33
Internet forwarder, 78
Internet group management protocol (IGMP), 79, 98
Internet protocol (IP), 1–4, 59
Internet service provider (ISP), 31–37
IP address, 5–7, 9, 11
IP address resolution, 155, 224
IP anycasting, 103–104
IP extension header, 154–155
IP multicasting, 104
IP spoofing, 220
IP traceback, 187
IP version 4 (IPv4), 7, 75, 93
IP version 6 (IPv6), 79, 82, 94, 102, 105, 133, 152
IP-in-IP, 175
IP-layer handover, 198
IP-only L2VPN, 124, 128
IPSec, 129
IPSec/point-to-point tunneling protocol (PPTP), 129

k shortest paths, 88

L2TP access concentrator (LAC), 131
L2TP control message header, 116
L2TP data message, 116, 118
L2TP network server (LNS), 131
L2TPv3, 115
Label, 59–61, 64
Label distribution protocol (LDP), 109, 125
Label edge router (LER), 64
Label merging, 66
Label stacking, 67
Label switched path (LSP), 61
Label switching router (LSR), 64, 111, 132
Lambda-switch capable (LSC), 146
Landmark, 226
Layer, 1–2, 19
Layer-2 tunneling protocol (L2TP), 114
Layer-2 tunneling protocol version 3 (L2TPv3), 115
Layer-3 VPN (L3VPN), 128, 131
LDP, 109, 125
LEC, 143
Linear programming (LP), 165, 177
Link, 15, 31, 34
Link management protocol (LMP), 147
Link state, 51
Link testing, 189
Link weight, 85, 169
Link weight matrix, 172–173
Link-layer handover, 198
Link-state advertisement (LSA), 85, 98
Link-state database (LSDB), 48, 51
Link-state protocol, 41
Load balancing, 16, 102, 156, 174, 197
Local area network (LAN), 71
Local exchange carrier (LEC), 143
Local preference, 35, 54–55
Loss sensitive, 197, 199
Lucent Bell Labs, 193
Martini-encaps, 109
Martini-trans, 109
Maximum receive unit (MRU), 114
Maximum transmission unit (MTU), 112
MC-bit, 98
Media independent handover, 219, 227
Message authentication codes (MAC), 194
Meter, 82
Microsoft point-to-point encryption (MPPE), 129
MIH function, 227
Mobile IPv6, 202, 205, 210, 213
Mobility support in IPv6, 213
Movement detection, 221
Multi exit discriminator (MED), 54, 56
Multi level tree for online packet statistics (MULTOPS), 184
Multicast, 9, 79, 93, 96
Multicast listener discovery (MLD), 222–223
Multicast OSPF (MOSPF), 98
Multicast routing, 79, 96
Multicast scalability, 127
Multicast transaction protocol (MTP), 102
Multicasting, 93
Multihoming, 17, 26, 198, 219
Multi-protocol label switching (MPLS), 59
MULTOPS, see Multi level tree for online packet statistics
National Science Foundation, 33
Neighbor discovery, 134, 155, 159, 220, 224
Neighbor discovery protocol, 155, 224
Neighbor solicitation message, 155, 222, 224–225
Neighbor unreachability detection, 223
Network access point (NAP), 34
Network address, 7
Network congestion ratio, 163, 166, 170
Network element (NE), 140
Network management system (NMS), 140
Network restoration, 137–138
Network time protocol (NTP), 32, 94
Next header, 135, 154
Node, 3, 15, 31
Node multihoming, 219
Nonlinear programming, 177
NSFnet, 33–34
On-link IP address, 201
Open shortest path first (OSPF), 14, 41, 48, 51
Open system interconnection reference (OSI), 1–2
Optical cross-connect (OXC), 140, 145–146
Optical interworking forum (OIF), 138
Optical transport network (OTN), 137, 140, 145, 147
Optical user network interface (O-UNI), 140, 145
Optimistic duplicate address detection, 225
OSPﬁ hello packets, 98
Output driver, 78
Packet, 1, 4–5
Packet classifier, 77
Packet scheduler, 77, 80
Packet-switch capable (PSC), 146
Packet-switched network (PSN), 115–116, 123, 139
Path, 13, 69
Path computation element (PCE), 69
Path state, 80
PathTear, 70
Payload, 5–6, 25, 27
Payload length, 154
Payload packet, 200
PCE communication protocol (PCEP), 69
Peer model, 132, 147
Peering, 32, 35
Per-hop behavior (PHB), 76, 82
PIM router, 105
Pipe model, 163, 166, 174, 176
Plain old telephone service (POTS), 115
Points of presence (POPs), 165
Point-to-point protocol (PPP), 3
Pop switch, 102
Port number, 24, 44, 61, 80
Post office protocol version 3 (POP3), 19, 25
PPTP tunnel protocol, 129
Prefix, 10, 13
Preventive start-time optimization (PSO), 172
Private branch exchange (PBX), 119
Proactive mobility management, 219, 227, 229–230
Protocol-independent multicast (PIM), 101
Protocol-independent multicast dense mode (PIM-DM), 97, 101
Protocol-independent multicast sparse mode (PIM-SM), 97, 101, 105–106
Provider, 13
Pseudo wire emulation edge-to-edge (PWE3), 109, 118–119, 121
Pseudowire service, 115
Public key infrastructure, 210
Push, 20, 61, 65
PWE3 network reference model, 119

