screening tests, preoperative evaluation 5–6
scurfola 34
secondary stability, implants 129–130
second molars
caries 85
restorative condition 84
subluxation 83
second primaries, malignant tumors 239
sectioning, third molars 80, 87–90, 92–93, 94–96, 98–99, 100
sedation, extraction of teeth 69
segmental resection, mandible 331–335
self-care programs, musculoskeletal disorders 350
sensitivity testing, trauma 260
sentinel node biopsy 238–239
septa, maxillary sinus 167
sequestra 30
sialadenitis
acute viral 245
bacterial 246
chronic/subacute 246
sialography 247–248
silk sutures 49
sinus lift procedures 166–171
infection 166, 173
use of biomaterials 181, 182
sinus membrane
maxillary sinus 167–168
local sinus lift 171
perforation 173
Sistrunk procedure 200
Sjögren’s syndrome 246
skin
radiotherapy 241
suture types 49
tension lines 45
skin grafts
after marginal resection of mandible 331
vestibuloplasty 122
smokeless tobacco 235
smoking
history-taking 187
implant treatment and 136, 172
malignant tumors 236, 239
soap-bubble appearance, cherubism 222
sodium channels 15
sodium fl uoride, avulsed teeth 270
soft palate 308
soft tissues
biopsy 47–48
cysts 199–200
integration with biomaterials 144, 145
surgery 117–124
instruments 37
tooth implants and 134–135, 141
trauma 288–293
antibiotic prophylaxis 36
software, computer-guided implant treatment 139–140
solitary bone cysts 199
spacemaking materials, guided bone regeneration 147
speculosed leukoplakia 231
speech, cleft palate 309–310
sphincter creation, pharyngoplasty 310
spillage, pleomorphic adenomas 251
spinal accessory nerve, management 239
splayed roots, third molars 82
splinting, see also orthopedics mandibular fractures 278
traumatic dental injuries 271, 272, 273
split crest surgery see crestal split
squamous cell carcinoma 10, 235–239
markers 230
primary intraosseous 223–224
squamous odontogenic tumor 213
square knots 50
stability
bone grafts, sinus lift procedure 168–171
implants 127–131
Stafne-type lesions 198
staging, bone grafting 172, 332, 342, 343
staining, tolu dine blue 191
static bone cysts 198
stereolithography, fibrous dysplasia 219
sterilization, see also aseptic technique
instruments 42–43
resected mandible 333
steroids
central giant cell lesion 220–221
nerve lateralization 160
nerve transposition 157, 159
perioperative 54
stones, salivary gland obstruction 246–250
storage, avulsed teeth 268, 270–271
straight elevators 39
straight horizontal incision 45
straight vertical incision 45
stress shielding, by bone plates 334–335
strictures, salivary 248
subcutaneous tissues, suture types 49
subcuticular sutures 51–52
subepithelial connective tissue grafting 118, 119
sublingual dermoid cysts 199
sublingual fossa 150
sublingual space infection 28
subluxation 263, 264
second molar 83
treatment 267
submandibular approach, facial nerve damage 104
submandibular fossa 150
submandibular gland tumors 251, 252
submandibular space
infection 27
root displacement 58
submasseteric space infection 26
submental space infection 27–28
submucous cleft, palate 308
submucous fibrosis, oral 231–232
subtarsal incision 283, 284
suction 41
suction tips 41
sulcular incision 45–46
sulfur granules 33
Summers’ sinus lift procedures
impaction technique 171
osteotome technique 181, 182
superficial parotidectomy 251
superficial temporal space 26
superior ophthalmic veins, cavernous sinus infection via 31
supernumerary teeth 65, 66
sural nerve, grafts from 105
surface area, third molar roots 80–83
surfaces, implants 132–134
surgical extrusion see intra-alveolar transplantation
sutures/suturing 48–52
autotransplantation of teeth 108
guided bone regeneration 147
lacerations 290
lingual nerve damage 102
lips 257, 292
Index

sutures/suturing (continued)
  microsurgery 114, 115
techiques 50–52
swelling, postoperative 54
sympyysis of mandible, fractures 275, 279
syndromic cleft lip and palate 298
synovectomy, temporomandibular joint 357
synovial chondromatosis 363, 366
synovitis, temporomandibular joint 349
synthetic biodegradable membranes 145–146
systemic diseases see comorbidities

telescopes, arthroscopy 353–354, 355
temporal arteritis 347
temporalis muscle 26
temporary implants, orthodontics 136
temporomandibular joint
costochondral cartilage graft 337
disorders causing pain 348–352
fractures, terminology 275
imaging 10–12, 13
reconstruction 363–370
surgery 353–370
  facial nerve damage 104
tension lines, skin 45
tensor palatini 308
tetanus immunization 293
TheraBite® jaw exerciser 370
third molars
  extraction
    contraindications 78
    indications 77–78
    inferior alveolar nerve damage 101–102
    lingual nerve damage 102–103
    preoperative evaluation 78–87
    risk assessment 84–85
    surgical 73, 85–90
  impaction 64, 77–96
    antibiotic prophylaxis 36
    donor teeth from 108, 111
    imaging 9
    incisions for 46
    pericoronitis 66
    root displacement 57
    thumb knots 50
  thyroglossal cysts 199–200
  tibia, graft harvesting 341
  tongue depressors 243
tooth displacement 57–58
  toothed forceps 38
  tooth sockets
    curettage 75
    expansion for extraction 70–71
  tooth-supported guides, computer-guided implant treatment 140
topical anesthesia 15
tori, palatal 46, 118–119, 120
total parotidectomy 251
toxicity, local anesthesia 22
trabecular bone 129
  anorganic bovine bone with 181
  particulated 163
tracheostomy, Ludwig’s angina 29
traction see orthodontics
training, mouth-opening capacity 243
transitional movement, temporomandibular joint reconstruction 370
transplantation see autotransplantation of teeth; grafts
transport segment, distraction osteogenesis 156
transverse discrepancy 327
transverse facial proportions 316
trapdoor flaps, iliac bone harvesting 339
trauma 255
  antibiotic prophylaxis 36
dental injuries 257–273
maxillofacial 274–287
soft tissues 288–293
  antibiotic prophylaxis 36
trays, mandibular reconstruction 332–333
triamcinolone, central giant cell lesion 220–221
triangular flap technique, cleft lip 304
trophiccalphosphate materials 142
trigeminal nerve 100–103
trismus
  after local anesthesia 22
  infection 26
tuberculosis 34
  tuberosity approach, maxillary nerve block 18
  tumors (benign) 201–223, see also keratocystic odontogenic tumors
  adjunctive therapy 203–204
  removal, antibiotic prophylaxis 36
salivary glands 250
  tumors (malignant) see malignant tumors/diseases
  two-stage procedures, bone grafting 172, 332, 342
ulcers
  ANUG 32–33
  biopsy 190
  chemotherapy 243
ultrasonics, root-end preparation 116
ultrasound imaging 189
  cleft lip and palate, prenatal diagnosis 300–301
salivary stones 247
unicystic ameloblastomas 207–210
  unilateral cleft lip, repair 303–305
  upper incisor and canine forces 40
  upper lip, infection 25
  upper molar forces 40
  upper premolar forces 40
  upper respiratory tract infections 4
Valsalva maneuver 336
vascular lesions 190
vasoconstrictors
  for bleeding 54
  local anesthesia 20
Veau classification, cleft lip and palate 299
Veau–Wardill–Kilner technique 309
vein grafts, nerve repair 106
velopharyngeal insufficiency 309–310
VELscope® 191–192
verrucous carcinoma 236
verrucous leukoplakia 231, see also proliferative verrucous leukoplakia
vertical defects, use of biomaterials 177–180
vertical facial proportions 317
vertical impaction, third molars 79, 81
vertical incision 45