QoS guarantee, 78, 83
Quality of service (QoS), 66, 75, 140
Reachability verification, 210
Reactive mobility management, 218
Real time protocol (RTP), 2, 19, 29
Recursive enumeration algorithm (REA), 89
Redirect based flooding attack, 201, 215, 220
Rendezvous router, 97
Repeater, 3
Resource reservation, 69, 77, 79
Resource reservation protocol (RSVP), 69–70, 77
Resv, 69
Return routability procedure, 215
Reverse path broadcasting (RPB), 99
Reverse path forwarding (RPF), 99
Reverse path multicasting, 99
Reverse-tunneled, 202
Route optimization, 203
Router, 2
Router discovery, 220
Routing, 6, 13
Routing extension header, 155
Routing information protocol (RIP), 25, 39, 41, 43, 52
Routing policy, 15
Routing protocol, 13, 39
Routing table, 10–11, 13, 34, 39, 41, 44
Rspec, 80
RSVP traffic engineering (RSVP-TE), 143
RTP control protocol (RTCP), 29
Run-time optimization (RO), 172
Segment, 1, 5
Segmentation and reassembly (SAR), 112
Service differentiation, 75, 141
Service vectors (SV), 83
Session initiation protocol (SIP), 2, 26
Shaper, 82
Shim header, 64
Simple mail transfer protocol (SMTP), 2, 19, 25
Simple multicast routing protocol (SMRP), 101
Simple network management protocol (SNMP), 2, 25, 141
Sliding window, 21–22
Smart OSPF (S-OSPF), 174
SMRP multicast transaction protocol, 102
Solicited-node multicast group, 222
Source address, 5, 134, 152, 154, 180, 183
Source-based tree, 96
Split horizon, 47
Stable IP address, 200
Standard reachability verification, 211
Stateless address autoconfiguration, 222
Stationary rendezvous server, 205
Stream control transmission protocol (SCTP), 2, 19, 26
Subnet, 9, 11
Subnet IP, 11
Subnet mask, 9, 11
Subnet prefix discovery, 220
Swap, 61, 65
Switch, 3
Synchronize sequence numbers (SYN), 20–21, 27–28
Synchronous digital hierarchy (SDH), 109, 140
Synchronous optical network (SONET), 109, 118, 138
T-like, 98
TCP/IP, 1–2
TDM-switch capable, 146
Telecommunication management network (TMN), 141
Three-way handshake, 20–21, 26–27
Throughput, 22, 76, 163
Time to live (TTL), 5, 64, 93, 134
Time-division multiplexing (TDM), 118, 138
Topology resolution, 15
Traffic engineering (TE) link, 67
Transaction language 1 (TL1), 141
Transit, 13, 32, 35
Transit area, 98
Translation, 157
Transmission control protocol (TCP), 1–2, 4
Transport mode, 110, 129, 214
Triangular routing, 202
Trivial file transfer protocol (TFTP), 25
Tspec, 80
Tunnel, 61, 71
Tunnel mode, 129
Tunneling, 59, 114–115, 131, 158, 202
Two-phase routing (TPR), 174
Type of service (TOS), 4, 75, 77, 82, 93, 98
Type, length, and value (TLV), 126, 147
UNI-C, 145
Unicast, 96, 99, 101
Unicast routing, 96, 99, 101
UNI-N, 145
Unverified, 210
Upper-layer protocol, 202, 205, 215
User datagram protocol (UDP), 2, 19, 25
Variable length subnet mask (VLSM), 53
Verified, 210
Version, 5, 44, 100, 130, 134–135, 154
Virtual circuit identifier (VCI), 64, 113, 119
Virtual path identifier (VPI), 64, 113
Virtual private LAN service (VPLS), 123
Virtual private multicast service (VPMS), 123
Virtual private network (VPN), 62
Virtual private wire service (VPWS), 123
Virtual router redundancy protocol (VRRP), 133
Virus scanning, 86
Voice over internet protocol (VoIP), 26, 29
VPWS L2VPN employs layer-2, 126
Wavelength-division multiplexing (WDM), 137, 146, 148–149
Weight, 61, 84, 170
Well-known anycast address, 104
Wide area network (WAN), 71, 117, 124
Zombie, 182
